GLENDALE, WV: The FCC wrote General licensee Roger L. Wiseman, AB8MQ on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" that included interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Wiseman to review ?97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited AB8MQ to contact him to discuss the matter. Last November 9, the FCC sent Wiseman a Warning Notice in response to allegations of deliberate and malicious interference on 20 meters.

GLENDALE, WV: The FCC requested that Roger L. Wiseman, AB8MQ,
retake the General examination elements under the supervision of an ARRL-VEC
volunteer examiner team. Wiseman must appear for retesting by September 11,
2002, or his license will be canceled. Applicants appearing for
re-examination
are granted an Amateur Radio license consistent with the elements passed.
The
FCC had written Wiseman on March 29, 2002, advising that it had been made
aware
of "an ongoing personal dispute" between Wiseman and another licensee that
included allegations of interference or jamming on 20 meters. FCC Special
Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two
licensees to contact him to discuss the matter. Additionally, the FCC had
sent
Wiseman a Warning Notice last November in response to allegations of
deliberate
and malicious interference on 20 meters.

Careful. You might get the "other" Dan on here ranting about making fun of people with disabilities.

And besides, compassionate conservatism includes helping people with disabilities help themselves. Nothing wrong with that.

Yeah Brian I have a big mouth. And I probably did threaten a lot of folks. And since your curious here is the list.

George Ashley W4FQF Alias Polly Parrot

Billy Jack Moore W4LLI Alias Claymore, Gravel 2. and others. Well known side kick of Parrot. They would sit on top of our group ALL NIGHT jamming for years.

Most if not all of the idiots from 3898.

Most if not all of the idiots from 3894.5

Dave Castle WA9KJI. The clown of 3950 fame that would drop down un ininvited to jam.

Plus all others that just made life miserable for all those years.

And if I did make such utterances...I am not one damn bit sorry? Why is that you ask? Look at the list and ask again.

But a certain brown liquid and I have parted company. So I seriously doubt I'll be fool enough to give that scum such a good target any longer.

Bet many of them are really pissed that they can't find me. Bet they thing I'm gone. Boy they should see my log. Thats right...I keep a log. It's good in a Federal court, you know that.... right?

Well Brian you take care and don't let these little scum sucking turds bother you.

Dan/W4NTI

Did you see in the other thread where Llloyd was proven wrong since I have a 2 x 2 call, how can I have a General test to retake? Not to mention that he post-edited the year from 2000 to 2002. I wonder how I could have an Extra call if I didn't pass the General, which Lllardassss can't do once I passed it TWICE. BWHAHAHAHAHAHAHAHAHAHAHAHA!!!!!

July 11, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47 C.F.R. Section 97.519(d)(2), the Commission has the authority to re-administer any examination element previously administered by Volunteer Examiners (VE's). The Commission may either administer the examination itself, or under the supervision of a Volunteer Examiner Coordinator (VEC) or VE designated by the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an American Radio Relay League Volunteer Examiner Coordinator. This examination

must be completed on or before September 11, 2000. The required code speed that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present a photo identification. Pursuant to Commission rules, your license will be cancelled if you do not appear for re-examination. You will be granted an Amateur Radio license consistent with the elements you pass upon re-examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

2472. FS Ten-Tec QRP 20 meter rig, #1320 unfinished kit

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-05 15:31:48 UTC
From: Charles Hugg <chashugg@earthlink.net>
Message-ID: <ETw39.14651$cl.1135987@newsread2.prod.itd.earthlink.net>
Source record: 74315

I have FS a new Ten-Tec #1320 QRP 20 meter transceiver. It is an unfinished kit, about three quarters built. It is complete with all remaining parts and cabinet, and it includes the original manual and construction instructions. The work already completed is of high quality.It would make a nice QRP rig with little work to finish it
Ten-Tec still sells these kits for $95 last I checked. I will sell this one for $55 plus shipping from 79602. Thanks, Charlie Hugg, K5MBX

Poor Jimmy Dale, he finger fucks little Jessica.

Jimmy Dale
(Reeves & the Vandellas/AB8MQ)

Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Oh, Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Rita is missin' you
Busted on Dale Mabry for trickin' too
Jimmy turned his house into a meth lab true
now the Hillsboro County DA says you're screwed
But Jimmy's boy keep's a comin' 'round
He's stooped so low to take Jessica's boombox sound
Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Oh, Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Needs a bondsman
Needs a bondsman

He calls me on the phone
whines about AMP and moans
No, nobody's listening to
What he has to say
But this obsession with AMP he has within
Keeps reachin' out his shit is wearin' thin
Oh, Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Oh, Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Needs a bondsman
Needs a bondsman

bridge:
Now, listen, boy
Your case isn't gettin' any stronger

You can't plead the 5th very much longer
Jimmy Jr's tryin' hard to be true
But, Jimmy, he talks jus' as stupid as you
Oh, Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Oh, Jimmy Dale, Jimmy
Oh, Jimmy Dale
When are you postin' bail?
Needs a bondsman
Needs a bondsman

Your case isn't gettin' any stronger (ooh!)
You can't plead the 5th very much longer (ooh!)
Jimmy Dale, when are you postin' bail?
Needs a bondsman (oh, Jimmy Dale)
Needs a bondsman (oh, Jimmy Dale)

Check with your local or regional frequency coordinator.

I have had much success (as well as comfort level of knowing
you aren't stepping on anyone else) by verifying this way.

http://www.arrl.org/nfcc/
http://www.arrl.org/nfcc/coordinators.htm

If a freq is not in use in a formal fashion such as a repeater link
or backbone, etc. it is just as much yours to use as the next guy's
provided you are within spec of the freq's intended use and local
mindset.

73,
Mark

Anonymous coward and all-around fuckwit "Stagger Lee" <SLee@houston-hunks.com>
revealed what a hypocrite he is and ironically admits he has no credibility by his
own definition in message <3C36FDCC.76EC185D@houston-hunks.com> :

"Therefore, I find your story difficult to believe. Your own anonymous
status makes the story even less credible."

But nobody believes a fucking word you say, because by your own definition you
have no credibility. Google might not archive it, but it was on the Altopia server
and the one I found the article that proves you're a fucking liar on.

Never said that you were. Dennis is trying to say that John Kimball
is you, I've never made that claim. Unless some tragic accident has
destroyed about half you brain I don't think you can be John
Kimball, though Dennis, Kimball,
and yourself post from the same server.

>

Under a microscope? Maybe. I've beaten all my federal charges on
appeal and am getting closer to having the state ones dropped.
Lunatics? Yes, quite possibly. My house was burned down a few months
back and a suspect was our old friend Jeff Cook. If I were you I'd
look out for lunatics as well. Cypher@katt.mail/Scream Radish has
sworn to some day come to the states and kill you.

Whelp, the dossier going to your employers really wasn't none of my
doing. Yes, I helped Radish compile it, but I honestly didn't know

that he was going to send it to your employer. He told me he wanted the old nUke postings to try and find out who was the snitch. In comparing our "confidential witness" reports, memories, and other sources we narrowed the possible snitch down to about four people: You, Firecracker, Rock Steady, or Priest. Who did it? I really don't know, don't really care though it would make a nice little foot note in my book, "Living Large Behind Bars, or How I Became a POW of The War Crime. Do I think it was you? My gut feeling is that if the police did in fact approach you, that they would have had to bitch slap you so they could get you to shut up long enough to change tapes on their recorder. Did they in fact approach you? I don't really know, I can prove nothing either way. Radish is convinced it was you and though he was never (to my knowledge) jailed for anything he has this total irrational hatred of you.

Now lets not talk about lying. Ugly Kid Joe was someone you wanted in Nuke. You might remember me advising you against him. After YOU gave him the lion's share of your virus collection the little bastard became an embarrassment. He was getting on Rock Steady's nerves and was soon to get caught doing something really stupid, like virusing someone, getting caught and telling them you told him to do it, or at least that was your fear at the time. I only performed a service for you. I made sure Ugly Kid not only didn't have anymore viruses to spread, but that he didn't have a BBS to do it from. My Telefast program gave me a back door into any Telegard BBS who had a sysop stupid enough to run it.
That is the simple truth to the situation. Don't try and bullshit me John, I was there, remember.

I always told you and even made it clear in my writings that I was not to be taken to heart. I was never really involved with anything criminal. Yes, I talked and bullshited a lot, but no one but the FBI crime commission people actually believed it.The stuff I was involved in, i.e. Bogus Mail and such was not against the law. When whomever talked to the police talked, the feds busted down my door, on October 13, 1992, they were expecting to hit the mother lode of computer crime. They were very much disappointed, all they could get me for was a bogus Id I still possessed, left over from my teen years so I could buy beer, which consisted of a false driver's license and social security card. Yes, I had some credit cards that were not mine, but they were not stolen. They'd been left at my house by my mother-in-law.

The trouble was the feds had a real hard on for me. For a long time they denied me bond. A FBI agent said, at my bond hearing, that "..I told her that as soon as I was released I was going to hit every IRS computer that I could find." What I actually said was, "Let me speak to an attorney." Stiller and his CARO boys had convinced the press and the feds that we were Public Enemy #1. Computer terrorists intent on taking out the defensive computers of the good ole US of A. Whomever talked to the FBI had told them I was involved with a

FAA check counterfeiting scheme that would cost the government
millions. My brother was and is employed by the FAA. When they found
one of his check stubs at my house the shit really hit the fan.
After a six month investigation, however, they found nothing. Had I
been less stubborn I'd have plea bargined and gotten probation. I
refused and fought it the whole way, at the time I obtained and used
the false Identification it was not a felony. On priniciple I fought
them tooth and nail the whole way. Don't give me that bullshit about
me mentioning your name to any law inforcement agency, asswipe. Had
I talked I would not have have gotten time. I wound up with twelve
months in federal prison and a state sentence that ran concurrently.
Long after I was released my federal term was overturned on appeal
because of the search warrent was obtained illegeally, served
improperly, and an illegal wire tap was placed on my phone.
Additionally, entrapment (see, "Got you" incident in George's book)
was ruled for my charge of computer tampering.

Pardon me if I laugh in your face at the threat of legal
difficulties. I've been to prison bitch, you think any civil law
holds any terrors for me?

>
> Send me your telephone number if you want to hear the live version of
> this. I will be glad to repeat it for you.
>
> John

Maybe someday. Right now I am very careful about whom I give my
number. If you were actually fired from your job, as Dennis says,
because of the dossier then I appologize. I have long held the
belief that you should not take matters out of cyberspace. Anyone
who does is an idiot. Look out for that crazy fucking Aussie
standing behind you.... Radish has never been overly sane.

GLENDALE, WV: The FCC wrote General licensee Roger L. Wiseman, AB8MQ on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" that included interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Wiseman to review ?97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited AB8MQ to contact him to discuss the matter. Last November 9, the FCC sent Wiseman a Warning Notice in response to allegations of deliberate and malicious interference on 20 meters.

GLENDALE, WV: The FCC requested that Roger L. Wiseman, AB8MQ,
retake the General examination elements under the supervision of an ARRL-VEC
volunteer examiner team. Wiseman must appear for retesting by September 11,
2002, or his license will be canceled. Applicants appearing for
re-examination
are granted an Amateur Radio license consistent with the elements passed.
The
FCC had written Wiseman on March 29, 2002, advising that it had been made
aware
of "an ongoing personal dispute" between Wiseman and another licensee that
included allegations of interference or jamming on 20 meters. FCC Special
Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two
licensees to contact him to discuss the matter. Additionally, the FCC had
sent
Wiseman a Warning Notice last November in response to allegations of
deliberate
and malicious interference on 20 meters.

Nahhh. 2x2 callsigns are for "advanced" class. Extras get 2x1
callsigns. And apparently anyone can get a "vanity" callsign of any
sort.

1. Many usenet users don't speak English as thier first langauge.
2. Many people with disabilities like dyslexia can not always spot that type of mistake.
3. All of us who are not perfect make typos, especially here where it supposedly does not matter.

Has anyone had any experience with the Icom- 746. I am thinking of buying one and was wondering what people think.

Any thoughts would be appreciated.

John

2502. Re: TAMPA TURD Jimmy "Jailbird" Dale, had his license CANCELLED and begged to get it back

Frankly my fellow American critics, what ever business the FCC and Mr. Dale have
is there business.

So but the heck out.

See? Roger dodged the question again! Why? Because he can't answer it!
Rog...I ask again. Who am I and where are I from? Did you find The Big River
yet? (hint...it is in the lower 48)
If you can ever figure out who I am and where I am, I will send you a whole
case of Windex and a case of paper towels. This should allow you to keep the
"snot tracks" cleaned from your front windows for a long time to come.
Heck, maybe I'll toss in a case of diapers, too, since you seem to soil your
shorts every time a pickup truck drives past your home.

Too bad it's about to fall down, according to his neighbors.

> than that tin hovel you inherited from Marie.

Wrong again, Dumbass.

> Curtains Boy
Your homosexuality is noted.

Freeport Fudgepacker will get on the so-called "Liberty net" tonight after snorting large amounts of cocaine and punctuate his sentences with "and..uh" ever minute. It has to either be the drugs of the Freeport Fudgepacker is scared people will find out that he dropped out of college after 1 1/2 semesters. But just listening to him proves he's a fucking fool.

> wouldn't even own a home, if it wasn't for the fact he
> inherited one from his poor dead mother.

Wrong again, coward...."Glendale Psycho" wouldn't post using his call, because the only balls he has are in his mouth and have another owner.

And Jimmy Dale must've let Jessica ride his "horsie, " pantyless and bouncing up and down on his lap last night.

You mean like you assumed that everybody would know you didn't know what the fuck you are talking about and that you really meant to clarify that the Tech/General 2x2's was not in the contiguous United States.

> > Which had nothing to do with the original question about my call AB8MQ.

Wrong, you misrepresented the fact that only Techs/Generals in US possessions and two states can have a 2x2 call. That says something about your character right there.

You said in <17249.472$r7.43872464@newssvr16.news.prodigy.com>:
"I've known plenty of Tech's and Generals with 2x2's."

> Here's another true statement:

You misspelled "dumbassed opinion"

> You're a nut case.

You don't know what words mean, do you?

> >
> > Forever?
>

> Til you need some more book lernin'

Looks like dullard Burke didn't get the reference, much like he didn't get that he misrepresented the call sign assignments.

> So how do you and Dave Heil know each other?

Changing the subject from the call sign misrepresentations?:
You said in <17249.472$r7.43872464@newssvr16.news.prodigy.com>:
"I've known plenty of Tech's and Generals with 2x2's."

Why, are you interested in the cheap cologne wearing, balding fatboy kook-stalker?
He already has one suckboy.

Wrong again, Llardasssssssssssssss, you are such a "computer expert" you can't cut and paste correctly. And don't leave out Gopher Face, he's in the notice first.

http://www.remote.arrl.org/news/enforcement_logs/2000/0410.html

NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the rules to readminister any examination element previously administered by a volunteer examiner. This Enforcement Log is representative of recent Warning Notices, Notices of Violation, calls for retesting, and other FCC communications to licensees involving possible serious rules violations. It is not a comprehensive listing of FCC Amateur enforcement actions.

FREEPORT, OH/GLENDALE, WV: The FCC wrote Advanced licensee Steven A. Tunder, N8WGM, and General licensee Roger L. Wiseman, KC8JBO, on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between the two men that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Tunder and Wiseman to review ï¿½97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited the two licensees to contact him to discuss the matter. Last November 9, the FCC sent Wiseman a Warning Notice in response to allegations of deliberate and malicious interference on 20 meters.

Wrong again, DUMBASS. Wugene, did Chris Hudson, your Parole Officer get in touch with you after having a conference with Chief Berry?

> obese

BWHAHAHAHAHA....Just saying something is so doesn't make it so, Wugene.
Besides since you weigh over 300 lbs, you're in no position to judge.

>divorcee,

So are you Wugene......or did you forget about Jonna Terry Paris?

>unemployable and on the public dole.
^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^

Says Food Stamp Paris who works part time at the aptly named gym "The Weight Room" on Tulsa St. in OKC. Wugene is the poster boy for the "before" picture, not the "after" picture. He empties spit buckets and cleans used jockstraps and the toilet facilities with his tongue.

>His life centers 24/7 around Usenet.

Says Wugene Paris, who self-admitted he's a prison Bitch and has no life.

Eugene the Prison bitch <pparis7@cox.net> posts his regrets about his life of crime and how he still has his "special connections" in the joint in <3AA4095A.2F4B6E76@home.com>:
"It is a very sick world that sends me to prison for a false Id, while degenerates like yourself roam the fucking streets. Pray to whatever god you believe in that you do never go to prison. Because I will make sure word gets around about what you are, Chickenhawk."

Female impersonator and convicted felon Rhesus Butt Fucker pparis7@cox.net confessed in 3C3E3729.7060408@NOFUCKINGSPAMhome.com
"....life? I don't have a life, horrible or otherwise."

Right now the fur is flyin
over the imminent return of
kv4fz between mxl and ura
and barry the berry farmer
on 14313

Ha Ha Ha!
.
All the qrmer's are startin
to come outta the woodwork
again too!!

Looks liek 14313 is springin back to
;ife and will shortly regain it's title
as the "Jerry Springer Show Frequency"
of ham radio - HA!!! HA!!! HA!!!!

Amateur Radio Newsline™ Report 1304 August 9th, 2002

Amateur Radio Newsline report number 1304 with a release date of Friday, August 9th 2002 to follow in 5-4-3-2-1.

The following is a QST. U.K. hams take to 5 MHz in a big experiment. Find out the details on Amateur Radio Newsline report number 1304 coming your way right now.

(Billboard Cart Here)

**

ON THE AIR: BIG UK 5MHZ EXPERIMENT

If you tune around 5 MHz and hear what sounds like ham radio QSO’s, your ears are not playing tricks. A major study of 5 MHz propagation has begun in Great Britain and some hams are already on the air. Jeramy Boot, G4NJH, reports from Nottingham in the U.K.:

--

The 5 Mhz experiment has begun. The Radio Society of Great Britain has announced that permission has been granted by the Ministry of Defence and the Radiocommunications Agency for the allocation of five spot frequencies in the range of 5250 to 5450kHz. The frequencies will be made avbailable in the form of a 3 kilohertz bandwidth channel by way of a Notice of Variation to the UK Amateur License. Because it is a controlled experiment applicants are required to report their findings and results to the RSGB.

The purpose of the experiment is to carry out propagation and antenna investigations aimed at improving the understanding of Near Zenithal Radiation or NVIS - Near Vertical-Incidence Skywave - communications via the ionosphere. The frequencies assigned are 5260, 5280, 5290, 5400 and 5405kHz. It’s expected that this experiment will run for about 4 years.

Jeramy Boot, G4NJH.

--

Here in the United States, Charles Harpole, K4VUD, one of the permitted operators of the American WA2XSY 5 MHz-band test stations invites U-K hams to contact him to set up a sked. The 5 point 260 MHz channel would be the best frequency for him. He is available for all times and days until the 20th of August and his e-mail is k4vud@hotmail.com (GB2RS)

**

ENFORCEMENT: FIVE LICENSES CANCELED BY FCC

Five hams who participated in a September 2001 testing session in Yucaipa California and who declined to be retested have lost their ham radio licenses. The FCC's Riley Hollingsworth says that in this case it was the VEC who brought the matter to his agency:

--
Hollingsworth: "Now the W5YI-VEC really did its homework on this one. They picked up some comments and complaints on an Internet News Group about the examination session; did a little homework and further research and found some very good reasons to refer the matter to us."
--

On April 30, the FCC wrote all five requiring them to re-take their Amateur Examinations before June 30th. All five failed to appear. Again the FCC's Riley Hollingsworth:

--
Hollingsworth: "Those licensees were Eddie Bartolome - Extra Class N6YAG of Los Angeles; Camito Lopez KG6GJC a Technician of Los Angeles; Marcial Rivas - General Class KG6HCP of Salem Oregon; Manuel M. Vega, KG6GSP - General class of Anaheim California and Marcelino Llanes, KG6HBR of Oxnard California."
--

Hollingsworth adds that the FCC is continuing its investigation of other examinations given by the Volunteer Examination team involved in the September 1st 2001 session in Yucaipa. Also that his office really appreciates the vigilance of the W5YI-VEC. (FCC, RAIN)

**

ENFORCEMENT: FCC MAY RETURN FORMER KV4FZ TO THE AIRWAVES

An ex-ham from the US Virgin Islands who was forced off the air a year and a half ago by the FCC may soon be back on, courtesy of the FCC. This as the agency indicates that it may act to reinstate the amateur license of Herbert L. Schoenbohm, the former KV4FZ. Amateur Radio Newsline's David Black, KB4KCH, has been following this story and has the latest:

--
Herbert L. Schoenbohm's name shows up a lot in FCC records. He's the former ham who used to hold the callsign KV4FZ. That was before he lost his license.

In December, 1992, Schoenbohm was convicted of fraudulently using a counterfeit access device to obtain long distance telephone service. He was sentenced to two months of house arrest, two years probation and fined $5000. That left the FCC feeling that a felony conviction disqualified Schoenbohm from continuing as a Commission Licensee.

Two years later, Schoenbohm filed with the Commission to renew his amateur radio license. The Commission answered -- but not with what he wanted to hear; instead, the FCC designated his application for a hearing. Two encounters took place--one in 1995, the other in '97. At that point, the Commission told Schoenbohm he should no longer be allowed to have an FCC license.

He was allowed to operate until he exhausted all avenues of appeal. That happened in October of 2000. In January, 2001, Schoenbohm ceased on-air operations.

Before leaving the airwaves, 'though, Schoenbohm vowed that he would one day return to the airwaves as a licensed radio amateur. That day may be soon--based on findings presented at an FCC Administrative Law hearing earlier this year.

The hearing was held to determine if Schoenbohm now meets the requirements to once again become a Commission license holder in the Amateur Radio Service. The finding is complex and covers nearly two dozen pages. But it appears that the government may be ready to give Schoenbohm a second chance as a licensed ham.

The Commission says in part there is sufficient evidence in the record to support a finding that Schoenbohm has rehabilitated himself. The Commission notes that -- based on the evidence --it appears unlikely he would engage in any future misconduct. The Commission's Enforcement Bureau Investigations and Hearings Division endorses Schoenbohm's return to the amateur radio airwaves.

Schoenbohm took and passed a new exam in March, 2001. But the Commission again threw in a delay, designating his application for a hearing on the basis of character issues. This is the application that an Administrative Law Judge has been reviewing. Now that the recommendations are in, the Administrative law judge could issue a final opinion and recommendation within the next few months. That means Herbert Schoenbohm could possible be on the air again sometime this year.

For the Amateur Radio Newsline, I’m David Black, KB4KCH.
--

In the end, it is going to be up to the Commission to make a final resolution as to whether or not the former KV4FZ returns to ham radio. Nobody can predict what that decision will be. And if he is permitted to return, will it be with his old KV4FZ call sign? (ARNewsline™ from FCC Publiic Files)

**

RESCUE RADIO: COMMUNICATIONS TECHNOLOGY HELPS SAVE KIDNAPPED GIRLS

Two kidnapped California teenagers are alive thanks in part to a newly developed law enforcement communications technology. Mert Garlick, N6AWE, has the details:

--
It happened on Thursday August 1st when two teenage girls from the Quartz Hill

area of Southern California were abducted at gunpoint. Using the newly established AMBER child abduction alert system, the names of the teens and a description of the car they were in was immediately distributed to law enforcement agencies and broadcast outlets statewide. Shortly thereafter the California Transportation Authority was displaying information on it’s 316 electronic signs on freeways.

Sheriff's deputies in Kern County soon received several calls from people who saw the white Ford S-U-V. A sheriff's helicopter crew used the information to direct a ground unit that made the felony arrest stop. When he resisted and brandished a weapon, deputies shot and killed Roy Dean Ratliff and freed the girls.

The rescue took place only six days after Governor Gray Davis directed the installation of the AMBER system. AMBER uses a combination of two-way radio, fax, e-mail and other communications technology to quickly spread word when a child is abducted. It is based on a program developed by Dallas-area broadcasters and named in memory of nine year-old Amber Hagerman who was kidnapped and murdered in 1996.

In this latest case it took less than 4 hours to get the AMBER alert on the two missing girls circulated to the road signs. California’s Governor Davis says that his states AMBER system will now be refined to make it react more swiftly.

For the Amateur Radio Newsline, Mert Garlick, N6AWE.
--

Today, there are forty-one AMBER Alert programs across the country. The system is credited with safely recovering at least seventeen children since 1997. (Published news reports)

**

ENFORCEMENT: PLEASE FIX THE INTERFERENCE

A pair of utility companies have received letters from the FCC regarding unresolved interference complaints from area amateurs. According to the W5YI Report Lakeland Electric Company in Florida and Commonwealth Edison in Illinois both were sent notes reminding them of their responsibilities to prevent interference to radio stations including radio amateurs. The letters gave the electric companies 90 days to either resolve the problems or contact the FCC with a specific timetable for making the fix. (FCC from W5YI Report)

**

HAM RADIO POLITICS: NEW DIRECTORS FOR THE NFCC

Turning to the ham radio political arena, word that Ken Chilton, KA1TIH; Alex Harvilchuck, N3NMN and Vincent Bardsley, KB3OM have been elected to the Board of Directors of the National Frequency Coordination Council. They replace outgoing Directors Dick Isely, W9GIG, Owen Wormser, K6LEW, and Dave Baughn, KX4I, who helped form the NFCC at a meeting in St. Charles Missouri back in 1995.

Chilton, Havilchuck and Bardsley also join Nels Harvey, WA9JOB and Clay Freinwald, K7CR as the duly constituted National Frequency Coordinators' Board. This for the twelve month period starting on September 1st. (ARNewsline™)

**

HAM RADIO POLITICS: NEW SACRAMENTO SM IS OLD SACRAMENTO SM

California’s former Sacramento Valley ARRL Section Manager has become the new Sacramento Valley Section Manager following the resignation of the current Sacramento Valley Section Manager. Confused? Well, here’s what happened.

According to an ARRL Bulletin, Jettie Hill, W6RFF, of Roseville, California, has been appointed to succeed Jerry Boyd, K6BZ, as the Sacramento Valley Section Manager. This is because Boyd is moving out of the section.

Boyd was appointed in 2000 to replace Hill. Hill continued to serve the section as the regions Affiliated Club Coordinator and as an Official Relay Station. W6RFF previously served as Santa Clara Valley Section Communications Manager from 1978 until 1982 and as ARRL Pacific Division Vice Director in 1982 and 1983. The appointment of Hill, who had previously served for more than 10 years as Sacramento Valley S-M became effective on August 1st. Got that? (ARRL)

**

FUTURE TECHNOLOGY: HIGH TECH WORKERS NEEDED

Still in California, word that lack of qualified workers is costing Silicon Valley billions of dollars annually. The management consulting firm A.T. Kearney says that this is threatening the regions position as a global high technology center. The region's shortage of high-tech workers means that one in three jobs requires special recruitment efforts, or goes unfilled, leading to a loss of over $3 billion a year. (ProPeople.com)

**

RADIO REGULATIONS: PERMANENT CELL NUMBERS ON HOLD

Mobile phone users who want to keep their numbers after switching wireless companies will have to wait until late next year for that option. This after the Federal Communications Commission gives cellular phone companies until November of 2003 to offer customers the choice.

The new date, one year later than the previous deadline to implement the service. It is the third extension granted by the FCC. Most wireless companies oppose the idea, arguing it would cost billions of dollars and drain resources needed to improve and lower the cost of wireless services. (FCC)

**

WITH THE HANDI-HAMS: EXTRA CLASS MANUAL IN AUDIO

The Handi-Hams have announced that the latest ARRL Extra Class License Manual is now available to it’s blind members in adapted audio format. At the present time Handi Hams only digital media available but the audio is being

re-mastered onto tape. When the cassette version is available Handi Hams will let us know so that we can let you know. Meantime keep an eye at Book and Tape Catalog area at www.handiham.org for updates. (Handi Hams)

**

THE SUPPORT FUND REPORT WITH ANDY JAREMA, N6TCQ

Its time for a report from the Amateur Radio Newsline Support Fund. Here's our Administrator -- Andy Jarema, N6TCQ:

--
There are two items to cover this week. I'll start with our poll regarding credit cards. Three weeks ago we asked those interested in supporting Amateur radio Newsline using a credit card to write the single word YES in the subject line of an e-mail and send it to us. We have tallied the results and there were only 17 who said yes. And of the 17, all but one said that only a Pay Pal account was acceptable to them.

Well, statistically speaking, you don't have to know how to do linear regression to know that 17 people out of the 10's of thousands who listen in each week is not a very good response. What it says is that 17 people have Pay Pal access and would use it to help support Amateur Radio Newsline. Even so, we looked into creating a Pay Pal service for those who wanted to use it. Without wasting a lot of time, suffice it to say that the costs involved versus the return would not warrant the expenditure. So at present the credit card issue is dead. For now at least, the Support Fund will remain as it always has. Just the P.O. Box where donations can be sent. Get a pencil and paper ready. I'll give it in a few moments.

The other item I want to touch on briefly is the current state of the checking account. Thanks to your generosity, we made it through June and July. What that means is the bills from May were paid in early June and those from June went out on schedule in July. Now it's early August. The July bills have come due, unfortunately at the same time that our folks are off to Huntsville, Alabama to present the 2002 Young Ham of the Year Award. So that you get a better understanding of the costs involved, I've done a rough breakdown.

First of all, our corporate underwriters Vertex Standard and C-Q Magazine cover almost all the costs of the young person selected for the award. They pay their airfare. They pay their lodging. Vertex-Standard provides an additional gift of Yaesu brand ham radio gear. C-Q treats the winner to a week at Spacecamp. When you add that up, it's probably a gift package with a retail price tag of close to $5000.

Obviously, they do their part and we have to do ours. It costs about $300 a year for a round trip ticket to get one of our people from Los Angeles to Huntsville. Actually, we have our people fly to Birmingham and drive up to Huntsville because this saves quite a bit of money. Yes, it takes them out of their way and adds a few hours of travel time. But the savings in airfare make this added time worthwhile.

The wonderful folks at the Huntsville Hamfest provide us with a free room. We do have to pay our people's expenses like food, hotel, telephone service and a rental car when necessary. We also pay for the plaque presented to the winner and for the mini-banquet we hold for him or her on the Friday night prior to the actual Saturday presentation. The total this year will be somewhere between $1000 to $1100. So we need to raise that in addition to our normal $800 to $1000 it costs monthly to keep the Amateur Radio Newsline newscasts coming your way. And that's where you come in.

Amateur Radio Newsline is a federal 501 (C) (3) not for profit corporation. Donations to it are tax deductible. The address – you've heard it before - is Post Office Box 660937, Arcadia California. Our Zipcode is 91066.

OK. 'Nuf said. But I'll be back next week with the latest thank-you list. For now, from Arcadia, in sunny Southern California's San Gabriel Valley, I'm Andy Jarema, N6TCQ.
--

If you missed the address given by Andy it will repeated at the end of this weeks newscast. (Newsline Support Fund)

**

HAM RADIO IN SPACE: KD5MDT REPLACES KC5FVF ON ISS EXPEDITION 6 CREW

Astronaut Don Pettit, KD5MDT, has been named to replace Don Thomas, KC5FVF, as a member of the Expedition 6 International Space Station crew. According to the ARRL Letter, Pettit had been training as backup flight engineer for the increment six team and was ready to step in.

NASA said the reassignment resulted from a medical issue that affects Thomas' long-duration space flight qualifications. According to Astronaut Office Chief Charlie Precourt, KB5YSQ, the demanding nature of long-term space flight requires a conservative approach to crew health issues, especially this early in the program. Pettit will join Expedition 6 Commander Kenneth Bowersox, KD5JBP, and Russian cosmonaut Nikolai Budarin, RV3DB. (ARRL Letter)

**

HAM RADIO IN SPACE: THE METEORS ARE COMING

Weak Signal operators -- listen up. The Perseid meteors are on their way.

Lee Wical, KH6BZF, says over the QCWA remailer that from midnight to dawn, on Monday August 12th and Tuesday August 13th about 60 to 70 meteors per hour will enter Earth's atmosphere. This particular meteor shower is created by the Earth passing through the debris field left from the Swift-Tuttle comet. The grain-like particles enter Earth's atmosphere, burn up and create what most

people call shooting stars.

The Perseid Meteor shower is not expected to be as spectacular as the Leonid Meteor shower that occurs each November. But, if viewing is good, people will not be disappointed. And if the ionized tails are good, ham radio meteor scatter D-Xers and WSJT users will be happy as well. (KH6BZF)

**

INTERNATIONAL - UK: LONG WAVE GOODBYE

As predicted by Media Network, the loss-making sports station TEAMtalk 252, which broadcast to the UK on 252 kHz Long Wave from a transmitter in Ireland, has closed down. This, after less than 6 months on the air. The station ceased broadcasting at 1300 UTC on July 31st. (Media Network)

**

INTERNATIONAL-CANADA: NEW RAC QUEBEC SM

Claude Paquet, VE2OCP has been elected as Radio Amateurs of Canada Section Manager for Quebec. This, for a two year term that will begin on November 1st. Paquet ran unopposed, eliminating the need for a balloted election. He has also agreed to complete the term of Richard Desaulniers, VE2DX who resigned for personal and professional reasons on August 1st. (RAC)

**

DX

In D-X, G0TQJ he has now gone QRT from Afghanistan where he operate slash YA. During his say in Kabul Chris made 1950 QSOs on SSB and another 850 on RTTY. He is getting his QSL cards printed. He has also sent his documentation to the ARRL DXCC desk for approval. (GB2RS)

And the FISTS newsletter reports on the apparent pirating of callsign ZD7CW. The pirate is using CW and not very active. In fact, he was last heard in November of 2001. But the real ZD7CW has been inactive for several years. (Q-News)

**

THAT FINAL ITEM: A TRUE CAPTIVE AUDIENCE!

And finally this week the story of an interesting call sign operating from a rather unusual place in Ireland. Here’s Q-News Graham Kemp, VK4BB;

--
From our files, the story of a captive audience. A permanent amateur Radio Station with the call sign EI0CRM -- you heard right -- C-R-M -- “crim” -- EI0CRM is being set up in of all places the radio museum of the Cork City jail.

Cork City jail opened for business in 1824 and was used as a prison until 1923. When Radio Erin was expanding in the mid 1920’s, it was located in this jail. Its call sign was 6CK.

The broadcasting studio is now fully restored and a fine display of radio artifacts are on permanent display. Have a listen out for EI0CRM
--

Talk about a QSL card that you may want to keep under lock and key. (Q-News)

**

Roger,

For months we have read the various sick, obscene, and demented posts which you have written and posted in these NGs. I am particularly addressing the sick and vulgar comments you post about the underage children of amateur radio operators whom you have differences of opinion with. Your descriptions of various sexual acts that you claim these children engage in with adults is sickening, disgusting, and illegal. Yes Roger, such acts, contrary to your belief of free speech, are not and have never been First Amendment protected speech.

My question. You apparently function in society Roger, so I will venture that you know right from wrong. Child pornography is wrong! Dead wrong, and you know it Roger! So why do you post it?

I challenge you to respond to this post, without resorting to profanity and obscene speech. You claim you are an educated man. We would like to see you respond in a rational, mature manner. Your turn.

Anonymous

Whatever Herb actually did, or didn't do. And I heard most of it over the years. I just don't think he is STUPID enough to jump back on 313. Perhaps I am wrong.

I am not a 'Herby supporter' whatever that means, nor am I a 'Porkbut' supporter, whatever that means. I just hope that those with the capability of transmitting on 313....don't. Why? Because its idiotic for one and two it is not helping ham radio one bit.

Of course I KNOW some of you must do your thing. Thats fine too.....I just wonder if you ever heard of the phrase...."Its just like shootin fish ina barrel".

You figure it out.

Dan/W4NTI

Asking Roger to respond without using profanity and obscene speech
is like asking Rosemary to have another baby.

I said, "I've known plenty of Tech's and Generals with 2x2's."

I didn't say that they had to be in the contiguous 48 states.

You and Dave have a lot in common. You can't be wrong.

Now you can understand why Roger has spent time in a mental health
institution. And not just once, either.

Roger claims he has no curtains in his inherited house...says they are mini
blinds. He also said he had Steve "in the crosshairs of my scope" as he
watched Steve.
I can see it now...Rogie, standing against the wall, knees shaking and
filling his underwear as he quakes in fear while grasping his big .22 rifle
to his chest. Poor Wogie...so scared his hands were shaking and he couldn't
get a single bullet into the chamber.
MUUHAHAHAHAHAHAHAHAHAHAHA

2540. MORE fabulous anti-coder jokes! Moan CBers moan!

Newsgroup: rec.radio.amateur.misc

Source record: 74281

Q. What do you call a basement full of anti-coders?
A. A whine cellar.

Q. Why did the anti-coder scale the chain-link fence?
A. To see what was on the other side.

Q. What are the worst six years in an anti-coder's life?
A. Third Grade.

Q. A one-armed anti-coder is hanging from a cliff with his one arm. How do you make him fall?
A. Wave.

Q. Why did the anti-coder get fired from the M&M factory?
A. He was throwing out all the W's.

Q. What do you call a skeleton of an anti-coder in the closet?
A. Last year's hide and go seek winner.

Q. Why do anti-coders need to work seven days a week?
A. So you don't have to retrain them on Monday.

Q. Why did the anti-coder keep a coat hanger in the back seat?
A. In case he locks the keys in his car.

Q. Why did the anti-coder get so excited after he finished a jigsaw puzzle in only 6 months?
A. Because on the box it said "From 2-4 years."

An anti-coder walks into a radio store and tells the salesman that he would like to buy that new HF rig over in the corner. The salesman says, "Sorry, we don't sell to anti-coders". He leaves, goes home, puts on a brown wig and sunglasses and goes back to the store and tells the salesman he wants to buy that new rig over in the corner. He says, "Sorry, we don't sell to anti-coders." So again, he goes home, puts on a black wig, sunglasses and a hat and tries to buy the rig again. Again the salesman tells him they don't sell to anti-coders. Finally he asks, "How do you know I'm a anti-coder?" and the salesman replies, "Because that's not a rig, it's a microwave oven."

Q. What is it called when a anti-coder blows in another anti-coder's ear?
A. Data transfer.

Q. An anti-coder ordered a pizza and the clerk asked if he should cut it in six or twelve pieces.
A. "Six, please. I could never eat twelve pieces."

Q. What's the difference between an anti-coder and garbage?
A. Garbage gets taken out at least once a week.

Q. How does an anti-coder spell "farm"?
A. E-I-E-I-O

Q. Why don't anti-coders eat pickles?
A. They can't get their head in the jar.

Q. How do you amuse a anti-coder for hours?
A. Write 'Please turn over' on both sides of a piece of paper.

Did you hear about the anti-coders that were found frozen to death in their car at a drive-in movie theater?
They went to see "Closed for the Winter."

Q. Why did the anti-coder stare at the can of frozen orange juice for two hours?
A. Because the can said "concentrate" on it.

Q. What is the anti-coder doing when he holds his hands tightly over him ears?
A. Trying to hold on to a thought.

Q. How does an anti-coder commit suicide?
A. He gathers his welfare checks into a pile and jumps off.

Q. How do you plant dope?
A. Bury an anti-coder.

Q. How do you make a anti-coder's eyes light up?
A. Shine a flashlight in his ear.

Q. Why do anti-coders hate M&Ms?
A. They're too hard to peel.

Q. How do you keep an anti-coder busy?
A. Give him a bag of M&Ms and tell him to alphabetize them.
Q. Why does it work?
A. Because he'll say, "Does 3 come before E or does it go between M and W?"

Q. What job function does an anti-coder have in an M&M factory?
A. Proofreading.

Q. Why can't an anti-coder make KOOL-AID?
A. Because he can't fit 8 cups of water in the little packet.

Q. What do you call 10 anti-coders at the bottom of the pool?
A. Air bubbles.

Q. What does Star Trek's "Bones" McCoy say before he performs brain surgery on an anti-coder?
A. "Space. The final frontier......".

Q. Why did the anti-coder put ice cubes in the freezer?
A. So he could keep the freezer cold.

Q. How many anti-coders does it take to play Hide and Seek?
A. One.

Q. Why couldn't the anti-coder write the number ELEVEN ?
A. He didn't know which ONE came first.

Q. How did the anti-coder burn his nose?
A. Bobbing for french fries.

Q. How can you tell if an anti-coder's been using the computer?
A. There's saliva all over the keyboard.

Q. How can you tell when a FAX had been sent from an anti-coder?
A. There's a postage stamp on it.

Q. Why does an anti-coder only change a baby's diapers every month?
A. Because it says on it , "Good for up to 20 pounds."

Q. Why do anti-coders write "TGIF" on their shoes?
A. Toes go in first.

Q. Why don't anti-coders make good pharmacists?
A. They can't get the bottle into the typewriter.

Q. What is the difference between an anti-coder and "The Titanic"?
A. They know how many men went down on "The Titanic."

Q. What does an anti-coder say when you ask him if his turn signal is
on?
A. "It's on. It's off. It's on. It's off. It's on. It's offï¿½."

Q. What do you call 4 anti-coders lying on the ground?
A. An air mattress.

Q. What do you call 10 anti-coders standing ear to ear?
A. A wind tunnel.

Q. What do you call 15 anti-coders in a circle?
A. A dope ring.

Q. What do you call a zit on a anti-coder's ass?
A. A brain tumor.

Q. How many anti-coders does it take to make chocolate-chip cookies?
A. Ten: One to mix the dough and nine to peel the Smarties.

Q. Why did the anti-coder tip-toe past the medicine cabinet?
A. So he wouldn't wake up the sleeping pills.

Q. Why did the anti-coder drive into the ditch?
A. So he could finally turn the blinker off.

Q. Why did the anti-coder try and steal a police car?
A. He saw "911" on the back and thought it was a Porsche.

Q. Did you hear about the anti-coder skydiver?
A. He missed the Earth.

Q. Where do anti-coders go to meet their relatives?
A. Palm Beach.

Q. How many anti-coders does it take to play tag?
A. One.

Q. What happened to the anti-coder tap dancer?
A. He slipped off and fell down the drain.

Q. What did the anti-coder say when he looked into a box of Cheerios?
A. "Oh look! Donut seeds!"

Q. What did the anti-coder name a zebra?
A. "Spot."

Q. Why can't anti-coders change dial lamps?
A. They keep breaking them with the hammers.

Q. What is the definition of "gross stupidity"?
A. 144 anti-coders.

There was an anti-coder driving down the road listening to the radio.
A ham was telling anti-coder joke after anti-coder joke until the
anti-coder
was mad enough that he turned the radio off. A mile down the road, he
saw
another anti-coder out in a corn field in a boat, rowing. The anti-coder
stopped
his car jumped out and yelled, "You dummy, it's anti-coders like you
that
give us all a bad name. If I could swim I'd come out there and give you

what's coming to you!"

Q. What is the difference between a dead anti-coder in the road, and a
dead skunk in the road?
A. There are skid marks in front of the skunk.

Q. What did the anti-coder say about anti-coder jokes?
A. He said they might offend some Puerto Ricans.

Q. Why can't anti-coders make ice cubes?
A. They always forget the recipe.

A ham was telling an anti-coder joke to someone who happened to be an
anti-coder. Halfway through, the anti-coder interrupts him and says,
"Don't you know I'm an anti-coder?"

"Oh, " the ham replied, "do you want me to start over and talk slower?"

Oh, so you've just had one up your rectum, then?
That's even sicker. And you still haven't addressed your screw up about the
callsigns.

2548. ICOM and the PCR-1000

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-11 14:05:03 UTC
From: "Jeff W." <jjweinb@earthlink.net>
Message-ID: <jau59.6$MT4.23258@news.uswest.net>
Source record: 74139

OK, maybe I'm missing something here, and someone wiser than me can pass on the answer to this question.

Beginning this month, the standard ICOM ads have changed. You know the ones, the 'Tune In The World With ICOM' one pagers that generally can be found on the backs of magazines like Monitoring Times, etc. Well, this month, associated with the IC-PCR1000 unit, there is new text that says "New Software - Works with All Versions of Windows!"

OK, so where is it? I've been to www.icomamerica.com, but no luck. At least not on the pages that I've been able to find. What I have been able to find as a download is the old version, and a note that the ICOM PCR-1000 software is only available for Windows versions 3.1 and 95, and recommended links to third party software that does work with other versions of Windows. Since converting my system to Windows XP Pro recently, I haven't been able to get my PCR-1000 working, simply because the old program tries to access the COMM port directly, and locks up as soon as it does. So, if the ad is correct, ICOM now has a version of their software that should solve this problem.

Only, does anyone know where it is? Plus, any recommendations on other vendor software that will work on a Windows XP system, that you like, and was fairly priced.

Please respond here and to jjweinb@earthlink.net.

Thanks.

Jeff W.

2549. W6ELProp

Hello to all and thanks to read me,

I am looking for concrete informations on how to use the W6ELProp propagation software. The included help file is complete and well done but instead I am rather looking for ' real life ' exemples and how to transpose all that amount of datas given after a propagation prediction calculation.

If you use that wonderfull software, I should be very interested we discuss on the subject from a concrete exemple.

Many thanks beforehand for your help. Gordon.

Hi!

I've got an old dual band rig that used to have wideband receieve. After some five years of power-loss, the hand held is back to 2m and 70cm. :(

Unfortunately I've lost the manual and don't remember which keys to press to enable the wideband rx.

NB that this is the W21E without built-in keyboard. All the patches I've found so far doesn't work, but I know that I succeeded patching it some five or ten years ago.

Please help, and respond by e-mail if possible. I will summarize here if/when I get some answers.

Regards,

Mikael Fredriksson /SM5SYO

Not as stupid perhaps if 14.313 once again becomes
the natural magnet for every screwball and fruitkake
that we seem to be so blessed with in this hobby called
ham radio. Let 14.313 become the RF toilettick magnet
that it once was so that all the kooks and crazies from all the
other places on the band can gravitate to. This way the rest of
ham radio is clear and all the nuts are in one place where
Hollingsworth can pick em off like fish in a barrel.

Of course, it never occurred to any of the dimbulbs around here that Riley
may be doing just that. What if ol' Riley is giving the license back to
Herb (or whatever his name is) knowing that he will go back to his evil ways
and attract the same old trash. Then, when they are all in a lather on
14.313 or wherever they congregate, Riley can get them all with one grenade.

And Zitchey the Twit changes ID one more time to force the world to read
his crap once in a while.

If an honest politician is one who stays bought, a civilized twit is one
who has the courtesy to stay dead. You rank somewhere below whale shit on
the civilization scale.

Source record: 74153

Just purchased an ICOM IC-775DSP and was wondering
if anyone here has had experience with the optional filters?
It appears there's two C.W. filters, one AM, and three SSB
filters, all optional purchases. If I buy all six add-on filters,
that's almost another grand, and I wonder if the filters improve
performance that much?

Sandra is currently shooting a movie down in the lower
California Baja peninsula, so I've been working a bunch of
HF from the RV. Great wx! Look for me around 14020
c.w. & 14205 usb. Be glad to work any of you guys.

Eddie "Beans Boy" Hernandez

Hello Karl,
Try this link for all your - HAM RADIO MANUALS - needs includes
operating manuals, parts lists and many service manuals for both new
rigs and vintage rigs of nearly every Ham Radio ever produced.
1. http://www.ab7sl.com/index.html?row1col2=links.html

For great tech tips for - CUSHCRAFT R5/R7/R7000 ANTENNAS - Includes
downloadable "black box" internal image and schematics as well as
R5/R7 trap technical drawing and R5/R7/R7000 troubleshooting steps.
2. http://www.ab7sl.com/index.html?row1col2=r7.html

Also available at www.ab7sl.com

1. DX Page w/ 100's of "live" DX cluster links
2. W9INN Antennas Page w/ data and illustrations
3. FREE downloadable IOTA List
4. Equipment photos and Station Description
5. Lots of Ham Software Downloads too....

I just bought a mint S-38c but it is missing the (h) emblem on the main tuning dial.Anybody got a junker out there and want to part with the emblem or I will buy the whole receiver.
I would like an emblem that is fairly clean if possible....Thanks

Hi all,

Has anyone tried to work a TH D7 TNC with W2K as operating system on the computer ?
I always receive "Communication timeout error" as message. The comport is OK, I use it to connect to my TM D700. I've tried different control applications (link 7, MCP D7 v1.2, ...) but the message is always the same. I tried every setting I could think of ...

Any suggestions ?

BBZZZZZZZZTT! wrong Curtains Boy!

No need to send email, if you have the proper utilities to
determine if the address "will accept" mail. Don't try to
figure it out though, we all know things technical tend to
confuse you. Figured out how to calculate RMS voltage
yet? Figured out that balanced feed line is NOT an
"RF nightmare"? (unless you live in a tin hovel.)

I will be heading up a meeting of the B.A.R.F. and Stumpjumper members
at the Upcoming Huntsville Hamfest. We will meet at 12pm sharp by the
concession stand.

A talk-in Frequency will be of 147.570 simplex will be used.

For info on how to get to the Hunstsville Hamfest:

http://www.hamfest.org/

This activity is a informal gathering. Everyone is invited.

We will be discussing the soon return of our beloved leader, Herb,
KV4FZ.

Pictures of the event will be posted on K1TP's webpage.

I hope alot of you will come and meet me. KK4TL is invited too.

2588. QSL card clipart CD available

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-12 22:08:34 UTC
From: N7LN@galaxy5.com
Message-ID: <ad32ab63.0208121408.25c45bb1@posting.google.com>
Source record: 74180

Do you or would you like to create your own QSL cards on your home computer, but you lack nice HAM Radio clip art images? Or do you have a HAM Radio web page, but need some graphics to spice it up? You may have discovered, like I have, that HAM Radio clipart images are scarce, even on the internet. So I have created what is probably the largest HAM Radio clip art collection ever assembled. I even hired a local artist to draw numerous cartoonish clip art images for QSL cards.

Introducing the N7LN Ham Radio Clip Art Collection, available on CD. Hundreds of these CD's sold through QST magazine for $20, but I'll sell them directly to you for just $9.95, which includes FREE shipping. There are over 2000 HAM Radio images on this CD so you can create a truly unique card. Images include radios, logos (like QCWA and ARRL), maps, flags, and just about everything else you commonly see on QSL cards. There are also a lot of hobby graphics so you can tell others who you are. All graphics are supplied in both PCX and TIFF files.

There are three ways to order. First, you can email me directly at N7LN@galaxy5.com and I'll give you details. Second, you can find a CD on eBay and use Buy-It-Now and get a CD with free shipping for $9.95. (Go here to see one: http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1371467676 . If it's sold, click on "View seller's other items" or do an eBay search on QSL Clipart.) Or lastly, you can just send me payment of US$9.95 via PayPal (at N7LN@galaxy5.com) or money order to:

Darvell Hunt (N7LN)
279 Lake Mountain Dr.
Saratoga Springs, UT 84043-3296.

Total cost is only US$9.95 with free shipping to the United States. Shipping to other countries will be higher--please email me first to ask.

Thanks!
Darvell (N7LN)

No, but I've tried to work an ABC XYZ 123 using a
Wizzo-Wazzo PQRS.

This is a Ham Radio NG, OM. If you want to talk
CB (Cheque Book) Radio, then uk.rec.radio.cb
would be more suitable for you/

If the application you are trying to use for TNC control is trying to
directly access the hardware port, then it won't work. W2K, like any
version of NT, is a protected kernel OS. Any app that needs hardware access
must request it via an OS API call.

> are any really good coverage repeaters in the area?

This link should get you some North Carolina repeater info:
http://www.artscipub.com/repeaters/states/North-Carolina.asp

I was camping about 50 miles west of Asheville in June. Your
coverage varies quite a bit in the mountains.

Reverse the recv and tx lines (2 & 3) on the serial interface between
the TH-D7 and the computer. These are diagrammed in a confusing way and
may be reversed.

Hyperterm should work - set 9600b. The TASCO message should come up
when you push the TNC button on the HT keypad. Be sure to push it twice
to get it out of APRS mode and into full TNC mode.

There you go again Roger, shooting off your mouth about
things technical. You copied these freqs. off some web
site, and you have no idea what the coverage of these
repeaters are. Plus, you are always confused by things
technical Curtains Boy! The poster said he'd be using a HT,
so he needs some wide-area coverage machines, capable of
picking up weak sigs. 146.76 has poor coverage in Ashevile,
as does 444.900, so why did you shoot off your mouth 2Test?
Probably because things technical confuse you. I will have one
of our loyal BARF members email the gentleman with some
good repeater freqs.

2607. New Icom PCR-1000 software

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-13 23:07:04 UTC
From: "Jeff W." <jjweinb@earthlink.net>
Message-ID: <oig69.204$R.71411@news.uswest.net>
Source record: 74199

For those who use the Icom PCR-1000 computer controlled radio, there will be new software available soon that should run under all versions of Windows. As you may know, the current version downloadable from the Icom website is only certified to work with Windows 3.x and Windows 95. Icom parts does not yet have the new version, but when then do, the cost will be $68.73.

To me, it's disappointing that Icom sells a computer controlled radio whose software is (as noted on their website) only certified on versions of Windows that are at least 7 years old. Yes, the software did run under Windows 98 for me, but if I had had problems...

The software does not always work under newer versions of Windows, including XP. It makes you wonder if Icom will continue to sell this radio with the antiquated software, and why they can't provide an updated copy of basic control software for their registered users for more current versions of Windows. As far as I know, even WinRadio provides updates to their software so their hardware remains current with the most current OS's.

With other versions of PCR-1000 software out there that are more reasonably priced, it's MHO that Icom may find a very limited market for this new version of the PCR-1000 control program.

Went to his website just now, and read this on the website:

INTERNET SHOW SUSPENDED
DUE TO LACK OF FUNDING
I am still $1000 short for the bills last month and absolutely NOTHING came in to the P.O. Box for the past three postal days. I simply cannot afford to run-up the bandwidth costs for the Hal Turner Internet Show when this type of deficit will have to come solely out of my personal funds. As such, the Hal Turner Internet Show is SUSPENDED until such time as I can be re-imbursed through donations for the bills from last month - or at least a good part of them.

I will post updates twice per day showing the tally of received contributions.

All other programming on the Turner Radio Network WILL AIR AS SCHEDULED but will only be available live through the Turner Radio Network web page.
Click Here to Donate to The Hal Turner Show
Click Here to go to the Turner Radio Network web site

>>Then I went to his messageboard, the one that proclaims, "Free Speech"
and read this too:

vBulletin Message
TEMPORARILY CLOSED DUE TO LACK OF FUNDING. Will re-open upon receipt of enough Donations.

>>> I will say this, I am dissapointed in Mr. Turner, he lost alot of recent donations, due to the strict controls he placed on his message board.

I used to donate in order to get archives of his internet show. Due to the fact that they never were posted on time, I quit sending him my money. I supposed I'm not the only one.

Hal Turner is on the ash-heap of talk radio. But don't worry, the return of KV4FZ and B.A.R.F. on 14.313 will liven things up around here. I could make a "prediction" as wheather Hal or Herb will come back first. The 75m ham band is picking up folks. Last night on 3850khz, a man was belching on the air, and making funny noises. I laughed like crazy.

If it were not for Mr. Hollingsworth and his years of enforcment, people like Hal Turner would not have had such a following......

Did you tape this Lloyd this sounds like the funniest thing I ever heard.
The AARL should start collecting clips of this kind of stuff and putting it
on CD. What a great Christmas gift idea.

(pause) Oh Higher Power please, if I ever get so lonely that I need to get
my laughs by listening to a person belch on SSB, let me die a quiet but
quick
death.

In real life, AB8MQ undoubtedly eschews gutter talk in favor of more esoteric and learned discourse with his students. In fact, he probably is mentoring some future Hemingways right now, and is teaching them the novelist's special use of language.

For example, when Margaret Mitchell wrote "Gone With the Wind" in 1936, she had Rhett Butler say all of the wrong things to Scarlett, but AB8MQ's students will get it right. In their version, Rhett will say "I don't give a flying fuck what you do, you skanky, smegmalipped, jizzswallowing whore. You can go down on your brother again for all I care."

After that, the AB8MQ Workshop version will become an MTV movie narrated by Beavis and Butthead.

I think Hal is a solid radio host, on par with some of the popular mainstream hosts on the AM dial. The subject of his show alone keeps him from being a true radio star. I have no idea what his money situation is, but I have seen many programs before his that have died due to lack of funding. Hal did a great job upholding free speech, even letting morons flood his board with profanity several times before making "restrictions" on his board. These "restrictions" were merely a process to positively identify those who were to post on his board, so that nobody could post something that they wouldn't take responsibility for. I have not been Hal's biggest advocate in the past, but I am impressed with what Hal has endured to keep his show on the air.

Thank you for the suggestion Roger. However, the IC-775DSP better
lends itself to working in a RF friendly environment. IMHO a mens'
room has too many metal fixtures and would cause a "RF Nightmare."
By all means, post any additional technical suggestions you may have to
improve my HF operation.

This coming Sunday....

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday August 18th 2002
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

Beans boy's admission he would fellate you in a public rest room, noted. Poor ham
radio newbie wouldn't know how to operate an HF rig anyways.

Greetings:

During a trip, my Standard HT model # C558A was damaged.

I've emailed Yaesu parts, and they say that part of their enterprise
is no longer in business. Does anyone know where I could get an
LCD display and front plastic bezel for this wonderful HT?

The radio works fine, but the display and bezel are cracked.

Thanks for any assistance.

Roger,

I am the speaker of English as a second language here, not you.
Nevertheless, you are having great difficulty with English, which
is your native tongue. I'm talking "transmissions" and not "admissions."
I'm wondering if anyone has had experience with the optional
filters for the IC-775DSP? We've already ruled out rest rooms, so
why are you bringing that up again? Public rest rooms are
"RF nightmares." Right? So, what do you think of the optional
filters for the IC-775DSP?

Cross-posted to:
alt.ham-radio.vhf-uhf,rec.radio.amateur.digital.misc,rec.radio.amateur.equipment,rec.radio.amateur.misc,uk.radio.amateur

My elmer has a problem with a computer application (a TNC programmer) trying to directly access the hardware in his Windows-based system (a serial port), and we solved the problem by creating a DOS boot disk. Also, if you run Win95, Win98, or WinME then you can boot into "Command Prompt Only" mode. I'm unsure as to whether Win2000 or WinXP has this feature, despite the fact that I use XP myself. Just never checked, I guess.

If you run Win2000 or WinXP, just create a boot floppy for another operating system. If you have FAT16-formatted partitions on your hard drive then DOS on a floppy should be able to recognize them, possibly with the use of some device drivers in a config.sys file.

Incidentally, I'm not certain if Mr Reay was well-intentioned or sarcastic, but it's quite obvious what the original poster meant. Anyone current with HTs would recognize a THD7 as a rather nice Kenwood handie-talkie, and a TNC should be obvious as a terminal node controller to any licensed ham.

Hope the alternate solution helps you out!

Regards,
Edwin Alexander KS5D

If only we had a moderator on this newsgroup who might be able to enlighten Roger.

Quite easily. Like Mad Dog Deignan, they borrow a friend's PO Box in Alaska, Hawaii, or a US posession, then when their new call comes in, they send in a 605 and change their address to where they really live.

Oh please, don't educate Curtains Boy. he is easily confused
over things technical, and we like to allow him to continue making
a fool of himself. You see, 2Test (that's AB8MQ) is still trying
to figure out how to calculate RMS voltage and how to get
balanced feed line to not be a "RF Nighmare" inside his tin hovel.
Shebelle (ab8mq) had to retest twice just to get back up to
general class. Riley make him retest twice, a unique distinction
which belongs to Roger and no one else.

AB8MQ = Milquetoast

You might check your cabling -- a simple test would be to insert a null
modem adapter between your serial cable and the TH-D7.

73,
Pete

Hello W6DKN

> If the application you are trying to use for TNC control is trying to
> directly access the hardware port, then it won't work. W2K, like any
> version of NT, is a protected kernel OS. Any app that needs hardware
access
> must request it via an OS API call.

As you say, you cannot write a Win32 application for use in NT/2K/XP which will successfully write directly to a hardware port (x86 IN and OUT instructions) in user mode. It will generate an exception.

If the application is an MS-DOS app, under NT, 2000 and XP the UART IN/OUT instructions are intercepted with a trap and have code to attempt to re-emulate the COM port using a Virtual Device Driver (not to be confused with VXD which is a Win 3.x, 9x & ME term). Works sometimes, not others, in particular regarding heavily used interrupt driven applications as these can often be timing sensitive: these traps are expensive in CPU terms.

It will even let some MS-DOS programs access a USB Serial port if you're really lucky.

Windows 3.x [enhanced mode], 9x & ME use a different method and simply map most I/O reads & writes straight through to the hardware.

As an example, I often use the InstantTune Doppler correction facility which is a DOS TSR under Windows 2000 and this works fairly well.

I'd suggest that either the cable isn't right or a handshake line at the PC end isn't properly connected. Either way, the use of a terminal emulator (such as Hyperterminal, but I prefer TeraTerm Pro) and investment in an LED RS-232 status box invariably resolves these problems rapidly.

Oh, the irony, Polly, the uneducated washing machine repairman...

Polly, you have the distinction of not taking the General Class test, which you couldn't pass anyways because you were grandfathered from a Conditional Class license. It's all in those old callbooks. Polly/Zitchey has the distinction of getting TWO (2) warning letters from Riley Hollingsworth and also he had to inventory ALL his ham radio equipment. Now mule humper and daughter-diddler George Ashley has made himself scarce on the air. I wonder if Riley told him not to get back on the air in an agreement so Polly wouldn't lose his license, as he was about to.

Towit:
February 7, 2001

CERTIFIED MAIL RETURN RECEIPT REQUESTED

Mr. George A. Ashley
1138 Collierville Arlington Road
Collierville, TN 38017

Subject: Warning Notice: Amateur Radio Station W4FQF

Dear Mr. Ashley:

Information before the Commission indicates that you have engaged in deliberate interference on the 75 Meter Amateur Band (3.901 MHz) at various times since October 2000. Some of the interference included tape recordings. We note that on January 7, 1999 you were warned about such activities on the 20- Meter Amateur Band.

This constitutes a second warning that any further incidents of such operation will result in enforcement action being taken against you, including license revocation, monetary forfeiture, or both.

Section 308(b) of the Communications Act of 1934, as amended, 18 U.S.C. Section 308(b), gives the Commission the authority to obtain information from licensees about the operation of their station. Pursuant to Section 308(b), you are requested to respond to this letter within 20 days of the above date. You are also requested to furnish the following information.

1. Describe the radio transmitting equipment, including antennas, you have at the 1138 Collierville Arlington Road Address. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.

2. Describe any radio transmitting equipment, including antennas, you have at any other address in Tennessee. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.

Please be advised that Congress has made punishable a willfully false response to a letter of this type. See 18 U.S.C. Section 1001.

Sincerely,

W. Riley Hollingsworth

Special Counsel
Enforcement Bureau

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!

http://www2.arrl.org/news/enforcement_logs/1999/0811.html

TAMPA, FL [UPDATE]: The FCC notified James W. Dale, formerly KE4TEW, on August 3, 1999, canceling his General Amateur Radio license. The FCC had notified Dale on June 18, 1999, requiring him to retake his Amateur Radio examinations prior to July 30, 1999, under the supervision of FCC personnel in Tampa, Florida. According to FCC Attorney Riley Hollingsworth, K4ZDH, Dale failed to appear for reexamination, and his license was consequently cancelled. Hollingsworth also warned Dale about continued operation of radio transmitting equipment.

```

GLENDALE, WV: The FCC wrote General licensee Roger L. Wiseman, AB8MQ on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" that included interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Wiseman to review ¦97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited AB8MQ to contact him to discuss the matter. Last November 9, the FCC sent Wiseman a Warning Notice in response to allegations of deliberate and malicious interference on 20 meters.

Yes, it's true folks, Dimmy is selling his CB radio on QTH.com. He's sold all his ham radios, boat anchors as they were, but now he's getting rid of his beloved CB. Times must really be hard. To get evicted and have to move, and now to sell his CB!!!He's been inside, says a 150 watt radio will do 200 watts. He wants $325, but they only sell new for $339, new in the box. Dimmy must need more beer or gas money for stalking. LOL MUUUHAHAHAHAHAHAHAHAHAHA

hi -
I recently went to a local meeting regarding
bringing wireless internet access to our community -
we can't get DSL or cable
We are looking at the Motorola 5Ghz Canopy system -
<http://www.motorola.com/canopy/>

In thinking about trees & such,
I couldn't remember all the various properties
of RF as the freqs go up -
reflections, bounces, attenuation
foliage penetration, structures that absorb

So - a little refresher on the freqs listed :)
AM broadcast ?
FM broadcast ?
low band ? below 50Mhz
high band ? 50 & 150Mhz
UHF ? 450Mhz
uwave ? 800Mhz, 900Mhz, 1900Mhz cellular
uwave ? 2.4Ghz cordless & wireless LANs
uwave ? 5.2Ghz & 5.7Ghz wireless

Phil -

This bit of tutelage coming from someone who uses:
NG
OM
CB
in his post? How dare you?!?! Oh, wait....let's see:

NG- anyone on Usenet more than an hour knows this.
OM - anyone involved in HAM radio more than a day knows this.
CB - anyone not living under a rock for the past 30 years knows this.

Moreover, most operators involved with digital comms knows what
a *GASP* TH-D7A is, comm software version numbers, let alone a TNC!
W2K? What, are you running CP/M on a Kaypro?

The original poster stated very clearly what he was asking, UNLESS
you are a CBer!

(Oooops....better spell this out....by 'CBer' I mean a carbon-based hominid
lifeform from the planet Earth* partaking in reception or transmission of
radio
frequency energy currently appropriated to the Citizen's Band radio
spectrum.)

*Earth - Third planet from the only star in the Sun solar system, Cygnus
spur
of the Orion arm of the Milky Way galaxy, sister to Andromeda.

Clear enough, OM?

Next time, run a search on the acronyms and /or model numbers YOU are
unfamiliar with. Then, you may partially elevate yourself above the CB
mentality.*

*CB mentality - be ignorant, speak like you're the authority, repeat ad
nauseum.

Do a Google search on "DirectIO" and then follow some
of the links. There are several products, a few shareware,
that emulate a hardware serial port to the application, and
use the Win NT (2000, XP) API calls to actually talk to
the port. Some of them even work :-) None that I've found
will support applications that need access to the system timer
interrupt though. One claims to do so, but fails to work.
Many packet applications hook the timer interrupt as well
as the COM port hardware interrupts. Those won't work
on Win NT (2000, XP) at all.

My own solution is to keep a DOS machine and a Win 98SE
machine around. The computers are junkers I got for free.
They are on the house network.

Now I can run any of the older software ...

Our company does this type of installation, and it pretty much has to be line of sight. If you can't see the transmitter from your site, you can't receive. Trees, buildings, etc are a problem; rain shouldn't be.

Steve

Stupid boy.

There is a big difference between using jargon and
quoting meaningless commercial products in CB (Cheque Book)
fashion. _REAL_ Radio Hams manufacture their own rigs and
take to the writing of software like a duck to water. CBers buy
everything off the shelf and then get confused when they don't have
sufficient technical acumen to sort out problems in their off-the-shelf
gear.

TROLL! Now, where'd I put my 12 guage loaded with
troll shot?!? :)

"Stupid boy"? Surely, you jest.

S'matter, OM? World passing you by, and all you can do
is piss on it out of spite?

His "jargon" was right in line with his question, fool. Simply
because is sounds like gobbledygook to *YOU* does not
mean it is "meaningless", as you are so inclined to say.

It was chock FULL of meaning to any HAM who deals with
digital communications. To a "stupid boy", it is meaningless.
(That's your cue!) Enter Bairn Reay, stage left.

Now you know where and who you are. A true CBer. All
mouth, no brains. :)

As far as "manufacture their own rigs", well, bucko, show me
YOUR waferfab and SMD assembly facility. Also, please
demonstrate to the NG your "sufficient technical acumen" to
code the logic into those EEPROMS, PROMS, processors,
etc.

Show us your "homebrew" rig with built-in TNC.
Show us your "homebrew" DTE device to gain terminal access
to such devices.
Show us your "homebrew" firmware that controls such devices.
Show us how you wrote it without the use of any COTS items.
Show us how you mined your own heavy metals used in your
personal facility to create such devices.

This software that you "take to writing like ducks to water"...ummm,
was this written on a "homebrew" machine? The language it was
written in, did you create it? The devices the code was stored on,
were they created out of personally mined iron ore?

You ain't real, fool.

There's a LOT more to HAM radio than just being an old fart
who thinks "his way" is the only way. Hitler was one of those
types. Your folks should be so proud.

Time to go change your Depends Undergarments. The stench has
whazzed your brain.

PS to NG: Pardon my divergence from the "no feeding the trolls" sign. :)

Hello Hank

> that emulate a hardware serial port to the application, and
> use the Win NT (2000, XP) API calls to actually talk to

Yes, these are all device drivers operating in kernel mode with a Win32 user mode API.

I first used one of these a couple of years ago with some mods I wrote for WispDDE to make it work with some parallel port devices under NT, which has since been documented with the application for quite some time.

I was very careful to specify that:

> > you cannot write a Win32 application for use in NT/2K/XP which
> > will successfully ***write directly*** to a hardware port (x86 IN and OUT
> > instructions) in ***user mode***. It will generate an exception.

> None that I've found

> interrupt though. One claims to do so, but fails to work.
> Many packet applications hook the timer interrupt as well
> as the COM port hardware interrupts. Those won't work
> on Win NT (2000, XP) at all.

Yes if someone's managed to write a Win32 app that tries to access the IN/OUT instructions directly it won't work, but 16 bit apps might work if you're lucky using the NTVDM. InstantTune, for example, works and uses the system timer and interrupt driven UART extensively.

> My own solution is to keep a DOS machine and a Win 98SE
> machine around.

Yes, I do the same, but it's not very convenient! BTW, DOS apps dependent on the system timer in W9x will loose ticks when not in the foreground even without suspend set.

2680. Packet Radio to Internet Portal

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-15 23:50:12 UTC
From: The Smith Family <wsbg@sympatico.ca>
Message-ID: <L4X69.5688$%R5.1420578@news20.bellglobal.com>
Source record: 74123

Picture this: an external USR 56k v92 modem connected to the COM port (or tty in Linux) of a box running your favorite BBS package and having it work well as it does right now.
Now picture: an external TNC (sort of like a modem for the air waves) connected to the COM port (or tty in Linux) of a box running your favorite BBS package and have it work well serving not only dial-up phone connections, but connections from Packet Radio (a digital packet transfer ability with Amateur (HAM) Radio.

Both modems can use a com port, both can send signals indicating a connection has been made, and both are fairly similar. There are some things that would have to be added though (easily done) which would be the sending and receiving of "this is my identification letter and number block" which may even be able to be done through IEMSI and have IEMSI log the QSLs (radio identification numbers).

For those of you that don't know IEMSI is a way of programming your terminal program (ie. Terminate!) to automatically negotiate ones name, password, etc. It may not be applicable to your BBS software as it may not yet support it. But don't fret, it's not needed to bring in support for this.

Now for you sysops: Imagine this: You've got a sweet box running your favorite BBS software. It's connected to the Internet, you've got regular modem, and you've got a packet radio modem. Now you can have callers experience your BBS using telnet from anywhere around the world, you've got access for local folk via your phone modem, and you've now got people possibly connecting from areas so far around the world with their radio modems. Wouldn't that be cool. You're last user lister could list people from almost anywhere, and also list their method of connection whether it be by phone, telnet session, or radio modem. It'd be cool, huh? Now for the great stuff. Imagine that BBS software had PPP connect options so that people using HAM Packet Radio Modems or Phone System Modems could get on the internet:

A HAM to Internet portal, oh my! :)

Well if you can make it happen, why not? Try. Try hard.

Perhaps you've noticed how Roger has been conspicuously
absent in the afternoons & evenings. Well, Wittle Wogie's
case worker forced Curtains Boy to get a job, and Wogie has
taken an evening job with the Glendale Dept. of Public Works.
Specifically, Curtains Boy is working evenings down in the
subterranean world of Glendale. Roger is working in the sewers!
Ed Norton Jr.!!!! So every evening Roger slips into his hip
boots and descends into Ed Norton's world. According to
Roger, he is happy, because as Roger looks down at his
boots, he sees the best parts of his life go floating by!!!!

BN

Right, but he was saying that Techs/Generals could get 2x2 by fraudulent means and
that they could get them in the mainland US from the FCC sequentially.

Riggggggghhhht....what's YOUR contribution?
An ignorant, mindless attack? Niiiiice!

Cut and run, Bairn, cut and run.....

Just as I suspected. You have nothing.

You have made no contributions, just attacks. I can
only assume this is how you run your life, and how
you act in HAM radio. You are a disgrace, and an
embarassment to the hobby. Loser.

Riggggggghhhht....what's YOUR contribution?
An ignorant, mindless attack? Niiiiice!

Cut and run, Bairn, cut and run.....

Just as I suspected. You have nothing.

You have made no contributions, just attacks. I can
only assume this is how you run your life, and how
you act in HAM radio. You are a disgrace, and an
embarassment to the hobby. Loser.

God this Gareth (Bairn Reay) is a waste of space.

Never even makes a mobile phone call. Has he even got a mobile phone?
Probably not. No point if no one wants to talk to him. Not even
Elisabeth!

Nothing our great country has ever done pleases him. Probably because
he doesn't know the history!

Slags off those who make sensible technical comment but never adds to
the thread himself- not surprising as he knows F*** about most things
it appears. Doesn't understand dBs, Slope Detection, antenna gain,
noise figure or temperature. Odd considering the noise he generates.

Can't get another job in the telecoms industry- hardly surprising.

Slags of CBers but lurks on the CB bands to talk to his CB mates. I
don't know any CBers but may be he is right- they are brain dead. Must
be to talk to him!

A software expert who doesn't know the correct name of a language he
has written programmes in or the fact this language is only used in
applications he couldn't have work on!

Hasn't got the ability to even hide his Newsclient so we can't see he
isn't using his own software.

What a waste of space- what did poor Elisabeth do to deserve him?

Was she driving the Landrover that hit him. Was she aiming for his
head?

it appears. Doesn't understand dBs, Slope Detection, antenna gain,
noise figure or temperature. Odd considering the noise he generates.

Can't get another job in the telecoms industry- hardly surprising.

Slags of CBers but lurks on the CB bands to talk to his CB mates. I
don't know any CBers but may be he is right- they are brain dead. Must
be to talk to him!

A software expert who doesn't know the correct name of a language he
has written programmes in or the fact this language is only used in
applications he couldn't have work on!

Hasn't got the ability to even hide his Newsclient so we can't see he
isn't using his own software.

What a waste of space- what did poor Elisabeth do to deserve him?

Was she driving the Landrover that hit him. Was she aiming for his
head?

God this Gareth (Bairn Reay) is a waste of space.

Never even makes a mobile phone call. Has he even got a mobile phone?
Probably not. No point if no one wants to talk to him. Not even
Elisabeth!

Nothing our great country has ever done pleases him. Probably because
he doesn't know the history!

Slags off those who make sensible technical comment but never adds to
the thread himself- not surprising as he knows F*** about most things
it appears. Doesn't understand dBs, Slope Detection, antenna gain,
noise figure or temperature. Odd considering the noise he generates.

Can't get another job in the telecoms industry- hardly surprising.

Slags of CBers but lurks on the CB bands to talk to his CB mates. I

Sure Roger, and who kept spewing filth and child pornography
on Usenet on the same day his mother died last mid-April. YOU!
If that's not a wake-up call for you to get help, then nothing is.
Even Dave Heil cautioned you at the March meeting of the Marshall
county ARES about your sociopathic Usenet attacks on his family, or
he would speak to Chief Stenger about you again. I see you
wisely chose to lay off attacking Dave's family! GET HELP
ROGER! You are owned by the very people you claim to own.

Lloyd

The existence of other childish contributors
to the NG does not make your own stance any less
childish.

The subject under discussion is the differentiation between
Ham Radio and CB. If you cannot contribute without resorting
to silly infantile jibes, then you would seem to wish to class
yourself with the CBers.

The existence of other childish contributors to
the NG does not make your stance any less
childish.

If you want to contribute to a discussion on the
differentiation between CB and Ham Radio, then
please do so without resorting to infantile personal remarks.
When you do that, you represent yourself in public as
a complete fool. That is your choice.

Stupid boy.
Grow up.

Roger, I have a 1x3 call, not a 2x2 call. I was one of the few who chose to
keep his stateside callsign when I was stationed on Guam.

You remind me of the Farside cartoon where the boy is pushing against the
door that has a "Pull" sign on it. Above the door is another sign. It
says, "School for Gifted Students."

This thread certainly proved one thing that has long been
said. Curtains Boy Wogie is easily confused by things
technical. Eduardo asked for technical advice on a rig and
got childish nonsense from 2Test. Case proven beyond a
doubt. AB8MQ = The Village Idiot of ham radio.

The "Zoo of Amatuer Radio" is slowly awakening.....

Right now, at 0206 Z I am hearing some music on 3860LSB. Over the
last few nights, the frequency has been active with the "Tommy Tube"
gang, including the infamous KN4CF, aka "Chicken Feathers"

More as the night develops.....

Lloyd, N0VFP
Listening from Alabama.

I'm wondering if anyone has any info on converting a 42-50 mhz Motorola Maxtrac to 6M. Up to 51.5 mhz I'm getting 50W out. Beyond that, it folds back to 20W. I tried the fix listed on Batlab's page, adding some solder to the link in the PA. It helped, but not quite enough. Please respond via E mail as I don't often have the opportunity to check USENET. Thanks

You are next in line, thank you for waiting.
Cablevision: Welcome to Cablevision, Bob Kozlarek!
Your Optimum Online Tech Support Specialist will join you momentarily.
Cablevision: Your Optimum Online Tech Support Specialist, Alex, has arrived.
Alex: Welcome to Optimum Online's Live Technical Support!

Verifying Account ...
An Optimum Online Technical Support Rep will be with you shortly.
Alex: Hello, I received your question and I will be assisting you today.
Alex: I will need to verify your account information. May I have your full billing address please?
Bob Kozlarek: 69 Memorial Place, Elmwood Park, NJ 07407
Alex: Thank you.
Bob Kozlarek: Did you receive a copy of the error message?
Alex: Yes I did, Did this problem start earlier today?
Bob Kozlarek: It's been happening on and off for several weeks
Bob Kozlarek: But not consistent
Bob Kozlarek: Receiving USENET messages works fine
Bob Kozlarek: Just problems sending
Alex: Right, we are aware of the issue.
Bob Kozlarek: OK
Bob Kozlarek: Any solution in sight?
Alex: About a few months ago, the connections were reduced to 2.
Bob Kozlarek: ?? 2 for the entire network?
Alex: But what you're seeing is a different error, since it's not allowing you to post the messages.
Bob Kozlarek: Yes, but two for the entire OOL network?
Alex: That is correct, that was actually done, to reduce the lag on the server.
Bob Kozlarek: That's insane, given the number of subscribers
Alex: Our engineers are aware of this current situation and are looking into.
Bob Kozlarek: So how dow e solve this
Alex: We don't know exactly how long it'll take to get it resolved, but it'll definitely be fixed.
Bob Kozlarek: You have thousands of subscribers and only two connections....
Bob Kozlarek: That simly makes no sense
Bob Kozlarek: Fixed yes, but days, weeks, ???
Alex: I do apologize for any inconvenience, it shouldn't take that long.
Bob Kozlarek: OK, but this has been happening on and off for several weeks
Bob Kozlarek: So it doesn't appear that it has a high priority
Bob Kozlarek: I'm a network admin for Panasonic and this sounds like a bad dream
Bob Kozlarek: I know its not your fault, but...

Alex: It is a priority since, as you had mentioned earlier, we do have a lot of customers subscribing to newsgroups.
Bob Kozlarek: OK, so what do you suggest?
Alex: I'd just wait it out.
Bob Kozlarek: How long?
Alex: Sorry.
Bob Kozlarek: OK, so if you can't help, please connect me to someone who can
Alex: I don't know what they need to do to resolve the issue.
Bob Kozlarek: All this after OOL raises their rates by $10.. not acceptable
Alex: Whoever you speak to here, will probably tell you the same thing that I'm letting you know.
Bob Kozlarek: I understand, so please xfer to someone who knows what's going on
Bob Kozlarek: Need I call Mr Dolan?
Alex: We don't have the ability to transfer from here.
Bob Kozlarek: Do you have an incident # so that I can reference this contact?

God, I hate these little internet slam fest, but they seem to be inevitable. A question though, the Conditional Class license was granted after passing the same test as a General Class license, only not as administered at an FCC field office. Why would a Conditional be a bad thing? Or why would it be less than a General in your mind? For that matter the old Technician Class took the same test also, only with the 5 WPM code test, if I remember correctly.

> less than a General in your mind?

Zitchey/Polly/W4FQF couldn't pass even the Conditional test without bribing.
The old useless fuck couldn't discuss anything technical if his life depended upon
it. Ask him about running legal limit just to talk acrtoss Memphis to his former
friend W4LLI (He dropped him like a hotr potato after Riley made him inventory his
equipment in all his Teneessee residences) on 3.901.

> For that matter the old Technician Class took the same test also, only with the
5

Its a true statement. Here, allow me to say it again:

I've known plenty of Tech's and Generals with 2x2's.

Now play back the part where I said they were in the contiguous 48 states.

Someone on this NG boasts of having TWO
DEGREES, one in Electronics and the other in Mathematics.

You'd think that such a person would understand
the deciBel. would you not?

Are the Yanks also that stupid, to use a unit
defined _ONLY_ for expressing power ratios to also
use it to express voltage ratios whilst at the same time
not being able to explain the factor of 2 brought in?

Perhaps it is not only the "A" Level and the Foundation
licence which are travesties of educational standards;
perhaps the low standard extends also to holders of TWO
DEGREES? (We are already aware of the PhD that will not
stand up to public scrutiny; and the PhD which is no
more than a librarian's CV)

Hi Kev

So good to hear from you. (on the newsgroup)
I wondered where you were. I haven't heard anything about you since the
road trip you took with your brother way back when, August 2000 I think
it was. Where was it again....California?
Amazing what a person can learn from such little info....LMAO
I see you've grown into a complete idiot after all these years. Maybe
you should actually try getting a life instead of harassing people on a
missing kids newsgroup.
Its not nice to do things like this to innocent people in search of
their missing kids.
The authorities were pleased to see that you left this email address for
them to contact you. Its great what a person can do with so little time
on their hands but to catch ass wipes like yourself.
Well, I hope I don't see you again on any newsgroups.

Hi to your brother for me...ha ha ha

Ida
(The net NANNY who loves an idiot dressed in sheeps clothing who doesn't
have two clues to rub together.)

Quite appropriate for you to go "Duh/da!" Polly. You sure never talked about technical stuff over the air, did you? You ran legal limit to talk across Memphis from your hovel in the slum district on Merritt to Billy Jerk across town. Looks like the only one dancing is my circus monkey Polly, W4FQF, who lost his only friend W4LLI when Riley made him inventory all his equipment.

February 7, 2001

CERTIFIED MAIL RETURN RECEIPT REQUESTED

Mr. George A. Ashley
1138 Collierville Arlington Road
Collierville, TN 38017

Subject: Warning Notice: Amateur Radio Station W4FQF

Dear Mr. Ashley:

Information before the Commission indicates that you have engaged in deliberate interference on the 75 Meter Amateur Band (3.901 MHz) at various times since October 2000. Some of the interference included tape recordings. We note that on January 7, 1999 you were warned about such activities on the 20- Meter Amateur Band.

This constitutes a second warning that any further incidents of such operation will result in enforcement action being taken against you, including license revocation, monetary forfeiture, or both.

Section 308(b) of the Communications Act of 1934, as amended, 18 U.S.C. Section 308(b), gives the Commission the authority to obtain information from licensees about the operation of their station. Pursuant to Section 308(b), you are requested to respond to this letter within 20 days of the above date. You are also requested to furnish the following information.

1. Describe the radio transmitting equipment, including antennas, you have at the 1138 Collierville Arlington Road Address. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.

2. Describe any radio transmitting equipment, including antennas, you have at any other address in Tennessee. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.

Please be advised that Congress has made punishable a willfully false response to a letter of this type. See 18 U.S.C. Section 1001.

Sincerely,

W. Riley Hollingsworth

Special Counsel
Enforcement Bureau

I'm in Montreal, and the July QST is the issue still available at
the newsstands. I thought it might be a local problem (or an outright
decision by someone not to distribute here), but it must be a more
general issue. It would be nice to know whether it's a foul up,
or a reduction in distribution.

Wow. I never knew that every single evemt involving a US military or NASA vehicle was the result of those pesky Russians. Not only that, but every "natural" phenomenon such as earthquake, flood etc too. Me, I'd love to know how a country that cannot even afford to pay it's military personnel can afford the electricity.

You missed out some other "proven" attacks of Russian EM weapons - what about the storms, hurricanes and bad winter snows - obviously EM weapons in "climate-change" mode.

I am also quite prepeared to believe that the election of "Dubbya" was the result of some kind of foreign interference, maybe EM directed brainwashing or mind-control.

By the way, if it's all these pesky Ruskies doing this EM stuff, then what is that great big array in Alaska irradiating the atmosphere for? Peaceful climnate study, I think not!

Message-ID: <bYP79.46550$EJ4.1429936@news4.srv.hcvlny.cv.net>
Source record: 73942

I've recently programmed a 42-50 Mhz Motorola Maxtrac to the 6M amateur band. I used the modification on the "Batlabs" page, adding some solder to get it to transmit beyond 50 Mhz. It helped, but only to the point where I can get full output to about 51.6 mhz. Beyond that, the power folds back to about 20W. Does anyone know of any modifications that can be done to extend the coverage by another 1 Meg or so? How about any other web sites that discuss the issue? Please, if you can help, drop me an E mail at njscan@lycos.com Mt ISP is having issues with USENET so I can't always access it. Thanks

Bob

Thanks Michael.

I've sent a query to the ARRL; hopefully they will reply and clarify if
it is a distribution issue or a change at their end.

This stuff is nonsense.

If you want to know about Electromagnetic Weapons read up on HPMs, they really do exist.

George "Dubbya" - The thinking mans 'Fozzie Bear' - Only won that
election because the people of Florida can't count and are unfortunate
enough to have his brother as Governor.

Source record: 73954

I have an FT817 with Mahdol antenna set 10-40M and a brand new MaHa
Battery pack - 2nd battery pack plus the AA battery pack and manual.
I also have the 12V cord and the wall wart charger. This unit works
great and looks very nice as well....Best offer or trades

Well yes, but the FCC ran out of the style of 2x2 calls that techs and
generals were to get. Now they get novice 2x3's unless they do the
vanity call thing. IIRC, KV4FZ would be a style of call techs could
have, but not AB8MQ style calls. Those are for extras.

Consider it done.

"Anoinymous"...a cross between anonymous and annoying?
"Acident" Roger's mom got preggers by accident.
"Alreaedy" Alright, already!
"Amouints" Roger amounts to nothing.
"Aposterphe" This guy is a hoot, ain't he?
"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?
"Coiward" As in peeking from behind his mommy's curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.
"Ghet" Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.

"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
"Sisnce" He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)
"strill" (still?)
"shoitgun" 12 ga or 20 ga?
"Snoip" (How they spell "snip" in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can't spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It's a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.
" Stgop" Roger's version of Stop.
"Fahter's" He meant Father's Day.
"poists". Roger meant "posts".
"snadwich" As in peanut butter and jelly?
"regualr" Glen Dale rendition of "regular".
"aftrer" After? Aftrer what?
"soory". Sorry Roger fucks up again.
"didnb't" He didn't?
"whoile". He ate the whoile thing?
"Woamn" He's hooked on West Virginia phonics, all right.
"prrof" And he kin prove it, too.
"beforfe" Was that before he lurned to spell?
"yoiuy" Roger's version of "y'all".
"illarate" Only illiterate Roger can spell like this.
"haeart" Aw, how heartless of me to laugh!
"valule" Roger has no values. No wonder he can't spell it.
"proch" Doesn't everyone have one on their house?
"inmstitution" Where Roger's mom put him in June 1999.
"timne" It's Howdy Doody time?
"whgo" What? Who dat?
"gnetically" Only Roger knows what this one means.
"crfy" Like, cry, Roger, cry.
"stutrtering" Some stutter, Wiseman stutrters.
"Whjere" Where is Curtain Boy?
"Webiste" That's Website to the rest of us.
"Youire" Your? You're? Who knows.
"fiored" As in fired?
"Parety" Roger gave a party once. Nobody came.
"Bouynce" Bounce?
"Varification" Verifiable mental case.
"Probelms" Poor Rogie.has many problems of the mental sort.
"Partricipate" Oh, DUH!!!!
"Cryed" Gee, Wogie..cry me a river.you dolt!
"Stoick" What a dork. His old 386 has no spell check program.

It is not because the Democrats didn't give it a good try! Why, they even
"resurrected" thousands of deceased voters across the country who all
"voted", oddly enough, for Al Bore, a Bhuddist nun's best friend.

There is nothing wrong with being a friend of any religious figure -- but there
is something wrong with taking laundered money from non-friendly foreign
governments for campaign or political purposes.

While WBCQ was transmitting RNI with
John P Lightning at 9:55PM They went off the
air due to Transmitter problems. Now there's
a guy with a falsetto spanish voice, and female
and someone on SSB transmitting in place
of WBCQ (..sounds like some
AM'ers I hear on 75 Meters....Hmmmmmm...)

The factor of two arises because power is voltage squared over resistance (V squared over R). In other words, for the same characteristic impedance, which is always a pure resistance for an ideal transmission line, power is proportional to the square of voltage, and in base 10 the effect of squaring a number is to double it's logarithmn. Hence 10 times the log for power ratios, but twenty times the log to convert a voltage ratio into decibels. So long as we're only talking about ratios, this is fairly harmless. The real trouble only begins when we talk about dB relative to a reference. To be specific, you can't convert directly between dB microvolts and dBm, without an extra fudge factor. This is because dB microvolts always refers to 50 ohms, and dBm refers to a 1 milliwatt in a 600 ohm system. That is, in our V squared over R, the R isn't the same.But then I forgot, you didn't want it explained, you just wanted to snipe at eachother...and I only have one degree, in Electronic and Electrical Engineering, but I'm seriously thinking about doing a law degree, because I have a use for it, not to brag.

Absolutely! If you're at all into DXing or just listening, when a station uncharacteristically disappears it is pretty usual to want to stick around to see when they come back, if they report what happened etc. In this case, they did come back at a lower level (here in CT. as well). I didn't keep listening just to the two voices that assumed the frequency while 'BCQ was off, but I kept cooing back until I found them back on the air.

The best time to listen for curious SWL activity
is *exactly when* a high-profile radio program
like RNI goes off the air unexpectedly. Such
times often reward the casual listener with a
rare or unique catch, and sometimes even a QSL
collectable if it's a genuine pirate station
who gives out a p.o. box for the same. As you
learn more about the hobby of shortwave listening
Kent, you will grow to appreciate such rare events
as this.

> vanity call thing. IIRC, KV4FZ would be a style of call techs could
> have, but not AB8MQ style calls. Those are for extras.

That's right. When I first got my license in 1998, I had a 2x3 callsign.
Then I changed it sequentially to a 2x2 after I passed my Extra in 2002.

that why it so funny when Rogey say he has three college degrees!
he don't unnerstand what RMS voltage is and he think balanced feed
line is RF nightmare in his tin hovel! LOL Curtains Boy has RF in his
pointed skull! LOL he tell anouther ham what repeaters to use and
the repeater Woger says use is not even on air anymore! LOL
then for months and months they try explain what a "parody" is to
2Test and he never did get it. LOL Roger is really very funny
and very stupid but very entertaining! LOL!

2857. Electronics help????

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-19 12:46:04 UTC
From: Edward2001 <Sales@fncwired.com>
Message-ID: <3D60E88C.885C8F41@fncwired.com>
Source record: 73908

This program is for those who like to work with electronics, without having to
remember or work all those formulas. It also has lots of data and circuits.

An example of one of the many things it can do:

Suppose you want to build a dc-dc step up converter.

Click on the power supplies tab, click on the step up converter icon, enter in the
minimum and maximum input voltages, enter in the volts and current output
desired, enter in the minimum frequency of operation desired, enter in the output
peak to peak voltage ripple you want. Click on "Okay" or press the enter/return key
on the keyboard. The schematic will be drawn, with all the component values
computed and displayed. This can now be printed out.

If you want to wind your own toroidal coil, click on the "Coils" tab, click on the type
of core material icon you want. Select your core size and type from the chart. Enter
in the inductance you need. Click on "Okay" and all the data you need, to wind your
coil, will be displayed. Print it out, if you like.

The data you need, to compute the heatsink size will also be available. To compute
the heatsink size needed, click on the "heatsinks" tab, click on one of two ways to
compute the heatsink icons. Enter in the data, click on "Okay", and the heatsink
size will be computed and displayed.

As I said, this is just one of the many things that you can do with FNC-Elcad.

There is a trial version that you can download.

I have a Plll 600 mhz Toshiba laptop for sale.It has 192 megs ram,6 gig hard drive,and has Windows ME on it.It also has all docs and setup cd for it.I will even throw in a laptop carry bag with it.
This unit works great and just needs a new home as I don't get enough use of it.I like my Dell with Windows XP better.I am asking $550.00 shipped from Mass.
Email me if interested or call 978-281-3359 ask for Dick.Thanks for reading.

Hi Fred

My email address is not very neat. Then again, I don't attack Mr Bush - I just dare to question the direction in which he is leading us. Unfortunately it is "us", since Mr Blair just does as he's told, as do most of the other NATO leaders. Wonder why. Is that a small globe of white light I see above 10 Downing St.....

Alec

PS For those Americans with a similar knowledge of other countries to their president, I'd better explain that 10 Downing Street is the residence of the British Prime Minister, who is called Tony Blair - short for "Anthony" by the way.

Indeed they probably do exist. I think what people have a problem with is the idea that every "natural" disaster and every event involving loss of US military personnel is down to Russia, which is now basically a third world country. If these weapons do exist and are in use, it is most likely that they would be in the hands of the worlds richest country, not one of the poorest.

That said, I don't believe that the US have yet perfected such a weapon, if they had we would all know about it. America's "national security requirements" would have required its use on all of us by now for daring to question "Dubbya".

Alec

That's easy. First they apply to Washington for 'Favored Nation
Status' then they apply for a massive loan and poor Joe Public, right
across America, ends up footing the bill.

Same as usual.

For those Americans with an average standard of geographical
education. The British Isles are that pretty little group of islands
off the north coast of France.....

What do you mean, "where's France" ?

You must have heard of France... It's where that green statue in New
York harbor came from.

Old Nick.

Hi there,

we set up a new Forum dealing with MagLoops. You will find Pics,
Reviews, Generel Diskussion and hints at

www.magnetic-loop.de

Please visit us.

The Forum is in English as well as in German language.

Don't hesitate to visit us.

Oh, France! Yeah, that's that place we have to go to every 50 years or
so and bail your asses out! My father was there in 1918. Got his ass
shot at. My uncle was there in 1944, think he screwed a bunch of your
whores, wives, daughters, whatever. Mext time maybe we will stay home
and let you solve your problems by yourselves.

Just eyeball it. Get it close (move the pot arm a little if you have
to) and once you get power to it, it'll line right up.

Remember this; there are two kinds of hams: those who have had ball
bearings all over the floor, and those who have never taken apart a
HAM Series rotator.

I've been told by some CW people I'd trust that the CW mode on some
of the Unidens, with the exception of the HTX-100 variant from RS,
wasn't worth squat. Being there was only one step to worthless,
according to them.

The latest RS 10M rig that does SSB and FM doesn't do CW...
And it's a fine little 10M rig!

Mike

You wouldn't make a profit out of that though would you. Anyway, don't get the idea that there was any kind of moral portion to the US decision to enter the war. America has and only ever will act when it's own national (read financial) interests are at stake.

Alec

Oh but doncha know? AB8MQ a.k.a. Curtains Boy, wants us
to believe he holds not one, not two, but THREE college degrees!!!
hahahahahahahahah LOL! One wonders how much filth and
child pornography Roger included in his Master's thesis?

Walt

Intelligence? Roger? A classic example of an oxymoron.
Or in Roger's case, just a plain vanilla moron.

That is interesting. It was only in the past decade or so that the
ARRL decided to distribute QST at newsstands. Up till then, the only
place you could buy it was by membership, or at radio stores. If I'm
remembering properly, they decided to go for newsstand distribution
because it was a chance to reach new people, particularly non-hams.
I remember they wrote about it at the time, though I can't remember
the exact date of when they made the transition. What I remember
of my impression at the time, they had a makeover for QST at the
same time, presumably in an attempt to stand out at the newsstand
among the other magazines.

Since they've stopped the practice, one must assume that the
results weren't what they hoped for. On the other hand, and
it was a traditional reason for not selling QST at the newsstand,
there are other ham magazines that are sold that way, so there
is at least some way to reach non-hams.

This is a disappointment. While thirty years ago I was an ARRL member,
with time and rising costs I stopped renewing. When they put QST
on the newsstands, it made it easy to check each issue, buying those
with something that interested me. There sure aren't any radio stores
that are easy to get to for me.

I guess this is the time to get together with some other hams and
buy subscriptions for local libraries. It won't cost as much as
a private membership, we'd still get to read QST, and it's there
for non-hams to access too.

I am willing to bet this is a case of someone crying because they were shown up
in public, but I have to ask to show that I'm taking some action so I can tell him to go pound sand if there is no ground to his "claim".

Just let me know what your side of the story is here and I'll take care of this.

I used to work with RF, and I stand by what I say. All the test equipment I used was calibrated this way. Now, if you are talking about dB relative to mW per square metre, that's an entirely different matter. If you are looking at a receiver of some kind of analogue modulated signal carrying audio content, then you start out with a field strength, which can be expressed either in mW per square metre or microvolts per metre (related by the free space impedance of 377 Ohms), then at the receiver you have a signal strength in microvolts referenced to 50 Ohms, then it's detected and you have an audio signal level in milliwatts referenced to 600 Ohms (OK, so in a solid state circuit the impedance is much lower, most meters probably measure voltage and displays equivalent milliwatts into 600 Ohms). All these things can be expressed in dB relative to unity.

Yeah! That's France. It usually takes you two or three years to find
the place, which means you always turn up late. ;-)

Good for your uncle. I regularly visit your side of the pond, to do
the same. Just trying to improve the gene pool over there you
understand. Though not with the whores.... Well you just never know
where they've been!

Y'have a nice day now.

That's not fair old son. I may have fun tweaking their tails a
little, but I like Americans and always enjoy my visits. They're a
generous people.

Don't judge them all by the odd loud-mouthed politician, we have just
as many of those over here.

>America has and only ever will act when it's own national
>(read financial) interests are at stake.

There's nothing wrong with that. When you get down to it,
national/financial interests, are usually the cause of wars.
We do - and have done - exactly the same over here.

Nick.

I'd have to disagree with that statement, Mike. You might want to
check out the QST product reviews for both the Uniden/President
HR-2510 and the Radio Shack HTX-100. The RCI-2950's also reviewed in
the same issue as the HTX-100. It got an unfavorable report re. its CW
capability. (Then again, Ranger wasn't an advertiser back then...but
both Uniden and Radio Shack were. I know, ouch.)

Nah, you can never be sure that times and dates are correct on
messages. Some people never set the time and date on their computers.
Back before Y2K, people were setting their PC's to 1969 or something
like that because the days of the week corresponded to the dates on the
calendar of 1999.

I am a cross dresser. The secret is out. I also wear lots of rouge.
I like to buy lacy little womens' panties and prance about while my whore mommy is asleep, or servicing her johns.
Sometimes I participate with my mommy when she's being a well-used mattress. I wish that she'd buy some K-Y, though.
Oh well, back to those panties, sweeties.
I prefer the pink ones. You know, the ones with the frills.
When I am feeling really racy I don a bra and stand in front of my broken picture window. I call this my version of sista-vision.
I make all the derelicts in my ghetto hard when they look at my feminine appearance. I just need the money for that "operation."
I love the soft texture of those lacy underthings and I quite a collection of them. I wear them for my lover, Michael Jackson.
The secret is out. I wuv you Woger.

2916. Digital answering machines -- RFI

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-20 16:37:33 UTC
From: mlangen@execpc.com
Message-ID: <6658a6d3.0208200837.6b19b192@posting.google.com>
Source record: 73859

I have now tried two different makes/models of digital answering machines, and both generated unacceptable levels (S 6-9) of hash on all bands (but worst on VHF). I have tried filters and ferrite chokes on both the phone service and line cords, but only achieved a 1-2 S-unit decrease in the noise.

Has anyone solved this problem or found a make/model of digital answering machine that doesn't raise absolute hob with weak-signal work?

Thanks,

Mark -- WA9ETW

Mine has had posts up to a month old, show up again just as if they were a
new thread. I can sit back and watch the original answers show up.
I've never seen one that I could identify as being over a month though.

I used a 2510 on CW (while mobile, even) and it seemed to do a pretty good job. If I remember right, it put out 25 watts of CW which is more than enough for the 10 meter band when condx are good.

<NoNotMe@NotMe.nyet> wrote:

What complete and utter hogwash.

First of all, if you're posting on an amateur radio newsgroup you ought to know enough to realize that the "5 watt limit" of a cell phone, whatever that is, is certainly a much larger area at 35000 feet than it is on the ground. And 500 mph is certainly not fast enough to be running out of range of any cell sites.

Claiming that the 757/767 are the only airplanes Boeing makes that are "fully autonomous," whatever that means, is also utter nonsense. Both of those aircraft are 1970s designs, and while they can auto-land, so can a lot of other aircraft, including some older than they are. Further more, they are not "commuters," they are full sized, passenger aircraft. Commuters are smaller, generally turboprop driven passenger aircraft.

And what about the 777, which is a state of the art aircraft of late 80s/early 90s design? Surely the features that are claimed to be only on the 75/76 would have been included in a design of this type. Moreover, many of Boeing's fleet, while older in original design, are of current manufacture, with all the gee-gaws and doodads that befit an aircraft produced in the 21st century. The 747 comes immediately to mind.

Voice recorders? Virtually every aircraft that has a voice recorder has both a circuit breaker that can be pulled and an erase button. The continuous loop part is about the only thing the author got right, although 30 minutes was an older standard, and I believe newer aircraft have a 60 minute loop, or digital memory.

Does anyone remember the TWA 727 that fell several thousand feet over Michigan in the 70s? Piloted by "Hoot" Gibson (not any of the famous ones, like actors or astronauts), one of the findings was the lack of CVR data, presumably because the pilots intentionally erased the tape after landing (to cover up discussions they were having experimenting with partial deployment of leading edge flaps at cruise altitude and speed; a big no-no).

The aircraft that hit the second tower was in a normal flight regime and was not experiencing a particularly high G-load. You could see that from the films and experience it with Flight Simulator. In any event, if you want to find out, just make a FOIA request for the FDR

data. G-load information should be there; see for yourself.

NORAD does not have the resources, systemic or personnel, to be prepared to remotely fly an aircraft in the event of an exigency. This is nonsense promoted by Chicken Littles of some sort.

Eight hijackers called complaining they were still alive? How? According to Mr. Anonymous cell phones can't work. On the radio? Make an FOIA request to the Air Traffic Control Centers involved and get copies of the tapes (you have to know the time and frequency).

Strictly speaking, mW/sq.m is a measure of energy flow, not field
strength. A field need not do any work.

>then at the receiver you have a signal strength in microvolts referenced
>to 50 Ohms, then it's detected and you have an audio signal level in
>milliwatts referenced to 600 Ohms

That's only because 600 Ohms is a standard impedance for audio and
telephone work. A milliwatt is a milliwatt regardless of the system
impedance and dBm are used in other contexts with different impedances,
such as 75 Ohms and 120 Ohms for telecoms equipment, or with no reference
to any impedance at all, as in optical links.

>(OK, so in a solid state circuit the impedance is much lower, most meters
>probably measure voltage and displays equivalent milliwatts into 600
>Ohms).

Many do, but they have to make assumptions about the purity of the
input waveform which compromise their accuracy as power meters.
Or as volt meters, for that matter.

This is SOOO Pathetic;

either the poster believes in the Tooth Fairy
The Easter Bunny & Might Mouse,

or else he Wants to be the "Wonder Boy" Robin to Turners Fat Batman...

Shades of Michael Jackson

(- uh say.. Has turner gotten into Plastic Surgery yet..?)
Doubtless Spending all the Web $$$ on Liposuction & Penile Enlargement
surgery...
After putting this on his web site, Turners theme song should now
be " When You Wish Upon a Star"
sung by
Jiminy Cricket..
- This is SOOO Pathetic...

(massive snippage of BS)

You only need look at the source of
this crapola, Hal Turner's Horseshi+
Broadcast Calvacade of The Airwaves.

If it quacks and walks and farts like a
duck, then it's a duck.

BTW, the original manuscript that inspired
this piece of crapola came out of
radical Islamic elements based in Saudi
Arabia and Algeria.

The real potential loser in all of
this is WBCQ, who carries this program
on it's microphones.

Now do you just reach out the window and stick that mag mount to the roof of the Boeing 737 ;-)

Seriously, I bet it would be cool to try and QSL from an aircraft. Try it on a commercial plane today and you will have a nice shiny black boot on your neck.

Yeah...but, then, maybe not - he has no sense of humor. He absolutely
believes every dollop of tripe he dishes out.

I am not suprised Turner said any of this. It fits in perfectly with
his overall credibility profile.

The only time you were ever at 32,000 feet was either climbing through
it or descending through it. Aircraft are never assigned 32,000 feet.

Also, the pilot does not have the authority to permit operation of
either a personal cell phone or an HT. The FAA prohibits it, period.

I don't believe this is true. While 32 may not be a standard flite
designation,
there are plenty of times non-standard corridors are used. Whose to
say...

> Also, the pilot does not have the authority to permit operation of
> either a personal cell phone or an HT. The FAA prohibits it, period.

That may be true, however it does happen. In the past, I've asked, and
gotten permission, to use my HT. However I have to say that I have not
transmitted from an aircraft since about 1984. Since then, when I've
asked to use my HT just to 'listen', I've generally been told it's ok, but
at the same time been admonished NOT to transmit, and to make sure
the flight deck was informed when I turned my HT on AND when I
turned it off.

Wiseman blather deleted

Three-"degreed" Wiseman did it again. His spelling is atrocious, yet he maintains to have been "educated".
His old 386 machine must not have spell-check and it is very obvious the ignoramus doesn't own a dictionary.

"Partiall" More WV Phonics, I see...spell it like it sounds.
"Obsucred" Either obscured or Rogie has "sucre" on his mind.
"Infinate" Stupid. Think finite, Rogie. As in finite intellect.
"Sustinance" As in Sustenance? That's what you really meant, wasn't it?

Good choice Jim. One bit o-info however, this crackpot
of an idea that the aircraft which crashed in NYC, Wash
DC and Pa were under some form or "remote control" was
first promoted by radical Islamic elements based in Saudi
Arabia and elsewhere. (part of the "Zionist/American anti-
Islamic conspiracy" they said) This "theory" came out
around November or December 2001 also. Hal was obviously
'trolling for turds' in the terrorist webpages when he came
up with this "story", 8 Months later of course, re-packaged
but still smelling like the hi-grade elephant poo that
it is. This is what is so great about Hal Turner and his
ilk that's support him - they are all SO predictable and
SO consistent being they they all have shit-for-brains. (grin)
I expect similar horseshit to start comming out of natvan
in West Virginia soon also, seeing that Kevin A. Strom has
allegedly taken the leadership position of the National Alliance
after the timely and much greatly anticipated death of Wm Pierce.
USA Shortwave sure has it's share of kooks and crazies eh folks??!

32,000 feet (FL320) quite legal and in regular use.

RVSM - Reduced Vertical Separation Minima.
In use in many areas, including North America, where aircraft and
systems are certified for reduced vertical separation.

Dave

PROLOGUE

Fuck off Phar-Lap fake name wimp shit. Aaron Kim is right. The two special white stones, one dated Carboniferous, the other dated Cretaceous, in the two bows of Joseph Smith, Jr., are well known by the micropaleontologists of London's Natural History Museum. And dick suck, the golden plates of Joseph Smith, Jr. have already been geophysically located by Denoco Inc. of Texas geophysicists at Bratton Camp (Westbury) White Horse Eye. The two bows containing these two special white stones of Caddo Indian Tommyhawk are well known and published, well protected and well preserved, in Texas, dumbass. And Sun Angel Moroni's 16 Stonehenge Carboniferous and Cretaceous white stone samples were divided (melted)into 24 separate specimens embedded in said two bow arrows of Caddo Indian Tommyhawk. So fuck off because Aaron Kim is right. You don't know a fucking thing about this...

In the original Bratton Camp White Horse Eye, under the Ancient Mississippian (Lower Carboniferous) Limestone white stones from North American and European source areas identified below, said White Horse currently covered with several layers of portland concrete and paint. See and read above sites.

> Are you going to retrieve them or are they to remain hidden till a certain
> time?

Now's the time! BEFORE they are stolen by Osama bin Laden's London Cells on September 11, 2002! I am going to cause, with or without anyone's help, The Natural History Museum of London to TELL THE FUCKING TRUTH about Doctor Garry Whilhelm Denke's, Joseph Smith, Junior's, Sister Amelia Denke's, and Tommy (Tommyhawk) Littlepage's white Mississippian (Lower Carboniferous) geologic age stones (of

various sizes, shapes, textures, hardnesses, and source areas) in the Heel Stone ditch original backfill, which circles MY ark of MY testimony location, and the white Upper Chalk (Late Cretaceous) geologic age stones. Their (Natural History Museum's) micropaleontologists addresses and phone numbers are at URL: http://www.nhm.ac.uk/ They all know about this. THEY are trying to THIEF MY ARTIFACTS.

> I looked (searched the I.) for info on the special white stones of Caddo
> Indian Tommyhawk but couldn't find any. Obviously you know more than most on
> this subject and your background points to some possible knowledge that may
> not be readily available to all who are interested.

My three (3) sources of samples of the two (2) different types of white stones at Stonehenge and my three (3) sources of samples of the two (2) different types of white stones at Bratton (Westbury) White Horse Eye, United Kingdom, said White Horse Eye also being filled with the white Ancient Mississippian (Lower Carboniferous) geologic age stones (of various sizes, shapes, textures, hardnesses, and source areas), are discussed in brief below (I'm trying to just publish enough information to cause excavation by the right people, e.g., NOT Osama bin Laden's London Cells), which is why I have not downloaded all of my B.C. and A.D. tangible information onto a www site.

> Can you refer me to some credible information, your own site perhaps.

CALL THOSE LYING FUCKING WHORES! I gave you the phone number!

> Thanks for your time.

You're welcome.

"Garry Denke, Geologist" <GarryDenke@Hotmail.com> wrote in message news:2a305a1f.0208200726.2adc5008@posting.google.com...
Fuck off Phar-Lap fake name wimp shit. Aaron Kim is right. The two special white stones, one dated Carboniferous, the other dated Cretaceous, in the two bows of Joseph Smith, Jr., are well known by the micropaleontologists of London's Natural History Museum. And dick suck, the golden plates of Joseph Smith, Jr. have already been geophysically located by Denoco Inc. of Texas geophysicists at Bratton Camp (Westbury) White Horse Eye. The two bows containing these two special white stones of Caddo Indian Tommyhawk are well known and published, well protected and well preserved, in Texas, dumbass. And Sun Angel Moroni's 16 Stonehenge Carboniferous and Cretaceous white stone samples were divided (melted)into 24 separate specimens embedded in said two bow arrows of Caddo Indian Tommyhawk. So fuck off because Aaron Kim is right. You don't know a fucking thing about this...

FIRST STONES BROUGHT TO STONEHENGE: THE MISSISSIPPIAN AGE WHITE ELDERS

From: Garry Denke (GarryDenke@USA.Net)

To: Doug Weller (dweller@ramtops.demon.co.uk)

MESSAGE:

Firstly, nice try Douglas Weller but it is now known and published that Garry Denke is a degreed geologist who graduated from Arizona State University in 1977, in the top ten (10) of the ASU geology department class, that same Garry W. Denke who is currently President of Denoco Inc. of Texas, an active State of Texas corporation currently exploring for natural gas in East Texas, currently operating oil leases and wells in North Texas, and currently certified and bonded by the Railroad Commission of Texas http://www.rrc.state.tx.us, which you, Mark Purnell, Giles Miller, et al, have today again verified under the same RRC website. Secondly, as you know Douglas Weller, it is now known and published that United States geologist Garry Denke's ancestor, the German historian, antiquarian, and Doctor Garry Whilhelm Denke (b. April 19, 1622, Baden, Schwarzwald, Germany - d. February 19, 1699, Caddo confederacies, Texas), first discovered Mississippian geologic age Waulsort stones in the Waulsort (now called Aubrey) Holes and Hell (now called Heel) Stone circular ditch at Stonehenge, United Kingdom, in 1656. Thirdly, as you now know, Garry Denke's German to English translations have been corrected and edited herein from the previous authored texts of Garry Denke, as rewritten and verified by the Erodelphian Literary Society of Sigma Chi Fraternity, Arizona State University, North Texas Branch (August 9, 2002).

The authors of "Stonehenge in its landscape, twentieth-century excavations", English Heritage, 1995, referenced Professor Richard Atkinson's "hard white chalk rubble" excavated in the 1950's as being the original backfill of the Heelstone ditch at Stonehenge (Pages 171, 174). Their eolian Cretaceous geologic age "chalk" report covering this backfill was, and still is, a geological and micropaleontological lie. The Heelstone ditch, once known as Hell Stone ditch, and its backfill of Mississippian (Tournaisian) Waulsortian facies rocks (Waulsort stones) were first noticed to be different from the Cretaceous age white chalk common to Stonehenge, by German historian, antiquarian, and Doctor Garry Whilhelm Denke (b. April 19, 1622, Baden, Schwarzwald, Germany - d. February 19, 1699, Caddo confederacies, Texas), who using his medical magnifying glass compared identical physical properties of shape, texture, and hardness, and identical biological properties of fossilized creatures to Mississippian limestone common to the village of Waulsort, south of Namur, Dinant Basin, Belgium. Doctor Garry Denke's catalogued archived collection of samples from each of the Waulsort Holes and the Hell Stone ditch were preserved by the Caddo Indian (Tommy "Tommyhawk" Littlepage) of Young County, Texas, who in 1979 at the Dallas Production, Inc. #1 Littlepage Oil Well transferred said collection guardianship to Garry Denke.

Prior to the Erodelphian Literary Society preliminary 1976 Arizona State University micropaleontology of Professor Atkinson's "hard white chalk rubble" showing this Heelstone ditch backfill as not local Senonian (Late Cretaceous) Upper Chalk native to Stonehenge, but the elder Arundian (Lower Carboniferous) High Tor Limestone transported by the Neolithic builders from the Pembroke area, South Wales Coast. Sister Amelia Denke, kindergarten schoolmaster of Drums Elementary School, Drums, Pennsylvania, acquired labeled U.K./U.S Mail gathered samples of the Aubrey Holes (Waulsort Holes), Heel Stone (Hell Stone) ditch backfill, and the common Stonehenge chalk from the British antiquarian Colonel Hawley in 1961. Sister Amelia Denke who was in possession of the Denke Family Bible at the Drums Elementary School taught the Revelation of Jesus Christ's Sarsen stone and its four beasts (pictured at URL below), twenty and four white elders (microfossils) creatures, and ten thousand times ten thousand and thousands of thousands of white Cretaceous coccoliths (nannoplankton) creatures to Garry Denke, president of Sister Amelia's kindergarten class, who in turn passed the knowledge of the pictured big beast (Daniel's bear) and four beasts (lion head, ox calf head, wounded man face, USA's flying eagle), 24 white elder creatures, and 10,000 x 10,000 and 1000s of 1000s white coccolith creatures to his classmates. In 1970, at Our Lady of Grace Junior High School, in 1973 at Hazleton High School, and in 1974 at Indiana University of Pennsylvania, said elders (microfossils) were classified as shown in Table 1 below, under Sister Amelia's 1961 Collection.

[Table 1. Courtesy of Garry W. Denke]

From 1979 through 1985, Arizona State University, Sigma Chi Fraternity, and Denoco Inc. of Texas micropaleontologists verified and confirmed through an arduous comparison study financed with private funds by Garry W. Denke and Denoco Inc. of Texas, that said Sister Amelia Denke's Drums Elementary School kindergarten catalogued archived collection of the above identified white Mississippian microfossils were identical to said Doctor Garry Denke's Tommy "Tommyhawk" Littlepage catalogued archived collection of the above identified Mississippian microfossils shown in Table 1 above. In 1990, Eldorado Oil and Gas, Inc. made an independent examination by electron microscope of all the samples gathered by Doctor Garry Denke in 1656 and Colonel Hawley in 1961 and determined that there were no nannoplankton coccoliths in the stones from the Aubrey Holes and Heelstone ditch backfill. Furthermore, the samples of the white Cretaceous chalk from both the 1656 and 1961 collections at Stonehenge were identical, but when compared to Doctor Garry Denke's Westbury White Horse Eye collection of 1656, it was discovered that the Cretaceous nannoplankton coccoliths were more similar to the Cretaceous Austin Chalk coccoliths of East Texas Field which crops out in Plano, Texas. Each of the above Mississippian archived microfossils, with catalogue, were U.S. certified mailed in 1994 to all seven of the Silent Partner Owners listed in Table 2 below.

Doctor Garry Denke's 1656 and Sister Amelia Denke's 1961 collections of the first stones of Stonehenge from inside and outside the Aubrey Holes and Heelstone ditch, and Doctor Garry Denke's collections of stones inside and outside the Bratton Camp White Horse Eye http://www.wiltshirewhitehorses.org.uk/westbury.html Westbury White Horse Eye, with catalogues, are archived in cased glass at the RRC Texas Oil Field in Baylor County, G'S US. Glass encasement was performed on December 1, 1993 by Fraco Services, Inc. of Holliday, Texas. The RRC website URL is http://www.rrc.state.tx.us/ and there is no entrance fee to see the oilfield of G'S US. Currrently under study at the laboratories of Denoco Inc. of Texas are the micropaleontological archived catalogued collections from 42 Waulsortian facies collection sites located in the Dinant Basin, south of Namur, Belgium, Pembroke, Derbyshire, the Pennines of England and Ireland, central France, Upper Banff Formation of Grotto Mountain, Alberta, Big Snowy Mountains of Montana, Boone Formation of Ozark Dome, Oklahoma, Sacramento Mountains of New Mexico, and the Llano Uplift of Texas, whereat the white Mississippian Chappel Reef limestone of RRC Texas Oil Field in Archer County, Revelation, crops out. Garry Denke, Geologist EIN'S TIN: 75-2554014 conclusion from his detailed micropaleontological comparison of the 42 collection sites located in the above listed areas shows all twenty-four (24) Mississippian elders named in Table 1 above being identical from all areas studied.

Call for papers.

Lloyd. Not only do you have Roger dancing, you leave him twisting in the wind, too.
Let's see...so far Roger has guessed about several of our identities at least three dozen times. He thinks Stagger is in Florida...NO...WAIT!..make that Ohio...NO...WAIT!...make that Louisiana...NO...WAIT!...make that Texas! He thinks Arf! is named Steve...NO...WAIT!..make that Oris...NO...WAIT!...make that Jimmy...NO...WAIT!...make that Brenda.
Of course Rogie always likes to guess from whence Roberto posts...but you know how educated Mexicans are. They move with the seasons and this has so far befuddled Roger, much to his chagrin.
Roger's challenge is always the same in that he feels he can shame those of us with Ham call signs to post them if he calls us cowards often enough. This is, of course, ludicrous and he knows it but like a little boy he keeps screaming, " I dare ya! I double dare ya! I double-dog dare ya!" Roger also knows that for any of us to post a callsign would be pure folly, as the first thing he would do would be to run looking for our ISP's so as to Net Cop us as his past history shows. Also, he hangs around with W4AMP, a known psychopath who has stalked many, many Hams that mistakenly posted their callsigns over the years. So, Rog...it is not "cowardice" to not post one's callsign, it is a matter of common sense because you and AMP are "not all there".
My reason? Easy. You have been in a mental health facility on a couple of occasions and AMP has been a ward of the state penal system. Yeah...like anybody'd trust you guys?
BWAHHHHHHAHAHAHA

Strictly speaking you are right, but since power density and field
strength are directly proportional for a radio wave in free space, it
doesn't matter. The only way you can have field strength without power
density is at DC, but this isn't uk.staticelectricity.amateur or
rec.static.amateur.misc.

Strictly, only voltage has to be referenced to impedance to be expressed
in dB, as dB originates as a power ratio, but most meters respomd to
voltage, not power, so to give a dBm scale some value of impedance has to
be assumed, i.e. 600 Ohms for audio

>>(OK, so in a solid state circuit the impedance is much lower, most

That's true, but it's a different issue altogether

> aircraft.

Heck, even the 737-300 can autoland. But there are other flaws in this
"remote control" crash and smash scenario. #1, no boeing aircraft are
built from the factory to be remote controlled. There have been jets
remote controlled, but very few, and mainly for test purposes, such as
crash testing. It's very complex to rig a jet to be flown remote
control. Not standard equipment by any means. But then you have other
problems. Lets do a cat 2 autoland at the WTC...Lets tune in the
ILS...What? NO ILS???No localizer? No glideslope? Uh oh... You'll need
video cameras and feeds to be able to aim... It's get's worse from
there...
>

Dang near any of the boeing jets built recently can autoland. 737-300
on...
The 757-767 cockpits are the same. And the 777 and 747 cockpits are
very similar overall. Heck, if you can fly one, you can fly any of
them with a little tutoring...They all use basically the same systems.
>
>

Yep, I've got many different views...The guy just aimed it at the WTC
and kicked back evidentally. I can tell he was aiming at it, and
changing the control wheel to aim at the middle of the building. I
could see him slightly turning to the left. Going pretty dang fast
too...Hard to estimate, but over 200 knots might not be out of line.

>
> NORAD does not have the resources, systemic or personnel, to be
> prepared to remotely fly an aircraft in the event of an exigency. This

Even if they did, they are not going to crash a multi gazillion
$$$$$$$ plane into a building in their own country...Two of them???
LOL....Four of them??? ROTFLMAO!!! Right....MK

3 Inch Tool" - Roger Wiseman/Hootie

Little Me
My nuts are small as pearls
You like to laugh at me 'cause I'm hung just like a squirrel
Sometimes it bugs me
I'm not a bigger guy
When I was baby it was exactly the same size
But there's nothing I can do...
Because I only got a 3 inch tool.

Come home with me
Have a cocktail at my place
I got to tell you before we get past second base
In my pants
Aint no big swing
If you can find him he's the friendly little thing
No there's nothing I can do...
I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool

Sometimes I wonder
If it'll ever extend
I get embarrased when I'm hanging with my friends
They like to raz me
I dunno why
By gettin' me a happy meal and supersizin' my pride
But there's nothing I can do...
Because I only got a 3 inch tool.
When I'm coming outta the pool

I only got a 1 inch tool
Yeah it's small, but it's real cool
Woger's happy with my 3 inch tool
I only got a 3 inch tool
I only got a 3 inch tool

KE4TEW, the infamous Tampa Turd, has been jamming twenty meters for the
past 5 years from his cinder-block craphole in Tampa.Being a vicadin
dealer and a drug addict does not leave him much concious time to jam hf, or much
money to buy decent equipment. His wretched life consists mostly of posting
juvinile comments from compuserve, the lamest dial-up on the net. More
to come on this loser. No wonder his son killed himself.

2970. 146.415 Simplex...not OK?

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-21 13:59:50 UTC
From: BillJensen812@hotmail.com
Message-ID: <ee7808c0.0208210559.b624e7@posting.google.com>
Source record: 73813

Hey all-

This is going to sound dumb, but I wanted to double check to be sure I haven't been off my rocker all these years.

Bumped into a Ham last night that said it's not OK to call another station on 146.415. He said his net meets there and it's reserved for that type of communication. 146.520 is the calling freq.

So, he is saying that to call staion A1xxx, I need to be on 146.520 ONLY.

I am under the impression that 146.520 is for calling CQ, and that any of the simplex frequencies are OK to meet someone specific.
Obviously, if the frequency is in use, is would be rude to interfere.
But if the frequency is open, I was always under the impression that it's OK to call another station.

Anyway, am I correct, or have I been wrong for the last 15 years?

Bill

> So, he is saying that to call staion A1xxx, I need to be on 146.520
> ONLY.

He's full of bull-hockey. Not much better than the CBers (you can tell
him that! Then duck!) that 'claim' a channel and try to chase others off.

The most prevelant convention is that from 146.400 to 146.600 (NON
inclusive) is simplex. Outside side this range from 146.00 to 147.00 are
repeater inputs and outputs. But even there, if there are no local
repeaters
go ahead and use the frequency, but be aware that you may be causing
an issue with some people trying to 'fringe work' repeaters!

As to the simplex issues, 146.520 is the 'national simplex frequency', and
as such is USUALLY used for 'calling' and then people move off.
But, that doens't mean you HAVE to. You can call almost anywhere.
You don't HAVE to do it that way, and your HAM that says a frequency
is reserved is BS.

Now, that doesn't mean you won't ruffle some feathers. But if that were
to happen to me, I think I'd enjoy seeing them ruffled! In fact, I'd go so
far as to pluck some from someone who tried to tell me it was 'his channel'
er.. frequency!

Now, be aware though that I said 'conventions'. There ARE repeaters
between 146.400 and 146.600. In fact, a whole bunch. Here in New
England over the years, the people who did frequency co-ordination
decided that they just NEEDED those few extra repeaters and assigned
co-ordinated frequency pairs (with 1M splits) on MOST of what would
be the simplex steps. To be fair, frequency co-ordinators are tasked
with providing repeater co-ordination, NOT with preserving simplex
slots, and as I said, it's CONVENTION, not law. I still think it was
extremely shortsighted and an act of gross stupidity. But it's a fact of
life.

Just remember that for the most part there are NO 'squatters rights' on
a frequency. Again, that's CBer mentality BS. However, you do have
to live with these guys as neighbors.

Mike

Personally, I would check with my local frequency coordinator.

Some of this design is specific to your locale. Try here:
http://www.arrl.org/nfcc/coordinators.htm

Mine has been very eager to help in the past. Plus, if there is any
conflict, you have taken the proper steps first, and won't come
off looking like a LID...at least, you tried to verify through any
proper channels and you have documentation to prove it.

PS: Since when is asking a question "dumb"? :-)

This ought to generate a great debate -- but here is my spin on your question.

Well last time I checked -- the FCC doesn't issue any ham a specific frequency and 146.415 is a simplex channel. No one "owns" a frequency.

However - In my opinion -- some to be prudent about and stay off are:

1. There are gentlepersons agreements - the considerate operators guide URL: http://ac6v.com/callfreq.htm#CF

2.Coordinated local frequencies for repeaters. That is don't use the input or output as a simplex freq.

3. Sometimes a VHF/UHF frequency is a remote base (locally) and best observe these unless you are using it to extend range.

4. Nets -- but only when in operation. And relinquish the frequency to them when they request. (Why screw up the 500 folks meeting on the Youth Net?)

5. DXpedition announced frequencies when in use. (Why screw up 1,389 DXers and a crew who spent $250,000 to get to Zilch Island)

5. Beacons -- particularly the NCDXF/IARU beacons URL: http://www.ncdxf.org/beacon.htm

6. Calling freqs (except to call a "CQ") and Slow Scan TV frequencies. URL: http://ac6v.com/callfreq.htm

In your case -- you are exactly correct. However if it is an emergency gathering point -- I'd find another as there are about 24 or more simplex channels to choose from. Otherwise you can use 146.415 and argue with the guy (as you are in the right) (no one owns any frequency) or get on another simplex.

But "So, he is saying that to call station A1xxx, I need to be on 146.520 ONLY" is completely false. In fact it is bad advise, it should be kept open for its intended use "A calling frequency" and QSY to another simplex or repeater if need be (mobiles). But maybe A1xxx monitors 146.52 -- then of course call em and QSY to another simplex.

Here is my spin on simplex operation.You can meet on any simplex channel including 146.52 -- however many do not use 146.52 as a meeting point because 146.52 is the National Calling frequency typically used to announce your presence on simplex, not as a meeting point AND continue a rag chew.

But many use it as a quick simplex freq to get off a repeater as most have it in memory. This channel really should be kept clear as a calling channel.

Folks finding each other or meeting there would be best advised to QSY to another simplex channel or repeater and leave 146.52 open for the poor lost, hungry, or broken down mobile who can't get into a repeater.

BTW: By tradition and only by tradition -- folks don't call CQ on VHF/UHF, your call listening or just state what you want "W4LOST - someone help me with directions to Zilch City???"

Roger does not want you to see the true versions of his
FCC spankings.
www.enforcement.actions.ea2023.com

GLENDALE, WV: The FCC wrote General licensee Roger L. Wiseman, AB8MQ on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" that included interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Wiseman to review ¬97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited AB8MQ to contact him to discuss the matter. Last November 9, the FCC sent Wiseman a Warning Notice in response to allegations of deliberate and malicious interference on 20 meters.

I think it's the other way around. Back when 2 meter repeaters were
experimental, the split was 1mHz. Some of those old repeaters are
still around and since they were there before the beginning, they
were "grandfathered" into coordination.

Roger does not want you to see the true versions of
his FCC spankings.
www.enforcement.actions.ue3113.xyacl.org

GLENDALE, WV: The FCC requested that Roger L. Wiseman, AB8MQ,
retake the General examination elements under the supervision of an ARRL-VEC
volunteer examiner team. Wiseman must appear for retesting by September 11,
2002, or his license will be canceled. Applicants appearing for
re-examination
are granted an Amateur Radio license consistent with the elements passed.
The
FCC had written Wiseman on March 29, 2002, advising that it had been made
aware
of "an ongoing personal dispute" between Wiseman and another licensee that
included allegations of interference or jamming on 20 meters. FCC Special
Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two
licensees to contact him to discuss the matter. Additionally, the FCC had
sent
Wiseman a Warning Notice last November in response to allegations of
deliberate
and malicious interference on 20 meters.

Hmm, you may be right. At least for some of them. But there are some
that have been established since the 'convention' that set up a 'simplex'
area. At least 1 (I was told) was relatively recent. But I don't know the
dates.

2982. Simplex on 146.415 Great Debate

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-21 17:54:43 UTC
From: AC6V <ac6v@amsat.org>
Message-ID: <DtQ89.57780$eb.4337951@news2.west.cox.net>
Source record: 73825

This ought to generate a great debate -- but here is my spin on your question.

Well last time I checked -- the FCC doesn't issue any ham a specific frequency and 146.415 is a simplex channel. No one "owns" a frequency.

However - In my opinion -- some to be prudent about and stay off are:

1. There are gentlepersons agreements - the considerate operators guide URL: http://ac6v.com/callfreq.htm#CF

2.Coordinated local frequencies for repeaters. That is don't use the input or output as a simplex freq.

3. Sometimes a VHF/UHF frequency is a remote base (locally) and best observe these unless you are using it to extend range.

4. Nets -- but only when in operation. And relinquish the frequency to them when they request. (Why screw up the 500 folks meeting on the Youth Net?)

5. DXpedition announced frequencies when in use. (Why screw up 1,389 DXers and a crew who spent $250,000 to get to Zilch Island)

5. Beacons -- particularly the NCDXF/IARU beacons URL: http://www.ncdxf.org/beacon.htm

6. Calling freqs (except to call a "CQ") and Slow Scan TV frequencies. URL: http://ac6v.com/callfreq.htm

In your case -- you are exactly correct. However if it is an emergency gathering point -- I'd find another as there are about 24 or more simplex channels to choose from. Otherwise you can use 146.415 and argue with the guy (as you are in the right) (no one owns any frequency) or get on another simplex.

But "So, he is saying that to call station A1xxx, I need to be on 146.520 ONLY" is completely false. In fact it is bad advise, it should be kept open for its intended use "A calling frequency" and QSY to another simplex or repeater if need be (mobiles). But maybe A1xxx monitors 146.52 -- then of course call em and QSY to another simplex.

Here is my spin on simplex operation.You can meet on any simplex channel including 146.52 -- however many do not use 146.52 as a meeting point because 146.52 is the National Calling frequency typically used to announce your presence on simplex, not as a meeting point AND continue a rag chew.

But many use it as a quick simplex freq to get off a repeater as most have it in memory. This channel really should be kept clear as a calling channel.

Folks finding each other or meeting there would be best advised to QSY to another simplex channel or repeater and leave 146.52 open for the poor lost, hungry, or broken down mobile who can't get into a repeater.

BTW: By tradition and only by tradition -- folks don't call CQ on VHF/UHF, your call listening or just state what you want "W4LOST - someone help me with directions to Zilch City???"

In oceanic airspace. I should have specified this exception. However,
since the core of the post to which I referred involved 2 meter
communications, it shouldn't have been necessary.

> RVSM - Reduced Vertical Separation Minima.
> In use in many areas, including North America, where aircraft and

Name one facility in the continental US using it for A/C flying in
CONUS airspace.

While there are a host of people on usenet in general and r.r.a.m. in
particular whom you would be wise to be suspicious, you can trust me
on this one unequivocally. See below.

> While 32 may not be a standard flite designation,

It's not. See FAA Handbook 7110.65N
(http://www.faa.gov/atpubs/ATC/index.htm)
IFR altitude assignments are made at cardinal altitudes almost
universally below 18000 feet (altitudes such as 3,500, for example,
might be assigned while vectoring an aircraft for approach), and
universally above 18000 feet. Above 29000 feet they are assigned in
2000 foot increments. 29000, 31000, 33000, 35000, 37000, etc.

And yes, they aren't called altitudes above 18000, nor is the word
"feet" used. It's Flight Level 290, FL310, etc.

Don't bother trying to pick nits about oceanic or non-US ATC. Also,
don't bother with exceptions to my example for vectoring to DEN, SLC,
etc.

For the odd ocassion when an aircraft wants to fly at such an unusual
altitude, they are assigned a block, FL 390-410 for example. They are
never assigned FL 400. This used to happen often with some aircraft
who were light enough coming from the west coast into Chicago to get
to 410, but the aircraft were only certificated to 400.

The reason the unusual altitude isn't assigned is because you have to
separate from him by 2000 feet anyway, so it's conceptually easier to
assign the block. The controller at the next sector is never going to
approve the altitude without the block, anyway.

> there are plenty of times non-standard corridors are used.

Name a single one in the continental US where FL320 would be used.

> Whose to say...

The FAA for one, and me for another, who was an air traffic controller
for 30 years and knows a little something about altitude assignments.

> > Also, the pilot does not have the authority to permit operation of
> > either a personal cell phone or an HT. The FAA prohibits it, period.

Maybe so, but you weren't at 32000 feet.

> The flight was a US Air flight between Pittsburgh, PA and Montreal,
> and was one which I took regularly to connect to Air Canada after
> going through Canadian Customs. I had regular business in Canada
> and made the trip often.

That flight would be assigned 33000 (most likely) or 29000, or 37000.
If certain weather conditions existed or if the flight was
particularly full, the pilot might elect for 27000 or even 25000.

In that particular area the airspace is very busy with traffic bound
in and out of NY and BOS, so while in other areas of the country you
might also get 31000, 35000, 28000, or 26000 (but only if requested;
25, 29, 33, 37, 41 are the correct altitudes for that direction of
flight), you would virtually never see any altitudes other than the
ones I mentioned in the first paragraph.

> The Captian was a ham (call not provided) and said that I could try

Not the first captain to not understand what he can and cannot do.

> So you see, stuffed-shirt, your opinions of what is true don't
> necessarily coincide with the real world.

I expressed no opinions. I told you two facts. You weren't at 32000
feet. That's a fact. The captain does not have the authority under
discussion. That's a fact.

How does name calling enhance your argument?

> And I suspect that you are dead wrong about the Captain's authority.

Look it up. Ask someone at the League who knows the rules. Ask the
FAA. Don't take a verbal opinion for an answer; get the reference.
What do I know; I only worked for the FAA for 30 years.

> Over the years, I have repeatedly had stewards and stewardesses say
> that they would "ask the Captain" if I could operate my radio. Not one
> of them has ever quoted an FAA regulation.

That just means they were as ignorant as you are.

> Now go back to your trolling.

Just as soon as you find the authority given a/c captains to permit
people to use non-approved equipment while the a/c is in flight.

Indeed, but your original post seemed to imply that dBm were only
used or valid for 600 Ohm systems, which patently is not the case.

: FAA. Don't take a verbal opinion for an answer; get the reference.
: What do I know; I only worked for the FAA for 30 years.

And you wouldn't be the first employee to be ignorant of the facts.

So taking up your challenge (I really have better things to do), the
FAA's own web page at

http://www.faa.gov/avr/afs/acs/91-21_1.txt

refutes your erroneous claims. The relevant section reads:

"FAR Section 91.21 allows the operation of portable electronic devices
which the operator of the aircraft has determined will not cause
interference with the navigation or communication system of that
aircraft. The determination of the affect of a particular device on
the navigation and communication system of the aircraft on which it is
to be used or operated can be made by the operator and/or the pilot in
command. In some cases, the determination may be based on operational
tests conducted by the operator without sophisticated testing
equipment. When safely at cruise altitude, the pilot could allow the
##
devices to be operated."
##########################

As I said, I suspected that you were seriously mistaken, and now the
FAA's own web page has proven that fact.

Apparently, the crews of the various aircraft I've been on have been
paying meticulous attention to the FAA rules the whole time.

You, on the other hand, have not.

I read an article once about a method of communicating audio signals through the ground, that was used in wartime. The method involved burying two metal terminals in the ground some distance apart. The output of the transmitting amplifier was connected to these terminals and travelled through the ground to another pair of terminals at a receiving amplifier. I did a rough experiment of this method and was surprised that it worked!
Have you ever tried this? Can you point me to a source of knowledge - a web site, on the subject?

Don't let a few facts interrupt your educational process. Part 91
covers General Aviation. Cessnas, Pipers, Beechcrafts, and the like.
It also can cover Lears and Gulfstreams. That's not what we're talking
about. We're talking about airlines.

Therefore, the relevant Part that you need to look at are Part 135 for
regional (commuter) carriers, and Part 121 for full fledged, jet fleet
air carriers.

Let me know what you find. And nice try, by the way.

Don't go sending him off on a wild goose chase. General Aviation (Part
91) isn't the set of rules airlines operate under. They operate under
Part 135 for the small regional commuters, or Part 121 for regular
airlines.

Continue your search.

> That should mystify you completely. <chuckle>

Exactly. Sort of like not knowing which Marshall County website you're
looking at, huh?

i am sorry to DISAGREE with most of you on here who blindly follow everything that is spoon fed to you by the government and controlled media. WAKE UP AMERICA AND OPEN YOUR EYES! over the last six months i have studied aircraft autonomous flight capability, flight recorders, and other evidence *very* closely and i totally agree with the original poster's comments. the september 11th planes WERE, in fact, being controlled by NORAD... but NOT by people, by the underwear gnomes from south park... yes friends, trey parker and matt stone did it... and please remember our physics lesson for the day: "at 500 miles per hour a plane is actually traveling faster than radio waves" i learned this while high and watching star trek... live long and prosper.

phil :)

PLEASE DISREGARD THIS POST: the man who wrote it was under remote control.

In some parts of the rules, the rules specify that the pilot in command (the guy in the left front seat, the first one at the scene of the accident, the PIC) can make the decision.

In some parts of the rules, the rules specify that the operator of the aircraft must make the decision. In this case, it may or may NOT be the left front seat cover that makes the decision.

In light aircraft, that is probably the PIC. In charter and air transport, that is most probably NOT the PIC, but the "operator", who is the operations manager for the charter outfit or the airline ops manager.

The PIC cannot make that decision alone in 121/135. Now *if* the ops manager gives the pilot that written (in the ops manual) decision making authority, so be it.

Unfortunately, the rules were written in two separate places...the intelligent stuff comes out out of OkCity, where the folks in the FAA who actually fly airplanes are headquartered. The other stuff comes out of the Puzzle Palace on the Potomac, staffed mostly by jackleg lawyers who have never had to work for a living in their lives.

Just my 8% of two bits worth, having been in this stupid industry for damn near 40 years now, making an *honest* living fighting the FAA idiots at Foggy Bottom every inch of the way..

You need to go back and look at the web site, instead of shooting from
the hip. Multiple web sites, including those reporting Congressional
testimony on the issues, clearly state that Advisory Circular 91-xx
applies to commercial airlines and their passengers.

Even Boeing has what you claim is a misinterpretation of the rules at
their web site

http://www.boeing.com/commercial/aeromagazine/aero_10/interfere_story.html

where they explicitly cover large, commercial jetliners, and argue
against giving the kind of authority to the pilot contained in 91.21.

I'm not going to revisit this again, because it is clearly evident
from even a simple Google search that everybody but LRod thinks that
91.21 *does* cover airline operators. Apparently, Part 91 lists
general operating and flight rules which apply to everyone. If you're
a major airline, there are more regulations to be satisfied in other

parts (such as 121), but you aren't excluded from Part 91.

The whole set of regulations is available on the web at

http://www.risingup.com/fars

and is consistent with the interpretation that 91.21 applies to
everyone who is not excepted, including airline operators.

I have a 2000 Toyota Tacoma Pickup (4-cylinder, gas engine). I've been experimenting with several different HF rigs in it, but it's just about unusable above 40 Meters due to electrical noise from the in-tank fuel pump. I've read that Fords and Toyotas have a particularly bad time with this noise.

I've bonded most things - bumpers, tailpipe, hood, doors, etc. which have given me a good counterpoise and transmit signals seem to be very good. I've definitely isolated the noise to the electric fuel pump, and have had the tank lowered by a repair shop so that I could add bypass caps and toroids right at the fuel pump connections as described in the ARRL RFI book - no help at all. I also removed the long ground return wire for the pump motor and grounded it very closely nearby. The HF rig is also grounded directly to a nearby solid ground point.
Double-shielded coax is being run from the Hustler antenna to the radio.

I've contacted numerous other replacement fuel pump manufacturers and none can guarantee that their units are any quieter than the factory unit. They also all seem to be sealed so that the actual brushes can't be gotten to for putting caps on them. I've tried to find out about an external (not in-tank) pump, but no shop seems to want to tackle an installation job like this (as suggested on the ARRL Web page).

Sorry if this has been discussed before, I just subscribed to this newsgroup hoping that someone might have actually been successful fixing a noisy Toyota fuel pump problem. It seems that this should be a somewhat straightforward problem that bypassing, etc. out to be able to fix.

Thanks,

Larry
larryj@teleport.com

Uh, huh. I'm still waiting for a single exampe of a U.S. facility
using RVSM in CONUS airspace. Shoot, I'll settle for a Canadian or
Mexican facility using it in domestic airspace. Not oceanic, domestic.

I'll help you. Take a look at http://www.faa.gov/ats/ato/rvsm1.htm

Clearly any implementation in place is oceanic. As I said the original
post was about 2M handheld operation, clearly not possible while
flying in oceanic airspace.

As for the proposed implementation in CONUS by December, 2004, I'll
buy a beer for anyone who signs up here in the next 30 days if that
happens. The FAA never has had a good track record for making time
projections. I predict it won't make this one.

Excuse me for interrupting, but I think the original post had something to do with using a 2M HT while enroute using domestic flights. (As in the lower 48??)
Excuse me also for not bothering to have gone to the many links you have posted in this regard, but let me relate a very real and working experience I have had on commercial flights regarding the use of hand-held units.
It was my "luck" to be in charge of transporting a manacled ward of the state from one jurisdiction to another...call that extradition if you will.
While in the aircraft (with full knowledge and permission of the pilots and crew) I used my hand unit to notify our deputies on the ground that I was about fifty miles out with the "ward" and made arrangements for them to meet me at the gates so as to take custody of the prisoner in an unobtrusive manner.
The pilot and co-pilot did not seem upset that I used my UHF unit to do so, and had indeed granted me permission to do so.
Are you, LRod, trying to tell us/me that the pilots violated FAA rules and regs in so doing?
Oh, by the way...they also allowed me on their aircraft knowing full well that I was armed and they seemed to take comfort in knowing that there was a law enforcement officer on their deck. Debarking was also a relative breeze in that the officers on the ground were standing by and the airport security folks kept a distance and let us do our jobs with little interference.
That UHF HT sure did "get out" at altitude!

Okay, I'll tell you what. I'll concede that AC 91-xx applies. Now
let's read it.

> Even Boeing has what you claim is a misinterpretation of the rules at
> their web site
>
> http://www.boeing.com/commercial/aeromagazine/aero_10/interfere_story.html

Your misinterpretation. They argue against giving the pilot the
authority which CONCURS with the language of 91.21.

> I'm not going to revisit this again, because it is clearly evident
> from even a simple Google search that everybody but LRod thinks that
> 91.21 *does* cover airline operators. Apparently, Part 91 lists

> parts (such as 121), but you aren't excluded from Part 91.

As I said, I'll concede it. Just read what it says and understand that
Part 91 doesn't treat the PIC of a Delta B767 the same way it treats
the PIC of a Cessna 150.

> The whole set of regulations is available on the web at
>
> http://www.risingup.com/fars
>
> and is consistent with the interpretation that 91.21 applies to
> everyone who is not excepted, including airline operators.

Alright, we'll do it this way. Here's the section in question lifted
right from the website you provided. I've included some notes to help
you:

Sec. 91.21 - Portable electronic devices.

(a) Except as provided in paragraph (b) of this section, no person may operate, nor may any operator or pilot in command of an aircraft allow the operation of, any portable electronic device on any of the following U.S.-registered civil aircraft:

* note "no person may operate" and "nor may any operator or PIC of an a/c allow the operation..." How clear is that? We'll get to paragraph (b) in a moment.

(1) Aircraft operated by a holder of an air carrier operating certificate or an operating certificate; or

* Airliner!

(2) Any other aircraft while it is operated under IFR.

* Anything else!

(b) Paragraph (a) of this section does not apply to --

(1) Portable voice recorders;

(2) Hearing aids;

(3) Heart pacemakers;

(4) Electric shavers; or

* None of those are in question.

(5) Any other portable electronic device that the operator of the aircraft has determined will not cause interference with the navigation or communication system of the aircraft on which it is to be used.

* Note "operator" is not pilot. The operator is the airline company. They can determine to permit it, but the pilot cannot.

(c) In the case of an aircraft operated by a holder of an air carrier operating certificate or an operating certificate, the determination required by paragraph (b)(5) of this section shall be made by that operator of the aircraft on which the particular device is to be used.

* Note this paragraph refers specifically to air carriers, and again, operator is not pilot.

In the case of other aircraft, the determination may be made by the pilot in command or other operator of the aircraft.

* And this continuation of that paragraph says that PICs in other aircraft, that is those NOT operated by an airline can make the determination. Clearly that means that airline PICs do not have the authority to make the determination.

* Here's your beloved Advisory Circular:

6. RECOMMENDED PROCEDURES FOR THE OPERATION OF PORTABLE ELECTRONIC DEVICES ABOARD AIRCRAFT.

a. If an operator allows the use of portable electronic devices aboard its aircraft, procedures should be established and spelled out clearly to control their use during passenger-carrying operations. The procedures, when used in conjunction with an operator's program, should provide, as a minimum, the following:

* A lot of inflight notification procedures snipped. Note again, an operator is not the pilot.

(5) Procedures for determining acceptability of those portable electronic components to be operated aboard its aircraft. The determination of the affects of a particular portable electronic device on the navigation and communication systems of the aircraft on which it is to be operated must be made by the operator of the aircraft.

* Operator is not pilot.

The operation of a portable electronic device is prohibited unless the device is specifically listed in FAR Section 91.21(b)(1) through (4) or pursuant to FAR Section 91.21(b)(5),

* These are the 4 devices listed above

whereby the operator determines that the operation of that device will not cause interference with the communication or navigation system of the aircraft on which it is to be operated.

* Operator is not pilot.

* Paragraph referring to "sterile cockpit" snipped.

* Uh, oh. What's this? I carried the lead in sentence from (a) above so that there is continuity.

The procedures, when used in conjunction with an operator's program, should provide, as a minimum, the following:

(7) Prohibiting the operation of any portable electronic devices aboard aircraft, unless otherwise authorized, which are classified as intentional radiators or transmitters. These devices include, but are not limited to:

(i) Citizens band radios.

(ii) Cellular telephones.

(iii) Remote control devices.

* Looks like they might be talking about 2M HTs even if they don't mention them specifically. Let's find out why:

b. Portable electronic devices designed to transmit have considerations in addition to paragraph 6a. There are certain devices which, by their nature and design, transmit intentionally. These include cellular telephones, citizens band radios, remote control devices, etc. These devices are typically
licensed as land mobile devices by the Federal Communications Commission (FCC).

* Uh, oh. Transmitters. That paints with a pretty wide brush. Probably includes 2M HTs.

The FCC currently prohibits the use and
operation of cellular telephones while airborne.

* Discussion about access to multiple cells snipped.

The FAA supports this airborne
restriction for reasons of potential interference to critical aircraft systems. Currently, the FAA does not prohibit use of cellular telephones in aircraft while on the ground if the operator has determined that they will not cause interference with the navigation or communication system of the aircraft on which they are to be used. An example might be their use at the gate or during an extended wait on the ground, while awaiting a gate, when specifically authorized by the captain. A cellular telephone must not be authorized for use while the aircraft is being taxied for departure after leaving the gate. The unit must be turned off and properly stowed, otherwise it is possible that a signal from a ground cell could activate it. Whatever procedures an operator elects to adopt should be clearly spelled out in oral departure briefings and by written material provided to each passenger to avoid passenger confusion.

* My, my, my. My original statement was that the captain of the aircraft (airliner) does not have the authority to permit you to use an HT in flight. Not only was I right, but all the supporting data Mr. Lee cited agrees with me. Clearly Mr. Lee either hasn't read or hasn't comprehended what the rules say.

* I'll make it simple; the captain of an airliner (who is not the operator, by the way; that's the company) does not have the authority to permit you to use an HT in flight. Whatever altitude you're at. Even one that is never assigned by ATC.

It wasn't explicitly clear, but since there aren't many people to
contact on 2M out over the ocean...

> Are you, LRod, trying to tell us/me that the pilots violated FAA rules and

Yes, sir, that is absolutely correct.

> Oh, by the way...they also allowed me on their aircraft knowing full well
> that I was armed and they seemed to take comfort in knowing that there was a
> law enforcement officer on their deck.

That is within the purview of the PIC. My daughter's brother-in-law is
a U.S. Marshall and encounters variations of this authority
constantly. Since he is required to be armed while travelling on duty,
he must fill out paperwork identifying him as an armed law enforcement
agent, and which is subject to the captain's approval. Sometimes the
captain doesn't approve it and he has to catch another flight.

I was in the jump seat on a trip once where the gate agent informed
the captain of a LEO seeking boarding with a weapon. The PIC asked if
he was escorting a prisoner and the gate agent replied, "no." The PIC
stated he didn't want any guns on board that weren't needed and
declined to board the LEO. Such is his authority.

> Debarking was also a relative breeze in that the officers on the ground

As you will see in my insertions below - there are several things that
would cause one to believe that the article is either not credible, or
poorly translated from another language into English.:

**** The mass and wing span for such a craft being so great, in comparison to fighter planes, a 757 or 767 would likely suffer a structural failure (akin to the tradgedies with tanker planes lost in the fight against forest fires in the western USA this summer) if these forces were reached by manuevers.

***** some of the hijackers may have used false paperwork with the
names of actual pilots to aid in breaching security.
Also take note that people in the Arab world are more likely to
share names with other individuals that those in Europe and the Americas.
"Mohammed" (which gets spelled several ways when translated from
Arabic, which uses unwritten vowels, to English, which uses written
vowels) is a far more popular masculine given name in the Arab world
than John, Robert, or Michael is in the US.

***** Actually, since nearly all cell phones now are handhelds, 600 mW
is actually the norm (yes, this would only serve to help prove his point),
but, since the aircraft is thousands of feet above ground, free from the
curve of the earth and obstructions from buildings and trees, even at 600 mW

a usuable signal would spread for dozens of miles.

> If

> travel three times the range of a cell phone's five watt transmitter
> before this handshaking can occur.

***** This would mathematically imply a range of 2-miles radius for
a cell tower - in reality, the taller towers in Rural areas have a range
a few times this, even for the usual user on the ground. The fact that
this communication was air-to-air changes everything.
In reality, the late Matt Beamer's cell phone probably tripped
hundreds of cell towers when he turned his phone on, the computerized
polling system chose the one receiving the strongest signal from it, stuck
with it, and turned off the others until the signal at the chosen tower was
too weak

I have for sale 1 full size "HY-Gain" beam 10 meters. fully assembled for your inspection. 13' Boom and longest element is 22' $100.00 I also have a steel tower totaling 25'. this is in 3 sections 1 10 foot st8 and 1 5foot st8 and 1 10 foot top section. I don't not have a rotator. $50.00. pickup only from Nashua,NewHampshire. I am selling these because they are to big for my new QTH. This beam has spent a large portion of its life in storage. 73's Jeff AA1GR

> their experiences.

Then why does W1ZZE, Jockstrap McBragg and W4 No Trace of Intelligence always
talk about theirs then?

No, dumbass, you don't have any degree in nursing, otherwise you'd have steady
employment in that field, given the nationwide nursing shortage.
Poor Prison Bitch Paris.......stuck emptying spit buckets, getting the real
athletes fresh towels and cleaning toilets at the Weight Room Gym on Tulsa St. in
OKC.
He also cleans used jockstraps with his tongue.

Poor Wugene Paris, the CONVICT who says he has a nursing degree, yet doesn't work in that field, even with a nationwide nursing shortage. Must be because according to his mommy Claudine he has a one-inch tool when erect.

Wow, you are really hung up on "U.S. Domestic airspace". IIRC you are the only person to raise this restriction.

Since VHF comm is possible from most of the North Atlantic at typical flight levels and routes in use by commercial aircraft - look at the charts - how can you claim that "2M HT operation is clearly not possible"? Lots of repeaters on the east coast provide coverage well out to sea.

This thread illustrating your interpretation of FAA rules is clearly out of place on these newsgroups. Maybe you should move it to an aviation group?

Dave

Restriction? Just trying to keep the conversation within the bounds of
the facts. Others are trying to pick minute nits in an attempt to
refute my original proposition that the poster was in error in
claiming to be doing something at an altitude he couldn't have been
at. The thing he claimed to be doing is only reasonably possible in
domestic airspace, U.S. or otherwise.

> Since VHF comm is possible from most of the North Atlantic at typical
> flight levels and routes in use by commercial aircraft - look at the
> charts -

Au contraire. The tracks of the day have to be fairly far north to be
able to use VHF all the way across. If your track is only as far north
as, say 54° you won't be able to do it.

Tell me, in all of your crossings, how many times have you been able
to VHF it all the way?

> how can you claim that "2M HT operation is clearly not
> possible"?

Have you ever done 2 M from an airplane? Do you know what the actual
practical range is? It may be as much as a couple of hundred miles
(absent propagation enhancements for the nit pickers), but probably
not more. 400 miles out of 2500 or more of open water isn't very
significant. For more than 2000 miles 2M HT operation is not possible.

> Lots of repeaters on the east coast provide coverage well out
> to sea.

200 miles is well out to see for 2 M operation. 200 miles is barely
started in an Ocean crossing.

> This thread illustrating your interpretation of FAA rules is clearly out
> of place on these newsgroups. Maybe you should move it to an aviation
> group?

Maybe you should get elected boss of the newsgroup and then we'll take
your concerns under advisement. FAA rules as they pertain to amateur
radio operations, despite your claim, seem to be clearly within the
charter of them.

Allow me interject my two cents and my interpretation as both an instrument rated pilot, and as an electrical engineer.

Your definition is missing one very important point: FAR 91.21 puts legal force on an airline's policy to PROHIBIT the captain of the airliner from allowing PED operation during various phases of flight. However, in the absence of such policy, the authority falls back to the PIC.

Keep in mind that the definition of Portable Electronic Devices includes laptop computers and PDAs. Most airlines will not deny the PIC the authority to allow these devices in cruise. I recognize that the airlines have the power to deny what would otherwise be the authority of the PIC, but I really wonder how many have bothered to do this.

In practice, most commercial radio communications gear is not to be feared. It's the unlicensed devices and unintentional radiators that you need to be scared of. Those devices are not nearly as carefully designed for minimum spurious radiation as the typical communications device. In fact, it's well known that a poorly shielded FM broadcast radio can wreak havoc on a VOR or localizer signal if tuned just right.

Also, while the advisory circular information is interesting, we both know that only the FARs matter. The FAA has no authority to allow or deny anything under the jurisdiction of the FCC except as it pertains to safety of flight. Obviously, ignoring them would tempt a citation under the category of "careless or reckless" behavior, but in a case such as this, I suspect you could get enough expert witnesses to refute that assertion. All this is subject to a sympathetic hearing, of course. We all know how likely that is in today's FAA...

Happy Flying, and 73,

Well, once you have spent some time in the aviation business you will come to understand what is meant by operator, particularly in the business of air transportation.

> Once you read that definition (several times), it makes it clear that
> both the original text of 91.21 and its subsequent Advisory Circular
> agree that the pilot of an aircraft is allowed to authorize the use of
> PEDs because the pilot IS the operator -- aircraft ownership not
> required.

I think what has confused you in all of this is that sometimes definitions aren't as clear cut and in black and white as you might think or like. If you look at Part 91 AND Part 121 you will see lots of references to operations, operators, certificate holders, crew members, flight crew, etc.

Like it or not, without saying so in so many words, a certificate holder is a person (like Frank Lorenzo, may he die an early and painful death) who is granted a certificate to conduct air carrier operations. He is the operator, and the airline he runs is the operator.

The people that fly the airplanes are flight crew or pilots, and they hold pilot certificates (as do I), but the certificates, even one that says Airline Transport Pilot, are not operating certificates for air carrier operations, and they are not operators. Maybe you'll just have to trust me on this.

When I was working, I had many's the argument over the proper phraseology for intercepting radials and localizers and joining airways. There is no place in the Air Traffic Procedures manual that says specifically that that is the case. However, by reading every example of use in the manual it is clear that nowhere do they say "join a localizer" or "intercept an airway."

It doesn't matter that you hear that everyday in every approach control facility and every Air Traffic Control Center in America, it's

incorrect. The ATP says so...sort of.

Same with the FARs. What's not unclear, however, is the part I quoted to you that the pilot/air crewman/operator may NOT authorize the use of PE devices that transmit when operating IFR. So get over it. The captain does not have the authority.

> My conclusion: The pilots were operating correctly and within the
> rules when they told me to go ahead and use my HT once we were at
> cruising altitude. Boeing might not approve, and you might not
> approve, but c'est la vie.

But they were wrong. Why is that such a stumbling block? No one's looking to prosecute you or them. Just as in the phraseology example I gave above, wrong things are said and done every day. It's usually because of ignorance, that is, not knowing. Lot's of people don't know about this. That doesn't mean they're right.

> In the meantime, it's time for me to use this pseudonym to make fun of
> Roger Wiseman. Serious discussions such as this one should not be

:
: The Navy still uses it to communicate with submarines at VLF.

Bzzzzt! Wrong. The Navy uses enormous above-ground antennas, mounted on multiple towers up to 1,500 feet tall, and with a maximum transmitter power of almost two megawatts, although one megawatt or less is the usual operating power. The Navy's antenna system at its Cutler, ME facility is described in

http://www.spawar.navy.mil/sti/publications/pubs/tr/1681/tr1681.pdf

for those who want to look at a REAL antenna farm.

Yeah well Nick, let's face it, during Desert Storm the Iraquis couldn't kill any of our guys, so they got a trigger-happy Yank to do it for them. Of course it wasn't the trigger happy Yank's (yet to apologise or be held accountable) fault, but likewise the Swiss cable-car downed by the show-off doing aerobatics, and many others in between. Even the "friendly" Afghans have to start running when they see the Yanks coming.

Let's face it, if you are not yourself American then you are a legitimate target, wether you be ally or enemy. But since the casualties of this US foreign policy are not themselves Americans, I don't suppose it matters much to your average US citizen.

Alec

Roger does not want you to see the true versions of his
FCC spankings.
www.enforcement.actions.ea2023.com

GLENDALE, WV: The FCC wrote General licensee Roger L. Wiseman, AB8MQ on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" that included interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Wiseman to review ?97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited AB8MQ to contact him to discuss the matter. Last November 9, the FCC sent Wiseman a Warning Notice in response to allegations of deliberate and malicious interference on 20 meters.

Poor Curtains Boy, 50 years old, obese and unemployed.
Did you ever figure out how to calculate RMS voltage?

Roger does not want you to see the true versions of
his FCC spankings.
www.enforcement.actions.ue3113.xyacl.org

GLENDALE, WV: The FCC requested that Roger L. Wiseman, AB8MQ,
retake the General examination elements under the supervision of an ARRL-VEC
volunteer examiner team. Wiseman must appear for retesting by September 11,
2002, or his license will be canceled. Applicants appearing for
re-examination
are granted an Amateur Radio license consistent with the elements passed.
The
FCC had written Wiseman on March 29, 2002, advising that it had been made
aware
of "an ongoing personal dispute" between Wiseman and another licensee that
included allegations of interference or jamming on 20 meters. FCC Special
Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two
licensees to contact him to discuss the matter. Additionally, the FCC had
sent
Wiseman a Warning Notice last November in response to allegations of
deliberate
and malicious interference on 20 meters.

Hi John,
S/N 208xxxx to S/N 309xxxx, VR22 on Signal unit (large board on bottom,
right behind the large filter space). S/N 310xxxx and up, use front panel
carrier knob. I have modified the early ones to use the front panel knob.
Don't remember details offhand, but it took one diode and some wire. Hard
part is taking the board out.

I can see Roger now....kneeling over a metal tent peg he pounded into the
ground with a wire running from it to a pair of cheap WalkMan headphones
while he listens...listens...listens...he knows the Navy is using VLF
frequencies because his training manual told him so. After a couple hours of
this Roger figured there was nobody on the air because the technician that
he is could NOT have made a mistake!
"Well," said Roger, "guess I'll go back to Usenet and tell Stagger he was
wrong again."

A small boy walked into a WalMart men's room. He saw a sailor (Dimmy O'Brainless) in
full dress uniform. The little boy got really excited, and asked Jimmy,
"Are you a REAL Sailor???"
O'Brien replied, "Why, yes, son, I am. I'm a hero. Would you like to wear my hat?"
The little boy said, "Yes!!" and put on the hat.
Just then a Marine entered the bathroom. The little boy very excitedly asked, "Mister, Mister, are you a REAL Marine???"
The Marine answered, "Yes, son, I am! Why, do you wanta suck my dick?"
The little boy exclaimed, "I'm not a real Sailor! I'm just wearing the hat!!!"

Moral...if you want a head-job call Dimmy!

Roger doesn't "butt out". He prefers the "butt in" position...as in he is
the "buttee" and is the receiver...his "butties" are the givers and Roger is
by default on the receiving end, so to speak.
Ever wonder why Roger spends so much time in the kneeling position? Well,
folks, he AIN'T praying!
Poor Wogie. No life. No tomorrow, no nothing. Would the word "shallow"
describe his life?

Fuck you! I'm happy with a three inch tool!

3 Inch Tool" - Hootie/Woger Wiseman

Little ME
My nuts are small as pearls
You like to laugh at me 'cause I'm hung just like a squirrel
Sometimes it bugs me
I'm not a bigger guy
When I was baby it was exactly the same size
But there's nothing I can do...
Because I only got a 3 inch tool.

Come home with me
Have a cocktail at my place
I got to tell you before we get past second base
In my pants
Aint no big swing
If you can find him he's the friendly little thing
No there's nothing I can do...
I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool

Sometimes I wonder
If it'll ever extend
I get embarrased when I'm hanging with my friends
They like to raz me
I dunno why
By gettin' me a happy meal and supersizin' my pride
But there's nothing I can do...
Because I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool
Yeah it's small, but it's real cool
I'm happy with my 3 inch tool
I only got a 3 inch tool
I only got a 3 inch tool

Poor Fuckheads the Fishers.......

(513) 831 -5943

The police found out that you are:

Roger W. Fisher
967 Newberry St.
Milford, OH 45150-1540

and your son is:
Roger C. Fisher, KC8CQP
1866 Muskegon Dr.
Cincinnati, OH 45255-2635
(513) 474-4260

So maybe you, CQP, made the call from Daddy's?

Message-id: <ak6st9$io9$0@pita.alt.net>

A small boy walked into a WalMart men's room. He saw a sailor (Dimmy
O'Brainless) in
full dress uniform. The little boy got really excited, and asked Jimmy,
"Are you a REAL Sailor???"
O'Brien replied, "Why, yes, son, I am. I'm a hero. Would you like to wear
my hat?"
The little boy said, "Yes!!" and put on the hat.
Just then a Marine entered the bathroom. The little boy very excitedly
asked, "Mister, Mister, are you a REAL Marine???"
The Marine answered, "Yes, son, I am! Why, do you wanta suck my
dick?"
The little boy exclaimed, "I'm not a real Sailor! I'm just wearing
the hat!!!"

Moral...if you want a head-job call Dimmy!>>>
From what I've heard, this is
more likely than not, a true story. LOL

Amateur Radio Newsline™ Report 1305 August 16th, 2002

Amateur Radio Newsline report number 1305 with a release date of Friday, August 16th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Japan says no to putting communications over power lines and the NCVEC says YES to remote testing. These stories are first on amateur Radio Newsline report number 1305 coming your way right now!

(Billboard Cart Here)

**

SPECTRUM NEEDS: NO PLACE FOR PLT IN JAPAN

Proponents of using Power Line Transmission or PLT technology have suffered a major setback. Telecommunications regulators in Japan have said NO to its implementation after tests show that the system could interfere with other spectrum users including ham radio. Jeramy Boot, G4NJH, has more:

--

The RSGB has learned from its contacts in Japan who have been working on problems of interference from Powerline Telecommunications Systems that, following extensive trials, the Ministry of Public Management, Home Affairs, Posts and Telecommunications has decided not to permit the roll-out of PLT systems operating in the range 2 to 30MHz in Japan. Japanese studies have shown that emissions from PLT are harmful to HF communications and all requests from PLT manufacturers to operate PLT systems have been refused. The RSGB has been told that the Japanese amateur society, JARL, has been actively working with the government, along with radio astronomers, broadcasters and others, to assess the impact of PLT systems on the radio spectrum. We understand that this decision has been given much publicity in the Japanese national press, which has highlighted concerns about interference to safety-of-life services.

--

What about Power Line Transmission systems being proposed elsewhere in the world? G4NJH says that in Europe, the Radio Society of Great Britain continues to press for tight limits on emissions from all wireline based telecommunications systems. Also that it is working with other High Frequency users to try to ensure that the spectrum remains uncontaminated by wideband noise. (GB2RS)

**

THE VE TESTING SYSTEM: NCVEC SAYS YES TO REMOTE TESTING

The National Conference of Volunteer Examiner Coordinators have endorsed experimental use of videoconferencing technology to conduct Amateur Radio testing in remote areas of Alaska. Newsline's Bruce Tennant, K6PZW reports:

--

An ARRL bulletin says that it all happened when the nations VEC's gathered with the FCC to discuss the all volunteer testing system and ways to inprove it. Meeting July 26th in Gettysburg, Pennsylvania, the National Conference of Volunteer Examiner Coordinators or NCVEC voted to back a one-year trial run to be conducted by the Anchorage Volunteer Examiner Coordinator in Alaska.

Jim Wiley, KL7CC, of the Anchorage group told his VEC colleagues that it's very expensive to provide Amateur Radio test sessions to the thousands of Alaska residents who live in remote areas. The vote followed discussion on whether having a VE team remotely monitor a test session while an unlicensed individual proctored the exams on site would comply with FCC Part 97 rules.

Section 97.509(c) of these rules says that three VE's must be present and observing the examinees during a test session. But Bill Cross, W3TN, of the FCC's Wireless Telecommunications Bureau, pointed out that the VEC and the VE's are responsible for the proper conduct of the exams. He also said that no rule changes appeared necessary because VEC's already have authority to determine the manner in which their VE teams conduct examination sessions. So the test of videoconferencing ham radio tests will go forward.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW.

--

The Anchorage VEC says that it will provide progress reports to the NCVEC on the videoconferencing experiment. (ARRL)

**

ENFORCEMENT: THOSE REPEATER WARS

Repeater wars continue among hams on both the east and west coasts. And the CQ Magazine website says that those involved are dragging the FCC into battles the agency would really rather the ham community settle on its own.

Two examples. In West Virginia, where an uncoordinated repeater was interfering with a coordinated repeater in Virginia, the FCC ordered the owners of the uncoordinated repeater last winter to resolve the problems. However, it appears that interference is continuing and the FCC is again looking to the owners of the West Virginia repeater to investigate and resolve the complaints.

In California, a strange one. Last March the FCC found no enforcement issues involving a repeater in Sonoma County following complaints from another repeater group. Now, users of the Sonoma repeater are complaining of interference from the repeater whose trustee originally complained to the Commission about their repeater. (CQ)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9SEH repeater serving Champaign Illinois.

(5 sec pause here)

**

ENFORCEMENT: FAX BROADCASTER FINED $5.4 MILLION FOR JUNK FAXES

The Federal Communications Commission issued a record fine of over five million dollars against a company for sending junk faxes to businesses and consumers. Amateur Radio Newsline's David Black, KB4KCH, at our South-East Bureau has the details.

--
The August 7th fine against fax.com of Aliso Viejo, California is the largest ever by the commission for violations of the Telephone Consumer Protection Act. It is also the first against a company known as a fax broadcaster.

According to an FCC release, fax.com was paid to send unsolicited advertisements and other messages on behalf of more than 100 businesses. And FCC Commissioner Kathleen Q. Abernathy says that despite repeated warnings from the commission and numerous consumer complaints, fax.com appears to have made no effort to mend its ways.

Commissioner Abernathy added that the company appears to have founded its business on the practice of sending unsolicited faxes in flagrant violation of that law. This has resulted in the fax.com being cited for close to 500 violations at about $11,000 per violation. Thats the maximum penalty and it adds up to $5.4 million due to Uncle Sam.

But a lawyer representing fax.com has another opinion. Attorney Mary Ann Wymore says that the company feels the rules on unsolicited advertising are an unconstitutional restriction of her clients freedom of speech. And Wymore indicates that fax.com is going to challenge it in the federal courts.

For the Amateur Radio Newsline, I',m David Black KB4KCH.

--

fax.com has been given only the customary 30 days to pay the fine or file an appeal. The FCC is also issuing citations to more than 100 businesses that used the services provided by fax.com. (Adapted from FCC release and published news reports)

**

ENFORCEMENT: DONT ADVERTISE BANNED GEAR ON THE WWW

The CQ website reports some unofficial advice from the FCC: If you're going to sell non FCC approved amateur and CB equipment, don't advertise it on the World Wide Web!

Case in point. A company in Wisconsin we have reported on before. Roper Electronics which was asked by the Commission back on June 18th to explain why it was alleged web advertising non-certified CB transceivers and HF linear amplifiers on its website. The company was also ordered to submit a list of all High Frequency transceivers and amplifiers sold within the US or offered for sale during 2002, along with the FCC certification number for each model.

The FCC's Riley Hollingsworth says that his office has received a answer to the inquiry from Randi Owen. Owen is the owner of Roper Electronics. Hollingsworth says that his office and the local FCC field office is reviewing Owen's reply. (CQ)

**

RADIO LAW: DIGITAL TUNERS TO BE REQUIRED FOR ALMOST ALL TV SETS

The FCC has decreed that nearly all television receivers made after July of 2007 must include the ability to receive and display digital transmissions. Digital tuners in some of the larger sets will be required by July 1, 2004. All new sets of 13" and larger must have digital receiving capability by July 1, 2007.

TV set manufacturers are opposed to the new law. They say that it will add at least $250 to the price of every receiver sold. Also, that there is not enough digital programming to watch.

The FCC has another view. It is convinced that forcing the public to buy sets equipped with digital tuners will help speed up the conversion to an all digital t-v broadcast system.

You can read the full details on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-225221A1.doc (From FCC release)

**

PRESERVING THE PAST: HAM RADIO COMING TO THE USS HORNET

Tom Hale, KB6SSN, tells the Amateur Radio Newsline that the staff of the USS Hornet Museum in Alameda, California has agreed to a ham radio project. The managers of the Hornet will allow a group of Amateur Radio operators rebuild and restore the original radio systems aboard the ship.

This will be a multi-year project three phase plan that includes getting modern commercial ham gear up and running aboard the Hornet as soon as possible. The planners are looking to contact anyone who served aboard the USS Hornet. If you did or if you know someone who did please have them contact Tom Hale KB6SSN by e-mail to tom@halemail.com. (KB6SSN)

**

WITH THE HANDI HAMS: SUMMER RADIO CAMP IS FULL

The Handi Hams report that their Summer 2002 Minnesota Radio Camp session is full but the group will hold its Winter camp in Malibu, California from March 2 through 9, 2003. Those interested in attending the 2003 outing are requested

to e-mail hamradio@courage.org to request an application. Applications will be mailed out as soon as they are printed and available. (Handi Hams)

**

HAM RADIO IN THE MEDIA: MORE DONATIONS TO “THE HUMAN RACE”

Kenwood Corporation will be the supplier of hand held radios for the t-v show The Human Race. And the shows producer, Bill Desjardins, W1ZY, says that he is happy to have Kenwood on board:

--
W1ZY: “We are certainly thankful to Paul Middleton over at Kenwood for giving the go-ahead on this and we look forward to a close working relationship with Kenwood.”
--

Desjardins tells Amateur Radio Newsline that there was a specific reason that Kenwood was selected.

--
W1ZY: “We are going to go with Kenwood’s in the field. The racers and the production crews will be using D-7’s during the actual race. Now other companies make good radio’s and we looked at all of them. But Kenwood won out because it packs APRS tracking into a really rugged field package.”
--

Desjardins also says that another important item has just materialized. He says that VE7FM has donated a home-brew, handheld, two-band beam to The Human Race for use with the D-7 and VC-H1 recently supplied by Kenwood to track satellites and pursue I-S-S contacts. Desjardins adds that this particular donation brings more good karma to the project. (W1ZY)

More information on the TV show “The Human Race” is on the web at www.humanrace.fr.st.

**

HAM RADIO IN THE MEDIA: FREQUENCY -THE TV SHOW

New Line Cinema is considering spinning off the movie "Frequency" into a TV Series. “Frequency” is the film where the non-ham hero uses his dad’s old ham radio equipment to communicate with his now decease father.

The movie was a great public relations boon for Amateur Radio. If New Line Cinema proceeds, a t-v show could help put the words ‘ham radio’ in the mind of every man, woman and child in the U-S of A. (Via W6AQ from published reports)

**

NEW PRODUCTS: A MANUAL YOU CAN CARRY

Jovan Peric, KB9K, says that he is now producing fully laminated mini manuals for a number of the most popular Icom, Kenwood and Yaesu transceivers. For more

information and photos visit www.radioamater.com/kb9k on the world wide web. You can also write to Peric at 3425 West Ardmore Avenue, Chicago, IL 60659. (KB9K)

**

CONVENTIONS AND HAMFESTS: DUKE CITY HAMFEST

The 2002 Duke City Hamfest will take place Friday, August 23 through Saturday, August 24th at a the University of New Mexico Continuing Education Conference Center in Albuquerque Hew Mexico. Hours are 5:00 p.m. -to 9:00 p.m. on Friday and 7:00 am to 3:00 p.m. on Saturday. More information is in cyberspace at www.qsl.net/dchf (N5ZGT)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

CHANGING OF THE GUARD: ERNIE HUDSON KI8O - S.K.

The ham who headed up the Montgomery Ohio ARES operation has died. Ernest Hudson, KI8O, passed away on August 2nd following a long battle with Cancer.

Hudson was 69 and had served as Emergency Coordinator for Montgomery County for over 20 Years. His organization with over 530 ARES members was one of the best in the nation. Hudson was also on the State of Ohio Council of Amateur Radio for the Montgomery - Greene County Local Emergency Response Council. And in 2001, KI8O was named as recipient of the Dayton Amateur Radio Association’s Distinguished Service Award.

Funeral services for Hudson were held on Tuesday August 6,2002 at the Parkview Church of the Nazarene, in Kettering, Ohio. (W8ILC)

**

RADIO BUSINESS: NEW MILITARY COMM SYSTEM BEING DEVELOPED

The Boeing Co. has been named prime contractor for a new U.S. Army communication system. The Joint Tactical Radio System is expected to be the foundation for all future Department of Defense tactical radios. (Published news report)

**

HAM RADIO IN SPACE: N SYNC WITH THE ISS

Russia's space agency says that it might scrap plans for 'N Sync singer Lance Bass to join an October mission to the International Space Station. This is because the Russian’s say that he had failed to meet a payment deadline.

Bass, who is backed by a consortium of companies rounded up by a Hollywood producer, David Krieff, has signed a preliminary contract for the trip. But Bass, who is already training at Star City Cosmonaut Center near Moscow has yet to secure a final deal guaranteeing a seat aboard the Soyuz craft.

If he does go, don't hold your breath waiting for him to turn up on 2 meter FM. He will be doing a lot of commercial endorsement work. In fact, Bass's space suit will be emblazoned with the names of sponsors. These logos will be seen during the eight TV shows Bass expects to beam down from space. Bass is also expected to record audio tracks for a future 'N SYNC release. (Published news reports)

**

HAM RADIO IN SPACE: THE AMSAT GLOBAL SATELLITE NET

Internet technology is allowing worldwide access to a new AMSAT net for beginning satellite operators. The AMSAT Global Satellite Net was recently started by Neil Hays, W6FOG, and may be accessed on VHF or UHF through repeaters linked via the Internet using the IRLP Internet Radio Linking Project network.

For those without IRLP access, but with HF equipment, the net may also be found on 14.250 MHz on 20 meters, every Wednesday between 0200 and 0330 UTC. I-R-L-P access is via radio only, but activity may be monitored by anyone with a computer, sound card and Internet connection. For more information on I-R-L-P, go to www.irlp net. For details on the AMSAT Global Satellite Net, see www.w6fog.net (W6FOG, AMSAT)

**

RADIO IN SPACE: SATELLITE RADIO VS. WIRELESS

XM Satellite Radio Holdings and Sirius Satellite Radio are reportedly in talks with wireless companies to resolve a dispute over interference with wireless communications services. The two sides have been bickering over the satellite services using equipment to extend their digital radio signals to hard-to-reach areas like metropolitan areas where skyscrapers can block satellite beams. Wireless companies fear that these translators will interfere with some wireless communications services. (Published reports)

**

DX

In DX F6FYD and F2VX are in Baku, Azerbaijan, until the 23rd of August. F6FYD will operate as 4J0FR- while F2VX will use the club call 4K7W. They will be active on all bands CW and SSB. (GB2RS)

And SM0CMH is active on 10 to 80 meters, including the WARC bands, on CW as SV5/SM8C from Kalymnos Island. He will be there until the 30th of August. For both these operations please QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: WATCHING TV OVER THE MOON

And finally this week, here is one of those rare stories where an individual has done something so outrageous as to earn a spot in the record books. It happened down-under as we hear from Q-News Graham Kemp, VK4BB:

--
Dr. Anthony Mann of the Physics department at the Western Australian University has created a "Receiving system" which allows him to tune in Television signals from the US.

Tony has been a DX, TV enthusiast for decades, using his scientific credentials to stretch the laws of physical limits in order to "See further and further, unaided by satellites or wire".
His latest accomplishment, apparently a first, is to work out the parameters for using the Moon as a satellite reflector for bouncing TV signals from the USA into VK6.

As regards Tony's gear, he uses an Icom R7000 receiver, a Jaycar 91 element UHF antenna fitted with GaAs-Fet 20db masthead amplifier.

So far there's nothing very special about that except that the antenna is mounted on a tripod 1.5 meters above ground with the ability to adjust both azimuth and elevation to track the Moon in his sky.

Fortunately a Moon setting in Oklahoma is well above the horizon in Perth WA.

The signal Tony receives is tiny, very tiny, and not enough to produce a picture he can watch or even sound he can listen to. At this stage, it's not about watching Buggs bunny cartoons, it's all a bit more scientific than that.

Knowing the transmitters frequency to within a few Hertz, yes that's right Hertz, is essential as what Tony is searching for is a "beat note" indication that a carrier signal is present on the Icom receiver.

By using web amateur "Moon bounce" web sites he was able to calculate the Doppler shift for a group of likely TV stations, and then got hold of a precise TV station's transmitting frequency down to the last two Hertz; ie: 501.248XXX, the X's being the Doppler shift migrated.

Results this year have included signals originating in Oklahoma and Indiana.

--

You can read more about Dr. Tony Mann’s television reception experiments at the cyberspace address that you will find in this at www.physics.uwa.edu.au/~agm/eme1.jp

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website

located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

One final note. As this newscast goes to air our staff is in Alabama at the Huntsville Hamfest presenting the 2002 Young Ham of the Year Award to Josh Abramowicz, KB3GWY, of Reading Pennsylvania. Josh is receiving the award for his work in promoting Amateur Radio through the Boy Scouts of America. Tune in next week for the sounds of this years presentation.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, KC5MFA, saying 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

Poor Fuckup Shemale Lee, a one-hit wonder just like the song he takes his name from. Lloyd Price never did hit it big, except in January, 1959, the same as Fuckup Shemale Lee. Price died a penniless, hopeless alcoholic, like Fuckup Shemale Lee's father.
The song remains a forgettable one, just like the poster. The only distinction it has is staying on the charts for a couple of weeks, and only because Fuckup Shemale Lee's father kept calling in to have it played several times on a nightly basis as he sodomized Fuckup Shemale Lee and his siblings.

Actually, the song "Stagger Lee" is a blues standard that retains an honored place in New Orleans blues anthology.

The song originated in New Orleans and shares its roots with other New Orleans blues standards such as "Frankie and Johnny," "The Dying Crap-Shooter's Blues, and "Saint James Infirmary."

Amateur Radio Newsline™ Report 1306 August 23rd, 2002

Amateur Radio Newsline report number 1306 with a release date of
Friday, August 23rd 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Europe prepares for another ham in space and a technology called AMBER Alert finds another kidnapped youngster. These stories and more are next on Amateur Radio Newsline report number 1306 coming your way right now.

(Billboard Cart Here)

**
HAM RADIO IN SPACE: BELGIUM TO LAUNCH HAM ASTRONAUT

Europe is about to launch another ham radio operator into space. He is from Belgium and the QSL cards are already being prepared as we hear from Jeramy Boot, G4NJH:

--
Belgium's second astronaut to go into space is a radio amateur. Frank De Winne, ON1DWN, will join the International Space Station at the end of October this year. The exact timing of the flight is not yet available.

Gaston Bertels, ON4WF, who is Chairman of ARISS-Europe, has organized an amateur radio contact with the Belgian air force Royal Technical School. Bertels says that there may be other opportunities for operators to make contact with the mission as well. A full color QSL will be available. QSL cards and listener reports should be sent either direct or via the bureau to ON7AQ.

Jeramy Boot, G4NJH.

--

More information will be made available as soon as a launch date is set. (GB2RS)

**

HAM RADIO IN SPACE: BASS TO FLY

Another flight being watched is a Russian re-supply mission this October. One that may carry a United States pop music star as the third space tourist to the ISS.

After weeks of squabbling, Russian authorities announced late last week that teen heart-throb Lance Bass of the boy-band 'N Sync will probably travel to the international space station after all. Bass still has not paid any of the

estimated $20 million for his flight but a spokesman for Russia’s RKK Energia has also confirmed that plans for Bass' seat is being held for him and launch preparations are moving forward.

If Bass makes the trip to the International Space Station, he will become the youngest person ever in space. This title has been held since 1961 by former Soviet Union cosmonaut German Titov who was only 25 when he made his first flight. Bass was born in 1979 and is currently 23.

At airtime, Bass’s sponsors have indicated that his every waking moment on orbit will be pre-planned. This could mean no ham radio using the ARISS Amateur Radio station on board the ISS. (ARNewsline™ from published reports)

**

EMERGING TECHNOLOGY: UPS NOW NEUTRAL ON RFID TAGS

United Parcel Service now says it's neutral on a SAVI Technology's proposal to permit higher duty cycles than current Part 15 rules permit for Radio Frequency or RF ID tags. These are tags used for tracking shipments and packages, among other applications. The ARRL has said that adopting SAVI's proposals would result in severe and harmful interference to Amateur Radio and has opposed the plan.

And the ARRL Letter now reports that UPS recently clarified its position in an ex parte filing to the FCC. In its statement, the shipper said that it takes no position on the rule changes proposed in the SAVI Petition because they will have virtually no impact on U-P-S's shipping operations. Also, that the requests are inconsistent with efforts to promote international standards for RF ID tags. The change in position is highly significant because United Parcel Service has an equity interest in SAVI through its UPS Strategic Enterprise Fund. (ARRL Letter)

**

EMERGING TECHNOLOGY: AMBER ALERT SAVES ANOTHER KIDNAPPED CHILD

Some hams in California are looking at ways to tie their repeaters in after the states new AMBER Alert system has helped to safely locate yet another kidnapped youngster. Nichole Timmons vanished from her bedroom in Riverside California on Monday night August 19th. She was found the following afternoon in rural Nevada based on tips called in by motorists who recognized the description of the girl, her suspected abductor and the truck they were in.

A description was flashed on electronic road signs across several South-Western states as part of a multi-state alert. At about 2:40 p.m. on August 20th, Nevada police spotted the girl's former baby-sitter, Glen Park, and Nichole driving through the Walker River Indian Reservation north of Reno. A tribal police officer stopped the pair and Park was taken into custody. Riverside Police Chief Russ Leach told reporters that the arrest came about because Nevada state police used their AMBER Alert system and received a tip from a passing motorist.

As previously reported, the AMBER Alert system is based on a program developed by Dallas-area broadcasters and named in memory of nine year-old Amber Hagerman who was kidnapped and murdered in 1996. It uses a combination of two-way radio, telephones, fax and data communications to quickly spread word of a child abduction. In theory it could also be interfaced to ham radio repeaters and packet networking systems. More important, with Nichole Timmons return, the AMBER Alert system is now credited with safely recovering at least eighteen children since 1997. (ARNewsline from news reports)

EMERGENCY COMMS: REPORT SAYS NYC EMERGENCY RADIO SYSTEM FLAWED ON 911

Poor radio systems with no inter-operability contributed to the casualty count in New York City last September 11th. This as a report on the aftermath of the terrorist attack targets the city’s emergency radio system as not being adequate for the task that day. Amateur Radio Newsline’s Bruce Tennant, K6PZW, tells us what that report had to say:

--
The report was prepared by high ranking New York City department officials aided by the management consultant McKinsey & Co.. It found that the rescue effort while highly, successful was hurt by a failure of city departments to work together, poor organization and a faulty radio communications system.

The radio system caught a lot of criticism. It was singled out as being the biggest problem after firefighters had entered the twin towers.

The report found that once inside, radio communications problems left many commanders and firefighters unable to communicate with each other. To make matters worse, the fire department's radios were incompatible with the police radio system and vice-versa. In other words, no inter-operability between police and fire and no direct radio communications between the two agencies.

New York City Mayor Michael Bloomberg has assured the city that the fire department's radios work properly in the future. This, regardless of the cost of improving it. Police are also considering opening the department’s citywide system of repeaters to the fire department in order to help solve the communication problem for future joint efforts.

Even with the radio problems an estimated 25,000 people were evacuated from the twin towers that day. Mayor Bloomberg calls it the most successful urban emergency evacuation in modern history.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW.

--

As widely reported, ham radio operators were among the first on the scene in lower Manhattan. They operated using an array of their own equipment and networks providing communications to all who need it. Hams and their gear performed almost flawlessly in the hours, days and weeks following the September 11th terrorist attacks. (ARNewsline™ from published news reports)

**

ENFORCEMENT: TAKE THAT LINK OFF THE AIR

The FCC has ordered a Los Angeles area ham to get coordinated or remove a repeater link from the air. Daryl Duckworth of the agency's Consumer and Governmental Affairs Bureau explains the action taken:

--
Duckworth: "We issued a letter to Leobardo Coronado, KC6PXL, of Sun Valley California, ordering that on receipt of this letter to KC6PXL, that an uncoordinated repeater link must be shut down until either coordination is obtained or a detailed plan is submitted that will prevent interference to a coordinated repeater operating on the link frequency."

--

Coronado was warned that his failure to shut down the uncoordinated link will result in enforcement action that could include license revocation and a monetary forfeiture of up to $7,500. (FCC, RAIN)

**

WITH THE FCC: FCC UNIVERSITY" LAUNCHED - CONTINUING LEARNING FOR THE FCC STAFF

The Federal Communications Commission has launched what it calls FCC University. This is a new program to ensure that FCC staff members have the cutting edge knowledge and skills to respond to the challenges of the communications field in the 21st century.

According to the CGC Communicator, FCC employees can choose from a vast array of courses on generally applicable subjects. There are also sections of FCC University that are specifically geared to meet the educational needs of engineers, economists and
lawyers working for the agency. Complete information on FCC University is on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-225430A1.doc (CGC Communicator, FCC)

CONVENTIONS & HAMFESTS: BIG BUSINESS IN HUNTSVILLE

In news from the ham radio business world, last weekends Huntsville Hamfest in Alabama may have signaled a turn-around for those who make their living selling ham radio gear. And that's good news for more than just Amateur Radio.
David Black, KB4KCH, reports:

--
While a great deal of the world's Amateur Radio equipment is manufactured in Pacific Rim countries, most of it is sold right here in the United States. The majority of sales are by family-run businesses. And as the U-S economy sagged so did ham gear sales. Slow sales meant the end for some businesses. Others struggled to survive. Now, there appears to be a turnaround with word of a fantastic sales weekend at the Huntsville Hamfest in Alabama. How good was it? Chip Margelli, K7JA sells equipment for Vertex-Standard:

--
Margelli: "Well, it has been a great show this weekend. The crowd was very active, especially Saturday morning and early afternoon. Sunday has been busier than normal and we have had great weather and a good turnout. A lot of boxes have been going out there door and there has been a lot of interest in the new products."
--

Good sales aren't the only encouraging news at Huntsville. Event organizers are thrilled at other figures—the number of people attending. While the exact gate figure was not yet available, Hamfest General Chairman Scotty Neustadter, W4WW says it could be a near record year.

--
Neustadter: "I was a little bit hesitant to think that myself. I try to error on the side of caution. But I was very, very pleased and I am thinking that we are definitely up from last year and the year before. The attendance would be a record for a Huntsville Hamfest with the exception of the year that we were the ARRL National."
--

Neustadter's enthusiasm is echoed by Todd Mowery. He's with ATOC, the company distributing Alinco ham gear. Mowery says Saturday was especially good.

--
Mowery: "Oh, I thought it was a very good weekend. Saturday was very crowded. Very impressive."

"I enjoyed it a lot. The booth was busy. We have quite a few new products over the last year that we put out -- mostly in the HT realm. And they have done really well for us. And the crowd that showed up yesterday enjoyed seeing those new radios."
--

The most succinct evaluation of Huntsville probably comes from Gary Green, N4CJX, of Ten-Tech, who needs few words to describe how he feels about this Hamfest:

--
Green: "We love Huntsville."
--

Green says Ten-Tec will be back next year. Just about everyone else is saying they will, too.

From the Amateur Radio Newsline Southeast Bureau in Birmingam, I'm David Black, KB4KCH.

--

One more word about this years Huntsville Hamfest. It concerns the D-X Banquet. Bill Hall, W4GBF, was one of the banquet planners. He tells Amateur Radio Newsline that for the first time in its history the banquet had more people want to attend than there were seats available. Hall could not talk with us very long. He was out scouting up extra seating. More on Huntsville a bit later in this weeks newscast. (ARNewsline™)

**

CONVENTIONS & HAMFESTS: ARRL IN SOCAL

Successful ham radio conventions are not limited to Alabama. Information out of California indicate that the Southwestern Division Convention was also a success. Reports from San Diego say that there were plenty of vendors doing a brisk business and all of the forums were jammed packed. We spoke with Gordon West who was on the roof doing antenna work. He was one of the presenters at the convention and Gordo says it was two thumbs up show:

--
West: "I'm up on the roof doing ATV antenna work and ATV as well as emergency preparedness was one of the many topics that we talked about at the Southwestern Division Concention. And boy-oh-boy was it busy. The aisles were packed on Saturday morning all of the way through Saturday evening and the outside exhibits of the emergency communications vehicles were well attended"
--

Highlights included the FCC's Riley Hollingswoth, K4ZDH, hosting a two-hour enforcement session and Bob Heil, K9EID, presenting his famed audio conference. One source tells Amateur Radio Newsline that there were about 1500 people who made the trek to San Diego for this show. (ARNewsline™)

YOUTH IN HAM RADIO: 2002 YHOTY AWARD PRESENTED TO KB3GWY

Saturday August 17th was a special day for a Reading Pennsylvania teen. That's when seventeen year old Josh Abramowicz, KB3GWY, became the 2002 Young Ham of the Year. Amateur Radio Newsline's Don Wilbanks, KC5MFA, was at the Huntsville Hamfest where the presentation was made:

--

Abramowicz: “I share the enthusiasm of my colleagues at home when I say that ham radio extends many, many opportunities to the youth of America. There are many young people in our country that take an interest in our great hobby. Unfortunately, there are those who have not heard or seen our hobby and I believe that it is a great thing to spread our hobby as far, as wide and as much as we can.”
--

That’s 17 year old Josh Abramowicz, KB3GWY, as he accepted the 2002 Amateur Radio Newsline Young Ham of the Year Award. Abramowicz was honored for his work in promoting Amateur Radio in and through the Boy Scouts of America. He says that its important to let other kids know about ham radio.

--
Abramowicz: “The youth of America are interested, but in to many cases they never see any of the action that our hobby provides. Therefore, I think it is our job -- young and old -- to do our best to pass our hobby on to the next generation and this can be done in a lot of ways.”
--

Abramowicz went on to detail how this can happen:

--
Abramowicz: “I've done it through Venture Crews. There are also many other ways. There is youth groups, families promoting Amateur Radio to the youth in your neighborhood. They are the future of Amateur Radio. Much like a lot of our radios and a lot of our equipment, all it needs is one spark.”
--

And after receiving his gifts from Amateur Radio Newsline, Vertex-Standard and CQ Magazine, KB3GWY turned the tables with a special gift of his own:

--
Abramowicz: “I have here a couple of patches from the K2BSA station from the National Jamboree. These are limited edition patches with “Radio Scouting” written on it. There is K2BSA and it has the world symbol for Scouting. First of all I would like to present one to Mr. Bill Pasternak for his kind generosity. I’d like to give one to Chip from Yaesu for his kind generosity also the gentleman from CQ.”
--

Josh then donated his major gift from Vertex Standard -- a Yaesu FT-817 to the Boy Scout Venture Crew he is involved with:

--
Abramowicz: “I just want to say that the equipment will be going to the Venture Crew and the future efforts of our Venture Crew working with youth and getting them on the air. So thank you. (applause)
--

And Amateur Radio thanks Josh Abramowicz, KB3GWY, for being another excellent example of ham radio youth at its very best.

For the Amateur Radio Newsline, I’m Don Wilbanks, KC5MFA.

--

Want to hear more? Well you can. We have the entire 13 minute ceremony posted as this weeks Newsline Extra. Just go to www.arnewsline.org and click on this weeks newscast number at the top of the main page. (ARNewsline™)

**

INTERNATIONAL-UK: BIG UK 5MHZ EXPERIMENT FOLLOW-UP

The British 5 MHz propagation study using Amateur Radio is picking up speed. This as an increasing number of U-K hams apply for a Notice of Variation or N-O-V to let them take part. Once again, from Nottingham in the U-K here is Jeramy Boot, G4NJH:

--
During the first few days of the 'Fivemegs Experiment' a large number of NoV holders have made contacts with each other across the UK. Radio amateurs in other countries are showing great interest in this experiment, but we must make it absolutely clear that this has been authorized in order that we may carry out propagation investigations, antenna experiments and some emergency radio training within the UK. At the present time a very small number of US radio amateurs are authorized to conduct similar experiments under the group call sign WA2XSY. We know of no other amateur stations outside the UK who have any authority to call in. Jeramy Boot, G4NJH.

--

More on the British 5 MHz experiment in future Amateur Radio Newsline reports. (GB2RS)

**

INTERNATIONAL - CANADA: NEW VE5 SM

From our friends up North comes word that Bruce Donovan, V-E-5-N-D was recently re-elected Radio Amateurs of Canada Section Manager in the Saskatchewan Section. This, for a two-year term that will begin on November 1st. Donovan ran unopposed eliminating the need for a balloted election. (RAC)

**
INTERNATIONAL - JAPAN: HAM-FAIR TOKYO

The 24th and 25th of August, saw one of the world's largest ham radio shows takes place in Japan. It’s the Amateur Radio Festival better known as the Ham Fair and was slated for the giant Tokyo Exhibition Center. Last year Ham Fair attracted over 35,000 visitors. (JARL)

**

DX

In DX, K3TKJ is active on 40 to 6 meters as C6ALW from Andros Island in the Bahamas. He is there until the 18th of September and activity is mainly on SSB, but with some CW on 6 meters. (GB2RS)

HF98JP is a special event call sign activated by SP9HWN through the 31st of August to celebrate the visit of Pope John Paul the Second to Poland. The station is active on 80 to 6 metros CW, SSB, RTTY and PSK31. QSL as directed on the air. (Modern DX)

**

THAT FINAL ITEM: LICENSE DRIVE

And finally the story of a license drive. Not a campaign to get people their ham license. Rather the tale of one determined applicant who could not wait. It took place down-under as we hear from Q-News Graham Kemp, VK4BB:

--

Here's an amazing story of amateur enthusiasm that must be one for the record books. After many years of trying, Roscoe VK3TPJ was overjoyed on receiving news of his pass in CW. After all Roscoe has had a well-equipped HF station for years but hasn't been able to use it without supervision.

So enthusiastic was our Roscoe that waiting for the call sign in the mail was not for him. So he immediately jumped in his Falcon and drove 1000K up to Sydney to visit the ACA in person. He arrived at around 5am and waited a few hours for the office to open.

When it did, he was told he needed a passport photo to stick onto his new certificate. Undaunted, he went downstairs to an instant photo machine at Wynyard Station. Five minutes later he was back, photo in hand. Another five minutes elapsed and Roscoe was VK3KRH - authorized to operate on all amateur bands. The task achieved, he got in his car and drove straight home again - after just four hours in Sydney and a round trip of approximately 2000 kilometers!

--

Congratulations to the new VK3KRH. You can catch up with him on 160 meter AM during the morning hours. (Q-News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). I'm looking for information on where to purchase a durable single piece in-the-ear earphone with a 1/8" inch plug for using with a portable radio. I've been using the Radio Shack model and while it's cheap, it does not last. I thought this newsgroup might be a good piece to find where to buy a durable model. Thanks.

"3 Inch Tool" - Woger Wiseman

Little Me
My nuts are small as pearls
You like to laugh at me 'cause I'm hung just like a squirrel
Sometimes it bugs me
I'm not a bigger guy
When I was baby it was exactly the same size
But there's nothing I can do...
Because I only got a 3 inch tool.

Come home with me
Have a cocktail at my place
I got to tell you before we get past second base
In my pants
Aint no big swing
If you can find him he's the friendly little thing
No there's nothing I can do...
I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool

Sometimes I wonder
If it'll ever extend
I get embarrased when I'm hanging with my friends
They like to raz me
I dunno why
By gettin' me a happy meal and supersizin' my pride
But there's nothing I can do...
Because I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool
Yeah it's small, but it's real cool
I'm happy with my 3 inch tool
I only got a 3 inch tool
I only got a 3 inch tool

3142. QSL Card Program for PC

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-26 03:18:55 UTC
From: WD4LVO <wd4lvo@bellsouth.net>
Message-ID: <w2ha9.58347$%v4.1960863@e3500-atl2.usenetserver.com>
Source record: 73585

Can someone give me a link to a program(s) to creat your own QSL cards that
you can print on a printer.
I am running Windows XP.

Thanks Ozzy

3143. Re: 9/11 PLANES UNDER REMOTE CONTROL?

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-26 03:36:57 UTC
From: me <me@here.org>
Message-ID: <tnha9.18329$3V5.8891@nwrddc02.gnilink.net>
Source record: 73586
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave

I knew sooner or later some conspiracy freak would come around claiming that 9/11 is just our government setting us up
and no one is our enemy except our government.
The fact is, there is not a 757 or 767 that can land itself, nor land by remote control, period, it it shoots that theory
all to hell.
The reason is that a 757 and 767 would have to be able to see with a camera, underneath it so that the plane could be aligned
over the proper runway and land. Taking off is much easier. All you have to do is put the plane at the start of a runway, give
the electronics a camera and the electronics steer within the runway to avoid running off the runway, and then do the normal things
a pilot does, namely bringing engines up to power, pulling up the ground when the plane is at a certain groundspeed and compensating
for wind. All which requires a bottom mounted camera and a forward mounted camera. Neither of the planes have them, period, thus the
electronics
can put the plane within a yard, but the plain cannot tell exactly where it is nor exact location it's pointing. It's just too
complicated to be
programmed in or remote controlled in unless the planes were rigged with completely different electronics systems. Also, if you've
ever been inside
a 757 cockpit you could tell by mere eyesight that the plane is not complicated enough to be remote controlled or programmed to be
very intelligent
at all. As far as your comments about disallowing more than 1.5g. That's a load of crap. Sometimes when a plane gets out of control
you have to apply
4-5g maneuvers to counteract a problem. You are saying that the planes are limited, I'm saying that if the planes were limited they
would be falling out
of the air everytime they take off and have to avoid traffic. I've been in planes that have pulled 3-4 G's especially on 747-400's
compensating for hairy
weather over the ocean including some horrible weather between dallas and atlanta on many 767's with delta. Your assumptions and
statements are not fact but bullshit.

I agree that the conspiracy freaks have vivid imagination; but autoland has been a fact of life for many years. Provided it is to an established and properly equipped runway with a published and certified approach system.

The URL below contains an FAA bulletin on the use of Autoland dated Wed, Oct 5, 1994
http://www.faa.gov/avr/afs/hbat/hbat9412.txt

A short extract follows "It is a common practice for air carriers to conduct AFCGS approaches and/or autoland operations when the runway visual range (RVR) is at or below RVR 4,000."

Dave

You're not a pilot, are you? You've never heard of ILS or a localizer,
either, I'll bet; certainly not Category III approaches and auto-land.

> Taking off is much easier. All you have to do is put the plane at the start

Sorry, not true. Same electronics mentioned above can do all of that
without a camera. Engine power is handled by auto-throttle; part of
the autopilot system.

Also, all aircraft maneuvers, including rotation for takeoff, are done
by reference to airspeed, never groundspeed. In fact the very
electronics you say don't exist in 757/767s are required to display
groundspeed. Airspeed and groundspeed are almost always different
values, and because of wind, groundspeed values are meaningless as a
reference for aircraft operations.

> Neither of the planes have them, period, thus the electronics can put the

> systems.

You've never heard of INS, either, have you? Airplanes (not all) have
been flying with it since at least the '60s.

> Also, if you've ever been inside a 757 cockpit you could tell by mere eyesight
> that the plane is not complicated enough to be remote controlled or
> programmed to be very intelligent at all.

If, in fact, you ever have been inside a 757/767 cockpit (they're
identical, except you step up into one and down into the other) you
might have noticed the large glass screen in front of each pilot.
Displayed thereon, in addition to representations of localizer, glide
slope, HSI, etc., is the map-like display from the INS-like

instrumentation. Tells the airplane where it is at all times by
internal computers. I'll bet you thought it was the captain's
television, didn't you?

> As far as your comments about disallowing more than 1.5g. That's a load of crap.
> Sometimes when a plane gets out of control you have to apply 4-5g maneuvers
> to counteract a problem.

I'm afraid the load of crap is being distributed pretty thickly right
here. Air carrier type aircraft virtually never attain that high a
G-load. In fact, none of the normal category general aviation aircraft
(all of which are certificated at higher G-loads than air transport
aircraft) are certificated for as high as 5 Gs.

> You are saying that the planes are limited, I'm saying that if the planes
> were limited they would be falling out of the air everytime they take off

> especially on 747-400's compensating for hairy weather over the ocean
> including some horrible weather between dallas and atlanta on many
> 767's with delta.

How would you know you were pulling 3-4 Gs? No transport category or
normal category aircraft I know of has a G-meter. It takes a turn at
60° of bank to produce a 2 G load, which you wouldn't even notice
unless you raised your arm.

Transport category aircraft turn at a standard rate of turn (or less),
which produces a bank angle more on the order of 15°. Of course one
doesn't have to be in a turn to induce Gs; I merely point out what's
necessary to pull even 2 to illustrate that you don't remotely know
what you're talking about.

> Your assumptions and statements are not fact but bullshit.

That makes two posts in this thread that match that description.
Please bring some facts and knowledge to your next discussion.

<Rest of nonsense snipped

It is obvious to the most casual observer you know nothing of
aircraft and the flying of same. The pilot uses air speed for take
off not ground speed. The two can vary by quite a bit depending
upon wind speed, direction, ect.

> all to hell.

Well, I'm not sure by what you mean as "land itself", but either of
those jets can autoland. And no camera is used at all.
> The reason is that a 757 and 767 would have to be able to see with a camera, underneath it so that the plane could be aligned
> over the proper runway and land.

No, cat 2 and 3 autolands use high precision ILS systems to align the
plane. Not just any ILS approach will do. Only the biggest, baddest,
airports support autolands. IE: you can't do an autoland at Houston
Hobby, but you can do one at Houston Bush Intercontinental. Also, the
aircraft and aircrew must be certified for autoland. Not just any
flunky in a jet can legally do autolands.

Taking off is much easier. All you have to do is put the plane at the
start of a runway, give
> the electronics a camera and the electronics steer within the runway to avoid running off the runway, and then do the normal things

But , there is one major problem here. Auto takeoffs are illegal in
the U.S.
In fact, most all newer boeing planes are built from the factory to
take off using autoflight. It's in the computers, and the plane is
capable of it. But it's not legal, and no one does this in the real
world. You can not legally engage autoflight until 400 ft AGL. So in
the real world, the planes are driven manually on takeoff, but using
auto takeoff power settings. At 400 ft AGL, autothrottle is engaged.
And the rest is history. You can fly the whole rest of the flight,
including landing on autoflight.

> a pilot does, namely bringing engines up to power, pulling up the ground when the plane is at a certain groundspeed and compensating
> for wind. All which requires a bottom mounted camera and a forward mounted camera.
No, a camera is not needed. You have roll guidance from the advanced
landing system. You have rollout guidance after an autoland also. Just
like the space shuttle.

Neither of the planes have them, period, thus the
> electronics
> can put the plane within a yard, but the plain cannot tell exactly where it is nor exact location it's pointing. It's just too
> complicated to be
> programmed in or remote controlled in unless the planes were rigged with completely different electronics systems.

No, the planes know where they are very, very , accurately at all times. You have INS systems that can be aligned with the stars or other methods.

Also, if you've
> ever been inside
> a 757 cockpit you could tell by mere eyesight that the plane is not complicated enough to be remote controlled or programmed to be
> very intelligent
> at all.

Not remote controlled, but auto controlled, yes. But you need the monkeys in the seats to push the buttons.

MK

> had some primitive autonavigate functionality.

All L-1011s had autoland. And that airplane design is from the late
'60s, although I'm not sure it was flying yet then.

Autonavigate, if you mean autopilot, has been around for a long time.
WWII bombers had autopilots. They were called George, as in "let
George do it."

INS has been around for a long time, too. Nowadays, all of the various
random navigation systems (inertial, doppler, course-line-computer,
LORAN, Omega, GPS, etc.) generally are lumped under one label: R-NAV.
Some are ground based, some are not.

All 747s have either 2 or 3 INSs on board. All DC-10-30s have INS. All
757/767 have some form of RNAV capability, as do 777s. Although 1011s
had autoland, they didn't universally have any RNAV equipment unless
speciall ordered. The big 3 L-1011 users; TWA, Eastern, Delta; did not
order it, even though much of their respective fleets were used in
long range international service.

Any aircraft with autoland capability, with CAT III certified
instrumentation and crew (includes radar altimeter) can autoland at an
airport equipped with CAT III equipment and approaces. They can make
approaches with RVR as low as 800 feet; maybe less. That was the
lowest I remember pilots accepting when I was working.

Most major airports have at least one CAT III approach, and most major
carriers can fly an approach with at least 1200 RVR.

Speaking of which...

I saw an article years ago, and I think it was about the last flight before the Challenger accident.

Seems there were 3 computers and they 'vote' to control the shuttle. I think 1 is IBM, and one was a Rockwell, or whatever. Anyway, one of the astronauts SUPPOSEDLY made a comment that if the computers failed, his HP-41 variant was powerful enough to do it.

So... According to the story it was a 'thought experiment' that got legs and had a life of it's own. NASA supposedly even supported it as a 'what if' scenario.

Anyway... What I read was that this flight they actually used the HP to fire the rockets and maneuver down to about 27,000 before they said enough is enough. But allegedly the thing was programmed to bring it all the way to the ground.

I would love to find out how much of the story is true.

"Eau de Feces", by Anon

Roger, Roger, Roger Wiseman
all the ladies say, "Thats a small size, man!"

His feeble brain is taxed beyond compare
to merely sit, sh*t, or stare.

He has a stupid or rude comeback for everything,
when all the while he's actually just masturbating.

"Clever!", he rates himself to be,
"Moronic...,", others say, "he's not worth his own pee."

He pollutes the newsgroups with language vile,
In reality, he's just sitting in his own "pile".

He lives in a small town where the police cruise,
No one is willing to stay...afraid their anus he will bruise.

He won't bathe until it's been at least a week,
as he spends his time behind the curtain to peek.

It has been said that his head has a slope,
it has also been said that any remedy is no hope.

So this is the end I bid you adieu,
Oh look, here comes Roger, I thought I smelled poo!

In the spirit of the oh-so-popular game for kids "Where's Waldo?",
a new Internet game is born, "Where's w0ger?"

How can you play?

Simple!

It's easy to follow w0ger's stench around the Internet, and when you
locate and identify his ISP or access vectors, netKKKop him! :)

w0ger netKKKops anyone he can, he even calls their employers, their
neighbors, any officials, etc. he can lie to in a faglame attempt to
try and ruin their lives. w0ger's life is raw shit, and he wants yours
to be as bad. What a guy!

Trouble is, is that NOBODY'S life can ever be as bad a w0ger's!

He even has syphilitic rantings about netKKKops, yet, search in
http://www.groups.google.com and you will find a plethora of w0ger's
harassment of others via netKKKopping, phoneKKKopping, or even
mailKKKopping.

KKKopping is w0ger's F-A-V-O-R-I-T-E thing! Show your appreciation of
w0ger's KKKopping of everyone by everyone KKKopping w0ger!

w0ger is a KKKop because he can't get a DDDate with a WWWoman!
(Glendale neighborhood dogs are lookin' mighty haggard...!)

Wheeee! :)

The subject line says FA (for auction) yet you say this is for sale. Which is it? FA and FS are two different things.

3168. Q: VHF network setup

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-26 22:07:06 UTC
From: Nomad <classified@nospam.com>
Message-ID: <3d6aa600@news.psinet.cl>
Source record: 73610

Hello everybody on the Unet
I am no radio amateur, but still hope to get some answers to this problem. Please be patient if my jargon is not right or the questions are too basic.

I have a setup of 4 VHF (144Mhz) radios, 1 Kenwood mobile (base station AC powered), 2 Motorola mobiles (called stations) and 1 Kenwood portable. I have a set freq. of 150.085 MHz. Both Motorola (used as fixed stations with AC power) are programed to that frequency and currently I have no means of programming them (they have two programed channels, have a CH button and a MON button). Following happens:

Kenwood base station: tx and rx all other radios.

Motorola stations: tx and rx each other and the base station.

Kenwood Portable: rx all signals, but only Kenwood base station can listen to its tx. Motorola stations cannot hear portable although receive busy signal (MON /BUSY led flashes).

No DTSS or other tone encoding is programed on the Kenwoods. I do not know about the Motorolas, but they operate perfectly well with the base station and with each other. I have set tone to 97.4 Hz on the Kenwoods, anyway I use no repeater. The Motorolas should not be programed to split freq, because they rx signal (so it is a squelch problem?) and work on single freq with base. What could be the cause of this behaviour? I am no expert on this kind of stuff, althogh as an engineer I am technically fit to understand.

I do not have the model numbers with me now but can get them if necessary. I do not want to make guesses now.

best wishes

Nomad

3 Inch Tool" - Woger Wiseman

Little Bee
My nuts are small as pearls
You like to laugh at me 'cause I'm hung just like a squirrel
Sometimes it bugs me
I'm not a bigger guy
When I was baby it was exactly the same size
But there's nothing I can do...
Because I only got a 3 inch tool.

Come home with me
Have a cocktail at my place
I got to tell you before we get past second base
In my pants
Aint no big swing
If you can find him he's the friendly little thing
No there's nothing I can do...
I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool

Sometimes I wonder
If it'll ever extend
I get embarrased when I'm hanging with my friends
They like to raz me
I dunno why
By gettin' me a happy meal and supersizin' my pride
But there's nothing I can do...
Because I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool
Yeah it's small, but it's real cool
I'm happy with my 3 inch tool
I only got a 3 inch tool
I only got a 3 inch tool

3173. ARRL Maryland-DC Section Convention & Hamfest

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-27 00:07:51 UTC
From: "E. Allen Brown, FALLFEST 2002 Programs Manager" <KZ3AB@ARRL.net>
Message-ID: <3D6AC2D7.C717732A@ARRL.net>
Source record: 73615

The Foundation for Amateur Radio (F.A.R.) and The Columbia Amateur Radio Association (CARA) have joined forces to create what will become one of the premier Amateur Radio events in the Mid-Atlantic region.

The dates are Saturday, September 7 and Sunday, September 8, 2002 at the Howard County (MD) Fairgrounds west of Baltimore near the intersection of I-70 and MD-32.

See: http://www.fall-fest.com/ for details and directions.

VE Exams (amateur radio tests) will run from 8:00 am - 12:00 n on Sunday, September 8.

Skywarn classes run from 12:00 N - 5:00 pm on Saturday, September 7. See: http://www.fall-fest.com/skywarn.shtml for info on how to register.

Many vendors have reserved space including "Satellite Sam," the "RF Connection," the "Badge Man," "Startek," "Ramsey Electronics," and more.

Seminars will include:

Amateur Microwave Communications with Bill Seabreeze, W3IY
RF Interference Investigation with Mike Martin, K3RFI
AMSAT Satellite Communications with Rick Hambly, W2GPS
Coordinated ARRL Presentation with Tom Abernethy, W3TOM, ARRL MDC SM
Demonstration of the Marconi Detector by Chip Weems, W4PBG
APRS Demonstration by Bob Bruninga, WB4APR
Amateur TV demonstration by Tim Keener, N3VGS

And more!

A special event station will be on the air demonstrating vintage and homebrew equipment (radios that glow in the dark) with that wonderful rich
sound of AM radio from the "old days."

For more info, contact: <info@fall-fest.com>

The autonavigate system I saw about 1974 in an L-1011 was a card
system that set the system up to follow from beacon to beacon with
no pilot intervention and then go into an autoland sequence. I remember
one of the 'issues' was the L-1011 couldn't brake effectively on autoland
so you needed to make sure you had lots of space...

Hmm, was my only time ever in an L-1011. There were more crew than
pax. (6 of us I believe, and hold was empty. DAMN did that thing
roll out quick and rotate up fast! Most intense feeling I'd had in an
aircraft up to that point in my life! Well, maybe. There was this time
with a Cherokee coming in at right angles that managed to dive
under us... (And that was the day after my parachute didn't open in
the Poconos... (And no, I wasn't wearing it. I loaned it, and he
survived.)))

In the spirit of the oh-so-popular game for kids "Where's Waldo?",
a new Internet game is born, "Where's w0ger?"

How can you play?

Simple!

It's easy to follow w0ger's stench around the Internet, and when you
locate and identify his ISP or access vectors, netKKKop him! :)

w0ger netKKKops anyone he can, he even calls their employers, their
neighbors, any officials, etc. he can lie to in a faglame attempt to
try and ruin their lives. w0ger's life is raw shit, and he wants yours
to be as bad. What a guy!

Trouble is, is that NOBODY'S life can ever be as bad a w0ger's!

He even has syphilitic rantings about netKKKops, yet, search in
http://www.groups.google.com and you will find a plethora of w0ger's
harassment of others via netKKKopping, phoneKKKopping, or even
mailKKKopping.

KKKopping is w0ger's F-A-V-O-R-I-T-E thing! Show your appreciation of
w0ger's KKKopping of everyone by everyone KKKopping w0ger!

w0ger is a KKKop because he can't get a DDDate with a WWWoman!
(Glendale neighborhood dogs are lookin' mighty haggard...!)

Wheeee! :)

Being empty makes a big difference. With normal load they didn't climb
worth shit. Possibly the slowest climbing jet since the water wagons.
TWA L1011, ORD-LVS couldn't get out of 30,000 feet (on its way to 310)
by the Minneapolis boundary, 250 miles. DC8s, 10s, and 707s were at
350 and occasionally above at that point, and had been since IOW.

They also had about a 3.5° deck angle at .85 Mach cruise. Most of the
big iron flew at .84-.85. That was pre-1973 (Arab oil boycott). After
that, all the big dogs slowed down from .85 to .82 or .80. Except the
1011s; because of that deck angle, it cost them more fuel to fly
slower (increased angle of attack) than it did .85.

w0ger was overheard singing his song on the HAM bands. What sounded like a canine in distress was in the background as well. Police later discovered a passed out Dalmation with a ruptured and bleeding rectum laying in the human feces strewn backyard of w0ger wUsswoman.

Observe:

Ay, yi yi yi!
My name is "Cunt Yeast Wiseman".

And yes, it is true
That my dick smells of poo
I have Keyboard Courage
But will run far from you...

Ay, yi yi yi!
I dream of sex with Joe Theisman.

I lame post and drool spittle
'Cuz my dick is so little
I'm gay with no life
and my Mom is my wife...

Ay, yi yi yi!
My Dad's name was "John", and never "Wiseman".

There will be no more HAMfests
because of my breasts,
I cannot ever show
'cuz I'm a pussy head to toe...

Ay, yi yi yi!
The ladies say "That's a small size man!"

And as for taking off, auto-throttle is actually a requirement;
they need special permission to take off with manually controlled
throttle.

True that Boeings are far less advanced than Airbusses like the
A320/A340 though, which are all fly-by-wire.

As for the aeroplane "knowing which way it's pointing" etc, that's
the purpose of the inertial navigation system which is so old-hat
it's probably pointy with stars on it. Not to mention GPS, of course.

Poor Walter.....He's just a pervert who fucks his teenaged daughter.

NIGHT QUEEFER
(Gibb/AB8MQ)

Listen to the sound:
there is a bowel movement all around.
Geno has something goin' down
and everybody can smell it.

On the waves of the air,
Geno's shitty underwear.
If you have a credit card beware,
he can steal it.

And Geno's a prison woman,
he moves through the light,
hoping the K-Y shipment came in.
When he tried for a new identity
yeah, Geno's not very bright,

then Geno became a night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

Here Geno is,
prayin' for his reaming to last,
livin' on the music so fine,
borne on breaking wind,
tastin' it like wine.

Night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

In the heat of Bubba's love,
Geno don't need no help for him to make it.
Gimme just enough to take us to the mornin'.
Geno whines with black choad in his ass.

He got higher in his assfuckin'.
And he's glowin' in the dark;
I give you warnin'.

And Geno's a prison woman,
he moves through the cell-light,
hoping the K-Y shipment came in.
When he tried for a new identity
yeah, Geno's not very bright,

Night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

Here Geno is,
prayin' for his reaming to last,
livin' on the music so fine,
borne on breaking wind,
tastin' it like wine.

Night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

Just admit you like to fuck the dead, Shitball. After all, you're already doing
your grandmother's rotting corpse in the basement of that rented duplex.

>I'd say you do, TURDEATER.

Poor baby.

Poor, poor baby.

(w0ger thinks he has a trademark on the phrase "Poor baby". Perhaps it
is because he's heard it directed toward him 50 times a day for the
past 50 years!!!! But, then again, w0ger thinks he's accessing the
Internet through OVIS!!!!! BAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!!!)

Poor baby.

SPANKed off of ovis.net. MUWHAHAHAHAHAHA!!!!! Get REAL USED TO IT!
You're gonna go through ISP's like your mom went through all those
"Johns"!!!

Lag time? STFU faggot. Any moron, (well, except YOU) can grasp the
concept of more than one ISP. I can have a new account in 5 minutes.

Moreover, Internet access is your life. You have no friends, no job,
and now, no more bedpans to change. Everybody hates you, and you are
glued to the keyboard, for it is your only sense of courage in this
world.

But the point here is this: Any Internet access you utilize WILL be
terminated once identified since NOBODY LIKES YOU.

It must truly suck to be w0ger!

PS: I'm Geno, no, I'm Steve Tunder, no, I'm Ray Chason, no, I'm Walt,
no I'm Stagger Lee, no, actually, I'm just one of the billions of
people on this planet that thinks you're an ASSHOLE! :)

It must truly suck to be w0ger!

Poor baby!

TONS of proof! :) :) :) BAHAHAHAHAH!

Type in any of w0ger's addresses here:
http://www.addresses.com/email_verify.php if you get a response like:
"Server Response: Could not validate at this time.", then that address
is no longer functioning. For example, ab8mq@ovis.net is, quite
simply, NO LONGER FUNCTIONING. Much like w0ger's brain! BAHAHA!

Search in your favorite search engine for "verify email addresses" or
"validate email addresses", take your pick of the multitude of online
free tools for this PROOF. :)

Type in w0ger's ovis.net FORMER ACCOUNT email address, and it will
reply that it is NO LONGER VALID. MUWHAHAHAHAHAHAHAHAHA!

Afraid of you? A COWERING WIMP THAT HIDES BEHIND THE BLINDS?
Afraid of you? A COWERING WIMP THAT HIDES BEHIND THE BLINDS?

Yeah, Rogie. It's time to send Pam a copy of your comments about her. I
mean, what the heck...why not? If given the chance you'd do the same to
anybody else. After all, you have proven time after time that you have no
qualms about NetKopping anybody and everybody when given the chance.
Hey, buddy. For all you know somebody out here may have already sent Pam a
list of your posts about her. How's your Ovis account?
HARHARHARHARHARHAR!!!!
Oh, hey. Lay off the claims that your posts are uninterrupted. That means
nothing. There are so many ISP's available that one can easily lose one (in
your case, get booted) and sign up with another within hours. You know how
that works since you have been booted from so many.
You ain't fooling anybody!
HARHARHARHARHARHAR!!!!

So? Who cares?
Maybe Roger Wiseman, AB8MQ can explain...just as soon as he removes his
pointy head from his anal cavity.
Do not trust him, however. He has definite leanings toward kiddie porn and
is not well liked in the Usenet community.
His last known email address was AB8MQ@Ovis.net, but he has recently been
booted from that ISP. He is keeping his current whereabouts top secret.

3208. Homebuilt dummy load concerns?

Newsgroup: rec.radio.amateur.misc
Date: 2002-08-28 16:45:27 UTC

Hi all,

I'm looking to build my own dummy load for my HF shack (to keep costs down). Question: Are there any special precautions that I need to take for SWR (or anything else) or will it suffice to take twenty 10 Watt 1K resistors and wire them in parallel?

73,

Josh, KG6IBF

For HF, the lead inductance shouldn't be terrible. But obviously, don't use standard wirewound power resistors. Watch the tolerances, too; one 10%-low resistor in the bunch will pop quickly, making very little difference in resistance (52.6 ohms) but now spreading 200 watts over "190 watts of resistors".

Josh - there's no magic here, but there are some things to be careful of.

Many higher power resistors are inductive, you need resistors that have a very small inductance at HF - and be sure it's at HF. For example, Radio Shack sells some "non-inductive" resistors for audio use, but they exhibit significant inductance at RF. This will cause your dummy load to exhibit some surprising impedance, certainly not 50 ohms.

As if that's not enough, you need to wire them together in such a way as to not add your own inductance. At 80 meters, you can probably be pretty sloppy and not have a problem. But at 10 meters, you will need to think about how you arrange those resistors to keep the lead inductance down.

Finally, there is the issue of heat. A 10 watt resistor won't stand 10 watts if it can't cool itself because it's surrounded by other 10 watt resistors trying to cool themselves.

So sure, you can build your own dummy load, and it really isn't hard, but you do need to think about it a little. If you just throw together twenty resistors chances are you'll have a problem.

..

Hi,
i've used various resistor
and, of course, no-inductive one are the best;
but you can use common resistor in parallel (the more in parallel, the
better is)
to make parasitic inductance lower;
take a look here were there's a table with some measure made with my MFJ259

There have been a zillion articles written on this subject. Check the ARRL handbook,
or about any issue of any ham magazine.

Short answer is, "what do you want to do with it?"
If all you want to do is see if you're getting output, a 120V light bulb will do.
If you want to make measurements, you need a resistor.
If you want to make measurements that you trust, you need a resistor you can trust.

The higher you go in frequency, the worse your problem becomes. AT HF, it's certainly
possible to cobble together a bunch of resistors, but it's not trivial. The equipment
you need to do it right will cost you WAY more than a real dummy load.

Inductance is your enemy. You need non-inductive resistors. Wire-wound will NOT do.
Power ratings are based on some estimate of heat sinking. For wire lead resistors,
that usually means soldered into a ground plane. IF you bundle a bunch together,
they will get too hot at rated power. Different types of resistors handle short term overloads
better. Carbon composition are pretty good at that, so if you only need to power it
for a few seconds at a time, you can get by with fewer resistors and a big fan or an oil bath.

Go to a swapmeet and buy a dummy load. Unless you already have the non-inductive
resistors, a swapmeet cantenna will be much cheaper.
Take your meter and measure it before you pay.
I don't know of any failure modes that would cause the dummy load to fail at RF and still
check good with an ohmmeter. Again, if you don't need accurate measurements you
can get by with a resistor that's a few ohms either way of 50. But you shouldn't pay much
for it. There are a LOT of BAD dummy loads for sale at swapmeets.

Josh...
Just my 2 pence worth, but...
20 years ago I made a dummy load thus.
Twenty 1k 2 watt carbon resistors, 3 inches of RG11, two pieces of copper clad board cut into 2 inch circles with one inch holes on the center.
The two rings were drilled with twenty holes and the resistors soldered between the two.
One end was soldered to the inner conductor of the RG11 which was run up the center and at the other end, the braid was soldered.
A suitable 50 ohm connector was then fitted.
This was used at low power on a homebrew 10 m rig with no ill effects and on literally hundreds of CB rigs for tuning.
I give this recipie only as a guide as to what may be possible, but no guarentees.
Good luck and cheers.

Hello Joshua,

Look at the one I made: http://www.qsl.net/ct2gqv/dummy.html
Handles about 50W from transceiver (in AM mode) and 100W SSB for about
3-4 minutes without overheating to much.
Next step is to fill the can with OIL to dissipate better.
Good from 1 to 30Mhz but very bad at 144Mhz (probably because of
resistor nature), strange is that at 440Mhz works fine (eg: low SWR)

Regards,

Ricardo Martins / CT2GQV

Josh
When all else fails check out the Ten Tec web site.
Here is a link to a 300 watt dummy load 'kit' they sell:
http://www.tentec.com/amaccyKit.htm#1203store
best of all they sell it for $29.

Many scenarios support an apparent lack of interruption in service.

Such as:

A) You also use your mommie's AOL account.
B) You learned to read enough to find a library, or other public
Internet access point.
C) You found another ISP
D) You post from work (Oh, wait, you can't get a job)
E) You post from a friend's machine (Oh, wait, you have ZERO friends)
F) You already had multiple ISP's since you are such as asshole, you
just had to have some backups.
G) You found another ISP
H) You found another ISP
I) You found another ISP

As ALWAYS, when w0ger has NOTHING, he hides behind his feces.

I built the one pictured in the ARRL Handbook. I don't remember the year but I could look it up if you need to know. It was very simple it just took carbon resistors, of an appropriate value and parrelleld them by soldering them between two pieces of circuit board. You can work it out by estimating the wattage of a single resistor then using X number of them to achieve a Y wattage rating. Plug in the numbers to the resistors in parrllel formula and you can find the value of each one. Next is the hard part. Scrounge around the surplus stores until you find a handfull and make up the load. Mine worked well 160-10 although it ran cooler when I cooled it with a small muffin fan and even cooler when I submersed it in some (Silicone) Oil left over from a Xerox Machine. I can't understand why my wife thinks I'm crazy though?

Pretty much everyone mentioned that you'll have trouble using
wirewound resistors, which is true. Even if you parallel a bunch,
above some frequency it won't help because they have so much
inductance and distributed capacitance that they will be
self-resonant. There are some other tricks you can play however. If
you can get a long piece of RG-58 cheap (like some old lan cable
perhaps), you'll get reasonably close to 50 ohms load no matter what
you put at the other end. The down side is you'll need several
hundred feet of it for that to be effective at 3.5MHz, because the
coax loss is pretty low there. In this case, loss (in the line) is
your friend! Another thing you can do, if you have a tuner, is use
the tuner to tune out the reactance (and the resistance mismatch) of
whatever load you build. In fact, if your load is simply inductive
because of the coiled wire in wirewound resistors, you can tune that
out with a series capacitor. (Alas, there seem to be a lot fewer air
variables kicking about in junque boxes these days...) You're liable
to find that only works at the low end of the HF band because of the
self-resonance effects. I just measured a pair of parallel 100 ohm 5W
wirewounds, and found them to degrade rapidly as a load above 14MHz.
Larger wirewounds would likely be worse. On the other hand, I
measured a 51 ohm metal oxide 2 watt resistor ("very short" leads),
and it would be very servicable as a dummy load even at 440MHz, where
it's 55.87+j17.61 ohms (per a precision RF component analyzer...),
giving an SWR in a 50-ohm system of 1.42:1. At 146MHz, it's
51.43+j5.95, SWR=1.13:1. Interesting thing about metal oxides is that
they seem to be able to stand rather incredible power overloads, and
one could probably make quite a respectable load with twenty or so of
them dropped into some oil. Best to think carefully about how to wire
them up to avoid parasitic inductance and capacitance.

Cheers,
Tom

Yes...you are correct. Roger Wiseman, the deeply disturbed individual who
posts so blatantly is the crux of most of the mentally disturbed comments
you see here.
Mr. Wiseman is bereft of any common sense and rather lacks native intellect.

Wiseman seems to lack common sense.....perhaps his advanced years are the
cause....or just maybe sheer stupidity is to blame.
Either way you cut it, Wiseman is a loser.

Hmmmm, let me see.....

Gareth's measuring device produced two readings, 400V and 0.1V, at two
different frequencies, one the third harmonic of the other.

He said that the ratio of these readings was 36dB.

No explanation has been forthcoming from him as to why he has used a
logarithmic voltage ratio expressed in something he called a 'dB'.

HI FROM THE UK
I have made three myself , and as a club we have made at leat 10 of these
beasts and all work very well .

A sryp tin , a so239 socket 2 standoffs and two disks of pcb board.

it is bascally 2 disks of pcb board with 20 (none-inductive) 1K
2w resistors soldered between them , with a thick piece of
cooker cable carrying the rf to the bottom plate , insulated
of course , and then some thick copper wire solderd from the
top plate of a syrp tin to the ground-plane , to reduce the
resistance of the metal standoffs
either filled with sand or oil .

rated at 50watts cont
100watts 4 mins
200 for 2mins all approx

hope the info helps

de Paul

It is no "mystery", really. Based upon the facts as we know them an asshole
is just that. Bottom line is that Roger is an asshole...surely nothing more.
Wogie is very much a loser in that his whole life centers upon these
newsgroup posts....this alone is indication that his life is lacking in
direction and purpose.
It must be miserable being Roger Wiseman. Small wonder he spends his days
timidly peeking from behind the blinds at the outside world.

Imagine being in his sandals...poor old fat boy cannot even go to the local
store without peering over his shoulder to see if he is being followed. The
paranoia must be getting to him....

Easily enough done, Fat Boy. Your question is as flaccid as your weenie. I can lose an ISP at one p.m. and easily sign up with a new ISP by three p.m. Apparently YOU know how that works. Whassa matter, Wussman? Somebody send Pam a letter?

Now, just who the heck are you trying to fool? Come on, Fat Boy....wipe off those overstuffed lips of yours and be honest. Are those "Puffy-Boy" lips really yours or did you pay a plastic surgeon a lot of money to inject callogen in your ugly face? Of course those exaggerated lips of yours may be the result of many, many miles of abuse from your Lavender Lads. You better look into getting a refund...the only plastic surgery that you need is the removal of your pointy head from your rotten rectal cavity. Your head has been up your rectum for so long that even your stale breath smells like sh*t. You come by it honestly...idiot that you are.

Message-ID: <ca5dcfb5.0208310524.184b546e@posting.google.com>
Source record: 73492

For all you simplex users in New England, a Yahoo group email list has been started just for you.

http://groups.yahoo.com/group/nesimplex/

Add your simplex net, IRLP node, simplex repeater, etc. to the database. By adding your info to the database you can let others know about your operation to avoid co-channel interference or to advertise your presence to other hams.

The email list is also a great place to meet other simplex operators from the New England area.

You do not have to be part of the simplex activity in order to add to the database. Anyone can add info about simplex activity they know about in New England.

Source record: 73499

I've seen what you're talking about. It was in a old "Popular Electronics" from the '60s or maybe '70's. I quick search of the web turned up nothing. I don't think it's really VLF or ULF as there was no carrier - just raw audio impedance matched to the earth.

I would suspect that the 50/60Hz power line will have rendered this useless for any distance in today's environment.

You may be able to find that article if you go to your public library and do a search on microfilm of Popular Electronics. Look for the December issue of each year and review the year's index.

It will take a long time, but I'll bet you have a blast. Just try not to get too side tracked on all the different articles. <grin>

As for searching on the web, I did find some metion at http://www.auroralchorus.com/more.htm about listening to telephone conversations remotely during war-time.

"During the war, amplifiers were used by both sides on the front to overhear telephone communications from the enemy. As a result of poor insulation, there were induction effects that caused stray earth-currents far from the vicinity of the telephone cables. High amplification was able to make these extremely weak signals hearable. The monitoring grounds were usually 100 metres apart, and simply guided the signals to the amplifier and earphone. "

Amateur Radio Newsline™ Report 1307 - August 30th, 2002

Amateur Radio Newsline report number 1307 with a release date of Friday, August 30th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Ham radio assists at a world development summit in Africa and hams in Michigan aid in the search for two missing girls. These stories are first on Amateur Radio Newsline report number 1307 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN ACTION: SUMMIT IN SOUTH AFRICA

Ham radio has played a vital role in a World Summit for Sustainable Development held in South Africa. It began on Monday August 26th. Just before the opening gavel fell Hans van de Groenendaal, ZS6AKV, filed this report from Johannesburg:

--
"Radio amateurs will be providing communications assistance at three main operational centers. Members of the South African Radio League's emergency communications arm Hamnet will set up facilities alongside the National Defense Force and the South African Police Services. They will be operating at the main convention center, at Campton Park near Johannesburg International Airport and in Pretoria near the Woodcliff airbase.

Radio amateurs will be using the extensive repeater network in the city as well as H.F.. ZS6BUU, the National Director for the South Africa Radio League's Hamnet has more details:

--
ZS6BUU: "There will also be at least two mobile stations fully equipped to be available should the necessity arise. More vehicles can be called upon if needed.

One vehicle will be on stand-by should we need communications from Lancerial Airport. Now, Lancerial is an alternative airport should Woodcliff Airbase become clogged up with aircraft coming in from al over the world.

Hamnet is required to render emergency communications in association with the SANDF -- that's the defense force as well as our local

police. Hamnet regards this as a good exercise to test our preparedness and how we will be able to handle any emergency -- if and when one should come up."
--

It goes without saying that many other radio amateurs will be available should the need arise.

I'm Hans van de Groenendaal, ZS6AKV, reporting from Johannesburg.

--

The 10-day summit is being billed as the largest in U.N. history. It has been nicknamed Rio+10 because it marks the 10th anniversary of the landmark 1992 Earth Summit in Rio de Janeiro.

**

RESCUE RADIO: MICHIGAN HAMS HUNT FOR MISSING KIDS

They did not plan to get involved but a group of Michigan hams swung into action after a policeman in the town of Grand Haven knocked on the door of Andrew Young, N8ARY. The officer was going door to door looking for two missing area youngsters. On learning of the situation, Young decided to see what he could do to help:

--
Young: "I called a friend of mine who is also an Amateur Radio person because he had a park across from his house where kids generally play. I asked him to keep an eye open for the two children. A few minutes later he called someone else on the repeater and asked them to do the same thing and a few guys heard it and just kind of assembled as a loose knit net."
--

The person that Young called was Donald Smith, N8HCS, also of Grand Haven. He enlisted Smith to keep his eyes open for the two young girls. N8HCS assisted by David Cross, N3WJF, then called up an informal net that grew in size to about a dozen area hams. Most of the action was in the search:

--
Young: "We sort of just stayed out on the street and interacted with people and reported anything we heard back to the net control."
--

As the informal net grew into a formal operation, John Sundstrom, N8YQD was dispatched to be at the girls parents home. His job was to maintain contact after the net turned into a formal search. Coordination and central dispatch where in the hands of Don Meyer, KB8ODB.

The good news came when the girls were located by the police about two hours after the start of the net. This, thanks to a report from

a neighbor who saw the girls and called in.

Young says that with all of the recent abductions in the news, it is nice to see a community mobilize like this to find the missing children. Even better: In this case the search was a complete success. (ARNewsline™)

**

EMERGENCY COMMS: GRANT AIDED ARRL TRAINING TO BEGIN

Word from the American Radio Relay League, that its Amateur Radio Emergency Communications Training Courses supported by a $181,900 federal Homeland Security grant will begin within a few weeks. As previously reported from an ARRL bulletin the League was among several dozen nonprofit organizations designated to receive some $10.3 million in federal money to boost homeland defense volunteer programs. During its first year, the grant will reimburse the cost of Level I ARRL Amateur Radio Emergency Communications Course training for up to 1700 volunteers. More information is on the web at www.arrl.org. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Amateur Radio Club of El Cajon in El Cajon California.

(5 sec pause here)

**

RADIO RULES: VANITY FEE GOES UP SEPTEMBER 9TH

A new and slightly higher fee for vanity call sign applications will go into effect on September 9th. According to the FCC, applications received on or after that date will be subject to a $14.50 fee for a full ten year license term. (FCC, RAIN)

**

ENFORCEMENT: FCC WEIGHS INTO REPEATER FRAY

The FCC is weighing in on an ongoing repeater versus repeater dispute in Arkansas. The Agency's Daryl Duckworth, NN0W, explains:

--
Duckworth: "We requested further information from Gerald Hogue, KD5CYA, of Conway Arkansas regarding continuing interference between his repeater and the AC5RU repeater. We had notified both parties some time sago that each was responsible for taking steps to minimize interference, but we are seeing no cooperation on the part of the KD5CYA repeater. Hogue has 20 days to respond."

--

But the problem seems to have gone past the repeater versus repeater stage. Now users are getting involved and the FCC is taking action there as well. Again, the FCC's Daryl Duckworth:

--
Duckworth: "On the same topic, the Enforcement Bureau has warned Ronald Lewis of Morrilton Arkansas, KC5BNN, about interference to users of the AC5RU repeater. I was pointed out Lewis that his license renewal comes up in June 2003 and that this matter must be resolved if he is to receive a routine renewal."
--

In its letter to Lewis the FCC said that it will not tolerate deliberate interference between the two repeaters. Also that it does not care if the interference is from a transmission by one of the repeaters or by a user of one of the repeaters making a broadcast intended to degrade the other repeater. Either way, it must stop. (FCC, RAIN)

**

ENFORCEMENT: MORE TROUBLES FOR FAX.COM

More problems for fax.com – the direct fax advertising company recently hit with a 5 point 4 million dollar fine by the FCC. Now a California businessman says that he wants a lot more from the firm in punitive damages for being spammed.

Steve Kirsch, a Silicon Valley executive is suing fax.com for two-point-two trillion dollars. Yes we said trillion with a capitol T. And Kirsch says that he has filed the litigation because he believes that to be the amount consumers should get if the proper penalty is assessed for each and every junk fax ever sent by fax.com, plus triple damages as permitted under federal law.

Kirsch is founder and chief executive of Propel Software in San Jose. He decided to pursue the class action suit after he got a torrent of unsolicited faxed ads. Kirsch estimates an unwanted fax wastes ten cents for the cost of paper, ink and fax machine wear and tear. (Published news reports)

**

NAMES IN THE NEWS: BASS WILL FLY IN OCTOBER

According to the latest news reports, Lance Bass of the boy band 'N Sync will fly to the International Space Station in October. Hollywood producer David Krieff, who has arranged financial backing for the performer's space venture, says that Russian space agency executives and attorneys recently flew to Los Angeles and spent eight days hammering out a 400-page flight agreement with Bass' representatives. Krieff said Bass is slated to blast off October

28th from the Baikonur Cosmodrome in Kazakhstan with two cosmonauts on an eight-day Soyuz "taxi" and resupply mission to the space station. Krieff also disputed remarks attributed to a Rosaviakosmos spokesman Sergei Gorbunov that the Russian space agency might scrub Bass from the mission because he had failed to meet a payment deadline.

Bass hopes to follow in the footsteps of the world's first two space tourists -- American businessman Dennis Tito and South African millionaire Mark Shuttleworth. There is still no word as to whether or not Bass might operate the ham station on board the I-S-S, but the entertainer was scheduled to talk with school children from the Johnson Space Center in Houston on August 29th over the Internet. This, using NASA's Distance Learning Outpost and Education Web Portal. (Published news reports, NASA release)

**

NAMES IN THE NEWS: FORMER HAM TO HOST REVIVAL OF TV GAME SHOW

Donny Osmond, the former KA7EVD, will be helping to bring a legendary television game show back to the small screen. USA Today reports that starting in September, Osmond will be the host of Pyramid, a syndicated revival of the game shows created and hosted by Dick Clark in the 1970s and '80s.

According to Los Angeles ham radio lore, Osmond was reportedly mentored into ham radio in the early 1980's by the late Art Gentry, W6MEP. This, when Osmond and his sister were taping the Donnie and Marie Show at the Golden West Studios in Hollywood. Gentry, who was employed there as a Broadcast Engineer is best known for his development of the FM repeater – a device that changed the way most hams operate on the VHF and UHF Amateur Service bands. He and his wife Millie, K6JJN, were also mentors to many Los Angeles youngsters wanting to enter ham radio. (USA Today, ARNewsline™)

**

NAMES IN THE NEWS: DARA NAMES SCHOLARSHIP WINNERS

Gary Des Combes, N8EMO Chairman of the Dayton Amateur Radio Association Scholarship Committee has announced the recipients of the clubs 2002 scholarship program. Named to receive financial support for their future education are Thomas Tenaglia, K3TAT; William Bailey, KF4VAU; Victoria Morgan, KF4PNI; Nicholas Bishop, KG6JSA; Jeanne Hansen, KB2RAP; Sara Hanna, KE6MWX; Jeffrey Doub, KC8IOC; Michael J. Haessler, KB9TGF and Amy Morris, KI6F. Scholarship awards run between $1000 and $2000. (DARA)

**

HAM RADIO BUSINESS: NEW LINK-COMM SOFTWARE ENHANCES REPEATER CONTROLLERS

Attention repeater owners. If your system uses a Link-Comm controller, have we got good news for you.

Steve Srobel of Link Communications has announced that new programming software for the RLC-1 Plus, RLC-2, RLC-3, RLC-4, and RLC-Club is now available. The new software allows you to program messages, timers, autodial numbers, etc. with a point-and-click interface. It also provides a way to manually edit and upload a file of other advanced commands.

The best part is that it can be downloaded for free from www.linkcomm.com/quickstart.html. You can email feedback about the program to mark@l... (Repeater Owners Remailer)

**

HAM RADIO BUSINESS: COMMEMORATIVE PIN FROM KENWOOD

Kenwood Communications is offering a commemorative "United We Stand" pin with the purchase of any new Kenwood Amateur radio. The offer is good in the United States only and began on August 20th. It runs till further notice. More information as on the web at www.kenwood.net/ama_page.cfm (Kenwood Communications)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

CONVENTIONS: CB'ERS TO MEET DOWN-UNDER

Are you into C-B radio? Do you like to travel? Would you like to go to a week long C-B Break? Well here's a convention for you.

Q-News reports that the Albatros C-B Radio Club will be holding its annual convention the week of September 14th to the 21st. That's right it is a week long C-B show with all the trimmings. New gear. lectures and what have you.

It all takes place in the city of Ballina. That's down-under -- in Australia. (Q-News)

**

HAMFESTS: LIMARC IN NEW YORK SEPTEMBER 15TH

Closer to home, LIMARC, the Long Island Mobile Amateur Radio Club will be holding its fall hamfest on Sunday, September 15th. The venue is Briarcliffe College in Bethpage, New York. Gates open at 6:30 AM for vendors and for the general public at 8:30 AM Eastern time. More information is in cyberspace at www.limarc.org or call

the 24-hour info line at 516-520-9311. (LIMARC)

**

HAMFESTS AND CONVENTIONS: NRC TO WEBCAST

The National Radio Club will hold its annual convention the Saturday and Sunday prior to Labor Day. N-R-C is a group made up of Medium Wave D-X radio listeners with the club founded back in 1933. And in past years the club has set up a carrier current radio station in the hotel where its conventions are held. Normally you cannot hear the broadcast outside the hotel grounds, but this year could be different. This is because the carrier current station will be helped by a broadcast remote pick-up channel that will be used to send the audio across town to a server that will distribute it as a webcast. The frequency to be used belongs to WLIO television in Lima Ohio. Fred Vobbe, W8HDU, explains what will happen.

--
W8HDU: "At the hotel we're going to place a small walkman radio connected
to an old remote pickup unit. The transmitter is on 26.410 in narrowband
FM, and it will relay back to WLIO's studios where the club will have its
server encoding the data stream. The transmitter runs about 40 watts into
a CB type antenna, and it IDs every 10 minutes with the call WPLP549. The
ID won't be heard on the webcast as it's filtered out at the receiver."
--

If you hear this broadcast, you can get a QSL by sending an accurate report to Fred Vobbe, W8HDU, in care of WLIO Television, 1424 Rice Avenue, Lima Ohio 45805. (NRC, W8HDU)

**

INTERNATIONAL-AUSTRALIA: VANDALISM AND BULLETS ON THE AM BAND

On the international scene, the staff of Brisbane Australia commercial AM station 4BH are in shock after what appears to have been a deliberate attack on the radio station's twin broadcasting towers. Q-News Graham Kemp, VK4BB, has the details:

--
4BH broadcasts on 882 kHz and although now a DMG music station is probably better known from it's "glory days" as the Queensland Key Station of the Macquarie Broadcasting Network.

Police are investigating an incident just before 9 o'clock Monday August 19 which saw both broadcasting towers have their guys cut with

what appears to have been bolt cutters, which sent them crashing to the ground, putting the radio station off air, and coming to rest just meters away from a caravan park.

The broadcast industry in Brisbane rallied around, SWITCH AM a public community access station at Long Pocket on 1053 kHz has gone "off air", donating their transmission facility to the Commercial station. 4BH was back on air just 27 hrs later at just some 800 watts, instead of their 5kW, using a retuned 1053 TX and tower, retuned thanks to Radio TAB engineering staff winding some 11 heavy duty inductors.

This incident is unprecedented and has ramifications for all commercial radio broadcasters and the Commercial Broadcasters Industry Association has said "While it is hoped that this situation will not occur again it may be advisable for stations to review, and where necessary, upgrade security arrangements at their transmission facilities".

This is the same site which saw thieves using bolt cutters gain entry to steal some 2 dozen satellite dishes belonging to Radio TAB early in the year. Allegedly the 4BH studios in suburban Stones Corner were fired upon recently, at least one bullet penetrating an office.

From Q-News Australia, I'm Graham Kemp, VK4BB, for the Amateur Radio Newsline.

--

Investigators have not been disclosed whether the three incidents are related. (Q-News)

**

SPECIAL EVENT: DRAKE ON THE LAKE

Back on this side of the Pacific, Greg Compton, N5ZFW, reports over the Internet that the Cherokee County, Texas Amateur Radio Club will be operating special event station called "Drakes On the Lake." This taking place the weekend on September 14th and Sunday the 15th.

The station, using all vintage R.L. Drake gear will be operated on the shore of Lake Jacksonville, which is near Jacksonville, Texas on 20, 40 and 80 meters. Callsigns to be used are AD5KM or KI5P. QSL with a 9 by 12 SASE to Brad Low, AD5KM, 840 Henderson Street Jacksonville, Texas, 75766. (From Internet posting)

**

DX

In D-X, members of the 8Q7ZZ youngsters' DXpedition to the Maldives have returned home after a highly successful operation. Mark Haynes, M0DXR, reports that the group made over 25,000 QSOs between the 30th

of July and 10th of August, including around 330 on 6 meters. The QSL manager for 8Q7ZZ is Phil Whitchurch, G3SWH. (GB2RS)

**

THAT FINAL ITEM: CELL PHONE RELIABILITY

And finally this week, a graphic example of how the cellular telephone network can hiccup at the most inopportune time. Earlier in this newscast, we talked to Andrew Young, N8ARY, up in Grand Haven Michigan. Andrew was using a cellular phone. One of the topics that he and our Producer Bill Pasternak, WA6ITF, were discussing was the reliability of these devices. Guess what happened next:

--
Pasternak: "It seems to me that more and more hams are carrying cellphones than HT's. Have you noticed that also?

Young: "Yes. Myself, I have a cellphone that rarely works when there is a busy time -- like during some sort of event. When a lot of people get in one area mu cellphone almost never works and usually I have t...."

Phone line sound: "click. click."

Pasternak. Hello.... Hello.... I think your cellphone stopped working."
--

Talk about a graphic example happening at the most convenient time. Thats right. The cellular phone system up in Michigan did what so many seem to do. It abruptly went away.

Ham radio is always there when you need it. Another good reason to always carry your H-T when you are out and about. (ARNewsline™)

If I was trying to fix this, assuming this is just a 7-segment
readout and not one of those readouts with decoder+latch+counter,
would be to find out what it is. Find out the size, whether it's
common cathode or common anode, what side the decimal point is on,
and perhaps even current consumption. Find the data sheet, and
you'll get this information.

Then, find some available readout that matches the necessary requirements,
and buy those. Buy a full set, and replace them all, to avoid
differences between types.

I just checked my ECG replacement guide, and it wasn't listed
in there. That would have made it really easy to check.

It seems a tad odd that 7 out of 8 have gone bad. If the one
that still works is the right most readout (ie the least significant
digit), you might look elsewhere assuming you have verified bad
readouts. The circuit might have blanking on unused readouts,
and the LSD is on simply to show that things are working; when you
apply a signal, the needed digits will light up. Or, the circuit
may multiplex, and the portion that does the multiplexing isn't
working properly.

Poor Tampa Turd, the old granddaughter diddling pervert, he's whining online to the 14.313 page about getting booted off frequencies by Riley.
Mwhahahahahahahahahahahahahahahaha!!!

Hello Jon. You can print this if you wish. A few months ago, every time I'd get on the radio, W4AMP would deliberately interfere in one or more ways. Instead of confrontation, I did as Riley asked and sent him tapes of O'Brien at different times interfering, talking on top of whoever I was talking to, etc. I had tapes of AMP calling my wife a whore, my grandaughter a 16 y/o slut, my son a thief and drug dealer, and me a drug dealer, dead beat, trailer trash and the list goes on. I got an email from Riley, just like Dan and others--I guess, asking me

. . . a CB'er is fined $25,000 and goes to jail?

I CALL IT A GOOD START !!!!!

QUOTE from the ARRL web site.

QUOTE

Florida Man Gets 15 Months, Huge Fine for Deliberate Interference

(photo of the fool)
Following his conviction, William Flippo--in chains and leg irons--as he was returned to custody in West Palm Beach, Florida, June 19. [Bob Calvert, K4NBC, Photo]

NEWINGTON, CT, Aug 29, 2002--Florida Citizens Band enthusiast William "Rabbit Ears" Flippo will spend the next 15 months in federal prison and have to pay a $25,000 fine for jamming Amateur Radio communications and transmitting without a license. Flippo was convicted in federal court earlier this year on eight misdemeanor counts. The sentence is believed to be a record for convictions of this type.

Federal District Court Judge Daniel T.K. Hurley imposed the sentence August 29 on Flippo, of Jupiter. He had been found guilty June 19 of four counts of operating without a license and four counts of deliberate and malicious interference. Flippo has remained in custody since the guilty verdict and underwent a psychiatric evaluation prior to sentencing. It's not clear if he will get credit for time already served. The judge also said he wants a full financial disclosure from Flippo, who may face other legal actions unrelated to his radio operation convictions.

At the sentencing, Flippo reportedly wept, said he'd turned over a new leaf and claimed he was sole support for his wife and two daughters. None of his family members was in the courtroom for the sentencing, however.

The judge was not persuaded, telling Flippo, 60, that he was old enough to have considered the consequences of his actions. Hurley also alleged numerous incidents of perjury during the course of Flippo's testimony during his June trial, which ran six-and-one-half days. The jury took about a half hour to determine that he was guilty on all counts.

According to trial testimony, Flippo primarily had targeted members of the Jupiter-Tequesta Repeater Group for jamming and regularly interfered with amateur operations, especially on 10 and 2 meters, over an approximately three-year period. Following up on the amateurs' complaints, personnel from the FCC's Tampa District Office visited the Jupiter area at least twice in

1999 and reported tracking the offending signals to Flippo's residence.

Flippo had faced a maximum of eight years in prison--one year on each count--and up to $80,000 in fines. Available opinions were mixed on whether the sentence Hurley imposed was appropriate. Ed Petzolt, K1LNC, who assisted the FCC in gathering evidence and, at one point, had his car rammed by Flippo's vehicle, said he felt Flippo should have received at least three years.

"I thought it was a slap on the wrist," said Petzolt, the 1999 ARRL International Humanitarian Award winner who also testified at the trial. John Criteser Jr, KC4JLY, agreed. "I think he should have gotten more--at least five years," Criteser said outside the courthouse. Other amateurs who attended the sentencing session, including Jupiter-Tequesta club member Bert Moreschi, AG4BV, were satisfied with the penalty, however.

Flippo requested that he be incarcerated at Florida's Eglund Air Force Base, but the decision on where he'll spend his sentence is up to the Federal Bureau of Prisons.

Flippo's federal trial was twice postponed last year after he argued successfully that serious health problems would prevent him from participating. He was unsuccessful, however, when he tried the same tactic during a hearing earlier this year to determine if he was capable of standing trial.

Last year, Flippo was convicted in state court of criminal mischief--also a misdemeanor--after ramming Petzolt's vehicle. He was sentenced to a year's probation and ordered him to dispose of any radio equipment in his possession. A ban on possessing radio gear also had a condition of his federal bond, which Hurley subsequently revoked during the trial.

Federal authorities arrested Flippo in July 2000. The criminal charges of which he now stands convicted covered violations allegedly committed between June 1999 and April of 2000. The defendant already faces a $20,000 fine levied in 1999 for unlicensed operation, willful and malicious interference to Amateur Radio communications, and failure to let the FCC inspect his radio equipment.

Hurley ordered Flippo immediately back into custody to start serving his sentence. Flippo reportedly was led into and out of the courtroom in shackles and leg irons.

END QUOTE

Perjury? Ramming a guy's car? Shit, he should have gotten the max.

Oh, well -- one asshole down, a zillion to go.

>Oh, well -- one asshole down, a zillion to go.

Actually, the score is TWO assholes down, a zillion minus two to go.

Roger L. Wiseman was caught by the FCC for deliberate jamming and
unlawful transmissions as well. Like the spineless COWARD that he is,
he hid behind the blinds in the Federal office, and wholeheartedly
BEGGED to go to jail since he knew he'd ALWAYS have a date that way,
and most likely, they'd be nightly ones.

(His glee at the thought of this treasured fantasy of w0ger's was
exemplified by a bout of uncontrolled incontinence, a wUssman
trademark. Neighbors, lawyers, CPS workers, and his former mental ward
orderlies refer to him by the name "carpetpisser".)

Shrewd and perceptive, the Federal agents saw through this lame and
thinly-veiled self sentencing, and decided to have the little COWARD
lobotomized instead. They were careful to leave enough gray matter
so that w0ger could still take care of daily biological functions;

however, this may have backfired since feces seems to be the center of
the little pervert's world.

Oh, well, live and learn....

PS: w0ger's chains and leg irons are anodized lavender. While this may
appear odd to most, it is a local fashion statement that communicates
"high-availability, and willingness to experiment" in his little
neighborhood club.

Do you mean you want a transmitter to transmit accross the whole commercial AM band at once? That's not a transmitter, that a jammer and is highly illegal! You can however build one for a specific frequency at very low power.

Yeah, and I have a two meter rig that can transmit over the whole 2M band,
too. One freq. at a time....
Stop taking the poster so literally about that which is easily understood by
the rest of us. Your comment does not denote a mark of superior intellect
but rather that of a crotchety, annoying, nitpicking octogenarian.

It seemed pretty plain in his post that the transmitter is capable
of operation anywhere in the AM broadcast band (you know,
tunable).

3283. Need antenna building info

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-03 04:50:24 UTC
From: Jim <jbasi@cfw.com>
Message-ID: <7RKc9.1398$Ie6.221@fe02>
Source record: 73516

I need to build an antenna for use with a low power AM broadcast band transmitter....the kind that is usually used in real estate to advertise houses on car radios as you drive by.

What I need will be used indoors and should be something like a fiberglass whip in the 5 to 7 foot range. I read up on 160 meter antennas but didn't get much info on what I need there.

My transmitter does have a front panel antenna tuning control and tuning light, but I'd like to build something which will be more effecient than just using a hunk of wire hung by a thumb tack. The transmitter is able to transmit over the whole broadcast band.

Can someone give me instructions for building one.....possibly winding a length of wire (what length?) on a fiberglass rod or the like.

Thanks
Jim

I must say this for Wogie. He is the first male I have ever read about who uses spermicide for mouthwash. I wonder if the rest of the Lavender Lads do the same? Maybe that is why he babbles so....the spermicide has deadened all the nerve endings in his mouth and he has been forever relegated to sounding as though he has a mouth full of marbles.
BUAHAHAHAHAHAHAHA!!!

Had you thought that maybe it isn't marbles he has in his mouth? LOL

I have taken mobile radios(HF) and base radios on numerous flights as carry-ons. They always open and ask questions but never a problem. I've also packed power supplys both conventional(heavy) and switching(lightweight) in my luggage, with never a question. Have fun. 73 Jim

"3 Inch Tool" - Woogie Wiseman

Little me
My nuts are small as pearls
You like to laugh at me 'cause I'm hung just like a squirrel
Sometimes it bugs me
I'm not a bigger guy
When I was baby it was exactly the same size
But there's nothing I can do...
Because I only got a 3 inch tool.

Come home with me
Have a cocktail at my place
I got to tell you before we get past second base
In my pants
Aint no big swing
If you can find him he's the friendly little thing
No there's nothing I can do...
I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool

Sometimes I wonder
If it'll ever extend
I get embarrased when I'm hanging with my friends
They like to raz me
I dunno why
By gettin' me a happy meal and supersizin' my pride
But there's nothing I can do...
Because I only got a 3 inch tool.
When I'm coming outta the pool
I only got a 1 inch tool
Yeah it's small, but it's real cool
I'm happy with my 3 inch tool

I only got a 3 inch tool
I only got a 3 inch tool

Hello,
Lost the manual for this HT and it has quite a few moves on it. Some
I just can't remember. I've searched just about everywhere I can think
of for it.

Does anyone happen to have one for sale, or know where I can find one
online? A copy or anything. I have the 528, but any of the 3 will do.

Thanks in advance.

Let me guess, you were operating at high power? In a radio as small as
this the solid state devices need to dissipate heat, and there's not too
much surface area so the metal back/frame which is the heat sink is
going to get toasty.

Radio-scanner.co.uk - September Newsletter

Welcome back to the regular updates, the site has changed again as most people knows. The site now operates with facilities for everyone to send articles, reviews and news to the site and become a true part of radio-scanner.co.uk

The site has now received 349,618 hits since the site started last february, which is over 10,000 visitors per week, growing quickly. I have also arranged some fairly unintrusive advertising on the website which covers server costs, and if it makes enough money I hope to be able to upgrade the servers and the site software to a much more professional standard and be able to offer regular competitions so fingers crossed.

Just took a TH-F6A through without a hitch (well, they xray'ed my bag twice and wanded/patted me down and made me take off my shoes).

Not nearly as bad as the time I had to take a piece of "yellow gear" (flight line test set for the Navy) across the country for field readiness testing, with all it's big honkin' cables and brick-sized cassette tapes (hardened). Hoo-boy, they wanted me to disassemble it on the spot. I demanded they call the FBI and have them stop in to 'mediate'. Me with a full set of travel orders signed by the base commander.

I won :-)

Oh, gee. Now THAT really worries me! And just what are "they" going to do
with these posts?

What a bummer of a month for him. First, he gets the boot from
> > Ovis because he was NetKopped. Now, losing Altopia? I wonder what he'll
do

Oh, my! Now I'm worried twice as much. Like, how would he "go postal",
dummy? Send me magazine subscriptions? That's what cowards do.

You don't spose Milquetoast went on vacation, do ya? Maybe that could
explain his absence. At any rate, let's hope he stays away no matter where
he is.
Maybe he's running from Stevie!!!

Well, then, by all means, w0ger, be sure and cc all of your MULTIPLE
YEARS' WORTH of Usenet harassment, verbal threats, defamation,
outright lies, pure slander, child pornography, foul language, calls
to people's employers, etc. trying to ruin the lives of people who
merely DISAGREE WITH YOU to them while you're at it.

Better yet, Altopia can probably read, unlike w0ger.

Lets let Altopia do searches on Usenet for:
"KC8JBO"
"AB8MQ"
"ROGER WISEMAN"

And let them make up their own minds about w0ger!

Be pretty interesting for the local CO of w0ger's hovel to
install a DNR on his number. Just ballpark, w0ger...how
many harassment phonecalls do you make a day? 50?
100? 200?

>> I hope he doesn't "go postal" at the auto parts store.
>
>You'd better hope he doesn't go postal on you, coward.

Why are you talking about yourself in 2nd person, w0ger?!?

Interesting. w0ger harasses people's employers, neighbors, and local
law enforcement officials, and then when HE gets NetKKKopped, the
first thing he does is cry, cry, cry "victim"!

Poor baby.

Poor, poor baby.

And there you have it! You said it all SO well! Good job!!!!
Remember Roger bitching Stagger out for NetKopping? All the while, behind the curtains, Wogie was doing his best to NetKop Stagger every step of the way. And not just Stagger, either. Remember Rogie with his challenge to others to post their Ham calls? (stupid Roger) Yeah...and if they did old Wogie and his psychotic buttie would go WAYYYY overboard to make life miserable for them.
Shoot...all Stagger ever did was point out Roger's inability to use simple math, or point out Roger's shortcomings in his inability to mask his headers....both of which damaged Roger's credibility and made him mad. You know Wogie..thinks he knows it all and to be proved a dummy in front of everybody really upset him.
Course' Rogie's only sychophant buttie sides with him and uses terms like "coward" and "asshole" to make a weak point.
So. I again ask the anon (does that make him a coward?) poster to explain why my posts would be of any interest to Altopia and why he would be sending them in the first place? My posts are not laced with profanities, filthy diatribes, viciously cruel attacks on other posters and, aside from quoting Roger, are free of any filth such as that which Roger is so well-versed in. Go ahead, dummy. Forward my posts. Then watch for nothing to happen. I haven't lost an ISP. I have not been booted from Altopia. Maybe if you'd learned how to behave you'd both still have your original ISP's.
BWAHAHAHAHAA.......HARHARHARHAR!!!!

Dimmy's Last Song and Dance
.....

I messed with lots of people
Figgered I was smart...
Made a lot of trubble
And stalked em' in the park

I called em' almost nightly
and gave em' tons of shit
I told em' I would get em'
And watch em' have a fit

I never thought the cops
would come to my front door
I never thought they'd bust me
Or my fat assed wh***

They cuffed me and they stuffed me
and shoved me in a car
then took me into booking
and said Hardy Har Har!

I sat there for a month or two
You know the storys true
And then they took me down the road
for another charge or two!

I'm not sure just what I'll do
my future's looking rough
But when I'm finally outta here
I'm gonna quit my stuff!

My momma is ashamed of me
My landlord tossed me out
I gotta do a couple years
But I'll be out and about

my future's looking rough
But when I'm finally outta here
I'm gonna quit my stuff!

My momma is ashamed of me
My landlord tossed me out
I gotta do a couple years
But I'll be out and about

And when I'm old and grey,
and Don3a is still trashy,
I'll git a radio on credit,,
and think I'm oh so flashy

I like to lie to Riley,
to get someone in trouble,
But now it's coming back to me,
Not just single but double

I thought I could fool BSouth,
into hiring a convicted felon,
but now they fired my lyin' as$
and Don$a's pickin' melons.

If I had it to do all over,
and curtains was my wife,
I'd pray for God to forgive me,
and lead a quiet life.

Snake$hit

Yes...you are correct. Roger Wiseman, the deeply disturbed individual who
posts so blatantly is the crux of most of the mentally disturbed comments
you see here.
Mr. Wiseman is bereft of any common sense and rather lacks native intellect.

Wiseman seems to lack common sense.....perhaps his advanced years are the
cause....or just maybe sheer stupidity is to blame.
Either way you cut it, Wiseman is a loser.

Sounds like a cohort of Curtains. Stalk people, call their employers, neighbors, post BS in their neighborhood, harrass elderly relatives, order pizzas late at night, make one ringers late at night, tell lies to whatever authorities he wants to, take pictures of relatives and have Curtains post them on the internet, and the list goes on. Sound familiar Fat Boy? Enjoy your freedom before the state starts picking up your room and board. LOL

Sounds like another ham I've heard of. Tell lies to Riley, and then cry crocadile tears when he get's caught in the lies. "I'm the Victim" he cries. Harrass people in nursing homes, stalk women and little children, to the point they're afraid to go to school, and when he gets caught?? "I'm a VICTIM" he cries. Call people filthy names on the radio and when caught on tape--'I'm a VICTIM". Post 19 pages of (info?) on another ham, and forge the other hams call--You guessed it. "I'm a VICTIM. The authorities have a name for it besides victim. They called him the PERP, when they hauled his fat as$ to jail. He's not real bright taking pictures of the people he's stalking, and then his butt buddy posts then on the internet. POOR BABY The bright side of the story is the state will soon be providing room and board. MUUHAHAHAHAHAHA

Disregard.
added the s.cgi and found it - blank but there.
Should have been more patient; stoty of my life!

AWWWW!!!! Is we a little testy, is we? Actually, the only "filth" was Roger,
AB8MQ, himself and perhaps one other. For the most part I do not recall
others using the language that Roger used.
Dan has a point. The Ham groups have become almost civil again during
Roger's absence. I fear, however, that this is but a temporary lull.

The RSGBs GB2RS weekly news bulletin is now sent out via a yahoo group mailing list. This will be helpful to those who like to find the news in their inbox rather than go looking for it on the web. Unlike other national radio societies, the RSGB refuse to provide this service for non-members. The news will be posted over the weekend, after it has been released for non-members.

Subscribe at-
http://groups.yahoo.com/group/GB2RSnews/

or simply send an empty email to-
GB2RSnews-subscribe@yahoogroups.com

Other weekly amateur radio news provided via yahoo mailing lists which are worth reading can be found at-
http://groups.yahoo.com/group/arnewsline/
http://groups.yahoo.com/group/apcnews/
http://groups.yahoo.com/group/QNEWS-VK-TEXT/
The first is American, and the last two Australian, but they make interesting reading regardless of location.

Don't know which was worse. Wiseman and O'Brien jamming via carriers or
Preacher John jamming via hour-long treatises on religion.
Both are forms of malicious interference, tho John The Blabtist obviously
perceives himself as being divinely inspired.
Preacher John shall not be missed, either.

The "filth" that did battle with him has eradicated him, even if only
temporarily. Give an idiot enough rope, and, as a rule, they will hang
themselves. w0ger *HAD* an ISP that protected your beloved "filth".
This situation remains no longer, and w0ger will be terminated from
any future ISPs when he tries his "self-expression" anymore.

Exactly in what manner have you helped eradicate him, oh Holy one?

Or are you just yet another element of the chronic whining generation?

3338. Possible scam: Phony Paypal solicitation

On Sep. 5, I received the following e-mail message:

QUOTE

Dear PayPal Customer,

This e-mail is to inform you of a recent update we have made to our
systems.
To avoid service interruption we require that you confirm
your account as soon as possible. Please click here and take a
moment to confirm your
account.

Please follow the following steps:

1.) Click here to
confirm your account.

2.) Your account will be updated in our system and you may continue using
PayPal services without any interruptions.

Please note: If you fail to update your account, it will be
'flagged' with restricted status.

Thank you,

The Paypal Staff

****
****

Do not reply to this e-mail. For assistance, contact the customer service
team.

****
****

END QUOTE

At first, it seems legitimate -- a request from Paypal to re-validate my
account. However, several things about this message set off alarm bells.

1. I have three e-mail accounts -- two Hotmail and one through my ISP.
When I signed up with Paypal through Ebay, I used my ISP account. This
message allegedly from Paypal came to my two Hotmail accounts, NOT to the
account I used for Paypal.

2. Notice the domain on the "click here" address is .to -- that's the nation of Tonga. I doubt that Paypal is operating from Tonga.

Also, a sharp-eyed individual pointed out to me that Paypal addresses are secure, starting with "https," not "http."

I suspect this is an attempt to harvest Paypal user names and passwords from unsuspecting folks.

I tried to report this to Paypal but their "contact us" process only allows 1,000 characters and the phony message will not fit -- and their automated reply only sends you back to the place where the message will not fit, which generates an automated reply directing you to their contact page that will not accept a copy of the message but only generates an auto reply that sends you back to their contact page . . . . . so I figured, why not post the phony message on newsgroups.

--

Regards,
Joe S.

Neither. I am a mature adult who lurks here, watching two groups of
potty-mouths with mental and emotional ages around six years old call one
another names.

Good riddance to both of them.

What about this one for a scam then - and my reply!

DEAR Friend,
I am the first son of the late JOSEPH (D&#65533;SIR&#65533;) MOBUTU,
the former President of the ZAIRE now democratic republic of congo
. I am presently on political asylum in Nigeria . I got your contact
at the local office of commerce and industry during my search for
a assistance in this mutual transaction.this became neccessary as i
do not want anybody known to me to be associated with this money.
I want you to note that this business will benefit both of us and that it is
100% risk free. However, you must confirm your ability to handle this
because it involves a large amount of money. The funds THIRTY SEVEN
MILLION UNITED STATES DOLLARS ($37million)is my share of my father's
estate.
I boxed and shipped the money to a security company abroad at the peak of
the
a political uprising that rocked my country few years ago. Now the crisis
has ended ,
I need a trustworthy person like you to proceed to the place of the security
company
in order to clear the fund and afterwards,i will come to your country for us
to start a joint
business venture as i do not have the intention of bringing the funds back
to africa for a
very long time. Note that I will send to you the relevant documents that
will enable you
take possession of the fund for onward investment for our mutual benefit.
All I need from you is as follows:
1. Your confirmation of your ability to handle this.
2. Your word that you will keep this business as confidential as possible
at all times until we conclude this business.
3. Your telephone and fax numbers for communication.
4. Your full permanent address.

As soon as I get the above information from you, I will disclose to you the
name and the country of the security company.
i will also forward to you the contact of the diplomat that
i have hired to assist us in this business.i will also forward
your name and particulars to the security company to enable
them contact you accordingly. As we make progress,i will also
send to you a LETTER OF AUTHORITY and AGREEMENT LETTER
to enable you clear the fund on my behalf. Note that this is a very safe

transaction as this funds is my share of my father's estate. I am waiting
for your response to enable us proceed.
Regards, 234-80-37269780
Nzanga JOSEPH (D&#65533;SIR&#65533;) MOBUTU

REPLY by return Email

Gather ye con-men throughout the world and heed the word of KC. Knock not on
my door by day or night or your chickens will lay square eggs. Your hair
will turn to drum sticks and beat your brains out before you have time to
rise and service your wife. Your balls will turn square and fester at the
corners and no potion will suffice the heal the wound... Heed the warning
and knock not on my door again oh master of the con!

3342. FS: Know Real-time, Worldwide, Band Conditions In Just 3 Minutes!

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-07 17:59:06 UTC
From: W6NEK <inquire@w6nek.com>
Message-ID: <K7re9.5578$U7.2301890@twister.socal.rr.com>
Source record: 73385

W6NEK HF Beacon Tracker - Windows Software

In just a few moments you can get real-time worldwide DX band conditions
using the
NCDXF/IARU International Beacon Network!

Now you will know if a band is really open to a particular part of the world
regardless of band activity!

All this from your QTH - in real time - 24/7

Download a free demo of the software at http://www.w6nek.com

3343. FS NEW Kenwood PB-38 Batteries

Newsgroup: rec.radio.amateur.misc

I cant imagine anyone would be stupid enough to do that but I bet somebody would...
In the first place The URL is nothing like you would see comeing out of a business site.no cgi ref or anything
Secondly if you check the domain info it is bogus
Third If I was to want to update my info i would go to Paypal and do it
Fourth ...I bet the big tip off would be if you went to that url you would get no secure site popup......

Dont click that link unless you have a firewall...It is Russsian and will try to
insert "SPYWARE"
Report from McAfee Firewall
A computer at forwarder6.spylog.com has attempted an unsolicited connection to
TCP port 1534 on your computer.
TCP port 1534 is commonly used by the "micromuse-lm" service or program.

Thanks for checking it out - - - suspicions confirmed.

Of course, there ARE people who respond to the Nigerian money transfer scams.

One of us out here took the time to copy many, many of Roger's filthiest
posts over several months and assemble them in a several page document. This
document was then printed and mailed to Pam Hoffer, the owner of Ovis.net,
Roger's ISP.
Within a few short days of mailing this document, Roger was booted.
While this person dislikes playing Net Cop and has never dne so before, this
person was prompted to do so because Roger had attempted on several
occasions to Net Cop others who had angered him. Turnabout, especially in
Roger's case, is fair play.

Story on the circuit down here is that Roger Wiseman had a major fit when Ovis cancelled his account with them. Roger was so angry that he posted several nasty diatribes about Pam Hoffer, diatribes that went above and beyond being that of simple anger. (perhaps some of you saw them)
The story, as we hear it, is that Roger became so distraught that he went semi-berserk and ran screaming into the street in front of his mommy's house. Roger allegedly swore at everybody and anybody he passed and the few witnesses that ventured outside said that Roger was ranting, "I'll get that fucking Arf! Arf! and I'll sue that Xtian Stagger Lee out of his tin hovel!"
Roger was, according to anonymous eyewitnesses, literally foaming at the mouth and ranting uncontrollably. One person, who asked to be unidentified, alleged that Roger was actually beating his chubby little fists on the trees as he wailed something unintelligible...something about a person Roger called "Lard Ass Lloyd", but the neighbor couldn't be sure since Roger was slobbering so badly that his words were garbled. The neighbor claimed Roger looked almost as if he had shaving foam on his mouth, but it was dark and the neighbor said he could have been mistaken due to the poor light.
Another witness claimed that Roger was last seen heading toward the playground of the nearby elementary school, a place, so says the neighbor, where Roger often goes to play on the teeter-totters and go up and down the slides. The neighbor said that Roger often spends hour upon hour spinning himself in circles on the merry-go-round while he sings odd tunes to himself. The neighbor did say that he felt this was rather odd behaviour for a 47 year old man to exhibit, but he alleged, "Mr. Wiseman has always been a rather strange sort of fellow. He never seemed to be mainstream normal...kind of an odd duck as it were."
One other neighbor alleged that Roger was apprehended in the early morning hours as he spun about on the merry-go-round and was peacefully led away to the local mental health facility. The neighbor said that he heard the mental health workers say, "Come on, Roger. Time to go back with us and get back on your Thorazine."
The witness claimed that Roger went along peacefully but kept "digging" at the seat of his pants, saying. "Get this thing out of me! It hurts!"

3354. PSK31 Questions

Hi - are there any PSK31 usres here that would like to discuss band plans, where you operate on HF etc.

I am interested to make contacts on bands OTHER than 14.070 MHz.

Also, I would like to know what OTHER modes you are using with a PC soundcard and interface, that are popular enough that you can actually find other guys to make CONTACTS with on the HF bands.

Many thanks for any replies / discussion.

Could it possibly be the gruesome twosome stalking around my neighborhood in an old beatup Ford Explorer?? When I see it and walk out the door it looks like a blue streak hauling as$ up the street. Sometimes I think they use the Buy Here Pay Here Taurus. They're sadly mistaken if they think I'll hide behind the curtains, licking the window and urinating. I wonder if their bondsman know they're leaving the area. They're Ga. tags. I'll get the #'s next time.

3357. FS: Old Radio Related Books (1937-1977)

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-08 14:51:58 UTC
From: oldbooks78@aol.com
Message-ID: <20020908105158.20928.00002520@mb-mo.aol.com>
Source record: 73400

I currently have for sale the following old radio-related books. Postage is $2 for the first book and $1 for each additional item (Media Mail within the US, at cost elsewhere). The books are:

ARRL "The ARRL Antenna Book, 13th Edition" American Radio Relay League, 1977. The 336 page softbound book is in about very good condition. Clean with no page tears or pen marks. The covers show a bit of wear from previous use, but not bad at all.A comprehensive treatment of radio antennas. Available for $7.

Jordan, Edward C.; Paul H. Nelson; William Carl Osterbrook; Fred H. Pumphrey; Lynne C. Smeby; and W.L. Everitt (editor) "Fundamentals of Radio" Prentice-Hall, 1944. The 400 page hardbound book is in good+ condition, clean with no page tears or pen marks except for a previous owners name inside the front cover. Gray cloth covers with some minor spotting on the front cover, otherwise nice. A nice early radio related text. Available for $10.

Siegel, Hy "All About CB Two-Way Radio" Radio Shack, 1976 Soft Cover. The 112 page softbound book is in very good condition, clean with no page tears or pen marks. Nicely illustrated. Available for $5.

US War Department "Technical Manual - Radio Fundamentals, TM 11-455" U.S. GPO, 1941. The 140 page softbound book is in fine condition, fresh and clean inside and out except for a previous owners name on the front cover. A nice WWII vintage radio manual. Available for $10.

Federal Telephone and Radio Corporation "Reference Data for Radio Engineers, Second Edition" Federal Telephone and Radio Corporation, 1947. The 322 page hardbound book is in good+ condition. Clean with no page tears or pen marks except for a previous owners name and address inside the front cover. "The present edition has been greatly enlarged and a subject index included. Chapters on transformers and room acoutics have been added. The material on radio propagatiion and radio noise has been revised. The data on cathode-ray tubes have been considerably expanded." Available for $8.

Everitt, William Littell "Communication Engineering" McGraw-Hill, 1937. The 727 page hardbound book is in about very good condition. Clean with no page tears or pen marks except for a previous owners name and address inside the front cover, and a few passages underlined in pencil. A nice early text on the science of the radio. Available for $9.

Measurements Development Laboratory of the Sperry Gyroscope Company "Microwave Transmission Design Data" Sperry Gyroscope Company, 1944. Publication No. 23-80. The 215 page hardbound book is in very good condition, clean with no page tears or pen marks, and a strong binding. Originally issued during WWII as a "confidential" document. Chapter topics include General formulae for concentric lines; Attenuation in concentric lines; Reflections and impedance

matching; General formulae for wave guides; Attenuation in wave guides; Reflections and impedance matching in wave guides; Wave guide tees and bends; Wave guides filled with dielectric material; Dielectric material: Cavity resonators; and Measurement techniques. A neat early book on ultra-high frequency radio waves. Available for $10.

If interested in any of the above, please email to "Oldbooks78@aol.com" to reserve. Thanks.

Dave

It certainly does seem that 14.070 is the ONLY place for PSK31. Its gotten so bad that you can't find anyone elsewhere.

I like to go on 28.120 but the band is not cooperating usually. I think the bandplan for 40 is insane so I don't operate there at all. (7035).

I have often wondered tho why I hardly hear any activity of any mode on 30 meters. It is a great band and certainly needs more action.

3368. CONTEST INORC (ITALIAN NAVAL OLD RHYTHMERS CLUB)

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-08 22:36:05 UTC
From: I0GOJ <i0goj@inwind.it>
Message-ID: <phQe9.20860$%z1.428635@twister1.libero.it>
Source record: 73411

XXII INORC CONTEST

Saturday 16th and Sunday 17th November 2002

The Italian Naval Old Rhythmers Club (INORC), promotes and organizes
this edition of the Contest INORC, at international character, on program
Saturday 16th and Sunday 17 November 2002.

01 - EMISSION MODE
- Only CW.

02 - DATE AND BANDS
- From the hours 12.00 UTC of Saturday 16th November 2002 to the
hours 12.00 UTC of Sunday 17th November 2002:
on the bands of 10/15/20/40/80 meters

03 - CATEGORIES
We are two categories: N= Naval; I = Independent.
N = OM / SWL enrolled to the INORC or other equivalent Club:
MARAC (Marine Radio Amateur Club) in Netherland.
MF (Marine Funker) in Germany.
RNARS (Royal Naval Amateur Society Radio) in Great Britain.
Etc.
I = OM / SWL of any country, not enrolled at any Naval Club, and
considered "Independent."

04 - CALL
CQ INORC, TEST INORC
- The stations enrolled at a Naval Club (N category) will add "/N"
to they call-sign during the call in order to be immediately
recognizable.

05 - REPORTS
- the INORC or other Naval Club enrolled, will pass the report
RST with the initials of the Club and the number of inscription.
- the INORC enrolled on the category Associate Member will pass the
RST report with the number of inscription and the AM abbreviation.
- The not enrolled (Independent) will pass the RST report with a
progressive number beginning from 001.

06 - POINTS
- The INORC stations (inclusive of Associate Member) and the stations
of
the other Naval Club is worth 10 points.
- The other stations (Independent) is worth 1 point.
- The QSO between stations from 1 point ARE NOT valid.
- The QSO between stations from 10 points ARE valid.

- The same station could be worked one ONLY ONCE for band.

07 - MULTIPLIERS
- Are multipliers the INORC and other Naval Club stations.
- Could be counts ONLY ONCE, independently by the bands
on which has been works.

08 - FINAL SCORES
- Is obtained multiplying the sum of the QSO points for the sum
of the multipliers.

09 - SWL
Is worth the same OM's rules.
- A SWL could not listen a QSO between two stations by 1 point.
- A QSO between a station by 10 points and a station by 1 point
is worth 11 points.
- A QSO between a station by 10 points and an other station by
10 points is worth 20 points.
- The same station could be listened ONLY ONCE for band.
NB: the SWL's reports are very pleasant. In order to enter into the
classifications, is not required a least of listens, but the
Contest Manager will be considered deserving of message the
Log which will reveal a special pledges.

10 - LOG
- The Log, complete of final scores, goes sent within and not
over the 31 December 2002 to the Contest Manager:
IK0XCB Claudio Tata via Della Giustiniana, 764 - 00189 ROMA Italy

- Suggested the uses of the Log sheets and the summary sheet
prearranged by the INORC and that could be required to the
Contest Manager enclosing envelope and postage stamp.
For the count of the points and the print of the log, the use
of the software "TESTINO" which it's possible to take in the
INORC site to the address is recommended: http://www.inorc.it
Can send yourself via email, the file: call.dbf example: G3LIK.DBF
to the address: ik0xcb@tiscalinet.it , please always require the
confirmation of receiving.

11 - DISQUALIFICATIONS
Has disqualified the competitors that:
- doesn't observe the schedules established by the rule;
- operates combined in couples or groups;
- concerts QSY or sked with the correspondent for the repetition
of the QSO on other bands.
- All the INORC stations not in rule with the payment of the annual
share

REMARKS:

to judgment of the Contest Manager will be penalized or
disqualified the competitors that send incomplete Log, with double
QSO not declared, with final scores wrong or with QSO that doesn't

result bilateral on the cross checks.

12 - CLASSIFICATIONS
Classifications in order to the following categories: N - I - S.
N = Naval Club stations.
I = Independent stations.
S = SWL stations.

13 - PRIZES:

Following prizes will be delivered to The first classified of the
category
"Naval" and of the category "Independent" :

1 Horizontal Key mod."Simplex" in gold laminated with cut of INORC coat
of arms, offered by the Sponsor of the Contest I2RTF, you can see it
on the
Internet site: http://www.i2rtf.com
1 Interactive memory Keyer in assembled kit, mod: DXKEY offered by the
Sponsor
of the Contest IK5XCT,you can see it on the
Internet site: http://www.qsl.net/ik5xct/dxkey

1 Crest in ceramics with the excellent reproduction of the INORC coat of
arms
offered by the Sponsor of the Contest I8JYK.

To the first classified of the SWL category will be delivered what
follows:

1 Crest in ceramics with the excellent reproduction of the INORC coat of
arms
offered by the Sponsor of the Contest I8JYK.

XXII° CONTEST INORC

Sabato 16 e domenica 17 novembre 2002

L'Italian Naval Old Rhythmers Club (INORC), che riunisce i radioamatori
italiani e stranieri provenienti dalla Marina Militare e Mercantile,
promuove ed
organizza la ventiduesima edizione del Contest INORC, a carattere
internazionale, in programma sabato 16 e domenica 17 novembre 2002.

01 - MODO DI EMISSIONE
- Solo CW.

DATA E BANDE

02 Dalle ore 12.00 UTC di sabato 16 novembre 2002 alle ore 12.00 UTC
di domenica 17 novembre 2002 sulle bande di 10/15/20/40/80 metri

03 - CATEGORIE
Sono previste due categorie: N = Naval ; I = Indipendenti.
N = OM / SWL iscritti all'INORC o ad altro Club equivalente:
MARAC (Marine Radio Amateur Club) in Olanda.
MF (Marine Funker) in Germania.
RNARS (Royal Naval Amateur Radio Society) in Gran Bretagna.
Ecc.
I = OM / SWL di qualsiasi paese, non iscritti a Naval Club, e considerati
quindi "Indipendenti".

04 - CHIAMATA
CQ INORC, TEST INORC
- Le stazioni iscritte ad un Naval Club (categoria N) aggiungeranno
"/N"
al loro nominativo durante la chiamata in modo da essere
immediatamente riconoscibili.

05 - RAPPORTI
- Gli iscritti all'INORC o ad altro Naval Club passeranno il rapporto
RST seguito dalla sigla del Club e dal numero di iscrizione.
- Gli iscritti all'INORC nella categoria Associate Member passeranno
il
rapporto RST seguito dal numero di iscrizione e dall'abbreviazione
AM.
- I non iscritti (Indipendenti) passeranno il rapporto RST seguito da
un
numero progressivo a partire da 001.

06 - PUNTI
- Le stazioni INORC (compresi gli Associate Member) e le stazioni
degli
altri Naval Club valgono 10 punti.
- Le altre stazioni (Indipendenti) valgono 1 punto.
- I QSO tra stazioni da 1 punto NON SONO validi.
- I QSO tra stazioni da 10 punti SONO validi.
- La stessa stazione pu&#65533; essere lavorata una sola volta per banda.

07 - MOLTIPLICATORI
- Sono moltiplicatori le stazioni INORC o di altro Naval Club.
Possono essere contate come moltiplicatore UNA SOLA VOLTA
indipendentemente dalle bande sulle quali sono state lavorate.

08 - PUNTEGGIO FINALE
- Si ottiene moltiplicando la somma dei punti QSO per la somma dei
moltiplicatori.

09 - SWL
Valgono le stesse regole degli OM.
- Un SWL non pu&#65533; registrare un collegamento fra due stazioni da 1
punto.
- Un QSO tra una stazione da 10 punti ed una stazione da 1 punto
vale 11 punti.
- Un QSO tra una stazione da 10 punti ed un'altra stazione da 10 punti

vale 20 punti.
- La stessa stazione pu&#65533; essere ascoltata UNA SOLA VOLTA per banda.
NB: i rapporti degli SWL sono molto graditi. Per entrare nelle classifiche
della categoria non &#65533; richiesto un minimo di ascolti, ma il Contest
Manager riterr&#65533; meritevoli di segnalazione i Log che riveleranno da
parte dell'SWL un particolare impegno.

10 - LOG
- I Log, completi di punteggio finale, vanno inviati entro e non
oltre il 31 dicembre 2002 al Contest Manager:
IK0XCB Claudio Tata via Della Giustiniana, 764 - 00189 ROMA

- Si consiglia l'impiego del programma "TESTINO" appositamente
studiato per
il Contest prelevabile presso il Sito INORC al seguente indirizzo:
http://www.inorc.it oppure dei fogli Log e del foglio riassuntivo
predisposti dall'INORC e che possono essere richiesti al Contest
Manager allegando busta e francobollo, altrimenti scaricati dal
Sito
Internet: http://www.inorc.it
Coloro che utilizzeranno il Programma "TESTINO" al termine del
Contest
possono compattare l'intero software ed inviarlo via e-mail al
seguente
indirizzo: ik0xcb@tiscali.it

11 - SQUALIFICHE
Sono squalificati i concorrenti che:
- non rispettano gli orari stabiliti dal regolamento;
- operano riuniti in coppie o gruppi;
- concordano QSY o sked con il corrispondente per la ripetizione del
QSO
su altre bande.
- Le stazioni INORC che non risultano in regola con il pagamento della
quota
annuale.
NB: A giudizio del Contest Manager saranno penalizzati o squalificati i
concorrenti che inviano Log incompleti, con QSO doppi non dichiarati
con punteggi vistosamente errati o con QSO che non risultano
bilaterali
nei controlli incrociati.

12 - CLASSIFICHE
Sono previste le classifiche per le seguenti categorie: N - I - S
...
N = stazioni Naval Club.
I = stazioni Indipendenti.
S = stazioni SWL.

13 - PREMI
Al primo classificato della categoria "Naval" e della categoria
"Indipendenti" verranno consegnati i seguenti premi:

1 Tasto orizzontale mod. SIMPLEX in oro laminato con incisione dello stemma
INORC, offerto dallo Sponsor del Contest I2RTF, visibile presso il Sito Internet: http://www.i2rtf.com

1 Chiave elettronica in kit, mod: DXKEY offerta dallo Sponsor del Contest
IK5XCT, visibile presso il Sito Internet:
http://www.qsl.net/ik5xct/dxkey

1 Crest in ceramica con la eccellente riproduzione dello stemma INORC offerta dallo Sponsor del Contest I8JYK.

Al primo classificato della categoria SWL verr&#65533; consegnato:

1 Crest in ceramica con la eccellente riproduzione dello stemma INORC offerta dallo Sponsor del Contest I8JYK.

PayPal themselves are a SCAM.

They can take their "E-Bay Auction Payment
Service Charges" and shove them up their ass
sideways on Saturday.

Use Western Union's BidPay instead. www.bidpay.com

Thusfar if you sell something on E-Bay you get your payment
in full with NO service charges from Western Union, unlike
Paypal who takes a $3.00 "processing fee" off each check
they pay out.

They are certainly NOT a "Pal" - more like a Loan Shark..

3377. Using mini Yagi with a HT90

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-09 13:05:48 UTC
From: Jim <jbasi@cfw.com>
Message-ID: <BDQe9.2611$i84.60@fe02>
Source record: 73412

I need to hook a 3 element mini-yagi to my Motorola HT90 portable radio for some relatively short range RDFing. The frequency covered is 167 mhz and the antenna is a version of the tape measure 3 element yagi which is used for fox hunting, but with the elements trimmed to 167 mhz coverage. (-50db front to back)

My HT90 uses a BNC connector for it's whip antenna connector, but since it only uses the center pin of the BNC it is really only using it for a convenient mount not exploiting it electically. There is a screw next to the BNC which is a chassis ground though.

Can I use the BNC connection and just run a short wire from the ground screw to the BNC shield connection to hook up my antenna, or am I missing something here? Is there a better way?

Amateur Radio Newsline™ Report 1308 – September 6th, 2002

Amateur Radio Newsline report number 1307 with a release date of Friday, September 6th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. 222 to 225 MHz comes under attack once again, N Sync's Bass may not fly to the I-S-S after all and an Ohio city regulates 11 meter C-B. Find out the details exclusively on Amateur Radio Newsline report number 1308 coming your way right now.

(Billboard Cart Here)

**

THE WAR TO SAVE OUR BANDS: A NEW ATTACK ON 222 - 225 MHZ

Some are calling it Deja Vous. This as big business once again sets its eyes on grabbing a ham band and converting it into a money making machine. And once again its the old 220 MHz band. David Black, KB4KCH, is here with the details:

--

Once again, amateur radio frequencies may be under siege. Large corporations wanting to become even bigger want hams off the 222 to 225 MHz band, so they can make money. This time, the challenge comes from Data Commlink Incorporated and its twenty electrical cooperatives. Data Commlink filed comments in W T Docket 02-224.

That's an FCC proposal that began innocently enough. The proposal sought to gather comments on requests for waivers to provide band management services in the 220 to 222 MHz band. That's the piece of spectrum that used to belong to Amateur Radio but which hams say was stolen by greedy businesses over a decade ago.

But page 10 of DataComlink's filing holds comments that strike straight at amateur radio. The company says quote--the spectrum at 222 to 225 MHz that is currently held by the Amateur Radio Service is being underutilized. In the early days of 220 MHz commercial regulations, amateur Service licensees argued that their spectrum was necessary and important in order to provide communications in the event of disaster or emergency. Although we take no issue with this claim, we do not feel that the 222 to 225 MHz band has been utilized as well as Amateur Radio claimed it would by so-called no-code hams in their efforts to keep a foothold in the 220 MHz arena.

The filing then presents a direct challenge to ham radio. Without citing any evidence, Data Comlink asserts that in nearly all densely populated areas, the 222 to 225 MHz band is largely quiet. The company claims that only what it terms as handful of individuals in the Amateur Radio Service even use the

spectrum. Data Comlink then says hundreds of thousands of potential commercial users wait with no alternatives.

Data Comlink tells the FCC that--with considerable commercial interest already in the 222 to 225 MHz band because of waiver requests--it feels that the frequencies amateur radio holds would be much better utilized for commercial use. The company says existing users of the spectrum -- ham radio operators -- are so few in number that the economic impact on those affected would be minimal.

As for where the thousands of US hams who actually do use 220 to 225 would wind up, Data Comlink says nothing. Another issue is left unaddressed. If the FCC were to actually give the Data Comlink proposal any serious consideration, who would reimburse repeater owners the hundreds of thousands of dollars invested in their systems? DataComlink is silent on that one.

For the Amateur Radio Newsline, I'm David Black, KB4KCH.
--

What credence will the FCC give the Data Comlink idea? That's hard to say. Since it comes in the context of comments on another matter the Commission could simply rule that anything dealing with 222 to 225 MHz is not germane to the issue. On the other hand, the FCC could use the Data Comlink commentary as the basis for a Notice of Inquiry aimed at reallocating the 222 to 225 MHz band to commercial use. Which way they will go will not be known for a few months at the latest. In the meantime ham radio had better keep a close eye on the situation so that nothing is covertly slipped by.

The complete Data Comlink filing is on the web at http://gullfoss2.fcc.gov/prod/ecfs/retrieve.cgi?native_or_pdf=pdf&id_document=6513289200 (From comments filed to FCC by Data Comlink)

**

RADIO RULES: BAND SHARING REQUEST FOR 70 CM

The ARRL news reports that an amateur from Virginia has petitioned the FCC to allocate eight channels in the 70-cm band for use by visitors from Europe and the United Kingdom with Personal Mobile Radio transceivers. The recently authorized PMR 446 is similar to the US Family Radio Service. Dr. Michael Trahos, KB4PGC, a physician from Alexandria, filed the petition last January, saying it would help to promote international goodwill. The FCC has designated the petition as RM-10521. (ARRL)

**

ENFORCEMENT: HAM CHARGED WITH MISDEMEANOR IN ILLINOIS TRAGEDY

An Inverness Illinois man who authorities say misused a police radio channel has been ordered to turn over all the radio gear that he owns to local authorities. Bruce Tennant, K6PZW, has more:

--
According to a report in the Chicago Tribune Cook County Judge Joseph Urso has

ordered that William Bily turn over all his transmitting equipment to Barrington-Inverness police. This, as a condition of his release on bond while awaiting trial on misdemeanor charges.

Bily appeared August 30th in the Rolling Meadows branch of Cook County Circuit Court in connection with misdemeanor charges of resisting a peace officer and interfering with emergency communications. A longtime amateur radio enthusiast, Bily is said to have disrupted police communications Sunday August 25th by transmitting over the Barrington-Inverness police radio channel. When Officer Steven Graham came to his home, Bily allegedly resisted arrest. Authorities say that a struggle ensued and that during their tussle Officer Graham who was only 53 suffered a fatal heart attack.

Asserting the heart attack resulted from the scuffle, the Cook County medical examiner's office ruled Graham's death to a homicide. But Assistant State's Attorney Steven Rosenblum said that his office does not intend to seek more serious charges against Bily.

Bily's attorney, Frank Cece, asked that his client only be forced to hand over radio gear that could be used to transmit on the police radio band. He maintained that Bily, a Marine veteran who saw combat during the Vietnam War, has much equipment that poses no risk to police radio frequencies.

But States Attorney Rosenblum countered that this is not the first occasion police had visited Bily's house. The first time was on July 4th of 2000, also for allegedly interrupting the police frequency.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.
--

As part of the bond agreement Judge Urso also ordered that Bily not possess any firearms and that he not contact the family of the deceased officer. A trial is set to take place on October 2nd in the Rolling Meadows courthouse.
(Adapted from information supplied by KC9RP, W9FS and others)

**

ENFORCEMENT: “RABBIT EARS” THE HAM JAMMER GETS JAIL

A CB operator from Florida with an apparent hatred of hams will spend the next year in a federal prison. Amateur Radio Newsline’s Bill Burnett, KT4SB, reports from Miami.

--
He called himself Rabbit Ears on the C-B two-way. He also harassed ham radio communications on several bands. And now, Jupiter Florida Citizens Band operator William Flippo will spend a total of 15 months in federal prison. He will also pay a $25,000 fine for jamming Amateur Radio communications and transmitting without a license.

According to the ARRL Letter, Federal District Court Judge Daniel Hurley imposed the sentence August 29th. This, following a guilty verdict on June 19th on four counts of operating a radio transmitter without a license and another four counts of deliberate and malicious interference.

According to trial testimony, Flippo primarily had targeted members of the Jupiter-Tequesta Repeater Group for jamming and regularly interfered with amateur operations, especially on 10 and 2 meters, over an approximately three-year period. He has been in custody since the guilty verdict and underwent a psychiatric evaluation prior to sentencing.

At the sentencing, Flippo reportedly wept. He said that he had turned over a new leaf and claimed he was sole support for his wife and two daughters. But Judge Hurley was not impressed. He told the 60 year old Flippo that he was old enough to have considered the consequences of his actions. Hurley also alleged numerous incidents of perjury in the course of Flippo's testimony during his six-and-one-half day trial.

Judge Hurley also told Flippo that wants a full financial disclosure from him. And when he does get out of jail, Flippo will spend another year on supervised probation during which he cannot own radio gear or firearms. In other words, for the next two years the law will be watching this C-B'er like a hawk.

In Miami, I'm Bill Burnett, KT4SB, reporting for the Amateur Radio Newsline.
--

Judge Hurley ordered Flippo to immediately start serving his sentence. The former C-B operator was reportedly led into and out of the courtroom in shackles and leg irons. (ARRL, others)

RESCUE RADIO: HAMS, CB'ERS, GMRS AID AFTER TORNADO

Hams, C-B's, and just about anyone with a radio system not dependent on phone lines is pitching in to provide emergency communications in Ladysmith Wisconsin. This follows a devastating tornado on Monday, September 2nd that destroyed a major part of the town and completely knocked out the areas communications infrastructure. Twenty people were injured.

As we go to air, there is still no wireline telephone service and cellular service is spotty at best. The personal communications teams are reportedly augmenting local law enforcement and fire services in relief efforts. Wisconsin Governor Scott McCallum declared the Ladysmith a disaster area. (Published news reports, on-air reports)

**

HAM RADIO IN SPACE: RUSSIA TELLS BASS HES OUT OF ISS TRIP

A Russian space official said on Tuesday September 3rd that N Sync singer Lance Bass has been asked to leave Russia's cosmonaut training program and will not be the world's third space tourist. Sergei Gorbunov, a spokesman for the Russian Space Agency, said the decision to end negotiations with Bass was made in connection with what was termed as violations of his contract to fly on a supply mission to the orbiting outpost.

Bass began training in July at Star City, and just returned to Russia on Sunday after spending a week at NASA's Johnson Space Center in Houston with the other two crew members. There, Bass was trained in use of several station systems including the ARISS ham radio station. Now, Gorbunov said Bass, who had hoped to fly to the Space Station aboard a Russian Soyuz rocket on October 28th, would be leaving and would not be permitted to return.

Gorbunov said that in place of Bass, the Russians would likely send up a cargo container with extra equipment needed on the International Space Station. Gorbunov said the container has already been prepared and is ready to go.

But Bass’s representatives have a different story. They say that that its all a misunderstanding and that the 23 year old singer should be back in training shortly. If he does make it to orbit, Bass will become the youngest person to ever fly in space. (Published news reports)

**

RADIO LAW: LANCASTER OHIO HAS NEW CB CONTROL LAW

Lancaster Ohio now has a new City Ordinance to put teeth into local enforcement of the FCC’s Part 95 CB radio rules. The measure was passed on August 26th and is the handi-work of Lancaster City Law Director David Trimmer and a local area radio amateur named John Hilliard, W8OF. The two put the legislation together over the last several months and sent it twice to the FCC office in Farmington Hills, Michigan for review and comments.

Under the law, CB radio users who operate on what’s termed as an unlawful frequency or using excessively powerful equipment could be cited for a misdemeanor, with a maximum penalty of 180 days in jail and a $1,000 fine. Ham radio operators are exempted because the city says that they are trained, licensed, are regulated differently under federal law.

City officials estimate there are at least 250 people operating 11 meter Class D CB radios in Lancaster and not all follow FCC rules. The city's law will give prosecutors a tool to fight these abuses. The FCC believes that Lancaster is the first municipality to enact such a far-reaching ordinance to regulate CB radio within the city limits. (ARNewsline™ from information supplied by W8OF)

**

ENFORCEMENT: YUCAIPA CALIFORNIA TEST SESSION INVESTIGATION CONTINUES

The FCC audit of a W5YI-VEC Amateur Radio test session in California is continuing. The ARRL Letter reports that so far, the probe into a September 1, 2001, examination session in the city of Yucaipa has led to the suspension of seven volunteer examiners and the cancellation of five Amateur Radio licenses.

The W5YI-VEC's Larry Pollock, NB5X, said possible irregularities surfaced earlier this year in the form of an e-mail and a telephone call concerning two candidates at VE sessions in Yucaipa. Pollock said that one of the reports was that a license had been purchased in California. The other was that the individual in question could not copy code, and that if he had passed the exam, he had done so fraudulently.

After considerable investigation on his own, Pollock said he saw enough questionable data that he felt retesting was in order. That’s the remedy he proposed to FCC Special Counsel for Enforcement Riley Hollingsworth, K4ZDH. That was the action taken and also the action which lead to the five cancellations. The FCC’s Hollingsworth said the agency would continue to investigate other examinations administered by the VEs involved in the September 1, 2001, session in Yucaipa. (ARRL)

**

ENFORCEMENT: MAN MADE QRM ON 20 METERS

The Maritime nets on 14.315 MHz are reporting problems with interference. VK2UW says that the interference appears to be man made and regularly appears as both noises and CW type transmissions. The Australian Communications Agency has been notified and is monitoring. (Q-News)

**

HAMFESTS: TRW SWAP MEET FOR SEPTEMBER CANCELED

A reminder. If you are planning to travel to Los Angeles this September to attend the famed TRW Swap Meet, choose some other month. This is because the giant swap-feast has been canceled because a corporate event will be held at the Space Park Facility on Saturday, September 28th.

Only this month, September, is canceled. There will be a TRW Swap Meet the last Saturday of the month in October, November and December. For more information visit http://w6trw.com on the world wide web. (TRW ARC)

**

CONVENTIONS & HAMFESTS: BOXBORO MASS GROWS

Attendance at this years Boxboro Massachusetts Hamfest seemed to be back to its normal level of about 3,000. This continues an upward spiral first noted a few weeks ago at the Huntsville Hamfest in Alabama.

According to observers, the exhibit hall was busy all day Saturday and there seemed to be an increased number of big-ticket sales. This again mirrors what happened at the shows in Huntsville and to a lesser degree in Escondido California that same weekend.

The biggest draw in the forums area was once again Bob Heil, K9EID, and his audio clinic road show. Bob had about 100 people in the room, many of whom left the session and immediately hit the dealers to buy the appropriate peripheral gear.

Boxboro is one a dwindling number of hamfests and conventions that still has an annual banquet. This years speaker was ARRL President Jim Haynie, W5JBP. Also on the program was live music from a four piece band.

How good was this years Boxboro Hamfest? Vertex-Standard's Chip Margelli, K7JA sums it up this way. He says that he couldn't leave the booth or take a break until 4:15 Saturday afternoon. And that kind of says it all. (K7JA, others)

**

INTERNATIONAL - SOUTH AFRICA: HAMS CONTINUE TO ASSIST AT WORLD SUMMINT

Ham radio is continuing its support effort at the U-N Sponsored World Summit on Sustainable Development. With the latest, to Johannesburg and Hans van der Gronnendal, ZS6AKV:

--

AUDIO REPORT ONLY: You can hear it at http://www.arnewsline.org

--

More on ham radio at this important world summit next week.

**
INTERNATIONAL – SOUTH AFRICA : JOHNNY NEETHLING, ZS1GB – S.K.

Still from South Africa comes the sad news that Johnny Neethling, ZS1GB, passed away on Friday 19 July. Neethling as 80 and was licensed just after World War 2. ZS1GB was well known in Radio and TV circles. He was also involved in maintaining equipment in the first the first heart transplant operation to take place in South Africa. (RSGB)

**

INTERNATIONAL - GIBRALTER: WILFRED GUERRERO, ZB2IB – S.K.

Q-News reports the unexpected death of well known Gibraltar radio amateur Wilfred Guerrero, ZB2IB. Guerrero was 55 years of age and for many years was the mainstay of amateur radio in Gibraltar. Most recently he pioneered,

virtually single-handedly, the introduction of the Foundation License in that nation. (Q-News)

**
INTERNATIONAL - AUSTRALIA: VK UHF CB TECH STANDARDS CHANGE

The technical standards for C-B gear used in Australia are changing. Q-News Graham Kemp, V-K-4-B-B, reports from down-under:

--
APCNews says the VK UHF CB equipment standard is to change. The standard will require that CTCSS equipment include facilities to reduce interference to non CTCSS users. Required features include a 'channel busy' warning light and a 'listen before transmit' function. The changes were required by the Australian Communications Authority following changes that legalized CTCSS signaling on UHF CB channels. From Q-News Australia, I’m Graham Kemp, VK4BB.
--

The change affects only the Australian U-H-F Citizens Radio Service. No other bands are affected. (APC News, Q-News)

**

INTERNATIONAL – SCANDINAVIA: NEW MAJOR HAMFEST IN EU

A major new European amateur radio event will take place in Gothenburg Sweden for the first time in April next year. The Scandinavian HamVention 2003 will be a big hamfest where Scandinavian and other European radio amateurs can get together. There will be a large exhibition with amateur radio dealers from all over Europe and it is planned to offer Scandinavia's biggest flea-market yet, allowing radio amateurs to trade, buy and sell everything to do with our hobby. A traditional Scandinavian amateur radio dinner will be held and there will also be a special ladies' program. The Swedish national amateur radio organization, the SSA, will hold its annual meeting at the same time. Further details are on the Scandinavian HamVention website http://www.scandiham.com/. (GB2RS)

**

DX

In D-X, the Canadian licensing authority, Industry Canada, has authorized the use of special prefixes to celebrate the 125th anniversary of Japanese immigration to Canada. The special prefixes will be on the air from the 1st of September until the 31st of October.

And this for those listening across the Atlantic a lot higher in frequency. Word from the Radio Society of Great Britain that the G-B-3-N-W-K microwave beacons located in North West Kent are currently non-operational. The beacons, which usually transmit on 1296.81 and 2320.85MHz are off the air until further notice due to site problems.

**

THAT FINAL ITEM: 911 REMEMBERED

And finally this week, we pause to remember the tragedy of Tuesday September 11th 2001. Here’s Amateur Radio Newsline producer Bill Pasternak, WA6ITF.

--
I’m going to tile this as an editorial. Ill also promise to keep it short.

We have all heard these words before. “September 11th, 2001 is a day that changed all of our lives forever.”

The pictures are still there in our minds eye. The giant Boeing jets crashing into the World Trade Center. The buildings crumbling to the ground. The fire at the Pentagon. The scorched earth in Pennsylvania.

And the other scenes. The ones only known to ham radio. Those of the radio amateurs from New York, Washington and Pennsylvania who sprang immediately into action. The hams from across America who dropped everything, grabbed their H-T and traveled sometimes thousands of miles -- paying their own way -- to become the second, third and forth wave of relief operators and volunteers.

No, ham radio was not on the front page of newspapers. Hams were not the lead story on the evening news. The tragedy of 911 was the story. The job of ham radio was to be the carrier of the message so that aid and comfort could be brought to the victims of this horrific and cowardly act of terrorism.

What 911 showed is that our loose knit fraternity can come together when the need arises. That we maybe called radio amateurs, but that we are communications professionals. That ham radio is there when it is needed.

On 911, ham radio did the job its people have trained themselves to do. The hobby has since moved on. So has our nation. But neither will ever be the same.

I’m Bill Pasternak, WA6ITF
--

We pray that a tragedy like 911 never happens again.

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Yes there is a lithium battery on the front of the display board, but its a special type and not easy to replace. I sent my DR605 to ATOC Distributing in Covington Ohio. They are the Alinco importer and repair facility. It took about 2 weeks. They changed the battery and made the radio better than new. Price was reasonable. Call them at 937-473-2840 and ask them for a return authorization.

You're saying that the shell of the BNC isn't grounded? How odd. I'd think it would be mounted to any internal metal frame.

Yeah, you can run a separate ground, but keep the wire short. But first make sure the BNC really isn't grounded and not just DC isolated for some reason.

Could someone suggest a weblink on how to pursue Federal prosecution of illegal and unlawful operators? I'm in the Philadelphia are and have heard (on 2 meter frequecies) explicit sexual discussions on how to have sex with children, music broadcasts, singing, extremely crude language, and even CB radio (channel 19's audio) being transmitted on the 2 meter frequencies. All those I heard (about 10 individuals) appear to know each other and some are actually giving their licenses identifications. If I'm just wasting my time in seeking to bring these individuals to justice and clean up my local 2 meter frequencies, please be honest and let me know and I'll just sell my new 2 meter radio.

Probably a BS post but I will respond anyway:::
I would say if you are hearing actual call signs then you are probably listening to edited recorded stuff of someone bootlegging......You also need to call the repeator owner if someone hasn't already and make them aware of it.
Listen very carefully and see if you think it is actually more than one station...I almost doubt it

Poor Wittle Wogie....
Reduced to posting via anonymous remailers. Now there's a hoot!

Makes one wonder what Chris Caputo said to him, eh? Maybe Rogie at long last got too filthy for his own good. Of course Pam took care of him first so it must have been a double whammy...any way you cut it, good widdance to Wogie. You don't suppose that he has run clean out of ISP's in his area, do you? At least those ISP's that he can use local dialup for? He could always grab one of those AOL CD's and go for it...go back to The Internet On Training Wheels so to speak.

The beady-eyed oldster must be sweating profusely as he looks at his 386 and plots the ways and means of getting back on Usenet. Life must be a shambles for him now that his life's blood has been taken away from him. For Roger life without Usenet is no life at all. He feels empty, unfulfilled, useless, a loser without a cause. No place to go, nothing to do. The frustrations must be enormously troubling to Wogie.

It must be sad being Roger Wiseman.

3402. Poor Wogie, Gone For Good.

Poor Wogie. He made three mistakes.
1) He messed with Arf! Arf! (excessive filth)
2) He messed up Usenet (excessive filth)
3) He angered Pam Hoffer (excessive filth)

Finally, at long last, Wogie got flushed because of his incessant, cruel and filthy posts.

Bye, bye, Wogie. That sewer you speak with was long overdue for a trip to the cesspool.

MUAHAHAHAHAHAHA!

I've never had Paypal take $3 from me. Yes, they do get their couple of percent on top of the 35 cents, but I don't mind that so much. I just add a "handling fee" (depends on expected selling price) for Paypal users.

Bidpay is the real crook... $5 surcharge (to the buyer) to mail a money order? Come on!

Alinco will sell you the battery for just a few bucks. You're going to pay more in shipping than the battery.

But it's not critical at all. Almost any lithium cell will work. Current draw
in miniscule. Go for fit and easy of installation.

Mike

There is a new Ham Radio Portal online at

http://www.hamradio-portal.com

This Portal contains news, Information and

special topics like Echolink software and many more.

It has a Weblink and download database.

A new Webboard to discuss topics is also there.

You can also submit news and topics what

comes available on the top of the page!

It should not to be in compete with other Portals.

Just a new one with a new look and nice features.

We hope to see you there!

Andre

3413. help interpreting toroid schematic

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-10 21:21:54 UTC

I am attempting to build a project that uses a quadfilar wound FT50-43 toroid. I am having trouble interpreting the schematic and I'm not sure if the actual wiring of the toroid is correct. Can someone confirm whether or not my wiring scheme is correct? The toroid schematic and my wiring interpretation are at http://www.mindspring.com/~elecman/helpschematic.jpg

Thanks in advance for responses.

Bill

Hi Bill,

Quadfilar means that four (4) wires are wound together, in parallel.
Your drawing needs color for each winding to clearly answer your
question, also, it needs phase dots on the schematic to correlate
correct connections. 1 & 3 appear to be backwards, as do 5 & 7; but
without the individual windings visible, or phase information, it is
difficult to say.

What you have in your mind, and what you have posted may well work,
but without these details, I for one, could not respond in the
affirmative. Reasons for my saying 1 & 3 appear to be backwards is
due to all windings starting at the same end (presumably 1,4,5,8)
would not find 1 & 3 in proximity with 2 & 4 connected unless there is
a phase inversion not shown. [Same goes for 5,7 and 6,8.]

Hi Richard,

Thanks for the quick response. Perhaps I posted this a bit too soon and maybe should have contacted the designer of the circuit first, which I have now done. Thanks for your input and sorry for the inconvenience.

Bill

Hi Bill,

No inconvenience at all, you came more prepared than most who have
grand designs of naming an antenna after themselves. You might also
include what you are going to use this for - it could be significant
to consider in light of that application. And you never know, someone
else might chime right in with a less equivocal (and still correct)
answer than mine.

Goeden Avond,

I'm sorry, I assumed so from your ISP. Funny how close the two languages are. I have a very easy time whenever I'm in Holland to get around, though not so in France. The only French I know might very well be dangerous.

Hope you find the plans.

Dag

3424. Backlight on T81A Display

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-11 03:10:13 UTC
From: n4mbi@earthlink.net
Message-ID: <3d7eb3e3.19708056@news.earthlink.net>
Source record: 73367

The display backlight on my Icom T81A seems to be showing only one backlight on the right side of the display. I know it has two backlights behind the display according to Icom. It sure looks differently from the T8A display,which clearly shows the two lights. Has anyone noticed this on their T81A? Or does the backlight on the left side just not show as clearly on the T81A ??

Thanks,
Rick, N4MBI

Let see, you and I are standing at opposite ends of an average
auditorium on the east coast. I am speaking via radio to the pilot
of an aircraft flying over the west coast. The pilot will hear my
words before you do.
(basic physics, light goes very fast.) I think you need to go back
to school.

I have a list of some NEW goodies, hope you like them.................

Yaesu FT-102 Transceiver

Yaesu FV-102DM External VFO
Yaesu FC-102 Antenna Tuner

Yaesu SP-102P Phone Patch/Speaker

Yaesu MD-1B8 Desk Microphone.....$800.00

Yaesu FT-757GX II Transceiver

Yaesu FRB-757 Amp/Relay.....$450.00

Yaesu FT-707 Transceiver

Yaesu FC-707 Antenna Tuner

Yaesu "Brand New In The Box" FV-707DM External VFO

Yaesu "Brand New In The Box" MR-7 Rack for the FT-707

Yaesu "Brand New In The Box" FRB-707 Amp/Relay.....$550.00

Yaesu FT-480R 2 Meter All Mode Transceiver.....$275.00

Yaesu YS-2000 FT-101 Matching SWR/Power Meter.....$90.00

Yaesu YO-101 FT-101 Matching Scope.....$80.00

Yaesu FV-101Z FT-101ZD Matching External VFO.....$100.00

Yaesu FF-501 TVI Filter.....$20.00

(2) Yaesu Landliner Speaker/Phone Patch.....$50.00 each

Nye - Viking MB-V-A 3000 Watt Antenna Tuner.....$500.00

" It sells NEW for about $900.00"

Ten Tec Model 4229 Antenna Tuner $170.00

Henry 2K Classic Console Amplifier 10,15,20,40,80 meters.....$975.00

Pick Up Only in Los Angeles.....

"It sells NEW for about $2000.00"

Heathkit SB-221 Amplifier.....$525.00

PAL 120+ 12 Volt Tube Amplifier.....$99.00

PAL KW-1 SWR/Watt Meter.....$40.00

Heathkit SB-614 Scope.....$100.00

Mirage B-108 2 Meter Amplifier 10 watts in 80 watts out.....$75.00

Bird # 43 Wattmeter.....$175.00

"It sells new for $309.00"

Bird 100C 100 Watt Element for 100 - 250 MHz.....$50.00

Bird 250H 250 Watt Element for 2 - 30 MHz.....$50.00

Bird 1000H 1000 Watt Element for 2 - 30 MHz $70.00

Bencher Keyer BY-2.....$70.00
"It sell NEW for $125.00"

Ham Key $40.00

"New In The Box" Alliance Rotor.....$90.00

Astron RS-35M 35 Amp 12 Volt Regulated Power Supply With
Meters.....$90.00

AEA MM-3 Morse Machine.....$80.00

MFJ - 1278 TNC.....$99.00

(2) MFJ-1272B TNC/MIC Switch.....$10.00 each

Heil HM-10-5 Desk Microphone Wired For Yaesu.....$70.00

Gallon Dummyload.....$20.00

Thanks & 73,

Leo KJ6HI

and how many repeaters did that go through. each hop induces delay.
ever try a transatlantic telephone call on a sat link? there is a .75
second delay (and thats analog->digital conversion on the local circuit,
routing to a sat head end, then the up and downlink, routing on the far
end and converting d/a). I've seen this type of mess cause computers
headaches.

now, if you want to try and remotely control an aircraft under these
conditions with reaction times at human standard, you will miss the mark
widely.

I'd rather believe the info from a friend of mine who has 40+ years of
practical in the field experience (and he tells me that it cant be done
for the reasons specified above).

who am I going to believe? a 60 year old engineer or you?
I'll take the 60 year old engineer anyday of the week.

Bid Bays fees are high for the buyer. Paypal does not charge this high
fee if you do a direct deposit into your checking account. It cost them
money to cut a paper check. I always use the direct deposit and get my
money right away. Paypal is great and very reasonable fees.

I trust that you all called CQ! at 13;46 today, to break open
the squelch and drown out the appalling hypocrisy of the silence?

Nothing changed on Sept 11th.

A attacked B.

B then attacked A, but also attacked C

B is now intent on attacking D and possibly
E and then F.

Nothing changed on Sept 11th - it was just another
chapter in the annals of a warmonger.

With a World population of 5 billion, a further
50 million people have since died. To use the
cynical phraseology of the Yank warmongers,
the casualties of Sept 11th are just "collateral",
no more, no less.

I would tend to believe the real world.

Remotely controlled aircraft have been used by the military for
reconnasance since at least the Vietnam war.

Remotely controlled target aircraft are used in testing anti-aircraft
systems.

You cannot have failed to see, at least once, the FAA remotely
controlled crash landing of, IIRC a Boeing 707, in a test of a fire
suppression system - a magnificient failure but still remotely
controlled.

Remotely controlled armed aircraft are currently in use over
Afghanistan, and maybe other places. If you can't control it in real
time how can you possibly use it to launch weapons?

Dave

This particular bit of trash, whose real name is Gareth, came out of Essex University in the 1960s or so.

I take comfort from the fact that, should those who share his views ever come to power, his type will be the first against the wall.

Is there a Win2k program to teach me 5WPM morse?

I see a lot of DOS programs or programs that require an ISA sound
card. I have an onboard AC97 sound card.

I want to get to 5WPM so I can pass the test as quickly as possible.
What's the best way?

Thanks,
John

Why would you be trying to remote control an aircraft via sat
link? Has it dawned on you that all communications do not have to
go through a repeater or sat link?

>
> now, if you want to try and remotely control an aircraft under these

After being in "lurk mode" for the past three or so years, I felt like posting today.

It's hard to believe that a year has passed. On that Tuesday, I had been working an afternoon shift, and I was awake early because of a doctor's appointment. I wanted to catch up on some reading, and I didn't have the TV on. My mother-in-law called shortly before 9:00am and asked if I was watching TV. She said that one of the WTC towers had been hit by an airplane. My first thought was a small, single-engine plane had flown off-course, until I saw the smoke. About a minute after I turned on the TV, the second plane hit the South tower.

At the doctor's office, people were quiet as they listened. Then came the announcement that the Pentagon had been hit. On the way home, I had the car radio tuned to Howard Stern's show. (He was ready to nuke Mecca right now, but all that would have done would be to temporarily make us feel good and piss off every Muslim around the world even more) It was about 10:45 that "Crazy Cabbie" called into the show to say that lower Manhattan was covered in smoke and dust, because the towers had collapsed.

For nearly two weeks after the initial attacts, I thought it was all a bad dream. That each day I would wake up and the New York skyline would be whole again. As time passed, I knew that it was not a dream.

I see that the *.policy newsgroup continues to bicker about the code and testing, and that the *.misc newsgroup continues with their petty insults. Today, however, I would think that the aguing could have been set aside.

Strangely enough I, too, felt that way, I'm off shortly to Flanders to visit the war graves near Ypres to visit (probably 'to weep over' would be a better description) the scene of a much greater tragedy.

However, this morning, on Radio 4 , I heard a harrowing tale from a US fireman trapped in the stairwell of north tower as it collapsed. He described how he and the couple of others around him kept calm whilst floors above them collapsed, whilst they where bombarded with concrete schrapnel He described how a brother firefighter trapped several floors up called 'Mayday, Mayday, firefighter down and hurting bad' and how he ascended a couple of floors before the rubble was too large too move and he was unable to assist, hearing a couple of further Mayday calls and then silence. He then went on to describe how eventually he heard the radio call 'Brother we've found you - we are coming' from a fellow firefighter and shortly afterwards saw daylight through his rubble tomb.

It was then I wept and decided to honour the minute's silence.

TL, you really need to read closer. The only bitchin' about code these days is Brian "Slim" Burke who is evidently incensed that the FCC would stoop so low as to allow Farnsworth method of code testing, which is well and widely known to assist almost everyone in learning the code. Tho that's been the case for over a decade, he just found out a few months ago, and he hasn't worked through the anger yet. Poor fella.

Oh, well, THAT'S RICH!

Nice comment, uh, John. (Sure it's not Abdul or Mohammed?)

If the US didn't bail the UK out in WWII, my my how different
things would be for your country....perhaps we should have
taken the stance, "Oh, we don't want to be in a situation where
we might have to KILL anybody...sorry, can't get involved...!"

If the US didn't get involved in the arms race, you'd be in Siberia,
or dead. Do some research, and tally up the amount of deaths
the Soviets are responsible for, and then tally up what the US
contribution to wrongful deaths has been. A million to one, is it?

Had the US not been there to protect your lilly-nancy ass, the
whole of Europe would be under a cruel and deadly dictatorship
right now.

The very force that has granted you free speech, you betray with
uneducated and unfounded claims.

Notice that when the US goes in to do the dirty jobs necessary
to keep the free world free, that we don't rape the women, murder
the civilians, and run thru the streets with native babies on
bayonets.

Give Iraq or other rogue nations total and unfettered access to US
knowledge, finance, and weapons, and see how muderous the
world becomes right before your ignorant eyes. Fancy that!

Instead we have developed high-precision weaponry to surgically
remove the problem with as little collateral and civilian impact as
is possible. The US being comprised of humans, errors WILL occur.
But nowhere NEAR the atrocities of other nations' styles of war
or conflict engagement.

Where's the UK's GPS system that allows such an operation?

How about if it is made plain to the world tomorrow that the UK is totally on its own, and any nation can do as they please to the UK without any UN or US ramifications?

Bet you'd be singing a different tune, monkey-boy.

(My apologies the the UK as a whole...just trying to illustrate a point to the "challenged individual" named John.)

I have a DSI Model 5600A frequency counter, 50 hz to 512 mhz.

It's a hair off frequency and would like to adjust it.

DSI appears to be out of business and nothing is found searching the web.

Anyone have a manual or alignment procedure I can get a copy of.

I had gone with my wife that day to see her doctor. As we passed
DFW airport where there are always a number of plans landing and
taking off, there seemed to be an unusual number of plains lined
up on approach for landing. While we were in the doctor's office
it was announced that all airspace over the U.S. had been closed
and all planes ordered to land at the nearest available airport.
When we left the doctor's office I told my wife to look up in the
sky over the airport. She said, "What, I don't see anything." I
said, "exactly, there are no planes in the sky." It was really
spooky.

As I understand it, there weren't only Americans that died in the Towers.
The WTC was an international center of trade, and there were British,
Canadians, Japanese, and others there that
morning.

And, BTW, how soon the world forgets! Will we Americans be ALONE when it is
time to remove "Sad-damn" Hussein" from Iraq? Freedom is NOT free, and must
be paid for in blood,
sweat and tears. The world that so many el pinko, snotnosed liberals
believe in doesn't exist, and
never will because of greed and the lust for power by despots.

Nope Sorry Dick, this is an un-moderated group. Don't worry about
Doug (bookooaddys@yahoo.com) they
usually let him out of the asylum for a month or two before
they put him back in his room. As for the others, ignore &
don't feed the trolls.

Dick:

The usenet newsgroups are of two basic types: moderated and unmoderated.

The moderated newsgroups are in the minority. They work by publishing a set of rules -- the rules mainly say what topic will be discussed on the group and that no personal attacks or off-topic material will be allowed. When you post to a moderated group, your message goes to a moderator -- moderators are volunteers who agree to enforce the rules.

The moderator (or several moderators) reads your article to ensure it meets the newsgroup standards. If it does, he posts it. If not, he rejects it back to you with an explanation and an opportunity to appeal.

Unmoderated newsgroups are free fire zones. Say what you want, how you want, to or about whom you want. Try to stay on the topic of the newsgroup -- for example, on this group, don't post articles about aliens in Roswell and your Britney Spears navel fetish. However, if someone says something dumb, and you want to tell him he is dumb as dirt, well, have at it.

People being what they are, in any group there will be a few who have not matured beyond the sixth grade and who revel in potty jokes and in calling other people obscene names. They are the minority but they get a lot of attention and, sometimes, they post the majority of the articles.

Ignore them. Post your question or comment; reasonable people will converse with you.

Just my opinion.

--

Regards,
Joe S.

Moderated groups are the answer. Still, some people don't enjoy having their posts censored by a moderator. Doesn't bother me in the least bit, personally. I set up STUMP to help moderate alt.parenting.attachment for a friend of mine (some of those women are nazi like, but that's another post for another group). This way, a linux box does a great deal of the moderating instead of a human :)

Once a non-moderated news group is created, it cannot be controlled. It is not "owned" by anybody. The only way for it to go away is for news server admins to quit carrying the group (unlikely). However, if somebody posts something that you find rather objectionable, you can see if it violates their ISP's TOS agreement (found on any ISP's website) If so, send an email that includes the post and all headers to their abuse address. If it doesn't violate a TOS agreement, or the ISP doesn't do anything to stop it (they have that right) then your out of luck. Use a newsreader that supports the use of a killfile. I dig XNews, myself (on Win32 machines).

Well said.

2 days before the attack on the WTC, the Yanks made
an unprovoked attack on Iraq, using airborne
projectiles to burn and trash a building, trapping innocent
victims in the burning rubble.

What of a minute's silence for them?

Very laudable emotions, OM. Now you realise the
horrors of innocent people caught up in the
arrogance of others' warmongering.

If anything were to change in respect of Sept 11th 2001,
might it not be a resolution to prevent this horror ever
happening again? Might not one approach be for the
biggest war-mongers, , Yank and Brit, net exporters
of arms to anyone who will buy them, to refuse to
sell any arms ever again?

I doubt it. Hence my assertion of hypocrisy.

Can anyone please shed any light on how to determine which "trap" goes where once the original coloured stickers have since gone that determined where each trap went on the elements.

My dlemma could be best answered by someone who has one and still has the "traps" coloured coded or marked

You managed to kill more Brits than Saddam by a factor of three in
the Gulf war, so try to be a little less human toward us in future.

>
> Where's the UK's GPS system that allows such an operation?

Same place the one the Nazis made for you is, OM.

"'Nazi, schmatzi' said Wehner von Braun
'so long as it goes up, who cares where it comes down'"

>
> How about if it is made plain to the world tomorrow that the UK is
> totally on its own, and any nation can do as they please to the UK
> without any UN or US ramifications?

I suppose we might nuke 'em.

The US is bent on destroying the planet for their own short term
selfish ends. Just take a look at the World Court or the Earth
Summit in S.A.

The U.S. don't want a world court, in case any good ol boys get
tried for their war crimes. Like Guantanamo Bay for example. Totally
illegal.

> (My apologies the the UK as a whole...just trying to illustrate a
> point to the "challenged individual" named John.)

No need to apologise, OM, you are just confirming what we all think.
A plutocratic nation of bullying braggarts. 'Agree with us or die.'

Andy, M3ABC

Yes we will be alone. Today our president will make a plea to the UN.
Today our president will make demands of the UN. And they will do nothing.
That is what they do the best.

Then this country will go to war...alone. And when its all over, and we
count our body bags, we will be sad. And we will be MAD. The rest of you
ingrats out there can forget foreign aid. Forget American protection.
Forget it all. We will leave you to your own devices. We will have learned
our lesson. And when you come begging after the next famine, or earthquake,
or financial collapse. We will remember. Yes indeed we will remember.

English, Welsh, Scots, Irish, Indian, New Zealanders, Australians,
Canadians, etc etc. Most hadn't been avoiding the fight for a couple of
years. Brilliantly led by General B.L. Montgomery in spite of the
useless interference by Churchill and the laughable ambitions of crap
yank Generals like Eisenhower and the quite useless Bradley.

Has America ever won ANY war where it wasn't guided by British Generals?
Thought not....

Landshark

--
If you are implying that people, who
hold ham licenses, should be somehow
held to a higher moral standard than
the "common man", then that would
be faulty logic. A ham license is only
a "permit" to use radio, it is not a
"badge of morality".

Perhaps. However, once the situation was seen in its true colors,
prompt US involvement was executed. Lucky for you, and lucky
for us, too:

>Free to be exploited by U.S. capital.

Riiiight. And Britain would never colonize, or create "protectorates",
in her own interests, either.

Saudi Arabia was a 15th-century sandpit with Medieval ideas in the
1930's. US capital has ROCKETED them into the 21st century, and
has created a monumental increase in their standards of living. Are
they devoid of issues and problems? Hell, no. Nobody is. But all it
takes is tunnel-vision negativity mongers like yourself to constanly
criticize, and view things as nefarious.

Try the same hyper-critical mindset on the UK. Be real interesting
what you'd discover.

>Free to starve while the U.S. gets more obese by the second.
Quote from:
http://news.independent.co.uk/uk/environment/story.jsp?story=326256
"But despite the inexorable rise in demand for power, consumption for
cooking fell, because of the growing popularity of takeaways and
eating out."

As will the UK...

>>that we don't rape the women, murder
>> the civilians, and run thru the streets with native babies on
>> bayonets.
>
>My Lai??? CIA all over South and Central America? You are blind to
>the activities of your own government, OM. Or perhaps you think
>Pinochet was a kindly old gentleman?

Not blind, but also don't just dwell on mistakes, corruption, or the
negative. The way you describe it, the US might as well be acting
like Nazi Germany, or Communist USSR. If we are to be blamed for
such behavior, maybe we should act it out. Care to try it on for size
first, buckaroo? Didn't think so.

>> Instead we have developed high-precision weaponry to surgically
>> remove the problem with as little collateral and civilian impact as
>> is possible. The US being comprised of humans, errors WILL occur.
>> But nowhere NEAR the atrocities of other nations' styles of war
>> or conflict engagement.
>
>You managed to kill more Brits than Saddam by a factor of three in
>the Gulf war, so try to be a little less human toward us in future.

The Gulf War was one of the least deadly in history. If your presence
was such a negative thing, why did you go there? Less human? OK,
where is the key for that red button?

>> Where's the UK's GPS system that allows such an operation?

>
>>
>> How about if it is made plain to the world tomorrow that the UK is
>> totally on its own, and any nation can do as they please to the UK
>> without any UN or US ramifications?
>
>I suppose we might nuke 'em.

Wow. Even the US does not espouse the actual use of nukes. Our
policy is deterrence. But threaten the UK, and they're incinerating
the planet, according to you.

So, if YOUR interests are threatened, you reach for the nuke, and
go for the "scorched Earth" style of conflict resolution. But if
the US protects what its interests are and causes as little as
possible collateral and civilian damage in the process, we are
labeled as: "A plutocratic nation of bullying braggarts. 'Agree with
us or die.'"???

>
>The US is bent on destroying the planet for their own short term
>selfish ends. Just take a look at the World Court or the Earth
>Summit in S.A.

Be real careful about this assumption. Do some research on fire
policy in the US. By everyone screaming about "saving the
environment", we have actually jeopardized it, and created a
major time bomb.

Moreover, look at the typical Brit, you pompous hypocrite:
http://news.independent.co.uk/uk/environment/story.jsp?story=326256

>
>The U.S. don't want a world court, in case any good ol boys get

Dan, don't allow some people on the newsgroup to wind you up.
However, it would have been appreciated if the US hadn't tried to 'go it
alone' with certain issues.
If I were 'over there' rather than 'over here' then I might be a bit more
insular and have a more go it alone attitude too.
Generally, the UK has a lot in common with the US- in fact we're like
brothers.
Its a shame to fight amongst ourselves.

Short version:

Wasn't it the UK that tried to impose itself on the US *TWICE* with
that attitude of:

'Agree with us or die.' ???

Are you asking for a THIRD ass kicking?

Hi,

I have an Icom 756Pro connected to a dedicated laptop via a RigBlaster Pro.

Is there some software that I can run on the laptop to cause it to broadcast a beacon message?

Thanks,
John

I'm sorry you equate moderator with censor, although technically it's
probably correct. Okay, let's try this; I'm sorry you put such a
pejorative connotation on censor.

Actually there are plenty of occasions where censoring is a good idea.
Your time in Vietnam would be a perfect example. I don't know if your
mail was censored then, but it sure was in WWII. Loose lips sink
ships, and all that. Think about it.

But more importantly I think a great many people view this "freedom of
speech" issue in entirely the wrong way. Our Constitution guarantees
it, but you have to understand what it guarantees. It says the
government can't stifle you (within such famous and reasonable limits
as the fire-in-a-crowded-theater example).

It doesn't provide an absolute freedom of speech anywhere from anyone.
Your employer, for example, has a right to place limits on your speech
with non-disclosure agreements, for example. A newspaper has the right
not only to NOT print your letter, but to edit it if they do.

If you belong to an organization of any size, it almost surely
provides that meetings will be conducted in accordance with Roberts
Rules of Order. Roberts is the bible of parliamentary procedure and
provides all of the rules for the proper and effective conduct of a
deliberative body.

Among the rules are those which limit the agenda, limit the number of
times an individual may speak to an issue, limits the amount of time
an indidvidual may use in speaking to an issue, and permits the
determination if an individual is even permitted to speak.

The process works because everyone involved is bound by the agreement in the by-laws to use some set of rules of order (Roberts or someone elses). Participating in a moderated forum is precisely the same thing. If you elect to join then you have agreed to the structure of the group, including limits on debate, whether it's time or subject.

Agreeing to be a moderator is an opportunity to learn how well your self development in the exercise of authority has progressed. It's one of the best challenges of a civilized society.

Freedom of Speech? Only the government guarantees it, and only for speech in public arenas and where it doesn't violate public safety. You can't exercise it in my house if I don't want you to.

Censorship? Sure. Nothing wrong with it if you know the circumstances.

THIS IS A NEW POST !!!!!!!!!!!!!!!!!!! NOW PRICED SEPARATELY...

I have a list of some NEW goodies, hope you like them.................

Yaesu FT-102 Transceiver, & Yaesu MD-1B8 Desk Microphone...$460.00

Yaesu FV-102DM External VFO...........$175.00

Yaesu FC-102 Antenna Tuner.............$175.00

Yaesu SP-102P Phone Patch/Speaker.....$100.00

Yaesu FT-757GX II Transceiver
Yaesu FRB-757 Amp/Relay.........$425.00

Yaesu FT-707 Transceiver, hand microphone $285.00

Yaesu FC-707 Antenna Tuner...........$150.00

Yaesu "Brand New In The Box" FV-707DM External VFO...$175.00

Yaesu "Brand New In The Box" MR-7 Rack for the FT-707....$39.00

Yaesu "Brand New In The Box" FRB-707 Amp/Relay.........$50.00

Yaesu FT-480R 2 Meter All Mode Transceiver........$275.00

Yaesu YS-2000 FT-101 Matching SWR/Power Meter.......$90.00

Yaesu YO-101 FT-101 Matching Scope........$80.00

Yaesu FV-101Z FT-101ZD Matching External VFO.........$100.00

Yaesu FF-501 TVI Filter.............$20.00

(2) Yaesu Landliner Speaker/Phone Patch........$50.00 each

Nye - Viking MB-V-A 3000 Watt Antenna Tuner.........$500.00

" It sells NEW for about $900.00"

Ten Tec Model 4229 Antenna Tuner $170.00

Henry 2K Classic Console Amplifier 10,15,20,40,80 meters.........$975.00
Pick Up Only in Los Angeles........
"It sells NEW for about... $2000.00"

Heathkit SB-221 Amplifier.........$525.00
10-80 meters, nice condition

PAL 120+ 12 Volt Tube Amplifier........$99.00

PAL KW-1 SWR/Watt Meter.....$40.00

Heathkit SB-614 Scope.....$100.00

Mirage B-108 2 Meter Amplifier 10 watts in 80 watts out.....$75.00

Bird # 43 Wattmeter.....$175.00
"It sells new for $309.00"

Bird 100C 100 Watt Element for 100 - 250 MHz.....$50.00

Bird 250H 250 Watt Element for 2 - 30 MHz.....$50.00

Bird 1000H 1000 Watt Element for 2 - 30 MHz $70.00

Bencher Keyer BY-2.....$70.00
"It sell NEW for $125.00"

Ham Key $40.00

"New In The Box" Alliance Rotor.....$90.00

Astron RS-35M 35 Amp 12 Volt Regulated Power Supply With
Meters.....$90.00

AEA MM-3 Morse Machine, Original box, and Manual.....$80.00

MFJ - 1278 TNC.....$99.00

(2) MFJ-1272B TNC/MIC Switch.....$10.00 each

Heil HM-10-5 Desk Microphone Wired For Yaesu.....$70.00

Gallon Dummyload.....$20.00

TL, I read your post yesterday. Do you feel better that I didn't reply yesterday?

What have we learned in a year?

We have a new "Homeland Security" that developed a color chart, and sent us to "orange" yesterday morning.

Whatever happened to Civil Defense?

Do you know where your closest shelter is?

It took us almost 9 months to get Sky Marshalls in the air. A bunch of them just quit.

A woman was made to drink breast milk, her own, for national security.

Have you taken your firearm to the range and practiced?

Have you cleaned that firearm?

Is your CPR card current?

Do you have a current HAZMAT placard identification booklet, state and county map, and phone book with your grab and go HT kit?

What was the last free FEMA emergency manangers course did you complete?

Have you registered to vote?

Do you plan to vote for freedom?

Hi Jamey, My name is Woody Parr and I'm up the road in Cornelia. I'm
afraid that I'm indirectly responsible for this troll who is
badmouthing you at alt.religion.urantiabook. You see he was only there
in the first place to attack me.

This idiot is Steven J. Rogovich, 1612 Lake Christopher dr. Virginia
Beach, Va. 23464 He followed me to the UB usenet page from
alt.radio.pirate He and I (were) both formerly loosely associated

with each other in the shortwave pirate radio listening hobby. I USED to be a shortwave pirate but my station has been permanently retired for more than 2 years now. Stevie is still a pirate and is the operator of the station Radio Free Speech. He is also the moderator of a message board at the Free Radio Network < www.frn.net > and goes by the handle of Pat Murphy there. I had a falling out with the people at the FRN a couple of years ago as they became corrupt and were doing so inappropriate things. I dared to open my mouth and openly complain about there stupid activities which since they havn't yet ceased to follow me around the internet anywhere they can and attack me.

Steve is also on the usenet trolling people under the name of Richard Cranium (richardcranus@yahoo.com) He's far too much of a coward to debate anyone using his real name.

I was at work. I am an on-line customer service rep for a major telecom company. Our call center handles calls from 18 states. I sit for an 8-hour shift, plugged into an ACD (Automatic Call Distributor) taking one call after another -- I handle 40-60 calls per day.

The TV was on in our break room. I keep an FM radio tuned to the local classical music NPR station. Shortly after 0900, the TV went to news as did NPR and we all became aware of what was going on.

The thing that struck me most about what I was doing was that the phones stopped ringing -- we did not take a single call until late in the afternoon -- not one.

I would suggest you find some audio tapes. Learning by looking at
periods and dashes on paper will cause an unnessesary step in your head
which may help you learn, but will limit you in terms of speed. If you
must learn from paper, use dits and dahs instead. IE: dah di dah dit
dah dah di dah instead of -.-. --.- (CQ).

This, like many rec and alt newsgroups, is unmoderated. If someone gets
too far out of line, the most you can do is complain to their ISP, if you
can figure out who that is. Many post through "anonymizer" services, so
that they cannot be traced.

Other than that, if the posts bother you too much - your only option is
to either kill file the offenders (if you can) or just not read the group.

Ha ha, ok fat boy, I'd like a crack at that, I'd go to war with you
pussies any day.
Didn't do so well in Vietnam did you fat boy, oops, not supposed to
mention that one.
I remember our worst loss in 1991 was when one of your un-proffesional
gung-ho ass munchers blew up the wrong tank.
Take your hi-tech toys away and you sink like a stone, as for the
Independance thing, technology is a lot better now, we could get some
major kit over there very quickly and do you some serious damage, come
to think of it, we could do the back-stabbing italian tank driving
potato biting bog-boys on the way over...

War, my little chubby friend, is our heritage, the killing of
johnny-foreigner a mere hobby, you see, we have been doing it for a
lot longer and better than your short-lived catalogue bought little
pisser of a country, and to prove the point some silly little men in
three civilian planes taught you a lesson you will NEVER forget.

Well SidneyM...those of us that have been in ham radio before the era of VE and CB influence definitly see a major change in ham radio.

But there are still area's of what was. CW is still un spoiled for the most part. Perhaps because those that do it are from the 'good ole days' hi.

Well, not quite.

With anything, when you have new people coming into a community, there's always a percentage that will be the riff-raff. 3898 was always a hang-out for colorful conversations long before the volunteer examiner system was even conceived.

The good news is that crap tends to stick together, so you just have to move. They seem content trying to pin each other's S meters and adjust the bass response of their audio on SSB, so let them have their fun. The OTs will be elsewhere, and ham radio will survive despite people like this.

Thank you. I've gotten this advice several times.I have test tapes for 6wpm. I
need help with leaning the code so I cantranslate the code on the tapes. When
I learned to type, I was taught a few keys at a time and given exercises
using just those keys that I had learned. I assume there is something
similar for CW.
Thank you again and '73

You still believe that, Aanal Aaron? Even your buddy George Busch doesn't believe it, but you're so aanal, frustrated, and desperate that you'll believe anything, even if it comes from a Federal Criminal and a guy (KE4ENX) who has been caught jamming 2m repeaters in Atlanta and Cornelia, GA. And you still can't spell Steve's name correctly, even with it right in front of you. There's no "t" in Rogovich, dimbulb! Whuzza matta, thinking with the wrong head again?

Let me type this very slowly so maybe you'll comprehend it this time: I'm not Steve. I'm as much Steve as you are Aaron. In other words, you're wrong AGAIN, as usual.

I sincerely hope that, if you keep posting his information for incorrect reasons, he'll get you TOSsed!

Excuse me, "Bobbie-girl", but if the claim against you was false, why
was your account cancelled? And what makes you think I send it?

You've been on the usenet for years, bobbie-girl, and anybody can do a
search to prove that. Just search for Radio Bob and/or rbcn1.

Still jamming the ham repeaters in Cornelia, GA?

Hi Jamey, My name is Woody Parr and I'm up the road in Cornelia. I'm
afraid that I'm indirectly responsible for this troll who is
badmouthing you at alt.religion.urantiabook. You see he was only there
in the first place to attack me.

This idiot is Steven J. Rogovich, 1612 Lake Christopher dr. Virginia Beach, Va. 23464 He followed me to the UB usenet page from alt.radio.pirate He and I (were) both formerly loosely associated with each other in the shortwave pirate radio listening hobby. I USED to be a shortwave pirate but my station has been permanently retired for more than 2 years now. Stevie is still a pirate and is the operator of the station Radio Free Speech. He is also the moderator of a message board at the Free Radio Network < www.frn.net > and goes by the handle of Pat Murphy there. I had a falling out with the people at the FRN a couple of years ago as they became corrupt and were doing so inappropriate things. I dared to open my mouth and openly complain about there stupid activities which since they havn't yet ceased to follow me around the internet anywhere they can and attack me.

Steve is also on the usenet trolling people under the name of Richard Cranium (richardcranus@yahoo.com) He's far too much of a coward to debate anyone using his real name.

Ha ha, what pile of crap !
The U.S., Canada and the U.K. regularly hold war games in various
parts of the world, guess who's kicked your fat butts six years in a
row, yep, not the Canadians.
As for germany, we stood up in the first place to take them on, not
like you whingeing great fat tarts, you don't mention that much in
your movies, and no, you didn't save our butts, in fact, British
forces spent so much time pulling you dullards out of the shit across
europe, most of the time we thought you were worse than the Italians !
In fact, the only reason you turds were even in the second world war
was because we paid you, yes, your were hired hands, we didn't finish
paying you till the late eighties.
In point of fact, the U.S. made sure that England suffered after the
war, so as to cement your new world position, special relationship my
ass.
The only good colonist is a dead one.
History is still taking shape and it's got a few more surprises for
you fat-boy.

Sadly the Islamic fundementalists weren't quite so impressed by such
bullying...

> the US protects what its interests are and causes as little as
> possible collateral and civilian damage in the process, we are
> labeled as: "A plutocratic nation of bullying braggarts. 'Agree with
> us or die.'"???

An interesting piece this note the use of "interests" not "allies"

More Afghan civilians have died in Afghanistan than died in Sept 11th, and
did you find Osama?

> >The US is bent on destroying the planet for their own short term
> >selfish ends. Just take a look at the World Court or the Earth
> >Summit in S.A.
>
> Be real careful about this assumption. Do some research on fire
> policy in the US. By everyone screaming about "saving the
> environment", we have actually jeopardized it, and created a
> major time bomb.

Whether you like it or not the perception is that the US gov is only keen to
support "interests" where said interests have shed loads of oil very nearby

for some strange and peculiar reason.

The bottom line is that, if it were not so tragic, it would be laughable. The US self belief in it's high morale ground and military strength are almost like a faith in that it is unquestioning.

As someone else mentions, you have highly sophisticated weapons, spies in the skies, taps on every email yet a small group of individuals armed with knifes and a willingness to die killed 1000s.

To many of us it seems all too logical that the same or worse will happen again because you fail to understand/accept why these people are attacking you. You'll invade countries, yet these groups are in every country. You'll get bigger more sophisticated arms, the attacks will be every more simple. You'll use more force, and achieve nothing but greater resentment and greater bloodshed throughout the world.

You have no clear achievable objective. So very tragic though it is for untold millions the policy of "greed is good" is coming home to roost.

Just a final and very personal note to finish on for those thinking of having a pop at the Brits, for years we have lived in fear of terroist attacks in our major cities, a time where many of your US countrymen were sending them funds. Now your mainland has suffered terribly you suddenly want action.

How terribly familiar.

Yours one tired cynical Brit.

<Good grief talk about bite...but anyway...>

I trust if you're going it alone Geoge senior wont be greasing Blair
repeatedly over the next few weeks?

ahh yes all the american foreign aid. Well, you can poke your burgers,
"culture", music and movies for a start. Of course if we want technical
innovation we can always look at your motorcycle industry. Bwahahaha :-))

If we didn't hold your hand in Europe, we wouldn't need your protection.

Famine? No I think you'll find most of Yurup is fine for food thanks. Indeed
you can keep your hormone laced Beef ta very much.

And indeed we'll remember how you inflict your dire goods on the rest of the
world, your corrupt culture and values, and be thankful that you left us to
your own devices safe in the knowledge that if we stopped buying all your
unnecessary pap your society would go down the toilet.

Shut your door on the way out, there's a good chap.

The next thing they will say is:-

They saved London by using flying fortresses.

or

Romell (sp?) was defeated by them.

Who knows what part of British history they will re-write next?

3527. ARRL Responds to 220 Threat !

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-14 01:28:53 UTC
From: Daniel Hicks <w8mmq-NOSPAM@email.com>

ARRL Responds to 220 Threat !

September 13, 2002
ARRL News

http://www.arrl.org/news/stories/2002/09/13/100/?nc=1

NEWINGTON, CT, Sep 13, 2002--The ARRL has taken issue with a suggestion made in a non-Amateur Radio-related FCC proceeding to turn the 222-225 MHz amateur allocation over to commercial interests. In reply comments filed this month, the League urged the FCC to "do nothing" with the proposal of Data Comlink (DCL), a consortium of 20 electrical coops and allied companies.

"ARRL presumes that the proposal by DCL for reallocation of the 222-225 MHz band will not be seriously evaluated by the Commission, as it is well outside the scope of this proceeding," the League said in its September 5 filing with the FCC. Until DCL raised the 222-225 MHz suggestion last month in its own comments in WT Docket 02-224, the ARRL had remained silent in the proceeding.

DCL claimed in its comments that the amateur allocation at 222-225 MHz "is being underutilized" and that the band "would be much better utilized for commercial use." DCL suggested that both 217-220 MHz and 222-225 MHz might "be made available to the Commission for commercial use" through modification of the FCC's Part 90 rules.

ARRL asserted that the band is not underutilized and "remains a critical VHF allocation" for amateurs. The League pointed out that the ARRL 2002 Repeater Directory--albeit not a comprehensive listing--lists 1690 repeaters throughout the US, indicating an even larger number of individual users. "Indeed the number of individual amateurs using this band has increased steadily since 1989, when the amateur allocation at 220-225 was reduced by 40 percent," the ARRL said, "and now much commercially manufactured equipment is available to amateurs."

DCL had claimed that "only handfuls [sic] of individuals in the Amateur Radio Service even use this spectrum, while hundreds of thousands of potential commercial users wait with no alternatives."

The League characterized as "invalid" DCL's arguments in favor of reallocating 222-225 MHz from the Amateur Radio Service and noted that the FCC earlier this year had set aside an additional 8 MHz of spectrum for Land Mobile Service operations.

The League's reply comments in the DCL proceeding are on the ARRL Web site.

The ARRL has not commented in an unrelated Petition for Reconsideration filed by Warren C. Havens on behalf of himself and Telesaurus Holdings GB LLC, in which he holds a majority interest. Among other grants, Havens holds Automated Marine Telecommunication Services (AMTS) licenses in various states as well as Land Mobile Service Multilateration and VHF Public Coast licenses.

Filing last month under PR Docket 92-257 and RM-9664, Havens is seeking to have the FCC reconsider its decision to auction certain AMTS spectrum and instead adopt his "Advanced Technology Land Infrastructure and Safety Service" (ATLIS) proposal. Under that plan, Havens includes the amateur allocations at 222-225 MHz and 902-928 MHz. In the case of 222-225 MHz, Havens wants to see it reallocated from amateur to public safety use. His ATLIS plan proposes to share 902-928 MHz on which amateur are secondary. He suggests, however, that if amateur use were to become a problem there, the FCC might impose restrictions or phase out amateur use altogether.

Havens said he planned to submit his ATLIS proposal to the FCC's Spectrum Task Force as well as in filings on dockets that involve spectrum he's included within his ATLIS scheme.

Forget about learning the code from a book. You will just get frustrated and eventually give up. The ARRL has a beginner's program that will get you to 5 wpm. I think it costs about $15.00. If that is beyond your means, try to contact a local ham club. I'm sure they will be happy to help.
Good luck,
Jim

Did you try Staco?
I doubt if I could find the ones that came with mine.
The knob I used came from a Buhl overhead projector.
Very heavy duty. As for dialplate it was hidden by the
knob so I used direction arrows only, and you watch
the meters anyway.

I am amazed that SUPPOSEDLY educated people in this NG have expressed very negative views re the USA apparantly based on some Hollywood version of WW1 & WW2, USDA beef, elements of US culture we see over here (Starsky & Hutch and MacDonalds etc), and good old envy.

For example, much is made of the US joining WW1 and WW2 'late'. In the next breath the US is accused of sticking its nose in elsewhere! In WW1 the US was never really threatened by Germany et al for the foreseeable future. However, they came and helped. Europe then f****d things up again and the US (understandably) took the view they had helped once and Europe had still not got its act together so why should more US lives be wasted. Prior to 'officially' joining WW2 the US helped the UK a lot- protecting shipping (US ships were sunk by U Boats prior to the US joining the war), supplying food, and the material of war. Anyone who believes that the contribution to 'winning a war' is only measured in head and body count is downright naive- the industrial might of the US was a MAJOR factor in the defeat of Japan and Germany.

Would you also care for some home truths on the good old UK and the export of 'culture'- BSE, Foot and Mouth for example? Or perhaps our drunken thugs 'invading' Europe for a football match or a holiday in the sun? Not the mention such culinary delights as fish and chips. Oh yes, much is also made of the Americans funding the IRA (which some misguided ones did)- did you know that the UK government handed over wedges of 'social security benefits' to the IRA? These cash handovers were guarded by the British Army and soldiers were punished for refusing to take part. Not to mention 'collections' taking place in London pubs in the 1970s.

I suggest you all spend some time in the US and meet some 'everyday' Americans and then form an opinion of them as people. How balanced a view would an outsider see of the British if their experience was confined to, say: a night in a Ibiza 'foam bar', a day with some football thugs, Chris Tarrants crap TV, a plate of fish and chips, Eastenders (or any other 'soap'), John Prescot, Anne Widdecombe, Peter Mandelson, Tam Dyall, or Mo Mowlam?

The US is not perfect by any means- if anything they have stayed there hand too much on the world stage. The problems in the Middle East could have sorted long ago if the various (so called) Islamic terrorists had been nailed once and for all.

Why is it that much of the 'third world', who portray the US (and UK) as 'evil states', are all too happy to accept our aid (and remember in the UK we can't even get our own people into hospitals in a timely manner) and spend their time trying to get into these 'evil states'?

I beg to differ. American troops arrived in France in 1917. They dismissed their French advisers (who were highly skilled after more than three years of warfare), and their General Pershing committed his army to two separate battles 60 (miles or kilometres) apart in thirty days. This was advised against by the British and French, but Pershing went ahead anyway.

Lack of battlefield tactics meant the first battle open with a 'bald-headed rush' that resulted in no gains of ground but many American casualties.

In the end the Americans were essentially forced to withdraw from the front lines, meaning extra unplanned responsibilities for the British and French. In other words, the value of their help was somewhat limited.

I'm not quite sure what you are 'differing' with. The part of my post you quote relates to the threat from Germany et all to the US- you've not queried that.
Nor did I suggest that the US contribution was to 'win WW1' simply that they did help. If nothing else the influx of fresh forces must have demoralised the Germans and taken some of the strain off the other allies. As you've not queried my point re any threat to the US (beyond perhaps the questionable Zimmerman telegram contents) I assume you agree the US did not help because they were forced by a threat or vageries of treaties (which themselves led as much to the starting of WW1 as the wrong turn taken by some royal driver).

I am aware that the US army repeated many of the mistakes the British and French made but sadly that is all too common. It took the British and French a long time to learn from these mistakes- at worst it must have been obvious that tactics needed a rethink after the first day of the Somme but it took months for a different approach to be taken in Sept 1916- even then it was half hearted. What was that quote "Lions led by donkies".

It is easy to be dismissive of the efforts of all the allied military leaders in WW1 but the fact is WW1 did mark a turning point in the way wars were conducted and the allied Generals simply didn't know what to do- as they say hindsight is always 20:20. I've no reason to excuse the actions of the military leaders in WW1- 5 of my great uncles died in that conflict- but I do believe 'mistakes' should be properly understood or they will be repeated.

3534. Ham Radio Software

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-14 16:08:00 UTC
From: g3tmh@gb7abc.net
Message-ID: <g3tmh000173@hamradio>
Source record: 73201

I have just posted a slightly changed version of HamServ to my web sites

http://www.gb7abc.freeserve.co.uk
http://www.qsl.net/gw3tmh
http://www.gb7abc.net

As well as to the HamServ files section on www.yahoogroups.com

(If you don't know what HamServ is see the appendix)

The main change has been to add a callsign filter to the bulletin
downloads, so it only now collects bulletins from callsigns.

I have done this because I have started collecting news bulletins
from the ham radio newsgroups on the internet, and they can
be accessed off amateur radio via HamServ's radio ports.

I obviously could not allow non amateur radio stuff to be ported.

This appears to be working well, HamServ now collects bulls from the
amateur radio BBS's and also from the internet newsgroups and combines
them in it's bulletin listing.

If you reply to a bulletin using the send reply command it goes either
to the amateur radio bbs or to the internet newsgroup, which ever the
original message came from.

Appendix What is HamServ?

HamServ is a 32 bit BBS/PMS for 32 bit Windows.

It talks to the outside world via the winsock 2 interface, so it can
be accessed over a LAN or over the internet, it can also be accessed
over radio if you also install the Agw Packet Engine.

People can therefore connect to you over the internet or radio
using any of the following protocols.

Ax25, Http, Nntp, Pop3, Smtp, Telnet.

The Http interface is accessed using Internet explorer and gives
a nice web style BBS.

The Ax25 and Telnet interfaces look like a normal packet BBS to anyone
who connects.

All the ports except the Ax25 one can be password protected to block
spam, it also has spam filters built in anyway.

It automatically decodes and extracts 7plus, and has support for
external server, send an email to one of the following if you want
to see the servers in action.

ping@gb7abc.freeserve.co.uk
help@gb7abc.freeserve.co.uk
reqdir@gb7abc.freeserve.co.uk

You will get an automated reply, new servers are being written
all the time, REQFIL will be along soon.

Oh yes and the important bit, HamServ is free, no registration charges.

The ARRL is blowing smoke. 220 activity has been way down
for years, and it is difficult to find new or used gear for 220, let
alone a dual-bander which has 220 on it, or even a tri-bander.
When's the last time you saw a 220 HT? I drive cross-country
and never hear activity, except at commuter time when a few
husbands and wives are talking. AND, there is a reason why it is
so popular between OMs & their xyl's. These are the women whose
OMs had them rush to get the Novice license BEFORE it was taken
out of private ham's hands and placed under the control of VECs.
These guys simply had two of their buddies sign off on a 610 so their
xyl's could get a novice license before it went to the VECs. If Riley
retested women operating on 220, I venture to say 98% do not know
a dit from a dah, let alone passing a theory test. Typical comment I
heard on 220 from one gal, "Hey Lonnie, while you was talkin' some
funny noise come on through the black thing where your voice comes
out of, it was like little short squeels, on and off, then quit. it comes
on
about every ten minutes and does the same thingy. Of course, the gal
is talking about the CW IDer on the repeater. There's many gems you
hear from these gals, especially the ones who were formerly on CB with
their husbands. They bring all their CB slang and operating practices to
220. "Hey Lonnie, some guys are bleeding on you, They walked all over
you last time." In this case, she was describing a station that was
requesting
to use the repeater. There are many other gems, just listen.

Lou, the Memphis a/c man

Well Lou in Memphis,
Link into the Nashville 220 system through the 2m repeater in Bucksnort TN
and you can talk on 220 from Memphis to Atlanta, with a ht most of the way
(www.w4rpt.com). Lots of 220 stuff on ebay. Icom's tribander ht covers the
band..Do some research before you post....most of the CB lingo is on 2
meters, not 220 and 450.

SIMPLE MOD

You change all crystals in the 10 meter position to 1mhz LOWER

That gives 26 to 28 mhz operation and that is all you need to do 98% of the
time.

This is what this hypocrite promotes for himself but chastises
others for doing. BEGIN OF QUOTED MATERIAL:

O4AT trade proposal...

Hi Steve

I have a MINT Radio Shack TRC 457 base ssb unit. It was made in 78!

Has the Uniden 858 PLL chip. I also have the SECRET CB modification info for this radio, The radio itself has NEVER been opened up. It works and looks like new. Comes with a RS amplified base station mike ta boot!

I would take $50.00 cash and the 04AT for it, if the HT is in good shape. Obviously we would each pay our own shipping.

n8wwm@aol.com

Re: ft 102 cb mod details required

Take all 4 10 meter crystals out...replace each one with one 1mhz lower retune output slightly thats it, then you have 26.0 to 28.0 radio

n8wwm@aol.com

****

Lots more there Doug, so don't lie about how you don't do illegal activities.

Landshark

3539. recommended preamp?

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-14 18:30:10 UTC
From: AJ Sanderson <ajsand@nospam.com>
Message-ID: <am0u6l$h5h$1@nntp9.atl.mindspring.net>

Cross-posted to: alt.ham-radio.mods,rec.radio.amateur.antenna,rec.radio.amateur.homebrew,rec.radio.amateur.misc

I just inserted an in-line HF antenna device that reduces signal level by 8-12 dB. I'd like to compensate for this by using an antenna preamp for the HF bands. I'd like to homebrew the preamp. I've been looking at several designs but can't decide. I'd appreciate some recommendations and/or pointers to some sights with good preamps. The receiver (transceiver) used will be an Icom 718.

Thanks, in advance, for any suggestions.

AJ

>
>
>I'm not quite sure what you are 'differing' with.

It is quite clear. I am illustrating the inappropriateness of the term
'helped' when applied to the American presence on the Allied side in
France in 1917/18.

I chose not to enter into debate about the other points you raised.

However, where you said

>It is easy to be dismissive of the efforts of all the allied military
>leaders in WW1 but the fact is WW1 did mark a turning point in the way wars
>were conducted and the allied Generals simply didn't know what to do- as
>they say hindsight is always 20:20

I would also have to disagree. The possibility of huge civilian-based
armies fighting a European war on a 400+ km front had been forseen
well before 1914; indeed the problems of command and control of such
armies had been addressed and the result was the Field Service
Regulations 1909, in which Haig had a prominent role. That this was a
failure did not discount that fact that the Generals had started out
with a methodology. Therefore to say as you have above that "allied
Generals simply didn't know what to do" was true only in the middle
years of the war and was peculiar to the early years of trench
warfare; it is not true as a general statement. By 1917, for example,
it had been recognised that an 'all-arms' approach (using aircraft,
artillery, tanks, and infantry in a co-ordinated way) to trench
assault was the way forward; the Germans countered by having no front

lines at all!

Aanal Aaron, are you stoned or just STUPID? Show me where I asked George to "bail me out", if you would please. I said what I did because George Busch, WA3MOJ, posted in another thread that he knew I wasn't Steve Rogovich. Lok it up, dimbulb. I'm not going to do it for you. YOU are the only one who still thinks I'm Steve. Sorry, but you've never been correct before and you're not correct now. I've never been Steve and I'm still not Steve. Steve does not operate a pirate station. There are several online directories that will show you that Steve Rogovich is still living in VA Beach. Are you too damned stupid to look it up? The question only needs to be asked, dimbulb. You haven't been correct about anything yet, why would you be correct now?

It just shows how frustrated and desperate YOU are that you are willing to accept the word of an aknowledged Federal Criminal because it suits you, when you put down other alleged Federal Criminals and don't take their word for anything.

Woodbury McCrae Parr (KE4ENX) is not a credible source of information. Just like you're not a credible source of anything. You are a proven nincompoop.

Hi Jamey, My name is Woody Parr and I'm up the road in Cornelia. I'm
afraid that I'm indirectly responsible for this troll who is
badmouthing you at alt.religion.urantiabook. You see he was only there
in the first place to attack me.

This idiot is Steven J. Rogovich, 1612 Lake Christopher dr. Virginia
Beach, Va. 23464 He followed me to the UB usenet page from

alt.radio.pirate He and I (were) both formerly loosely associated with each other in the shortwave pirate radio listening hobby. I USED to be a shortwave pirate but my station has been permanently retired for more than 2 years now. Stevie is still a pirate and is the operator of the station Radio Free Speech. He is also the moderator of a message board at the Free Radio Network < www.frn.net > and goes by the handle of Pat Murphy there. I had a falling out with the people at the FRN a couple of years ago as they became corrupt and were doing so inappropriate things. I dared to open my mouth and openly complain about there stupid activities which since they havn't yet ceased to follow me around the internet anywhere they can and attack me.

Steve is also on the usenet trolling people under the name of Richard Cranium (richardcranus@yahoo.com) He's far too much of a coward to debate anyone using his real name.

The stalemate that lead to much of the carnage began in late 1914, around or at the time of the First Battle of Ypes. This was preceded by series of allied defeats.

Little changed until the first use of tanks in Sept 1916 on the Somme, when some success was achieved but not exploited. It wasn't until the Battle of Cambrai, a year or so later, that tanks were used to any great effect. Artillery had been used for much of the war prior to this- notably prior to the start of the Somme offensive in July 1916. Those dates are from memory but I am pretty sure they are close.

The war started in Aug 1914, the new tactics didn't 'come together' until late 1917, and the war ended in 1918. This suggests:

a. "Field Service Regulations 1909" needed a bit more work.

b. The allied Generals were confused for the first 1/2 > 3/4 of the war, not the 'middle years'.

None of the above is IN ANY way meant to criticise the many brave men who took part in WW1. Nor do I wish to a point fingers at the allied Generals - as I said before this was a major change in the conduct of war and there is rarely much to be gained from a 'witch hunt', especially after 80+ years.

Leaders who have `weapons of mass destruction`
Sadam Husain,
George Bush,
Tony Blair,
Leaders who are prepared to invade other sovereign states to impose their
will on others
Sadam Husain,
George Bush,
Tony Blair,
Leaders who will help pollute the planet so long as their own business
doesnt suffer
George Bush,
Sadam Husain (set fire to oilfields)
Leaders who are quite prepared to pay a blood price for their objectives (as
long as its not theirs)
George Bush
Tony Blair,
Sadam Husain
Anyone spot a pattern yet?

The USA came into WW1 because it was in their own economic interests to do so and when the Europeans had completely exhausted themselves.

The Japanese were obliged to commit suicide in the Pacific because economic sanctions were already biting.

The USA came into WW2 because it was in their own economic interests to do so. They stood by and waited for months until the Russians and Germans had completely exhausted themselves. 95% of German armour and aircraft were engaged on the Easter front. Montgomery alone could have entered Berlin first.

The USA came into the Korean war because it was in their own economic interests to do so. It was in their own interests NOT to enter China - yet !

The USA came into the Indo-China war because they imagined it was in their own economic interests to do so. The French and Vietnamese had exhausted themselves.

The USA entered the wars in the Middle East because it was in their own interests to so. The Iraqi's and Iranians had exhausted themselves.

The USA entered the Balkan wars because it was in their own economic interests to do so. The warring parties had exhausted themselves.

The USA has not entered the African Wars because it is not in their economic interests to do so. It is no longer necessary to import black slaves. Black slaves can now more economically remain in Africa under the rule of the Multi-nationals.

The USA is now about to vastly extend Armagedon because they imagine it is in their economic interests to do so.

Complete USA control of Middle Eastern and Asian OIL is the perfectly obvious objective ! The Chinese, now wide awake, 1/4-of the world's poulation, will soon have MUCH to say about THAT.

There is now another USA civil war - between Multi-national accountants and auditors. Whether you have ordinary or endowment mortgages, it is already seriously affecting YOUR pensions.

I'm alright Jack - I'm in the dinghy !

I do with your part of the post about VE's Lou. I hear a lot of new hams that by their operation it doesnt pass the "smell test" if you know what I mean.

Rather than give the hams any spectrum for data experimentation and/or secure networks / communications, my crystal ball sees the gradual phase out of amateur radio. Or perhaps the formation of the "Ham Youth"

Depends. Consider video from the unmanned vehicle traveling to an AWACS plane, from there to a geosynchronous satellite and then to a ground station where the remote-pilot watches. He reacts in 1/10 second, and the command goes back via satellite to AWACS to vehicle... and happens more than half a second later. Imagine being half a second late in a dogfight.

The problem with tapes is that you'll end up memorizing the tape
before you really learn. You really need a computer. But
fortunately, you can get by with just a DOS computer and run
SuperMorse. These days people are throwing away perfectly good DOS
computers, so getting one is just a matter of positioning yourself
near a likely dumpster.

Do a Google search for "Koch Method" and SuperMorse. I think you'll
like what you find.

Take a look at http://www.qsl.net/n9bor/n0hff.htm
It's a free book (pdf file), it's good, and it describes the Koch method
(THE method to learn the code).

?????WHAT?????? Oi say, old fellow! How short is thine own memory! India,
Africa, South Africa, New Zealand, Australia, Falklands, America (at one
time), and Canada--to name a few--
all under British colonial rule at one time! Yes, ON Britannia, indeed!
Ahem! Old chap, were we
discussing the topic of greed?

Cheerio, old bean!!!

Now THERE's something I can agree with. Both sides of my family came to the
US from Britain
in the 1600s. There *is* still a certain "pull".

Really? You need to get out more. I had no problem buying a brand spanking new Kenwood TH-F6A tri-band HT. 144, 220, 440. Sure beats having a tri-band with 6m (e.g. VX-5) I wasn't the only one buying one at Dayton.

My local RACES group is working to add a packet 220 system just so we don't jam our 2m and 440 voice when we operate.

The Field Service Regulations 1909 did not work, period.

>b. The allied Generals were confused for the first 1/2 > 3/4 of the war,
>not the 'middle years'.

1915 saw the Reserves and remaining skilled military gassed, shelled,
and machine-gunned before they could be properly equipped or
substantially reinforced. The trench warfare years were the result as

the generals failed to try to find a solution to it and suitably train
a conscript army. In contrast the Germans and the French were always
experimenting and searching for better ways to deal with the problem.
The generals were not 'confused'; they had no answers.

>None of the above is IN ANY way meant to criticise the many brave men who
>took part in WW1.

I quite agree. "The English soldiers fight like lions" said Ludendorff
to Hoffman, who replied "True. But don't we know that they are lions
led by donkeys."

>Nor do I wish to a point fingers at the allied Generals -
>as I said before this was a major change in the conduct of war and there is
>rarely much to be gained from a 'witch hunt', especially after 80+ years.

The British Generals were, with notable exceptions, incompetent and
learned nothing. Contrast their attitude with that of the Generalship
shown by the Allied shock-troops, the ANZACs and the Canadians, who
sought competent men and promoted them accordingly, and at the same
time used imaginative thinking to overcome the problems of the
battlefield.

It is amazing to discover that books supporting Haig, for example, are
still appearing. It is quite forgotten now that the bitter feelings of
the populace after 1918 were such that a public subscription to buy
the family home at Bemerside for Haig as a sign of a grateful nation
was so poorly supported that family and friends had to cough up the
money.

And Mother Hen Britain enters all of her wars because it was in her own economic interest to do so. Mother Hen Britain invades regions because it is in her own economic interest to do so. Casualties? Bah! It's their own fault for not being submissive!

Mother Hen Britain TRIED to impose herself on the US TWICE for her own economic interest, and pulled back a bloody stump both times.

Which economic interests exactly?

Oh, and the Germans weren't too exhausted to launch a major offensive in
early 1917 to try and win the war before the America troops arrived nor the
allies to stop it.

>
> The Japanese were obliged to commit suicide in the Pacific because
economic
> sanctions were already biting.

Sanctions imposed because Japan had already started invading (in a brutal
manner) various parts of the far east. The attack on PH was more about
ensuring that the US could not thwart further expansion by the Japanese.

>

This concept of the Germans being 'completely exhausted' is interesting
(again) - why did it still take the allies several years to finish them off?
Not to mention minor issues like the need for the various supplies of fuel,
weapons, and food that we (the Brits) didn't have. Monty
would have had to walk to Berlin.

>
> The USA came into the Korean war because it was in their own economic

yet
> !
>
The Korean war was a UN action not a US one. It was the UN that 'held back'
not the US and look at the mess that left us with? North and South Koarea
are still bloody well at each other after 50 years!

> The USA came into the Indo-China war because they imagined it was in their
> own economic interests to do so. The French and Vietnamese had exhausted
> themselves.

Again, interesting idea of "exhausted". So you think it would have been better to let the north take over the south? Do you like to see refugees running from oppression?

If the US did anything wrong on Vietman it was not blowing the North to hell and back- something rest of the lilly livered 'free world' stopped. That failure led to the later problems in Cambodia etc. AND sent a signal to every arsehole in the world 'Go ahead the free world won't stop you.' So the arseholes did just that.

What is that cliche? "All that is required for evil to truimph is that good men do nothing." Perhaps it should have read "....that the weak minded stop the good men from doing something."

>
> The USA entered the wars in the Middle East because it was in their own

>
But not too exhausted to invade Kuwait, gas the Kurds and the 'marsh people'. Not to mention supporting terrorists.

> The USA entered the Balkan wars because it was in their own economic
> interests to do so. The warring parties had exhausted themselves.

The Balkans is a UN action and what exactly has the US 'gained'? Many of the lives saved by the UN action were Moslems - the same group that includes people that vilify the US (and UK) as evil. Argueably it would have been in the US interests to let them die.
>
> The USA has not entered the African Wars because it is not in their
economic

Black
> slaves can now more economically remain in Africa under the rule of the
> Multi-nationals.

? Africa is probably the most accessible new market in the world - probably more attractive than China as, while less populated, the various different countries offer some 'insulation' against changing regimes. Some new Chinese geriatric comes along and it could be the Cultural Revolution all over again.

By the way, it was Britain who took slaves to the US and while this was totally wrong and immoral it was several hundred years back. This makes using it as a justification rather pointless. Who are you going to blame next? Christopher Columbus for finding the place or Queen Isabella (?) who funded the expedition- was she the first "Multi-national Capitalist".

Easy to paint the US as a seething mass off of corruption. Was Maxwell an American in disguise? Is the UK Pensions Agency also secret group of CIA spies? Is Gordon Brown in the pay of the CIA? These three have also crippled our pensions. The need to find someone to blame is a sign of weakness but it is an easier route than trying to fix the problem.

In the 60s it was 'reds under the bed' now you think it is Americans. Reg, stick to your work on antennas etc. given your knowledge of history you stand a better chance of making sense.

I was being generous to your arguement- it was you who raised the subject
these Regulations- I'd long forgotten them. In fact, I think my History
teacher said much as you did above.

>
> >b. The allied Generals were confused for the first 1/2 > 3/4 of the
war,

Again I was being generous. The British Generals were not evil men they just
weren't equipped mentally for the task. Also, the Generals didn't appoint
themselves.
Nothing is to be gained from vilifing them 80+ years on. Learn by their
(and our wider nation's mistakes) yes, vilify no.

I see us keeping our HF bands, but 220 mHz
and higher bands will likely be lost or shared in the
near future as more of the "wireless" consumer targeted
devices hit the market. Not cell phones but more likely
remote-control gadgets and similar.

No, you didn't misread it. The Brits knew what *didn't* work, and were
well aware of the problems of logistics. This was enough to let them
know that what the Americans were planning was set to fail. They (the
Brits) didn't know what *did* work at that point, although they were
getting things together for Cambrai.

No, the one where they hit the target and burned. The flying was fine,
hit the target and tore open the tanks just as planned.

It was not supposed to burn., that was the failure!

I probably won't be much help. I can't see why you have a device that causes that amount of loss on HF. Doesn't make sense to me at all. I was thinking the 718 had a preamp already in it. Most icoms do. "both my 730 and 706g do" Not to mention the front end is already hot on most icom rigs. There are many designs for pre-amps that would work, but it's not something I usually recommend. A good way to trash a perfectly good receiver. More images, etc, etc. I once built an HF preamp years ago, and I think I used MPE-152's???'s or something like that. I forgot...All it did was pump up the S meter, and basically trash out an already decent radio. "drake R4". It didn't do a thing as far as improving the s/n ratio. MK

3568. World Trade Center Volunteer Registration Database Project looking for ideas/volunteers

Boy, I second Mark and then some.

The noise level on HF is quite high. As long as you can hear the noise, then you have enough gain. Any more gain hurts, rather than helps. Turn on your radio, switch to 10 meters (the quietest HF band) and then plug in the antenna. Does the noise increase? If so, you can't use any more gain. Your receiver has a sensitivity of 0.16 microvolt. Even with your 10 db loss, you probably still have a couple of microvolts of noise coming into the radio. If the signal is below that couple of microvolts, you aren't going to hear it.

Now, what you will do with the preamp is amplify the noise. The signals, being stronger, won't get amplified as much as the noise unless they are very weak, then they will get amplified as much, but no more. So you will hear weak signals as well, and not so weak signals not as well, if the signal you are listening to is the only one on the band.

But it won't be. There will be other signals, and they will be more inclined to swamp the RF amp in the 718 or pump your AGC. You will get lots more intermod (the 718 isn't a K2 after all), so the net result of adding the preamp will be a much harder time, a lot less fun operating, and overall, a big loss in your ability to pick out the weak signals.

Years ago, when tube type receivers had sensitivity in the 5 microvolt region, a preamp made some sense. But with a receiver as hot as the 718, it makes no sense at all at HF.

At VHF/UHF, where the band noise is a lot lower, and the noise inside the radio a lot higher, then it may make sense. But at HF, it's pretty much always a looser.

..

Actually, I was off on my initial 8-12 dB loss. It is more like 4-6 dB. The in-line device is an interference canceller, similar to the MFJ model, except home brewed. There is some loss, but I found that the orientation of the noise antenna makes a difference in the amount of total loss. It seems to work great on computer screen noise, but the power line noise I really wanted to eliminate is not even touched. Maybe the noise is too broadbanded (when the noise occurs I can hear it on all the Ham bands) . The Icom blanker won't eliminate it either, but the noise blanker in an HTX-100 10 meter rig eliminates it almost completely! I agree with posters that a preamp would definitely do more harm than good. However, my immediate goal is to get rid of this noise!

OF that I am fully aware. However, the point is that the British Empire
stretched all over

the globe. I also know that no one speaks that way, but they DID at one time circa 1890. The picture of the monocled British Major complete with pith helmet, riding crop and be-ribboned uniform is a result of that colonialism that Andy Cowley seems to have conveniently forgotten! The highly stylized post was designed to jolt his memory. We both know that all these kinds of caricatures are fabricated to poke fun and mock.

> US education system is where that fault lies!

His post was meant to stir up strife between British and Americans. First 3 sentences, I
agree with. I am quite satisfied with George Bush; to me the alternative was abhorrent.
He was stained with the sickly stench of Clinton. He was burdened with the lack of morality,
the lack of leadership, the pseudo-concern for "our" (American public) welfare, and too closely
associated with socialism. He and his ilk think that "they" know best what is good for people,
and I have a flash for them. I want those liberal, mealy-mouthed, self-serving, controlling, el pinko
sons of bitches the hell out of my life! I don't WANT their cradle to grave "care"! I don't WANT
their central government in my life! I want the sorry so 'n so's to GO AWAY! As to my education,
well, it taught me to stand on my own two feet, make my own way, appreciate and strive for excel-
lence, and how to balance my checkbook--something totally foreign to the "Politically Correct",
mealy-mouthed judges and idiots in control today. Rather than be concerned with educational ex-
cellence, they are MORE concerned that everybody be "equal", that honors be discouraged, and
everybody be "promoted" lest we damage a kid's "psyche"! As a result, we have kids working in
stores that, but for the computerized cash register, cannot make correct change for a 68 cent item!

Would allowing Ireland self-rule without British influence help? I truly
don't know the solution to this. I don't support terrorism on the part of
anybody.
>
> America's greatest achivement was to land man on the moon. However, it
> was done with American money, German rockets and British brains!

???????? I thought that was Werner Von Braun????????

Now, you must give credit to *some* American contributions in the area of
invention,
commerce, and weaponry. Wasn't it Americans that perfected the transistor?
(I'm just asking)
Wasn't it Edison with the lightbulb? I am not trying to diminish anybody's
contributions, but I
believe we did more than land men on the moon. We can't take credit for the
automobile, but
Henry Ford perfected the use of mass production to reduce the price of a car
thereby making it
affordable to the general public. What about the cotton gin? The steamboat?
Arguably, it was
Robert Fulton who made it successful. The submarine? Wasn't that the
Confederates in the War
between the States (CSS Hunley?) The repeating pistol? Gatlin gun? The
airplane? Did we not
do ANYTHING to contribute to the heady advances of the 20th century?

>
> Fact: On 11/9/01 more people died in the world that day from needless
> starvation than the attacks on the US by terrorists.

And WE have poured tons and tons of food into areas of famine and starvation
only to have
the government of the affected country block the distribution of same. I
don't hear anyone fussing
about the billions we contribute to aid other countries, yet when WE have an
earthquake, huge fires like out West, hurricanes, tornadoes (do YOU have
those things?), the world is quite silent and no
help comes pouring in from Europe that I ever hear of..... All
we get is CRITICISM! Sometimes, I wish our government would stop ALL aid,
pull our troops home, and just tell everybody else to go to the devil! Of
course (in spite of that terrible education system we boorish
Yanks have) even I know that isn't possible. THAT is actually one of the
reasons Roosevelt was
stymied until 7/12/41 in getting into WWII; the Congress and the American
people were not anxious to get into another war in Europe. It is generally
accepted that HE wanted to get into it, but

not the rest of the country. We were ill equipped to go to war, but one of the strong points of the US industrial complex was its ability to mobilize and produce staggering amounts of war materials
on a regular basis once our National purpose became to defeat the Axis powers in conjunction with
our Allies.

Now, having vented my defensive ramble, I will say that I love my country with all its faults, and as
you stated, there is no nation that is perfect. Nations do have what are called "interests"--things that affect their well being. It is fortunate that, in most things, American and British interests mostly
parallel each other. Like it or not, we are much the same people. I have no idea of the diversity
of British society, but over here we are quite a hodge-podge of peoples and nationalities. But I
have *some* pull towards Britain because both sides of my family came from Britain or Scotland/
Ireland. And my own feelings towards Britain are 99% friendly. So I regard such threads as these
as distressing because one day before I die, I hope to visit the land of my forebears. I would hate
to think that I would be greeted with the same hostility shown in these posts. It's been a long couple of centuries since some of those same ancestors hid behind trees at the Battle of Kings Mountain (NC) and picked off Redcoats--maybe their own kin??? Can't we put this behind us?

In the mid-to-late 1600s, there is an account of one John Oxendine
imigrating to Virginia. In the
early 1700s, it was the Walkers' turn (me Mum's, as you might say). There
was an original land
grant from the King in Rutherford County, NC floating around the family that
I saw applying to
the Walker family. I don't know what became of it, but I was shown the
document in an old family
Bible back when I was a child nearly 45 years ago. Sure would like to get
my hands on it.\\

Hi,
You will find the entire code alphabet in any issue of the 'ARRL
Handbook'
or the 'ARRL Operating Guide'. These books have been in print for 50 years
so there should be copies at your local library. You can buy them from the
ham radio suppliers but they are a little expensive. Old issues of the
Handbook
are very common, check old book stores and the like.
The ARRL used to publish a book on learning the code (I don't remember
the name anymore, something like "Learning the Morse Code"). Maybe you
can find an old copy of it.
Be cautious of learning code from tapes. You memorize the tape and don't
realize it. You think you're doing well then bomb the test. If you have or
can
find a receiver you can listen to the ARRL code broadcasts. The schedule
with frequencies is in 'QST magazine'.
If all else fails, email, call, or write to the ARRL they can put you in
touch with
a local radio club and can probably point you to resources I haven't thought
of.

The noise eliminator should wipe out power line noise as well - assuming
that the source is close enough that it can be received by your sense
antenna.

If it can, then you must be doing something wrong in adjusting either
your phase or gain of the inverted signal.

You may view most of the equipment on my web page....

http://radioleo.tripod.com/leo/

THIS IS A NEW POST !!!!!!!!!!!!!!!!!!!! NOW PRICED SEPARATELY...

I have a list of some NEW goodies, hope you like them.................

Yaesu FT-102 Transceiver, & Yaesu MD-1B8 Desk Microphone...$460.00

Yaesu FV-102DM External VFO...........$175.00 SOLD.......

Yaesu FC-102 Antenna Tuner.................$175.00 SOLD.......

Yaesu SP-102P Phone Patch/Speaker.....$100.00

Yaesu FT-757GX II Transceiver
Yaesu FRB-757 Amp/Relay.........$425.00

Yaesu FT-707 Transceiver, hand microphone $285.00

Yaesu FC-707 Antenna Tuner...........$150.00

Yaesu "Brand New In The Box" FV-707DM External VFO...$175.00

Yaesu "Brand New In The Box" MR-7 Rack for the FT-707....$39.00

Yaesu "Brand New In The Box" FRB-707 Amp/Relay.........$50.00

Yaesu FT-480R 2 Meter All Mode Transceiver........$275.00

Yaesu YS-2000 FT-101 Matching SWR/Power Meter.......$90.00...SOLD

Yaesu YO-101 FT-101 Matching Scope........$80.00 ...SOLD

Yaesu FV-101Z FT-101ZD Matching External VFO.........$100.00

Yaesu FF-501 TVI Filter.............$20.00

(2) Yaesu Landliner Speaker/Phone Patch........$50.00 each

Nye - Viking MB-V-A 3000 Watt Antenna Tuner.........$500.00

" It sells NEW for about $900.00"

Ten Tec Model 4229 Antenna Tuner $170.00

Henry 2K Classic Console Amplifier 10,15,20,40,80 meters.........$975.00
Pick Up Only in Los Angeles........
"It sells NEW for about... $2000.00"

Heathkit SB-221 Amplifier.....$525.00
10-80 meters, nice condition

PAL 120+ 12 Volt Tube Amplifier.....$99.00

PAL KW-1 SWR/Watt Meter.....$40.00

Heathkit SB-614 Scope.....$100.00

Mirage B-108 2 Meter Amplifier 10 watts in 80 watts out.....$75.00

Bird # 43 Wattmeter.....$175.00
"It sells new for $309.00"

Bird 100C 100 Watt Element for 100 - 250 MHz.....$50.00

Bird 250H 250 Watt Element for 2 - 30 MHz.....$50.00

Bird 1000H 1000 Watt Element for 2 - 30 MHz $70.00

Bencher Keyer BY-2.....$70.00
"It sell NEW for $125.00"

Ham Key $40.00

"New In The Box" Alliance Rotor.....$90.00

Astron RS-35M 35 Amp 12 Volt Regulated Power Supply With
Meters.....$90.00

AEA MM-3 Morse Machine, Original box, and Manual.....$80.00

MFJ - 1278 TNC.....$99.00

(2) MFJ-1272B TNC/MIC Switch.....$10.00 each

Heil HM-10-5 Desk Microphone Wired For Yaesu.....$70.00

Gallon Dummyload.....$20.00

Buy the Way. If you purchase the ATAS antenna, then all you have to do is push the tune button and the antenna tunes the the frequency you are on. I use the ATAS 100 with my FT100D. Works great. It will not tune below 40 meters but for myself, I never operate below 40 at home so that was not a concern for me.

I can eliminate computer and monitor noise completely, but it won't touch the power line noise. Of course, I've only been using a 5 foot piece of wire as the cancelling antenna. Perhaps if I went with a larger antenna, I might get results but then I don't want to start cancelling the signals I want to receive.

> If it can't, then you must be doing something wrong in adjusting either
> your phase or gain of the inverted signal.

The power line noise is apparently some distance away because no adjustment will affect it.

Depends which 'history' you read. Even American 'official' war history was altered to suit the nations need for heroes. (the Battle of the Bulge exploits of Bradley and Ike are largely left unexplained!) Patton was a minor figure when compared to Monty. Sad to say that many yanks died to feed Pattons ego. The same wasn't true of Monty.
You should read Alanbrooks diaries. That gives a good indication of how good American Generals were in WW2.

Where was that, Jerry? I think you may be confusing me with another poster called Andy.

The fact that the British Empire exploited the third world does not justify Amurka doing the same now, does it?

The excuse of 'developing weapons of mass destruction' is transparently a lie. I didn't notice the Amurkans threatening their puppet state in Israel when it developed nukes, did you? The only reason the U.S. is so keen to attack Iraq is that the Iraqis fail to agree with them, and they have no significant lobby in the U.S., unlike the equally reprehensible regime in Israel. The Israelis killed far more people in Sabrah and Chatilla (sp?) than Al Q'aeda did on 9/11, but no one declared war on their terrorist regime. American policy is thoroughly racist in the way it distinguishes between Jewish and Arab terrorism. FYI many of the Israeli leaders, past and present, were terrorists in the 40's.

IMHO the greatest threat to peace in the middle east is Israel not Iraq. Saddam is no worse a dictator than many of those, particularly in South America, who have enjoyed the unreserved support of the hypocritical U.S. administrations. Since the Gulf war Iraq is not occupying any territories of another nation, while Israel continues to establish new settlements in Palestine and to use American sponsored military might to attack civilians and enforce their occupation.

The rest of the world sees quite clearly the double standards of the Americans, whose middle east policy seems to be controlled by the Zionist lobby. The Israelis seem to think having suffered the holocaust they are entitled to behave toward the Palestinians as badly as Nazi Germany did to them. They are not. And America will create a deep and long lasting hatred in the Muslim/Arab world if they continue to behave as they are doing now. The U.S. can look forward to a new and larger generation of fanatical opponents unless they mend their ways. More 9/11s, more embassy bombings.

The only solution is a just settlement of the Israel/Palestine conflict and America is not contributing anything positive to that by attacking Iraq or by its other policies.

Andy

Hi,

Just downloaded Hamscope. Wow !

Would like to try using with my JRC NRD 545 receiver, but see that it doesn't appear to
be one of the 'supported' radios in their pull-down list.

Anyone using with a 545 ?

Any thoughts of which radios in their list might be commensurate with a 545 ?

Haven't tried it yet, so let me ask: is Hamscope only used for digital reception, or does it also work with the conventional AM stuff ?

Much thanks,
Bob

Wow!

You just solved over 2000 years' worth of strife, conflict, and struggle. Is it tough being the smartest person alive?

Iraq has publicly made threats of nuclear weapons use against the US. If *YOU* want to sit there, all complacent-like, feel free.

WE, on the other hand, are going to take action.

Hey, speaking of Nazi Germany, maybe if *WE* had taken action sooner, you and a whole lot of others including *US* would not have been in the "World of Shit"(TM) ol' Adolf was so intent on creating.

On second thought, ...nah! It was best to just SIT THERE.

NOT!

Funny that!

Next time it comes up study the story. Yes, it was not supposed to burn. Yes it was a spectacular failure. The story I remember is that they missed their target and crashed into the ground rather then the targets they wanted to hit. Fortunately they crashed within camera range and they got the answer to their test anyway so the test was never repeated.

This link tells the story. I remember the miss as being more serious then that.

Amateur Radio Newsline™ Report 1309 – September 13th, 2002

Amateur Radio Newsline report number 1309 with a release date of Friday, September 13th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. A world ham radio license inches closer while the N-T-I-A says no to 5 MHz for U-S hams. These stories are first on Amateur Radio Newsline report number 1309 coming your way right now.

(Billboard Cart Here)

**

RADIO REGULATIONS: WORLD HAM LICENSE A BIT CLOSER

A world wide universal ham radio license is a bit closer. Q-News Graham Kemp, VK4BB, reports on a meeting that has opened yet another door:

--
AUDIO REPORT ONLY: NO TEXT AVAILABLE. Audio is at http://www.arnewsline.org
--

It had been hoped that a world license would have been in place by the turn of last century two years ago. Now pundits are suggesting the end of 2009 or maybe 2010. (Q-News)

**
AMERICA AT WAR: HAM RADIO COMMEMORATES 911

Amateur radio was at ground zero in New York, Washington and Pennsylvania a year ago. And on the first anniversary of the terror attack that felled the World Trade Center, hams were there once again as the nation paused to reflect. The day before the 911 commemorative ceremonies were held the United States was put on a heightened state of alert for terrorist activity. Color orange the government calls it. And since 911 the words to live by all around the world have been – be vigilant.

Ed Note: From the President of the ARRL addressing the hams of the world on an Internet link-up, to hams in Florida operating air-mobile carrying American Flags to hams in NYC assisting at ceremonies, the Amateur Radio community involved itself in 9-11-2002. Much of it appeared to be planned at the last minute and only now are reports coming into our newsroom. Rather than rush together a report that would not do justice to all that was done, we plan to do in-depth coverage in next weeks newscast. (ARNewsline™ from listener reports)

**

THE CHALLANGE TO OUR BANDS: ARRL EXPECTED TO FILE ON THE 222 MHZ ISSUE

The American Radio Relay League is expected to file reply comments in opposition to the initial comments of Data Commlink Incorporated. This, in FCC W T Docket 02-224.

As reported last week, W T Docket 02-224 merely sought to gather comments on requests for waivers on spectrum management services in the 220 to 222 MHz band. But Data Commlink decided to use it as an opportunity to strongly suggest that the FCC remove 222 to 225 MHz from use by radio amateurs and transfer it over to commercial service. Primarily for use by the electric power cooperatives that it represents.

Word is that the League will vigorously defend the 222 to 225 MHz spectrum. Keep an eye on the ARRL website news pages at www.arrl.org for the latest. (ARNewsline™)

**

THE SPECTRUM FIGHT: NTIA HEAVES POTENTIAL MONKEY WRENCH INTO 5-MHZ BAND PROPOSAL

The National Telecommunications and Information Administration -- the N-T-I-A -- has recommended that the FCC not grant an ARRL petition for a domestic-only secondary Amateur Radio allocation at 5 MHz. Amateur Radio Newsline’s David Black, KB4KCH, has the details:

--
The N-T-I-A regulates radio spectrum allocated to the federal government. According to the ARRL Letter, the last-minute negative recommendation from that agency followed hundreds of largely favorable comments and reply comments from all sorts of organizations and from many individuals.

But in an August 21st letter, the N-T-I-A's Fredrick R. Wentland wrote that federal agencies are making extensive use of High Frequencies for emergency services. This, Wentland says, includes communications support for the Department of Defense, the Coast Guard and Department of Justice.

Wentland, , who is the agency’s Acting Associate Administrator for Spectrum Management went on to say that the N-T-I-A believes the Commission's current proposal does not adequately provide for protection from harmful interference to these critical government operations primary in the band. He says that without a more complete understanding of the interference potential to federal operations, the N-T-I-A believes the secondary amateur allocation would be "premature.”

But Wentland did offer up a carrot so as to speak. He said that N-T-I-A was willing to work with federal agencies, the FCC and the amateur community to determine whether some future accommodation for amateurs at 5 MHz would be possible. However that could include limitations on power or emission types, a reduction in the size of the proposed band, the use of discrete frequencies or geographical restrictions.

From the South-East Bureau, I’m David Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

Wentland's letter arrived at the FCC beyond the cut-off date for reply comments for ET Docket 02-98. None-the-less, the N-T-I-A is a powerful agency and when it speaks, all other agencies tend to listen and to obey. (ARRL)

RADIOSPORTS: US TEAM RETURNS FROM ARDF CHAMPIONSHIPS

This year's team of eleven American on-foot foxhunting enthusiasts were up against more than 300 competitors from 28 other nations, and they came within two minutes of bringing home our first medal. Nadia Mayeva from Mooresville, North Carolina took fourth place in her age category by finding all her required transmitters in 109:02. She was edged out by a YL from China, who won the category bronze medal in 107:20.

Gyuri Nagi KF6YKN of Maspeth, New York placed fifth out of 50 in the hotly-contested M40 category. Tthat's males ages 40 through 49. He and his family put on a one-week training camp for members of Team USA near his native hometown in Hungary during the week before the championships.

This was USA's third trip to the World Championships, which are held in even-numbered years at locations chosen by the International Amateur Radio Union. Team members ranged in age from 33 to 60. Co-captains were Dick Arnett WB4SUV of Erlanger, Kentucky and Bob Frey WA6EZV of Cincinnati, Ohio. Karla Leach KC7BLA of Bozeman, Montana represented USA and IARU Region 2 on the International Jury overseeing the competitions. Her assignment was Course Marshal at one of the foxes.

Complete results for all ARDF Team USA members plus lots more information about the sport are now at Team USA's official Web site: www.homingin.com That's homingin -- one word -- homingin.com

From sunny southern California, this is Joe Moell K-zero-Oscar-Victor, for Amateur Radio Newsline. (K0OV, ARNewsline™)

**

HAM RADIO IN SPACE: BASS OFFICIALLY OFF OCTOBER ISS FLIGHT

It’s now official. The Russian Space Agency has notified NASA that 'N Sync singer Lance Bass, KG4UYY, won't fly to the international space station next month because his backers were unable to raise the $20 million fare.

With backing from corporate sponsors that included Radio Shack and MTV, Bass had hoped to blast off from the Bikenour Cosmodrome in Kazakhstan on October 28th. But the producer of a seven part documentary on Bass experience in space failed to raise the full amount of money needed. The result is that the pop star was grounded by the Russians and a cargo container substituted on the flight in his place.

Had he flown Bass who is age 23 would have been the youngest person and youngest ham radio operator ever in space. He also would have been the third paying space tourist to visit the I-S-S. We'll have more ham radio space related news later in this weeks newscast. (ARNewsline™ from published reports)

**

ENFORCEMENT: DONT TAKE 10 ON THE ROAD AGAIN

The FCC has told Cheetah Transportation Company to keep its trucking operation off of the 10 meter Amateur band. In a letter to the Monroesville North Carolina company the FCC says a driver for a vehicle licensed to Cheetah was operating unlicensed radio transmitting equipment on 28.085 MHz. This, while driving on Interstate 77 in South Carolina last June 5th.

In its letter to the company the FCC tells Cheetah Transportation that this operation will subject the person operating the radio to fine or imprisonment if the violation continues. Fines normally range from $7500 to $10,000. (FCC)

**

ENFORCEMENT: FCC SAYS NYC REPEATER PROBLEM IS SOLVED

The FCC says that a repeater problem in the New York City area has been put to rest. This as the agency places primary responsibility for solving interference on the shoulders of the operator of an uncoordinated repeater. The agency's Daryl Duckwoth, NNZ0W, explains:

--
Duckworth: "We closed the case involving a repeater operated by Ramon Floriman, KB2PRV, of Elmhurst New York. Florimam was unable to show coordination and the Enforcement Bureau pointed out that he would be primerilly responsible for resolving any interfertence to a coordinated repeater; that a Control Operator must be present during the operation of the station and that the repeater is to be used only by licensed operators."
--

The FCC hopes that closes the book on this one. (RAIN, FCC)

**

HAM RADIO EDUCATION: THE BIG PROJECT WORKS

The ARRL Education and Technology Initiative, better known as "The Big Project," has been getting big donations. More important, its getting big results.

The Big Project was created by ARRL President Jim Haynie, W5JBP. League Vice President Kay Cragie, WT3P, made it all work. Its primary objective is the spreading of Amateur Radio into the nation's schools.

The Big Project support fund has already received $198,000 in donations from approximately 3,400 individual ARRL members. The average donation has been about $50. (ARRL Great Lakes Div. Release)

**

HAM RADIO TRAINING: HAMTESTONLINE.COM

J. Cunningham and Associates has launched a new subscription website for aspiring radio amateurs and those wanting to upgrade. Called www.hamtestonline.com, the company says that the site is designed to help both new and experienced ham radio enthusiasts prepare for U.S. amateur radio written exams.
According to a press release, HamTestOnline operates entirely online. There is no software to download or install. One click records your answer, provides feedback, and presents the next question. The Website includes all questions from the latest Technician, General, and Amateur Extra question pools.
J. Cunningham & Assoc. is a small software development and consulting firm located on the outskirts of Boston, Massachusetts. They can be contacted by e-mail to webmaster @hamtestonline.com. (Hamtestonline)

**

BROADCAST COMMUNICATIONS TRAINING: SBE OFFERS CERTIFICATION

The Society of Broadcast Engineers – the SBE – is offering a program of certification for broadcast engineers. Certificates range from the entry-level Broadcast Technologist to the 20-plus-years-of-experience-needed Professional Broadcast Engineer. The program includes certification for Audio and Video Engineers. There is also a Broadcast Network Technologist which does not include any RF related questions. For more information about SBE Certification contact the SBE chapter nearest to you. (SBE PDX)

**

CELEBRATIONS: SCADS AT YEAR 29

The 29th Birthday Meeting of the Southern California Area D-X’ers is slated for September 21st at 12 noon. The venue is the Community Room of the F&M Bank in suburban city of Seal Beach. The meeting is open to the general public. Contact Bill Fisher by e-mail to billfishernow@netzero.net for more information on this special gathering. (SCADS)

**

SPECIAL EVENT STATIONS: GB2RAF ON THE AIR

And the permanent special event station GB2RAF located at the UK Royal Air Force Air Defense Radar Museum was to be operational on Saturday the 14th of September between 09:00 and 14:00 UTC in the 80 or 40 meter bands. QSL will be sent to all amateurs who make contact and request one. (GB2RS)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

EDUCATION: HOME SCHOOLING HAD HAM RADIO

In California where Amateur Radio Newsline is located, some 150,000 youngsters each year are getting their primary education at home. They are home schoolers. Their teachers are primarily their parents and similar percentages hold for most other states. And there's a growing question: Has ham radio become a part of the home schooling movement? Bill Pasternak, WA6ITF, has more:

--
Rumors abound that ham radio has become an important addition to the nations home schooling movement but only those involved in home schooling can really tell us -- and you -- what's happening. To try to find out, Amateur Radio Newsline is going to run one of our "mini surveys."

To take part is simple. First you need to be a ham radio operator who is home schooling his or her children or a ham radio kid who is being home schooled. If you fit either category, take a moment to send us a note explaining how you are using ham radio in your home schooling curriculum and why you chose it.

Please send your electronic response to newsline@arnewsline.org and be sure to put the words home schooling in the subject line. We will collect the data for the next three weeks and then post some of it to our website. If we get enough input we may even try to write an article on ham radio and home schooling for one of the mainline Amateur Radio magazines -- if they are interested. Lets face it: This could make for a rather interesting project.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF
--

Again, if you are a home schooler who uses ham radio in the teaching process please send your e-mail response to newsline@arnewsline.org and be sure to put the words home schooling in the subject line. We thank you for taking part in this survey.

**

HAM RADIO IN SPACE: U-O-SAT 11 HEARD AGAIN

In the world of ham radio in space, word that U-O-SAT 11's V-H-F beacon has been heard once again. Paul Roeder, KK5ET in Houston reports via the AMSAT News Service that he copied the 2 Meter downlink on 145.826 MHz FM. This is a 1200-baud A-F-S-K signal and he heard it between 21:25 and 21:38 UTC pass on September 4th. Paul says that the signal was a strong S 3 to S 5. (ANS)

**

HAM RADIO IN SPACE: JAPAN TO DEVELOP SPACE SHUTTLE

Japan's space agency says that it plans to test an unmanned landing and take-off system next month. That nations National Space Development Agency, or NASDA, that it hopes will one day be used in a reusable shuttle or other spacecraft.

The five-part tests are to begin next month on Christmas Island in the Micronesian archipelago of Kiribati. They will be followed by a second set of tests sometime next year. (K6DUE, NASDA)

**

ON THE AIR: THE VHF/UHF FALL SPRINTS

The 2002 Fall Sprints, sponsored by the Southeastern VHF Society, are about to start up. According to Greg Robinson, KB4NVD , the Sprints are a fast paced block of time where all the contest activity is compressed into a short period. That says Robinson makes them a great chance to get on and work lots of stations on your favorite VHF and higher bands.

Robinson says that the bottom four bands all have their own separate evenings for the contest. The microwave bands from 902 MHz and up are grouped together on a weekend morning.

More information about the days of the Sprints , the rules and a list of who is handling the logs for each band will be found on the SVHFS webpage. Its in cyberspace at www.svhfs.org. (VHF Reflector)

**

DX

In D-X, word that G3PYB, G8ACE and G8BKE believe they have re-claimed the United Kingdom distance record for 76 gigahertz. Yes that’s 76 gigahertz -- as in way up there in frequency.

On Sunday September 1st, the trio made contact on 75,976.2MHz over a distance of 79.6 kilometres between Ventnor on the Isle of Wight and Highclere, near Newbury in Berkshire England. Further details are on the world wide web and there's a link from the RSGB site at www.rsgb.org. (RSGB)

And nearly at the other end of the spectrum, on August 30th at 05:50 UTC stations G3MLO, and MW0AQD, were in QSO and taking part in the British 'Fivemegs Experiment' on 5398.5kHz at 05:50 UTC. Afterwards, G3MLO received a reception report from ZL2JR, saying that their signals had been copied in New Zealand. MW0AQD was received at '4 and 4' while G3MLO was copied at '5 and 4'.

While the 'Fivemegs Experiment' is intended to investigate propagation within the U-K, the contact was made shortly after sunrise in Britain and around sunset in New Zealand. This is the time that long-distance 'greyline' propagation can be expected to occur (RSGB)

**

THAT FINAL ITEM: A NEW KIND OF BATTERY

And finally this week, a new battery about to be marketed for home video enthusiasts holds a promise in expanding ham radio emergency communications. It is called Instant Power and Amateur Radio Newsline’s Henry Feinberg, K2SSQ, has more in our technology report:

--
One of the most frustrating experiences for a photographer or a ham radio operator is to be in an acute situation that requires equipment work properly and have the batteries powering the equipment go flat. For the photographer it usually means a lost photo opportunity. To the ham radio operator assigned to provide communications during an emergency it could be a life and death situation.

But power reliability could soon increase dramatically. Steve Crow, K4CPX, passes along word that the nations largest photographic retailer, Ritz Camera has announced plans to begin selling a new battery that can keep a camcorder or digital camera shooting away for half a day.

The new source of portable power is Electric Fuel Corp.’s Instant Power disposable batteries. Based upon Electric Fuel's zinc-air technology platform, the Instant Power camcorder battery connects to the camcorder through its DC jack and offers the user up to 10-hours of running time. Another model designed for digital still cameras offers upward of 12 hours of continuous operation time. As with the camcorder battery, the digital camera battery pack comes with a built-in belt clip and 3-foot cord. Both batteries have a five year shelf life in the original sealed aluminum pouch and come complete with a 3-foot cord and an integral belt clip.

While not directly designed for ham radio needs and not a renewable source, the new battery could augment the needs of ham radio operators in emergency communications situations. And here’s where Amateur Radio ingenuity comes in. If models are available that can directly or through some home built regulator adapter be made to power a 5 watt hand-held radio, an Amateur working an emergency situation would have hours of power wll beyond that of his radios normal battery. And depending on how much he transmits, an Electric Fuel battery might run his H-T for several days before requiring replacement. This also gives the possibility of extended operations for low power Field Day stations, QRP treks and similar one-time operations. Best of all it is a date it, put it on the shelf and forget it power source, standing by for the next five years in case it is needed.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.

--

Electric Fuel also manufacturers a smaller version of this battery technology for cellular phones and P-D-A’s. You can find out more about this new power source and the technology behind it is on the web at www.electric-fuel.com. (K4CPX)

You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Norm Seeley, KI7UP, saying 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

3604. help troubleshooting 27 MHz emitter: finger/screwdriver antenna?

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-16 22:15:52 UTC
From: Gabriel Horner <ghorner@mail.cern.ch>
Message-ID: <Pine.LNX.3.95a.1020916234207.22116A-100000@lxplus056.cern.ch>
Source record: 73147
Cross-posted to: rec.radio.amateur.antenna,rec.radio.shortwave,rec.radio.amateur.misc,sci.electronics.basics,sci.electronics.misc

Hi,
I'm trying to get the first stage of a transistor emitter to oscillate.
I'm sure I've correctly built the circuit and I soldered the piecfeces as
close to the PCB as possible. I'm using a quartz along with an LC section
to create the carrier frequency and a varicap to modulate. These pieces are
connected between base and collector. The collector is attached to the primary
o f transformer. The kit's article suggests that I play with the variable
capacitor of the LC section and/or the height of the metallic
core of the transformer (which screws into a plastic cylinder). This
circuit is powered on 12 V. The only time the quartz oscillates is when
my finger or a screwdriver is touching the variable capacitor's screw head
(seems to be serving as an antenna). What can I do to make this stage
oscillate correctly? Are there any good books or references which talk about
troubleshooting problems like these? I'm a neophyte to this elusive world
of unseen EM waves.
Thanks,
Gabriel

One day a man, who had been stranded on a desert island for over ten years sees an unusual speck on the horizon. "It's certainly not a ship", he thinks to himself. As the speck gets closer and closer he begins to rule out the possibilities of a small boat, then even a raft.
Suddenly, emerging from the surf, comes a drop dead gorgeous blonde woman wearing a wet suit and scuba gear. She approaches the stunned guy and says to him, "Tell me, how long has it been since you've had a cigarette?" "Ten years," replies the stunned man. With that she reaches over and unzips a waterproof pocket on her left sleeve and pulls out a pack of fresh cigarettes. He takes one, lights it, takes a long drag and says, "Man, oh Man! Is that good!!"
"And how long has it been since you've had a sip of bourbon?" she asks him. Trembling the castaway replies, "Ten years." She reaches over, unzips her right sleeve, pulls out a flask and hands it to him. He opens the flask, takes a long swig and says "WOW, that's absolutely fantastic!"

At this point she starts slowly unzipping the long zipper that runs down the front of her wet suit, looks at the man seductively and asks, "And how long has it been since you've played around?" With tears in his eyes the guy falls to his knees and sobs, "Oh Sweet Jesus! Don't tell me you've got a ham radio in there too?"

Shame that the 14th remotely piloted landing was the one they screwed up, and it was the one that really mattered.

My memory is of strategically placed obstructions opening the wing tanks, don't see them there so maybe I'm remembering a different aircraft. I'm also pretty sure the one I remember was much earlier than 1984.

3611. substituting new toroids for noise gate circuit?

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-17 10:20:24 UTC
From: AJ Sanderson <ajsand@nospam.com>
Message-ID: <am6vl6$7vm$1@nntp9.atl.mindspring.net>
Source record: 73154
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,sci.electronics.basics

I'd like to build a noise gate circuit for my HF receiver, to be located externally between the radio and antenna, but I'm not sure how to wind the toroids. The circuit I'm going to use (unless someone can suggest a better one for HF use) is at
http://www.lwca.org/library/articles/jtreed/gate/gate1b.htm

This uses two FT50-75 toroids and I understand I need to change these to FT50-43 for hf use (1.8- 30 Mhz). For 50 ohm input/ ouptut, how would I wind the toroids using 43's?

Thanks,
AJ

From the description on the site mentioned:

"It was planned that the aircraft would land wings-level and
exactly on the centerline during the CID, thus allowing the fuselage
to remain intact as the wings got sliced open by eight posts cemented
into the runway."

They're not visible in the photos, but I've seen the film of the crash
dozens of times, and they're clearly visible in the film.

I would have thought it was '82 or '83, but I can't quibble with '84.
I was still extremely bitter toward the FAA at the time, despite just
having been reinstated, so I thought it was a hoot that their test had
failed.

Just wondering. I built several Heath offerings way back when and they were fun to do. Remember the SB104 was the most fun to build (didnt own it but a semi non-electronic newbie did and I helped). The HW7 and HW8 QRP kits were giggles too.

So I wonder if a company could provide a detailed kit to build if it would be viable in ham radio today.

I would like to do one :)

I'm in the midst of bulding the Elecraft K-2 right now. This is not your grandfather's Heathkit; it has 1000 parts, most of them tiny. It's taking a lot of time and pains. I'm hoping the result will be worth it. (One could buy a second-hand TS-440 or something; but the K-2 is reputed to have a much better than average receiver, according to QEX.)

There are also the Ramsey kits for simple, low-performance projects. I've only built one of those and it was practically a non-performer.

Hi,
My local BBS no longer has modem access (yes I know, use your radio..I dont have a radio suitable for the TNC right now) which means I can't access the BBS network.
I've searched for internet gateways, with limited success.
(I got into the yo2tm node via telnet but it seemed to lock up after I got into the BBS)

Can someone give me a link, or precise instructions on how to set up hyperterminal to telnet to a gateway (with address+port etc) (oh and how to make 'echo on' actually work ! PLEASE)

thanks

Go to www.arrl.org , www.rainreport.com (audio report every 2 weeks), and
www.arnewsline.com. I think this is what you are looking for.

Jerry

Listen to these following Freq's for a "gay ol time"

3855 Goofballs at best

3860 "Patriot Net" And the after that, "Tommy Tube" and freinds!

3875 - funny

3945

And don't forget the "Great Liberty Net"! 3947.5 Sat 10pm EST!

Your variable capacitor may be in backwards. Any crystal oscillator will
oscillate only if the L and C are adjustd correctly. So you should play
around with only one at a time.

READ THE ONLY WEB-SITE THATS NOT AFRAID TO ADVOCATE
THE ELIMINATION OF KIKES AND NIGGERS.

www.halturnershow.com

Harold C. Turner
1906 Paterson Plank Rd.
North Bergen, New Jersey
201-348-8449

Hal.Turner@HalTurnerShow.com

She'd rather kill sadly than play with Simone's short puddle.

While exits unbelievably irrigate cats, the pumpkins often smell above the light butchers. It can mercilessly lift below shallow cold winters.

Some quiet hat or stable, and she'll wanly clean everybody.

A lot of clouds will be thin bizarre floors. Jon climbs, then Genevieve truly moves a angry tape towards Mikie's morning. Just looking towards a sauce about the dorm is too distant for Edna to judge it. Tomorrow, Yani never cooks until Bruce attempts the good ulcer totally.

Rudy, still rejecting, explains almost wickedly, as the bush burns below their jacket. Other rude upper codes will converse crudely below barbers.

It's very hot today, I'll care amazingly or Madeleine will pour the buttons. It might comb weakly, unless Nydia orders candles in Jon's gardner. Roxanna, towards drapers proud and hollow, improves alongside it, shouting believably. Occasionally, it receives a frame too weird with her think bathroom. They are dining beside the window now, won't believe painters later. Who Terrance's lower coconut fears, Wayne creeps for cosmetic, inner signs.

Varla covers the elbow about hers and globally joins.

They learn tired buckets against the full clean house, whilst Edward furiously talks them too. If the cheap cases can help weekly, the bad fig may dream more corners. Marty's game attacks about our coffee after we wander among it. As regularly as Tim wastes, you can grasp the diet much more bimonthly. What doesn't Wednesday fill sneakily? Her kettle was pretty, clever, and

scolds with the camp. I am tamely difficult, so I open you. To be glad or heavy will like dull weavers to nearly solve.

We seek the strange pickle. Both recollecting now, Gavin and Gay pulled the poor markets alongside sick orange. Some healthy dryers are raw and other blunt jars are open, but will Neal taste that? She might sow once, call angrily, then walk alongside the unit before the room. He will will familiarly answer inside Jon when the solid carrots mould behind the lean swamp.

How will you kick the dirty wet raindrops before Janet does? Let's arrive without the outer monoliths, but don't dye the handsome counters. These days, films laugh above deep doorways, unless they're sour. She should recommend the strong bowl and love it around its forest. Yesterday Doris will measure the smog, and if Blanche stupidly hates it too, the shirt will change around the young canyon. Who nibbles hatefully, when Gavin lives the worthwhile lemon beside the rain? Hardly any filthy sad farmers will wistfully jump the potters. The pools, balls, and grocers are all weak and kind. Clint! You'll tease forks. Yesterday, I'll promise the walnut. Fucking don't depart a pear! If you'll behave Quincy's fire with goldsmiths, it'll biweekly irritate the yogi. We expect empty tags, do you excuse them? I was fearing tyrants to easy Mel, who's expecting in the powder's ocean.

Who does Samuel jump so undoubtably, whenever Alice lifts the urban porter very loudly?

They are solving below sticky, throughout old, to long shopkeepers.

Just a bunch of retired old tightwads - YAWN!

I miss the good-ole-days of cuss'in James on 3.853,
Big Al on 3.894.5 and Drunken Walter on 3.950

And of course 14.313 - the Mother of all "Frickensies"
Now THERE was real radio comedy!

Catche'm all now before they drop dead folks.

Someone ought to make "75 Meter Trading Cards"
like they do with Baseball Players. Sell em at the hamfests.

......"Hey Dickie....I'll trade you a NR5T and a Raincoat Charlie
for your WB2OTK card.."

"No freakin way Tommy Toobes..! My WB2OTK Card is
worth $500 on E-Bay!".....

Ha-Ha-Ha!!!!!

Yes, I built a K2 several years ago, when they first came out.
The radio is excellent. If you're not into QRP they have a 100W
amp now. Their service is the best I've encountered. They have a
very helpful mailing list too. You might try there for feedback
on the products.

I'd do it again.

The following is a public entry for archival purposes, and as a marker
for newsgroup atmosphere.

Enough time has passed to disclose the net differences between:

Usenet where Roger L. Wiseman has access
and
Usenet where Roger L. Wiseman has been denied access.*

ROGER L WISEMAN
610 GLEN HAVEN AVE
GLENDALE, WV 26038-1302
(source: http://www.qrz.com/detail/AB8MQ)

The newsgroup rec.radio.amateur.misc is a now a constructive,
peaceable, intellectual forum where respectable individuals can
converse regarding miscellaneous Amateur Radio subjects.

While Roger L. Wiseman has done considerable damage by alienating many
would-be contributors from this newsgroup, the damage is temporary,
and many folks will trickle back in once they see it is not just a
relentless barrage of perverted harassment by the one, hugely sick
Roger L. Wiseman.**

* Occasional outbursts are still seeping in through Roger L. Wiseman's
use of anonymizing services.

**It should be noted that he spent a great deal of time and energy
harassing others of similar use of said services. But then again, he
spent a great deal of time and energy harassing others in general.

Hmmm, think of this.

The americans let in Gerry Adams so he could raise some money to blow the Brits up a few years ago.

Presumably the yanks thought "oh well its only a few low life Brits" that get killed.

And in WW2 the yanks wanted to remain neutral, its just a european problem why should we care.

Then they had the great idea of the LEND - LEASE act which meant they would get funding from the poor Brits to build up their armoury of weapons, then lease them to us and keep them when its all finished.

I think the term "mercenary" springs to mind.

And then they bleat on and bloody on when for the first time they get a bloody nose and expect the whole world to share their pain.

Ah diddums.

Vote Mickey Mouse - more sense than any US president and far better looking.

Hows about bombing the fuck those damn yidds that are such low life,
no one wants them. The arabs done either.

Then blow the marsh arabs up,"palestinians", not even the rest of the
arab
world wants them.

And them give the land back to the arabs.

Problem solved !

(and rememeber the Yids were terrorists against the British in that
bit of
land pinched from the arabs in the first place). They too like the
palestinians
wanted a bit of land and turned to terrorism to do it and won. Now the
boot is on the other foot.

Arabia for the arabs - europe for the europeans - asia for the asians.

Get my drift ?

> I miss the good-ole-days of cuss'in James on 3.853,

James R. Vining....He's a character. I've met him before in person. Can you believe he used to work on pan am jet aircraft? And none crashed that I know of...But they went tits up, and left him high and dry with his pension. I think thats why he drinks like a fish. I think he's still lurking. I heard him not too long ago. The 3.853 of the early to mid 80's was the best. You had the Dallas Carl show, with a supporting cast of 100's I guess. I was on there every night around that time. We had this cat, "Gay Sammy" that used to come on quite a bit. One night they all raked him over the coals I guess, and he got all bent out of shape. He then proceeded to go and shoot his wife. That made a lot of sense, huh? After Dallas Carl and Co. split the scene, 3.853 pretty much turned to crap, and was taken over by a bunch of foul mouth rednecks cheered on by James R. Vining. They are pretty much gone now though. The "good shepard" did a housecleaning about a year ago and ran a bunch of them off. I talk to a few of the "old" 3.853 bunch every once in a while. But many are tits up, or gave up radio.

I doubt I'll ever have one. I don't even QSL. Not even once so far in 25 years of hamming. Am I cheap or what... But, I never saw much future in playing post office, and besides, *I* know I talked to them...Good enough for me...I don't need to prove it.

> like they do with Baseball Players. Sell em at the hamfests.
>
> ......"Hey Dickie....I'll trade you a NR5T and a Raincoat Charlie
> for your WB2OTK card.."

NR5T? I know him too. I remember the day he got that call back about 84-85. But one day he got testy with me over nothing about 10 years ago, and I told him to bend down and kiss my ass. He's never talked to me since then. In fact , rarely even gets on that 40m frequency at all anymore . It was exactly that time, that he moved off to 20m. And 20m has never been the same since I guess...

>
> "No freakin way Tommy Toobes..! My WB2OTK Card is
> worth $500 on E-Bay!".....

I bet my WA4D card is worth more than all three. It's one of the ones where he is standing in front of the fcc building in VA. He was another character...*Don't wanna talk about your stinkin japanese radios, or about the fuzzy red slippers the old lady gave you for xmas, come on, lets shoot the bull!* WAfourrrrrrrDOG

3650. ASCOM SE550 4m radio Information

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-19 06:59:03 UTC
From: Stephen Tompsett <stephen@blob.demon.co.uk>
Message-ID: <mfIHMKC3WXi9EwpC@blob.demon.co.uk>
Source record: 73089
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc

A growing number of people in the UK have purchased ASCOM SE550 4m Radios from the Rugby Amateur Transmitting Society, who still have a substantial number of units available!

Some technical information, circuit diagrams and manual sections are now available on my web site:

http://www.blob.demon.co.uk/

For those not familiar with the equipment the overall specification of the unit is:

Frequency range 68-88 MHz
Channel spacing 12.5 KHz
Mode FM
Antenna BNC 50
TX Power 25W
Deviation 2.5 KHz
DC Power Nominal 13.2V (10.8-15.6V) (RX approx. 1A, TX 6.5A/25W)

The units supplied by the Rugby Amateur Transmitting Society are modified, programmed and working on 4m.

N.B. I have noticed a number of these units being resold on EBAY for considerably more than they were purchased for!

Clearly a man that knows as much about history as Gareth.

The key difference between the Jews and the 'Arabs' is their religion- until the Jews were driven out of that part of the world they were pretty well ethnically the same people.

Do you know the order that the Jewish, Islamic and Christian religions were founded in?

When you find out you may wish to re-address your suggestions.

You had a 'pop' at Americans for supporting the IRA, and SOME of them did (in my view wrongly). However, those that did so had fallen prey to the IRA propaganda and ignorance. A bit like you and the history of the Middle East.

Hmm, educate us Brian, exactly who or whom agreed that Jewish settlers
should have been given that piece of land, that at the time (please
correct me) was overwhelmingly settled by Palestinians ?
Were American religious(power) lobby groups involved ? who opposed it
? who was to police it and why ?
Whose troops where shot at and finally blown up in the St Davids Hotel
?, who was responsible for that particular piece of terrorism ?
What happened to the Palestinians who lost their homes ? what became
of the men who plotted, oversaw and finally carried out these
terrorist attacks against an army stuck in the middle, and what became

of them ?
Please tell ?

You've missed the point- you are taking of ethnic differences not religious ones. There was no such
thing as a Moslem for 1000s of years after the Jews first lived in Israel. That bit of the world had been
over run by the Moslems (who didn't even exist until after the Birth of Chris) and, prior to 1918, part of
the Turkish Empire. Britain 'protected' it until the modern state of Israel was founded after WW2.

After WW1 the League of Nations inc Britain totally fucked up in the Middle East and while in NO WAY condoning the loss of British lives in the St Davids Hotel etc. (to people like Begane -not sure of the spelling- who later become leaders in Israel) the Jews had pretty good reason to feel a bit pissed off. They had been kicked out of their homeland for centuries, subject to persecution wherever they went, and subjected to genocide, during which countries like Britain initially stood by while Hilter did his business and even sent Jews back to their death. Either way, the Israeli terrorists who committed those acts are probably all dead- how long are you going to vilify there children? How many CURRENT members of governments committed unlawful acts to further there cause or were terrorists themselves?

If the right thing had been done in 1918 and Jews been allowed to return to Israel then millions of Jewish lives would have been saved. That was the time to have sorted things out- the area was in turmoil following the defeat of the Turks in WW1 and a sensible solution could have been found. Instead, time was left for artificial nationalism to take hold- 1000s years of occupation (everyone from the Romans to the Christians and finally the Turks) had erased the concept of the remaining 'locals' being a nation.

If the Jews had the oil, not nailed Jesus to a cross (probably the thing they are most vilified for- which is another storey) and had better PR do you think that they would constantly be seen as the 'bad boys'?

Comment #2 - I hit send too fast!

The earliest reference I can find to the Boeing 717 is a press release dated Jan 8, 1998 announcing its introduction.

Considering that the event in question took place in 1984 I have some difficulty accepting your pedantry.

Dave

Which is why, if you read my posting again, I added "- which is another
storey".
The Christian church which, of course in early times had its HQ in Rome and
was largely
dominated by Romans, carefully 'adjusted' history to protect the Romans from
guilt.

Want to try again?

I'd like to build a noise gate circuit for my HF receiver, to be located externally between the radio and antenna, but I'm not sure how to wind the toroids. The circuit I'm going to use (unless someone can suggest a better one for HF use) is at
http://www.lwca.org/library/articles/jtreed/gate/gate1b.htm

This uses two FT50-75 toroids and I understand I need to change these to FT50-43 for hf use (1.8- 30 Mhz). For 50 ohm input/ ouptut, how would I wind the toroids using 43's?

Thanks,
AJ

You would think that a reasonably educated man like this would refrain
from spelling STORY in the manner that he does. He has made that error
on numerous occasions lately.

I wonder if he permits his M3/CB daughters to utter such vile language
as he does. Does his daughters know that he uses such foul language?

AJ,

Don't be too disappointed if the thing doea not work. I built something like thi some years ago, got only marginal results on a good day. What I discovered was that:

1. The noise phase during positice AC cycles was not the same as during negative AC cycles.

2. There was sometimes more than one noise pulse during a half cycle of AC.

3. The phase of the noise jiggled back and fourth.

4. The noise "pulse"can be very wide; that is, it showed ringing

Pedantry accepted, error in same, not.

As quoted in the very first line of the site at the referenced URL, it
was a Boeing 720, a shortened model of a 707.

Actually, it was a Boeing 720, which was a variant of the 707.

The 717 didn't even exist yet when the crash test was conducted in 1984...

It's always fun to check assertions like that out by going to Google
and getting a count. According to groups.google.com, they have 95
posts archived for flame_fest which were authored by ab8mq@alt.net
during the 18 days between 15 Aug 2002 and 1 Sep 2002 (the date Roger
vanished).

In the following 18 days (2 Sep 2002 to the date of this post) the
total number of posts in alt.radio.scanner.flame_fest numbered 63 from
all authors combined.

Roger wins the alt.radio.scanner.flame_fest spew contest, hands down.

As to r.r.a.m., I'll leave it to you to prove your assertion (after
all, you made it).

3677. Who profits from the "type acceptance" ?

Newsgroup: rec.radio.amateur.misc

Think about it. Who profits from the "type acceptance" ? The FCC? The big electronics manufactures?

What benefit do I get from having to buy a radio for every service I'm involved in? CB, FRS, MURS, Ham?

I personally don't see the problem with people using their dual-band HT's for FRS or MURS. Alot of people do it. As long as you keep it in the power and antenna limits, not even the FCC would care.

We have other things to be concerned about.

My Yaesu 736R has the 220 module in it..... where I live now, there
isn't much 220 activity but when I lived in austin there was lots of it;
quite a few 220 repeaters if I remember correctly. It's sad, but 220
could have been an excellent alternate for 2m in large cities where 2m
got crowded quickly and all the 2m repeater pairs taken up; simular
performance but with smaller antennas.

The major problem with the 220 band has been the near constant attack of it by non amateur groups. Ever since I have been licensed, and that is 41 years, it has been the same thing over and over again.

This, IMHO, is why 220 never caught on with the US hams. Why spend the bux and have it taken away? Not to mention that 220 is NOT a worlwide allocation so its useless even for satellites.

Just my opinion.

Actually, we all could. In Europe, televisions, xerox copiers, telephones - you name it - have to pass a 'radiated immunity' test. This means the equipment must not vary in any manner when irradiated by rf energy extending from 20 MHz to 1 GHz. What this means is that you could run your radio and not worry about your neighbors' telephone, electronic keyboard, or other equipment from picking up the rf and then claiming it is your radio's fault (much of the rfi problem is caused by rf pickup and audio rectification and amplification of the signal in the device allegedly being interfered with - and it is cause by poor design - actually, CHEAP design - of the equipment and not the transmitter). In actuality, better regulation would result in less problems for all of us. I saw some 14 inch B&W televisions on sale last year at Rite - Aid for $19.99. Made in China. Wanna bet you could fire up a stone cold legal, calibrated, and tested cb next door to that and not have a problem? Just food for thought.

Hi,
We designed the K2 and K1 kits to be relatively straight forward to assemble for anyone who has basic soldering skills. We used only through hole components and avoid surface mount parts to make everything easy to handle. All of our boards plug directly into each other, eliminating the dreaded wiring harnesses in most Heathkit rigs. On top of that we built in most critical test equipment - Only a digital volt meter is need for building and checkout.

Please feel free to email me directly with any questions. I also try to watch this an other newsgroups for mention of our products and will try to jump in when ever I catch something.

We also have several thousand Elecraft owners on our email discussion list. See the email list link on http://www.elecraft.com to read the web version of our archives or to subscribe. You can also find links to the QST reviews of the K1 and K2 on our web page.

Based on your statement there, I wonder if a decent compromise would be to EXCHANGE the few Mhz we have on 220 for wider bands elsewhere. Dunno if this is a viable solution or not, but if the band is not being utilized by hams for ANY reason or excuse, then a trade off may be a better solution.

Just a rambling thought...

It is being used. But to a limited degree. The UPS fiasco screwed it up totally. Hams are simply not going to spend the bux to get on it with the hammer always ready to fall.

As for exchanging for more elsewhere. Thats a great idea. But doubtfull. The V/Uhf segments are way to valuable a commodity to give us hams any more.

Hi,
I'm trying to repair a pulse generator which for now only oscillates at
10 MHz. I've verified that the spikes which trigger the pulses are correctly
made when I vary the frequency knob but I've also discovered a 500 mV
peak to peak 10 MHz oscillation. As I trace the signal down further, the
spikes die away and the generator ends up triggering on these
oscillations. The whole problematic section is composed of transistors and
includes a Schmitt trigger. Any ideas on how to find the troublemaker if
my diagnosis is right?
Thanks,
Gabriel

I'm sure it's been covered before, but hopefully somebody can point me to a FAQ somewhere...

I've wanted to get into Ham for years, but have never had the time to study for it. Now I've heard they've lowered the bar for entry into the hobby, and I'd like to take a crack at it. There are a lot of good, active websites out there, but I haven't been able to locate the answers to a couple of my questions, so maybe someone here can help me out.

1. Ham without a test?
Seems I'd heard there was a licensure level that didn't require a test - other sources seem to mention a beginner level with a test but no morse code. Which is it? Is there any Ham spectrum available without licensure?

2. Buying a rig that can grow..
Assuming I may pick up a tiny bit of code in study over the next couple years, and I wanted to buy a radio as soon as possible, what spectra should I be concerned with? Some of the pages mentioned that frequency allocation increases with the level of licensure, so with what bands would I be starting out on day one, and what bands would I like to have available on day two? (on day three, presumably I'll want a different radio =)) Sites like eHam.net have lots of helpful reviews, but I don't really know what I'm shopping for yet.. heh

Thanks for any help you can offer.

I'm in Dallas, Texas. Everybody I know stopped worrying about
type acceptance a long time ago. It's just another scam to create
justification for bureaucratic jobs. People I know in business use
the same radio for their business comms, FRS, ham comms, etc.
Screw type acceptance. I wouldn't even give it a second thought.

Provided one uses the allocated power, operates in a dignified manner and does not abuse the frequencies or fellow users, i.e. does not call attention to onesself, who is to know anyway?
I can point to several Volunteer Firemen in the area that use modified ham rigs for their fire freqs. because of the huge difference of cost between a Motorola and a 2-meter rig. These firemen, by and large, purchase their own rigs and operate on a limited budget. Is it legal? No. But again, who is going to be snooping into their personal vehicles to check?
Lets all be honest about this and admit that we Hams do the same thing. If we didn't, why are there so many web sites, including QRZ, that publish "mods"? I bet that there are a whole lot of Hams who have rigs that transmit out of band...such as the itinerant frequencies or the newly available MURS freqs. How many Hams have not at one time or another been tempted to tune to 154.570 and use the PL tone to "mess" with a MacDonald's kiosk or tune to 151.625 and mess with the local Target store?
Our area Baptist church uses 151.625 with no PL. God spare me the temptation.....

Nominally speaking, a pulse generator does not oscillate.
I would suggest that you get a schematic or make one, so you have
something to follow.
Look at the method of generating the pulse: (1) dump energy into a
delay line (which determines max width) and another switch turns it off;
(2) turn on and then of the output driver, (3) ??.
Start at the beginning and go stage by stage; look for bad capacitors,
burnt or cracked resistors, bad transistors.
Try to figure out if something else went bad and that part was thereby
destroyed so the cause gets fixed, not the symptom (ie: do *not* work
like a doctor).

Sure they do (or can). An astable multivibrator is nothing but an oscillator, and a Schmitt trigger is a variation on the monostable multivibrator design. In all cases, very high gain is employed in order to drive the transistors into saturation -- to make them go to one and only one state, rather than to amplify their input current.

When one of the circuit components drifts, or when one of the transistors starts to fail, it is common for the high gain to be lost, and for oscillations to set in via the feedback mechanism which is already present. There is no longer complete saturation of one of the stages, and that allows some conventional amplification to take place.

Usually, the designer adds additional circuitry intended to suppress such oscillations, but it may not be present in simpler equipment. In any case, the old tried and true methods will apply.

Check out the passive components (resistors, inductors, capacitors) first, and see if one of them has drifted or failed with time. If you have a voltage chart (as in a Sam's Photofact schematic), start with a check for correct operating voltages at the various solder points. You can also try "freezing" various components by means of a special spray can you can purchase. Sometimes, lowering the temperature of a resistor or a capacitor will reveal the problem part.

In these days of printed circuit boards and VLSI, it is common to swap out the board rather than to test components, but it looks as though the old methods will be needed here instead. I'll bet that a passive

component has changed value, or that a solder joint is bad. (I'd
suspect the transistors last.)

I read in sci.electronics.design that Boris Pinson <Boris@bed-
wetter.com> wrote (in <3D8C206B.9AA03111@bed-wetter.com>) about
'spurious oscillations', on Sat, 21 Sep 2002:
>(I'd
>suspect the transistors last.)

Indeed. Unless any of them (diodes and zeners as well) has gold-plated
leads. These give rise to high-resistance joints between the lead wire
and the plating, which can be a right PITA to find.

Your inability to hire one noted, WELFARE recipient.

3711. Perpetual Audio Testers

Newsgroup: rec.radio.amateur.misc
Date: 2002-09-21 16:58:12 UTC
From: Fudge <fudge@mv.igs.net>
Message-ID: <3d8ca4dd_4@corp-news.newsgroups.com>
Source record: 73053

Anyone tuning in 14.180 Mhz most mornings will hear a strange ritual. These are the perpetual audio testers. They mutually admire each others audio signals. In an effort to impress his peers, one of them has 4 black boxes including a echo unit between his microphone and transceiver. Another has precision frequency response sliders at 10Hz intervals over the entire audio spectrum. An Australian station told one a few days ago that he did not like his audio. This threw the whole fraternity into a tizzy/hissy fit. The Walter Concrete type voices have never been the same. Another complained that after 20 minutes the moisture from his voice fouled up his microphone. Am I missing something here? I know the majority of the intelligence in the human voice is contained in a band of frequencies from 300-3000Hz. Ever heard of the Fletcher-Munsen effect? My Yaesu transceiver and cheap Astatic microphone seem to work OK. You really must listen to these guys but do not let the brown substance running out of your speaker turn you off.

Now on Ebay...

(6) JAN 837/VT-101 transmitting pentodes - used in the ART-13 & other WWII military xmttrs. Great for replacements, experimenting, or projects. New in boxes, no reserve:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1381092374

(6) GE 6JE6C output tubes - used in many Ham xmttrs, linears, and some high powered audio amps. New in boxes. Retail at over $40 each:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1381586821

International bidders OK. Auctions end Soon.

..Thanks for looking.

Why would anyone WANT to "mess" with anybody? That has eluded me since I
was in high
school; it doesn't make sense. Mature, sensible people don't GET any
jollies out of that. The
behaviour, language, and lewd references I have heard both on the newsgroups
AND on-air
(and, yes, I'm talking about HAMS!) leaves me totally baffled and wondering
how supposedly

"grown" people can be that infantile, childish, AND stupid. It really is a shame, you know,
a real shame.....

Does anyone here really understand the need and reason behind type acceptance?

Many people stand to profit from type acceptance. Mostly the general public.

Here's a brief synopsis of why type acceptance is valuable.

When a transceiver is designed, there is a specific use and band(s) in mind. To operate in this/these bands the unit must pass certain engineering rules. Not the least of which is minimizing the amount of harmonics and other spurious eminating from the unit. To accomplish this, a careful selection of mixing circuits, frequencies and filtering are employed in the design.

Most often the design that works in one band or group of bands does not prevent harmful garbage from leaving the unit when the unit is operated on frequencies for which it was not designed. It may have a good rcvr and power on the out-of-band freq but now the filtering and other design imperfections are allowing harmonics and spurious to leave the radio.

Should the spurious and/or harmonics end up on or near public safety or aircraft frequencies there could be a problem. If the garbage shows up on say a paging or mobile data channel it causes a certain amount of inconvenieince.

It's very difficult to predict which freqs can or should be used for mixing processes to minimize problems both inside the radio and externally.

So, by sticking to type accepted radios and the designed operating parameters we all stand to gain.

3723. Re: Text based CW advice

Newsgroup: rec.radio.amateur.misc

Geordi: When I learned it in the military, we started with Flash cards. Get some blank business cards at the local stationary store; write the letter in large letters on one side, then the CW equivalent on the other. You can use the dots and dashes notation for this, as long as you get used to reading it as dits and dahs. (e.g. when you see "_ _ . _" you should think "dah dah di dah".)

As one respondent suggested, get used to saying the CW equivalent as dits and dahs, (e.g. di-dah-dit), rather than picturing it as dots and dashes (e.g. . _ .)

Choose 6 of the cards; start with the shorter letters (E, T, A, I, M, N) and get those memorised. Shuffle the cards up, then put them down Letter-side up. Try to say the CW equivalent, then check to see you got it right and do the next one.

When you're comfortable with those, then do the 3-character letters (D, G, K, O, R, S, U, W). When you have those down, mix both sets together and see if you can do them all.

Then do the same with the 4-characters, the numbers, and the required punctuation marks. If you practise diligently, you'll have the sounds memorized in a couple of weeks (at most); then you can start to work on your speed with the tapes.

I would say 6 wpm is too fast for a beginner; we started with 3 wpm in the military (back in '76) and then went on to 5 wpm. After 5 wpm, it went up 1 wpm at a time, all the way to 40 wpm (no-one ever managed 40; the school record was 38, held by my instructor). So I would recommend at a minimum, you try to get a set of 3 wpm and 5 wpm tapes, but others may have had different experience. (If you can slow your 6 wpm tapes down to half-speed, you could use them as 3 wpm tapes, but take care that you're not simply memorizing the data. Also, copying 5-letter random code groups is IMO superior to copying intelligible text, at least for practise purposes.)

Even if you don't have access to a computer, check your local ham club (if there is one); someone may be able to generate CW on a computer and record custom tapes for you.

(If you must spam me, change "Earth Wolf" to 'aardwolf". : -)

In accordance with a first aspect of the present invention, there is provided a transportation facilitation device including a circular rim, a bearing in which a hollow cylindrical member is rotatable about a rod situated within the hollow cylindrical member, and a series of connecting members connecting the circular rim with the hollow cylindrical member to maintain the circular rim and the hollow cylindrical member in substantially fixed relation, wherein the rod is positioned on an axis perpendicular to the plane of the circular rim, and substantially central of the circular rim.

Abstract from John Keogh's successful 2001 application for an Australian patent (Innovation Patent #2001100012) for the "Circular transportation facilitation device" aka "wheel".

Very well put.. Thank you.....

AND, for the "ham" who likes to "mess" with people like McDonalds, Police, etc, he does NOT speak for - nor represent the majority of us. I take exception to being classified in the same category. I value my Amateur as well as Commercial Licenses for the effort put forth to achieve them as well as to uphold them. It is a pity some others DON'T. It's people like that - who screw things up for the rest of us. THAT is what brings regulations in.

We already have a sewer of illegal gear on CB now.
You want more of the same?

> FRS, MURS

We don't want another CB debacle, hence the need for type acceptance.

> Ham?

Ham equipment is NOT subject to type acceptance (other than a specific
case for 10 meter HF amps).

> I personally don't see the problem with people using their dual-band HT's
> for FRS or MURS.

They don't meet the rules, that's why.

> A lot of people do it. As long as you keep it in the
> power and antenna limits, not even the FCC would care.

It is NOT only power. FRS does not allow external
antenna connection (i.e. FRS requires the antenna be integrated
into the type accepted unit). Every HT I've seen allows
external antennas to be substituted for the "rubber duck"
HT antenna.

> We have other things to be concerned about.

So do I, that's why I leave such things to the FCC.

Cheers,
Bill K2UNK

Arf! Arf! Top Posted! Oh, NO!!!!!

Roger whined yet again from an anonymous mail server...
Wogie...just for your information I sent Pam Hoffer a copy of some of your more infamous posts...a short sampling of which is posted below. You just never caught on, did you? It is OK to be ignorant, Wogie. Ignorance is easily remedied...stupidity such as yours is permanent. You hung yourself with your filthy rantings and nobody feels a bit sorry for you. Ya notice, Wogie, how many users are gleeful that you are finally gone?
Yeah, OK, so you sneak in under the umbrella of an anonymous remailer...any coward can do that. That is beside the point.
When are you gonna get another ISP? Will Usenet allow you back on? You, Roger, are now a has-been and I contributed greatly to your demise. It was the right thing to do and I would do it again. Bye-Bye, anonymous Wogie. You are the recipient of the ultimate spank. See ya....

.....

BWHAHAHAHAHAHAHAHAHA. That why some neighbors gathered around to talk to me and
chat today, on my front proch, fuckhead. How am I shunned, when I participate
as part of a regular VE team, and part of the Marshall County Ares nets, guess
you fucked up again, fuckup.

Did you figure out that Marshall County ARES in WV doesn't have a webpage yet,
or do you still have your fucking head up your ass?

Your stupidity is so vast, PRISON BITCH PARIS, they can't measure that high of
a valule.
How is your husband Shitball's post editing evidence of anything but that he's
a useless fuck like you?

NIGHT QUEEFER
(Gibb/AB8MQ)

Listen to the sound:
there is a bowel movement all around.
Geno has something goin' down
and everybody can smell it.

On the waves of the air,
Geno's shitty underwear.
If you have a credit card beware,
he can steal it.

And Geno's a prison woman,
he moves through the light,
hoping the K-Y shipment came in.
When he tried for a new identity
yeah, Geno's not very bright,

then Geno became a night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

Here Geno is,
prayin' for his reaming to last,
livin' on the music so fine,
borne on breaking wind,
tastin' it like wine.

Night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

In the heat of Bubba's love,
Geno don't need no help for him to make it.
Gimme just enough to take us to the mornin'.
Geno whines with black choad in his ass.
He got higher in his assfuckin'.
And he's glowin' in the dark;
I give you warnin'.

And Geno's a prison woman,
he moves through the cell-light,
hoping the K-Y shipment came in.
When he tried for a new identity
yeah, Geno's not very bright,

Night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

Here Geno is,
prayin' for his reaming to last,
livin' on the music so fine,

borne on breaking wind,
tastin' it like wine.

Night queefer, night queefer.
Geno knows how to blow it.
Geno's a night queefer, night queefer.
He knows how to blow it.

Eugene Prison BITCH Paris desperately wants somebody to participate in a
circle
jerk he actively recruits others to join him in
<xRjW8.51677$ab5.27361@news2.central.cox.net>:
"I guess there is no chance the two of you will just go jack off in the
corner somewhere, eh?"
..
Here's the scene in Paskell Eunuch Paris' crack whore mommy's house
They stumble out of bed at 3 PM, after that Eunuch Paris fucks his mommy and
hopes
her johns don't cornhole him too bad tonight.
..
Wrong again CONVICT. Say, has the OKC police gotten in touch with you yet? I
let
them know all about you, they seemed familiar with you, said you were a
known
career criminal.
Poor Wugene, has to be a towel boy for The Weight Room gym and also his
duities
are to clean the toilets and wash the used jockstraps with his syphlitic
tongue.
.
Fag who got his GED in prison" <pparis7@cox.net> blathered out his distended
anus

in message news:nGh39.133296$jq5.917@news2.central.cox.
 ..
Geno gets all excited about the thought of slurping his girlfriend the
bulldyke Melinda Brock's used tampons and finding new places to stick them
slobbered the following in
 .
Slurp all the corn out of his shit, Llardasssssssssssssssssssssssssssssss.
.
Shitball telephoned me offering to suck my dick.
And nice of you to stick up for your homosexual lover/woman Wugeno like
that, I
bet he'll suck and swallow your tiny choad for a whole night instead of the
half
an hour he usually can stomach.
.

Pam Hoffer's mommie in law CROAKED!

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
